Welcome to...

...the 2025 Moles Seeds catalogue

Dear Customer,

Welcome to our new 2025 catalogue. As always, we would like to start by thanking all those customers who purchased from us over the past year. From the customer feedback we received it appears you have enjoyed great success with the products grown from our seed.

2025 marks the 75th anniversary of the founding of Moles Seeds back in 1950 by Mr J W Moles, then of Bradwell near Braintree, Essex. Looking through that very first seed listing it is interesting to note how some of those varieties remain popular to this day, such as Sweet Pea Mrs Bolton and Garden Pea Onward. The company remained in the Moles family until 2007 when the second generation of owners, Mr M R Moles, retired and the management team at that time, consisting of Jim Reid, Stuart Donders and Robert Aldsworth, took over the reins of the business. Jim Reid retired in 2018 and Stuart Donders retired in August 2024, so in its 75th year Moles Seeds has once again returned to single family ownership. Stuart was with Moles Seeds for over twenty-one years and dealt with many customers during that time, so we are sure you will join us in wishing him well upon his retirement.

As outlined above, Moles Seeds remains a privately-owned independent company that is not tied to any one breeding company. It is this independence that continues to allow us to select the best flower and vegetable varieties from around the world. For 2025 we have added a number of interesting products to our assortment, including Osteospermum Hawaii Sunset Mixed and Calabrese F1 Delistem Green. Although the printed catalogue is only updated once per year our range remains dynamic and we are often adding new and innovative items, which may well appear on our website before appearing in our catalogue. Furthermore, our website carries more products than we could squeeze into the catalogue so it is always worth checking the website for additional items.

We continue to supply all kinds of businesses and professional organisations, as well as allotment societies and keen individuals, in fact anybody who appreciates good quality seed, backed up by good quality service. If you are new to Moles Seeds then we hope you find something of interest within this catalogue and we look forward to hearing from you very soon. We wish all our customers good luck for the 2025 season.

Reselected strain with high proportion of double white flowers. 60cm (3,700 seeds per gram).

$\frac{1}{4}$ g	$\frac{1}{2}$ g	1g	$2\frac{1}{2}$ g
£2.55	£4.50	£8.60	£18.65

Aconitum

Perennial. 300 seeds per gram, 15g for 1,000 plants. Cold germinator. Taller subject, so sell as green plant with colour label. Warning: all plant parts are harmful if eaten.

Sell in: 2 litre or larger pots.

End Use: Herbaceous borders.

Newry Blue

ACO10 Newry Blue

Monk's Hood. Tall spikes of deep blue flowers over deep-cut foliage, in May-July. 1m.

100sd	250sd	500sd	1,000sd
£5.25	£11.95	£22.60	£43.00

Acroclinium

Helipterum roseum. Hardy annual. 300 seeds per gram. Sow directly into open ground in April/May at $\frac{1}{2}$ g per metre length of row, 30cm between rows. Flowers July-August.

End Use: Cut flower (dried).

Grandiflorum Mixed

ACR40 Grandiflorum Mixed

Double flowered mixture of pink, red and white, for dried flower arrangements. 35cm.

5g	10g	15g	25g
£3.45	£6.25	£8.65	£13.50

Agapanthus

Perennial. Sow March-June. Erratic germinator 24°C, cover seed lightly with vermiculite.

Sell in: 2 Litre or larger pots (green plant with label).

End Use: Borders, containers.

Umbellatus Blue

AGA75 Umbellatus Blue

Tall blue flower heads on glossy green foliage. Prefers a well drained position. Flowers between May and August. 1.4m.

100sd	250sd	500sd	1000sd
£3.45	£7.85	£14.80	£28.15

Agastache

Slightly tender perennial grown as annual, aromatic foliage. Sow Feb-April. Cover seeds lightly with vermiculite, germinates 1-2 weeks at 20-22°C. Sowing to flowering 12-14 weeks.

*Sell in: 12cm or larger pots.
End Use: Borders, containers.*

Apricot Sprite

AGA10 Apricot Sprite

Apricot flowers over compact foliage. 45cm.

£2.60	£4.60	£8.25	£11.45

Antirrhinum

Snapdragon. Annual, which can be sown early and sold April onwards as it is tolerant of low temperatures. Sow January - February, germinates 7-10 days at 18-21°C. Sowing-flowering 14-16 weeks. 6,500 seeds per gram, sow $\frac{1}{4}$ g for 1,000 plants. Cultural Leaflet available.

Compact varieties such as **Floral Showers** are sold in 6 or 9 packs in bud or in flower. They can also be sown in June-July and sold in flower in pots in Autumn.

Taller varieties are sold in 9-packs or strip trays as green plants with label. F1 hybrids such as **Liberty** and **Sonnet** are ideal for formal bedding schemes.

Candy Showers is a trailing hanging basket variety, whilst **Rocket** and **Madame Butterfly** are cut flower types.

Gala Lavender

Aster - Annual Cut Flower Varieties

Technical details - cut flower types

1. Sowing under glass and transplanting outdoors:

Sow Feb-April into seed trays, blocks or module cell trays at 15-18°C, cover seed (400 seeds/g). Germinates in 7-10 days. Transplant into borders mid May onwards at 25x25cm. Crop will be slightly earlier in unheated tunnel, otherwise around 100 days sowing to flowering. Support to prevent collapse.

2. Direct sowing into open ground: Sow thinly into rows 25cm apart in April. Thin to required spacing. The disadvantage of this method over transplanting is that weed control is less easy.

3. Whole production under glass: This method will provide a late extension to the crop, i.e. into October. Sowing is carried out in June, and the young plants are planted out into suitable prepared soil in glasshouses and beds. Aster Wilt (*Fusarium oxysporum callistephi*) is the greatest threat to aster production (plants wilt just before flowering); avoid it by rotating the crop (one crop per 7 years) to prevent build-up.

Gala Yellow

Gala Mixed

AST060 Matador Mixed

A mixture of eight colours, upright habit with long stems. Large-flowered, Princess type. 80-90cm.

Aster bedding

Annual, sow February-April, cover seed with vermiculite, germinates in 7-10 days at 18-20°C, prick out into multicell trays after 4-5 weeks. Grow on at 12-15°C. To encourage a compact habit, growth regulators can be used, according to the manufacturers' recommendations. Sowing to flowering 14 weeks. 450 seeds per gram (sow 5g for 1,000 plants). Drench compost with a suitable fungicide to prevent wilt disease.

Milady Series

This well-known dwarf bedding Aster is also perfect for pot bedding sales late in the Summer. Well branched habit, Chrysanthemum-type flowers. 25cm.

£3.05	£5.45	£7.55	£11.80

Beet ornamental

Annual, sow February-March, germinates in 2-3 weeks at 18-20°C, cover with vermiculite. 80 seeds per gram.

Bull's Blood

BEE100 Bull's Blood

An ornamental variety used as a contrasting foliage plant in formal bedding schemes. Bronze-green foliage, slightly variable in shade. 45cm.

5g	10g	15g	25g
£3.25	£5.85	£8.10	£12.70

Begonia Semperflorens

Annual, sow January-March. Germination takes 2-3 weeks at 22-24°C. Do not exclude light and keep compost moist. Prick out after 6 weeks into 6-pack trays or pots. Supplementary light quickens development of the small seedlings. Grow on at 15-18°C. 70,000 seeds per gram. Total production time around 14-16 weeks depending on lighting and sowing time. Cultural Leaflet available.

Sell in: 6 packs and 8-10cm pots.

End Use: Versatile, tolerant of rainy weather, long flowering season. For formal bedding, and baskets and containers.

Planum

ERY30 Planum

Dark green heart-shaped leaves with cornflower-type globular heads. 120cm.

Sell in: 10cm-12 pots.

End Use: Borders, cut flower, dried flower.

2½g	5g	10g	15g
£4.00	£7.10	£12.75	£17.65

Perennial (1st Year Flowering)

Does not need vernalisation. Sow January-February for flowering in July-September. Cut flower stems can be harvested, when the flowers are just half open. Remove the soft lateral shoots. Vase life 12-16 days. The stems can be harvested for dried flowers when the flowers are fully open. 90-100cm.

ERY70 Blue Glitter

Blue Glitter adds stature to the perennial border and makes a good cut flower for dried and fresh use. The silver blue stems produce an abundance of blue pincushion flowers. 90-100cm.

50sd	100sd	250sd
£6.95	£13.10	£29.90
500sd	1,000sd	2,500sd
£56.55	£107.65	£242.25

Erysimum

Biennial, 2 weeks at 18°C, sow June-July. Cover with vermiculite. 1,000 seeds per gram

Sell in: 10cm pots.
End Use: Borders.

ERY50 Gold Shot

Bunches of golden yellow flowers on bushy plants with long thin leaves. Can also be used as an annual as it needs no cold treatment for flower induction, also used for biennial and perennial production. Excellent performance in the pack. 40cm.

1,000sd	2,500sd	5,000sd	10,000sd
£4.00	£9.00	£17.65	£33.80

Eschscholzia

Annual, direct-sow into the flowering position in April-May. 900 seeds per gram.

ESC10 Thai Silk Mixed

This California Poppy makes a bold display, with an attractive mix of orange, red, cream and yellow shades.

End Use: Borders.

2½g	5g	10g	15g
£6.45	£12.00	£22.55	£32.50

Eucalyptus

Perennial, 2-3 weeks at 20-23°C, sow February-April, cover with vermiculite. Grow on at 16-18°C, and transplant into the flowering position at 25 x 100cm. For seed count, see variety descriptions.

Sell in: 10cm to 2 litre pots,
generally in flower in Spring.
End Use: Borders, containers.

EUC05 Preissiana Albany **NEW**

Suitable for cut flower floral arrangements, along with pot and container production. Produces large, oval shaped green leaves, with mature plants also producing attractive yellow flowers. 90cm

50sd	100sd	250sd	500sd
£5.05	£9.60	£21.85	£41.35

Horizon Shadow Violet

Horizon Shadow Series

Horizon Shadow comes from the same breeders as Horizon. It has rich, dark foliage that contrasts beautifully with the bold, bright colours. This series displays natural basal branching which leads to reduced production costs with a lesser requirement for PGR applications. It is suitable for high density pot and pack production due to its earliness, uniformity and short, sturdy flower stems. In the landscape or container, Horizon Shadow's hybrid vigour makes for a stunning display all summer.

Dwarf Satin Mixed

GOD05 F1 Dwarf Satin Mixed

Outstanding performance in 10cm pots, flowering profusely at about 17-20cm high. A formula mixture of deep rose, lavender, lilac rose, pink, red and white bi-colour, salmon, white and red. 20cm.

Sell in: 10cm pots.

End Use: Houseplant, and containers.

100sd	250sd	500sd	1,000sd
£7.25	£16.50	£31.20	£59.35

Grace Mixed

GOD10 F1 Grace Mixed

Cool temperature plant, when grown at 15-18°C day and 10°C night it will flower in about four months from sowing. Do not exceed 25°C. Can be grown both in the autumn (Glasshouse), and early spring (outdoors or under glass). Cover seed with a thin layer of vermiculite. When 7-8 true leaves appear, pinch out the tops and plant into beds at 25-30cm spacing. A sandy soil with good drainage is optimal. The lateral branches all produce five to six flowers in a cluster on top of the plant. Stems are strong and the plants are productive, with yields in the order of fifteen high quality stems per plant. Flowers 7-8cm in diameter are borne in clusters on top of the stems. Highly cold resistant. Long lasting cut flower, all buds will open when placed in vases. 50cm.

End Use: Cut Flower.

100sd	250sd	500sd	1,000sd
£6.70	£15.25	£28.80	£54.80

Open-pollinated types

Annual, sow directly into open ground in April-May. 1600 seeds per gram.

GOD20 Dwarf Double Mixed (Azaleaflora) (not shown)

Dwarf bushy plants with large semi-double flowers. 35cm.

End Use: Borders.

Impatiens

'Busy Lizzie'.

Impatiens technical information

This is a species which requires great care, particularly in the early stages, to get the best from the seed. Modern F1 hybrids are produced to yield 90-100% germination given favourable conditions during raising. Sow January-March. For first 5 days: 22-24°C, cover seed with vermiculite but do not exclude light, make sure well watered, low nutrient compost pH 6.2-6.8. For following 10 days, 22-24°C, medium moisture, ideally provide supplementary light above seedlings, give one weak strength feed. For following 10 days, reduce temperature to 20-22°C, one moderate strength feed. For next 7 days, temperature now 17-18°C, one moderate strength feed. At the end of this stage, strong seedlings should be ready for planting on into packs/pots as required.

Impatiens Downy Mildew is a potential problem for producers and users of this important bedding plant. We recommend taking professional advice regarding routine spray programmes when producing this crop. Approx. 1,000-2,500 seeds per gram.

Lollipop Mixed

Lollipop Series

This Impatiens has been bred to be the most professional Impatiens on the market. With very high germination, the plants are naturally self-branching and fill the pot quickly. Great for baskets and containers.

LIN30 Perenne Diamant

Pure white flowers with yellow centres. Companion to Blue Saphyr. 30cm.

250sd	500sd	1,000sd	2,500sd
£4.90	£9.25	£17.55	£39.50

Lobelia

Annual

Sow January onwards on compost surface, takes 10-14 days at 21°C. Unless sown direct into final sales container (at around 10 seeds per station), prick out tufts of seedlings after 5-6 weeks into 6 or 12-pack trays. Seed can also be broadcast over cell trays.

It is necessary to observe the most scrupulous glasshouse hygiene especially in propagation areas. It is also important to be ever vigilant for any sign of disease at all stages of propagation, especially with earlier sowings where susceptibility to disease seems more prevalent, and to take prompt remedial action at the first sign of infection. Sowing to flowering around 16 weeks. 25,000 seeds per gram.

Please note white lobelia varieties contain a small proportion of blue flowers.

Compact Bedding Varieties

Sell in: 9-packs and baskets.

End Use: Borders and containers.

Millet

Perennial, treat as annual. 1 week at 22-25°C. sow February-April. Grow on at 18-23°C. Suitable for sales in 10-20cm pots, can be direct-sown in the pot. Keep light levels as high as possible. Rootbound plants will stop growing from the main shoot and start to flower, hence container size can dictate crop size.

Sell in: 10-20 cm pots.

End Use: Borders and containers.

Jester - young plant

Jester- mature plants

MIL05 Jester

Young leaves are green. As the leaves mature they become more burgundy red in colour. Developing plants show a definite multi-colour appearance as leaves mature. Produces flower spikes at the end of the season. 110cm.

Pax Blue with Blotch

Pansy

Pansy Cultural Guide

The higher cost of the F1 hybrids may be justified in terms of uniformity, speed of flowering, clear flower colours and overall garden performance. In general the larger flowered varieties tend to flower slightly later, and are especially suitable for late Spring and Summer flowering, as flower size tends to reduce as temperatures increase. Seed count approx. 700 per gram.

Sow the seed into trays or plugs, cover lightly with vermiculite, and keep the compost moist.

Germinate at 18-20°C, shading to avoid excessive temperatures which can depress germination. Germination should be apparent in about 7-10 days.

After 4-5 weeks, prick out into 6-packs or 8cm pots. Use a slow-release fertilizer or commence liquid feeding after 2-3 weeks.

For early Spring sales, it is necessary to harden off the plants prior to sale, by gradually reducing the temperatures.

Pansies are very susceptible to stretching where temperatures are high for a significant period of time. Where reasonably low temperatures (i.e. temperatures not above 14°C) cannot be guaranteed, then growth retardant chemicals should be considered. Virtually all are suitable for use on pansies, subject to the manufacturers' guidelines. Side effects may include a reduction in flower and leaf size.

Cascading type

Freefall F1 Series

Moles Best Seller!

A Pansy that has been bred for use in baskets. Freefall is available in seven colours all with a vigorous spreading habit and medium sized flowers. The low spreading habit makes it ideal for late Summer production as it is less prone to stretching. Meanwhile the sustained day-length neutral flowering ensures greater colour even through the Winter months.

Synthetic Hybrids

PAN072 Metro

This medium flowered mixture bridges the gap between F1 and open pollinated material, in terms of uniformity, price and earliness. Metro performs well in U.K. conditions. Excellent in packs and pots for Autumn and Spring sales.

Pansy Metro is a high quality alternative to open pollinated material. Separate colours are available (minimum order 5,000 per colour). Please contact your sales person or head office for details.

Orientele (Oriental Poppy)

PAP060 Allegro

Compact habit with 8-10 huge scarlet flowers blooming simultaneously. Strong stems resisting rain and wind. 40cm. (4,500 seeds per gram).

1g	2½g	5g	10g
£5.40	£11.70	£21.70	£40.80

PAP063 Checkers

First year flowering from an early sowing. Checkers has pure white silky flowers flanked within by the deepest black cross. Divided grey-green leaves. 60-90cm.

100sd	250sd	500sd	1,000sd
£2.45	£5.55	£10.50	£19.95

PAP064 Coral Reef

Large vibrant flowers, often 10cm across of an intense and vivid coral pink. Unlike many orientale poppies, because it has been bred from seed it has consistent vigour, with many flowers over a long flowering period. Also it is not prone to 'flopping over,' a fault with many varieties of this type of poppy. It is a long lived perennial making large plants within 3 years. From a late Autumn sowing it will flower the following summer. 75cm.

250sd	500sd	1,000sd	2,500sd
£2.20	£4.10	£7.80	£17.55

PAP065 Pizzicato

A superb semi-dwarf mixture of red, scarlet, orange, salmon, mauve, rose, pink and white all with a black centre. The flowers are 15-20cm in diameter and are held on tall strong stems, thus enabling them to withstand strong winds. Each plant can produce up to 20 flowers in a season. 50cm.

£3.70	£8.35	£16.35	£31.25

Twizzle

PEN50 Twizzle

This first year flowering perennial blooms over a long period from Summer to Autumn. Great for sales in 12-18cm pots. Can be either sown in autumn and overwintered frost free or sown Febuary-April for flowering July onwards. Great for containers and borders. 70-80cm.

50sd	100sd	250sd	500sd
£3.75	£7.10	£16.10	£30.45

Electric Blue

PEN90 Electric Blue

Penstemon heterophyllus. One of the most popular recent introductions. Produces multiple stems with branched spikes holding intense blue flowers. Flowers in about 16-18 weeks in a 10cm pot. 45-55cm.

100sd	250sd	500sd	1,000sd
£5.75	£13.05	£24.65	£46.95

PEN80 Mystica

Penstemon digitalis. Bronze rosettes are produced in early spring. Multiple flower stems with large lavender pink flowers appear in early summer. In the Autumn leaves turn red. Sow July-August for flowering the following year. 70-80cm.

250sd	500sd	1,000sd	2,500sd
£4.50	£8.55	£16.20	£36.45

Mystica

Pentas

Greenhouse annual, 2-3 weeks at 18-20°C, sow January for May flowering, cover lightly with vermiculite. successional sowings will provide a continuous supply of flowering plants throughout the Summer. During the growing season, never let the temperature drop below 10°C, since this will prevent the flowers opening.

Sell in: 10cm or larger pots, in flower.

End Use: Pot plant, containers.

Northern Lights - Close Up

Northern Lights

PEN02P Northern Lights Lavender

A breeding breakthrough. Northern Lights is more tolerant of cooler temperatures when planted out. At our trials of patio plants this Pentas was the star of the show. New flower heads appear long before the last flowers of older heads are finished providing continuous colour.

Perilla

Annual, sow Feb-April 2-3 weeks at 18°C, cover lightly with vermiculite. germination can be slow and erratic, 630 seeds per gram.

End Use: Foliage bedding plant.

Perilla Nankinensis

PER10 Nankinensis

This is the traditional strain of Perilla which is used for bedding and as an accent plant in Summer bedding schemes. Deep red foliage with a purple glow, slightly curled and deeply cut leaves. 60cm.

1g	2½g	5g	10g
£3.50	£7.60	£14.15	£26.55

Perovskia

Perennial, 3-4 weeks at 16-20°C, sow Jan-Feb for June-September flowering or May-June for overwintering. Cover lightly with vermiculite. Keep on the dry side.

Sell in: 10cm or larger pots, in flower.

End Use: Perfect landscape plant or border plant.

Blue Steel

PER25 Blue Steel

Aromatic, silvery foliage carries clouds of small blue flowers on strong silver stems. Pinch for better branching. Drought tolerant. Great item for late season sales. 60-90cm.

25sd	50sd	100sd	250sd
£5.40	£10.05	£19.05	£43.50

Petchoa

Annual, sow 1 seed per cell on the compost surface from February-April. Germinates in 7-14 days at 20-25°C. Prick out after 4-6 weeks into packs or pots as required. Grow on at 16-18°C; growth regulators can be used, according to the manufacturers' guidelines, but avoid at visible bud stage or later as it can reduce flower colour intensity. Sowing to flowering takes around 11-13 weeks. Approx 1600 seeds per gram.

Sell in: 9-10cm pots.
End Use: Baskets and containers.

PET700P **Caliburst Yellow** **NEW**

The first petchoa from seed is a vibrant calibrachoa colour with the flower size, form and habit of a petunia. It has a controlled mounded, spreading habit that makes it ideal for pots, containers and baskets. Germination is cold-durable and can be produced in early spring, a flowering 9-hour daylength response means these make excellent spring and summer sales.

Caliburst Yellow

Petunia

Annual, sow on the compost surface from February-April, germinates in 7-10 days at 20°C. Prick out after 4 weeks into packs or pots as required. Grow on at 12-15°C; growth regulators can be used, according to the manufacturers' guidelines. Sowing to flowering takes around 12 weeks. 9,000 seeds per gram. Note-Star and Picotee types: High temperatures, high light levels and high soil fertility, will increase the proportion of white. Conversely low temperatures, low light and low soil fertility will result in a decrease in the proportion of white. Grandifloras produce fewer, but larger, flowers than the multifloras.

Sell in: 6-packs (basket & ground cover varieties in 9-10cm pots).
End Use: Baskets, containers and borders.

F1 Hybrids, Multiflora Single

Flower size is not the only difference between Grandifloras and Multifloras. Multifloras generally grow faster, have more branches and flowers, hence providing more masses of colour. Other differences are smaller, thinner leaves, and flowers are usually not as ruffled or fringed. They also have greater disease resistance and weather tolerance.

Mambo Series

The widest colour range of any compact multiflora on the market. Mambo resists stretching such that growth regulators are not required. This series also has excellent garden performance.

Success Series

Moles Best Seller!

Excellent series which is the earliest seed raised trailing type to flower. Flowering times are well matched across all the colours. The seed vigour and viability is very high, giving great plug performance. Success also performs well in the garden making it a great basket and container subject. A good alternative to more expensive cutting raised material.

£4.95 £11.15 £21.85 £41.80

Primrose

For pot plant or perennial sales depending on variety. Sow June-July. Germination max temp 18°C, keep moist, cool and shaded, cover seed with thin layer of vermiculite to anchor the germinating seedlings. 1,000 seeds per gram, 1.5-2g for 1,000 plants. For more details download or request our cultural leaflet.

- Market prices for primroses remain under pressure despite their enormous popularity. To maximise their potential here are some suggestions.
- Target flowering to coincide with maximum sales demand, e.g. choose Last Dance for sales in late February-March.
- Use added-value lines like Rosanna in mixed bowls and arrangements.
- Spice up the colour range with special mixtures such as Meteor.
- Grower-retailers - consider a 'primrose special' weekend promotion to kick off the sales season at the end of February.

STO027 Vintage Mixed

A dwarf series that blooms up to one week earlier with better branching than comparable varieties. This non selectable type produces a large proportion of double flowers. The sturdy, well branched plants are excellent garden performers. Great for early spring sales. 38cm.

250sd	500sd	1,000sd
£2.95	£5.55	£10.50
2,500sd	5,000sd	
£23.65	£46.35	

Selectable Varieties

Selectable stocks: Sow at a temperature of 13-15°C. When the seed leaves have formed, drop the temperature to 10°C. It will then be found, when the plants are large enough to prick out, that there are two distinct colours in the seedlings. Light green plants should be kept (they are the doubles), the dark greens are the singles and should be discarded. Once this is done, temperatures can be raised again. 5g = 1,000 double plants.

Cinderella Series

Moles Best Seller!

Cultural Details: Best sown from February-August in temperatures of 18°C, germination 1-2 weeks. This improved series of dwarf Stocks is ideally suited for growing in pots and bedding.

The colours come into bloom uniformly and are delightfully scented. From sowing to flowering takes approximately 90 days. Grow one plant per 9cm pot or alternatively 3 plants per 11-12cm pot. 100% selectable for fully double flowers, by discarding the dark green seedlings. 25cm.

Pot Plant Varieties - Pollen-Free

SUN10 Junior

In our pot Sunflower trial this pollen free variety excelled. It was generally considered to be the best dwarf variety of the trial. Very good uniformity makes this variety ideal for mass production. Flower size is around 17cm with a dark disk and yellow petals. 60cm.

100sd	250sd	500sd	1,000sd
£4.75	£10.80	£20.40	£38.85

SUN09 Sunsation Yellow

Sunsation is a large flowered, pollen free F1 hybrid with a black centre, producing multiple flower buds. It has dark, green, glossy foliage. The compact plants are ideal for 12 cm pots. Because of its compact habit, Sunsation needs very little if any growth regulators. The plants have good keeping qualities and have an excellent garden performance. 35-45cm.

25sd	50sd	100sd	250sd
£3.65	£6.80	£12.85	£29.25

Suntastic Series

Moles Best Seller!

Suntastic is very floriferous bearing up to 20 flowers per plant. The flowers are produced in flushes. The first flowers appear 50-65 days after sowing. The flowers are pollen free. 30-45cm.

SUN11 Yellow Black Centre

Bright yellow flowers with dark centres.

SUN13 Yellow Red Bicolour

Yellow and red petals.

50sd	100sd	250sd	500sd
£4.05	£7.60	£17.35	£32.85

SUN12 Smiley

Smiley is dwarf, early blooming, and day length neutral. It branches freely and is great in pots and containers. The pollen-free flowers have broad petals, it maintains an excellent shape without petal curling. 50cm

£32.55	£62.00	

SUN14 Lemon Cutie

Lemon Cutie is a new dwarf branching pollen-free type. It produces multiple heads of semi double lemon yellow flowers. It is great for pot sales, containers and borders. 40cm

50sd	100sd	250sd
£4.35	£8.25	£18.75
500sd	1,000sd	
£35.45	£67.50	

Cut Flower Varieties

Sow April-mid June, direct into the flowering position. Row width depends on variety (up to 40cm for largest varieties); spacing between plants around 12-15cm. Sow at approx 4 kg per acre. Lightly cover seeds, and keep moist. Germination optimum 20°C, minimum 5°C. From sowing to first cutting is approximately 60 days in mid Summer - plants flower July-September. Denser plantings or excess nitrogen can lead to smaller flowerheads with less robust stems. Cut flowers just before first ray petals open. Treatment of stems with holding solution can prolong vase life. Seed count varies greatly from one variety to another. Although the following varieties are all used for cut flowers, we would especially recommend the pollenless varieties as the others will shed pollen when cut.

SUN15 Sonja

Sonja has long laterals without side branches. Small flowers, of tangerine orange with dark centre. 1.1m.

250sd	500sd	1,000sd

250sd	500sd	1,000sd
£4.50	£8.55	£16.20
2,500sd	5,000sd	
£36.45	£71.45	

Cut Flower Varieties - Pollen-Free

Pollen-free types can be sown under glass September to March, and outdoors April to August. Sow directly, cover with soil and maintain temperature around 10°C. Approx. 10 days after emergence, thin out to leave the best seedlings, spaced at around 10-12cm in each direction. High density production suppresses the production of sideshoots. Minimum night temperature 8°C, with a maximum of 25°C in the daytime. Provide little or no fertilizer, and water sparingly.

SUN20 Superted

This fully double sunflower produces bright yellow flowers. Suitable for greenhouse or outdoor production. An outstanding cut flower variety with good vase life. It is significantly earlier than Double Shine which it replaces. 160cm.

50sd	100sd	250sd	500sd
£4.00	£7.55	£17.20	£32.50

Sunflower (contd.)

SUN26 Ruby F1 Eclipse

Beautiful branching plants produce flowers of ruby red tipped with lemon, flower size approx. 14cm, height approx. 180cm.

African Sunset Mixed Shades

THU30 African Sunset Mixed Shades

A vigorous twining climber, easily grown as a windowsill, conservatory or basket plant, flowering within a few weeks of sowing. The mixture contains a stunning selection of colours, from brick red through soft reds, oranges and yellows, to cream, with dark centres.

25sd	50sd	100sd	250sd
£9.15	£16.95	£32.15	£73.30

Thymophylla

Annual, sow February-April, germination takes 1-2 weeks at 18°C, grow on at 14°C, takes around 12 weeks from sowing to flowering. 7,000 seeds per gram.

Sell in: 6-packs, 9cm pots.

End Use: Hanging baskets, containers, borders.

Tenuiloba

THY10 **Tenuiloba**

Produces a mass of bright yellow flowers on delicate trailing stems. Free flowering all summer making it ideal for bedding and hanging baskets.

1/4g	1/2g	1g	2 1/2g
£2.45	£4.30	£8.20	£17.75

Thymus

Wild Thyme. Perennial, 2-3 weeks in a cold frame, 7,000 seeds per gram.

Sell in: 8cm or larger pots.
End Use: Borders

THY20 **Serpyllum**

Creeping habit, purple flowers with scented foliage. 10cm.

1g	2 1/2g	5g	10g
£2.70	£5.80	£10.75	£20.20

Tithonia

Annual, sow January - April, 1-2 weeks at 18-20°C. Sow on compost surface, do not cover seed. Cold sensitive so plant out after risk of frosts past.

Sell in: 10cm or larger pots.
End Use: Borders, containers.

TIT10 **Fiesta del Sol**

The most compact Tithonia available. It is extremely heat and drought tolerant and needs no support. The bright orange flowers enjoy full sun. 70cm.

100sd	250sd	500sd	1,000sd
£4.60	£10.45	£19.75	£37.55

Torenia

Annual, sow February - April, 2 weeks at 20-24°C. Sow on compost surface, do not exclude light.

Sell in: 8cm or larger pots.
End Use: Houseplant, containers.

TOR10 **Kauai Mixed**

This compact variety offers the fullest complement of the most vivid colours. It is easy to schedule with a 7-10 day flowering window. Has a great exotic appearance in warm locations. 20cm.

pelleted seed

100plt	250plt	500plt	1,000plt
£5.65	£12.90	£24.35	£46.35

Trachelium

Tender Perennial, 2-3 weeks at 15-20°C, sow May-June.

Sell in: 12cm or larger pots.
End Use: Houseplant, containers.

TRA05P **F1 Passion in Violet**

This variety has been bred as a pot and bedding plant. It produces attractive violet umbels of 10-20cm in diameter, it has an excellent basal branching ability making pinching unnecessary. Ideal for patio tubs and garden beds. 35cm. If grown as a pot plant an application of a growth regulator is recommended to reduce the height.

pelleted seed

100plt	250plt	500plt	1,000plt
£9.20	£20.90	£39.55	£75.30

Tradescantia

Perennial, cold frame.

Sell in: 9cm or larger pots.
End Use: Borders.

TRA30 **Blue Andersoniana**

A hardy border plant with dull green pointed leaves. Deep blue flowers are borne freely from June to September. 60cm.

50sd	100sd	250sd	500sd
£2.85	£5.40	£12.30	£23.30

Tritoma

See Kniphofia (Red Hot Poker).

Trollius

'Globe Flower'. Perennial, sow in autumn, cover with vermiculite and leave to germinate over winter in a cold frame. 700 seeds per gram.

Sell in: 10cm or larger pots.
End Use: Borders.

TRO10 **Ledebourii Golden Queen (not shown)**

Flowers June/July; orange flowers with prominent stamens, taller and later flowering than Trollius europaeus. 75cm.

1/2g	1g	2 1/2g	5g
£4.80	£9.15	£19.80	£36.80

Tropaeolum

Annual

Annual climber, sow direct into flowering position April-May; takes 2-3 weeks to germinate, and 12 weeks to flower from sowing. 15 seeds per gram.

End Use: Fences, trellises.

TRO30 **Canariense (Canary Creeper) (not shown)**

This rapid climber can reach a height of 4m in one season. It has blue-green leaves with 5 lobes, irregularly shaped yellow flowers are borne from July until October.

10g	15g	25g	50g
£4.10	£5.70	£8.90	£16.25

Tunica

Perennial, Sow May-July 2-4 weeks at 20-25°C, 6,200 seeds per gram, 1g for 1,000 plants.

TUN10 **Saxifraga**

Clusters of star shaped white and light pink flowers produced on wiry stems with grass like foliage. An excellent rock plant. 18cm.

Sell in: 8cm or larger pots.
End Use: Rockeries.

2 1/2g	5g	10g	15g
£4.45	£8.25	£15.50	£22.35

Tweedia

Tender perennial, sow in February-April 15-24°C, cover with thin layer of vermiculite 7-14 days however germination can be erratic.

Sell in: 10cm or larger pots.
End Use: Cut flower, containers.

TWE05 **Heavenly Blue**

Produces narrow sprays of aquamarine flowers within 6 months of sowing. Evergreen if kept above 5°C, however it is not hardy and needs protection in winter. Good cut flower. 70cm.

50sd	100sd	250sd	500sd
£4.20	£7.95	£18.05	£34.15

Venidium

Annual, can be sown directly in the flowering position in April-May, otherwise sow February-April at 15°C, cover with vermiculite, prick out into pots/cell trays as required and grow on at 12-15°C. 1,400 seeds per gram.

VEN10 Zulu Warrior

A mixture of orange and white, sunflower-like flowers with dark centres, over silky foliage. Grow in a sunny aspect as a bedding plant or in containers. 60cm.

Sell in: 10cm or larger pots.

End Use: Borders

1g	2½g	5g	10g
£3.35	£7.25	£13.45	£25.25

Verbascum

Perennial, sow April-July, germinates in 2-3 weeks at 18°C. Prick out into 9cm pots when large enough, grow on at 12-15°C, sell green with label, or in flower in a large container. 7,000 seeds per gram.

Sell in: 10cm or larger pots.

End Use: Borders.

VER005 Southern Charm

A first year flowering perennial when sown Jan-Feb, that does not need vernalisation. Southern Charm offers a unique blend of creamy yellow, soft lavender and peachy rose shades each marked with a fuzzy purple bee. 60-70cm.

pelleted seed

Xeranthemum

Annual, sow direct into open ground in April-May. 700 seeds per gram.

End Use: Dried and fresh cut flower.

XER50 Lumina Double Extra Mixed

Wiry stemmed, crisp petalled everlasting flowers. 70cm.

5g	10g	15g	25g
£3.75	£6.80	£9.35	£14.70

Yucca

Perennial, after a 14 day period of cold treatment, germinate at 20-25°C for 4-6 weeks, 25 seeds per gram.

Sell in: 12cm and larger pots.
End Use: Borders.

YUC11 Filamentosa (Adam's Needle)

Mid-green, narrow, stiffly erect leaves. In July and August creamy white flowers are borne in erect plume-like panicles. 1.5m.

100sd	250sd	500sd	1,000sd
£3.40	£7.75	£14.65	£27.85

Zea

Annual, 2-3 weeks at 15-18°C, for seed count see species.

ZE10 Strawberry Corn (not shown)

Highly decorative mixture of small round cobs. Particularly useful for flower arrangements. 12 seeds per gram.

End Use: flower arrangements. Dot plant.

10g	15g	25g	50g
£3.35	£4.65	£7.30	£13.35

ZE20 Japonica

An excellent item for dot planting. Beautiful variegated leaves in striations of white, pink, purple and all shades of green. 1.3m. (6 seeds per gram).

End Use: Feature plant in formal bedding displays.

5g	10g	15g	25g
£8.10	£14.55	£20.10	£31.55

Zinnia

Annual. Zinnias resent disturbance so, for pot sales, sow directly into the pot in April, germinates in 7 days at 20°C, cover with vermiculite. Grow on at 15-18°C, sowing to flowering takes about 12 weeks. Dahlia Flowered and Benary's Giant may be sown directly into the flowering position in May. 120 seeds per gram.

Sell in: 9cm or larger pots.

End Use: Borders, containers.

F1 Hybrids

Zydeco Mixed

ZIN210 Zydeco Mixed

Zydeco is a great series of zinnia. It has huge, fully-double flowers that provide lasting impact. Zydeco has excellent disease resistance and its heat and drought tolerance provide season-long summer performance. The attractive mix is made up of four colours including Cherry, Deep Yellow, Fire and White. The tight branching habit looks good in a pot and results in great garden performance 50cm.

50sd	100sd	250sd	500sd
£3.40	£6.40	£14.60	£27.60

The urban meadow is a great option in areas that do not require the formality of bedding schemes...

It is a cost effective alternative to grass with a large cost saving on mowing. It has proved immensely popular with the public for its rejuvenating effect in urban areas and its positive effect on biodiversity.

For more information about our Throw to Grow products please see pages 162-163. For larger quantities, in a wider range of mixtures, please request our specialist catalogue.

Throw to Grow

Our range of non-native, direct-sown, annual and perennial mixtures makes a stunning display throughout the spring and summer months. The contents of the mixtures have a wide range of flowering times which overlap from late spring to late summer.

Easy! Quick! Colourful! Economical!

When is it sown?

Throw to Grow is usually sown from the end of April to the beginning of June (depending on the location) when the soil is sufficiently warm and moist for the seeds to germinate.

What is the correct sowing rate?

In most cases, a density of between 2 and 6 grams per square metre is sufficient. An area that cannot be watered, has very stony or capping soil and is sown early (therefore at a relatively low temperature) will require a greater seed density than a plot of good soil with access to irrigation.

How should the ground be prepared?

Weeding must be carried out before and after sowing. It is not possible to sow into established lawns, meadows, etc. The seeds must be lightly covered by soil in order to germinate. It is best to cultivate the soil to prepare a fine deep seedbed. Before sowing, mix the seeds well with sand or vermiculite ($\frac{3}{4}$ of the overall weight). Sowing into rows 20cm apart allows hoeing between rows until flowers are established.

Throughout the entire sowing process, whether manual or mechanized, continue to mix the seeds well for a homogenous distribution. After sowing, use a rake to cover the seeds lightly with soil, then water well to aid germination. Over the first few weeks, water if possible to keep the soil moist and to encourage germination.

What about after care?

Throw to Grow requires significantly less management than bedding plants do. Fertilizers and pesticides are not needed and demand is low for water once established. It is important however to remove weeds when visible.

Wild Flowers by Species

Attractive in their own right, these species are important components of natural ecosystems. They are ideal for wildlife projects in reserves, estates, schools, gardens, urban wildlife projects, to improve biodiversity, and for production of plants for sale. All the seed on these two pages is produced in the UK. No artificial heat is required for production. Great for attracting butterflies, bees and other insects. See also our wild flower seed mixtures on the next pages, we also list Cowslip (*Primula veris*) in the main seed section, and *Primula vulgaris* with the hybrid primroses.

WFS200 Yarrow

Achillea millefolium (p). Grassy places. Short plants bearing flat flowerheads of white or pale pink flowers from June-Oct. (6,000 sds/g).

5g	10g	15g	25g
£2.80	£5.05	£7.00	£10.95

Agrostemma githago (a) Cornfield annual. Tall stems topped by bold pink flowers from May to August. (60 sds/g).

5g	10g	15g	25g
£1.90	£2.70	£3.75	£5.85

WFS220 Corn Chamomile

Anthemis arvensis (a) Cornfield annual. Daisy like flowers with feathery leaves. Flowers from June to Sept. (4,000 sds/g).

10g	15g	25g	50g
£3.10	£4.30	£6.70	£12.25

WFS230 Kidney Vetch

(not shown)

Anthyllis vulneraria (a/p). Dry, grassy places. Short plants with generally yellow flowerheads April - Sept. (350 sds/g).

2 1/2g	5g	10g	15g
£4.05	£7.25	£13.00	£18.00

WFS235 Bluebell

Hyacinthoides non-scripta (p). Deep Blue flowers on the native Bluebell will be produced in 4 to 5 years from seed. A economical choice for large areas. May need pre chilling to break dormancy. Flowers April-May. (120 sds/g).

2 1/2g	5g	10g	15g
£5.40	£9.60	£17.20	£23.85

WFS240 Cornflower

Centaurea cyanus (a). Cornfield annual. Unmistakable blue flowers on long stems from June to August. (200 sds/g).

5g	10g	15g	25g
£2.50	£4.40	£6.25	£9.75

WFS245 Greater Knapweed

Centaurea scabiosa (p) Tall thistle like flowers. Grows on dry grassland particularly calcareous soils. Also at the edges of woodlands. Attractive to a wide range of insects. June-September (140 sds/g)

1g	2 1/2g	5g	10g
£2.45	£5.40	£9.60	£17.25

WFS250 Corn Marigold

Chrysanthemum segetum (a). Cornfield annual. Tall stems bearing large daisy-like yellow flowers June - Oct. (600 sds/g).

5g	10g	15g	25g
£2.40	£4.30	£6.00	£9.35

WFS260 Foxglove (not shown)

Digitalis purpurea (p). Tall purple flower spikes appear in shaded places, waste ground etc, June - Sept. (13,000 sds/g).

1g	2 1/2g	5g	10g
£1.90	£2.90	£5.20	£9.35

WFS265 Teasel

Dipsacus fullonum (b)

The Conical flowerheads of this tall native biennial are attractive to bees. The seedheads, which last well after the flowers have faded are great food for goldfinches. Also used by florists. Tolerant of a wide range of soils. (300 sds/g).

2 1/2g	5g	10g	15g
£2.60	£4.65	£8.30	£11.50

WFS270 Viper's Bugloss

Echium vulgare (p). Medium height, grows in dry places, pink flowers turn blue as they open May-Sept. (250 sds/g).

2 1/2g	5g	10g	15g
£2.55	£4.55	£8.20	£11.35

WFS280 Meadowsweet

Filipendula ulmaria (p). Tall, bearing masses of fragrant flowers June-Sept in damp meadows and woods. (1,000 sds/g).

2 1/2g	5g	10g	15g
£2.55	£4.55	£8.15	£11.30

WFS290 Lady's Bedstraw

(not shown)

Galium verum (p). Sprawling stems with bright yellow flower clusters, June-Sept, dry places. (1,900 sds/g).

5g	10g	15g	25g
£4.80	£8.65	£11.95	£18.75

WFS300 Cranesbill (not shown)

Geranium pratense (p). A medium to tall grassland perennial with deeply cut leaves and long, hairy and frequently reddish stems. The flowers, which are out from June to September, consist of five un-notched violet blue petals (100 sds/g).

1g	2 1/2g	5g	10g
£6.25	£13.65	£24.30	£43.75

WFS310 Field Scabious

(not shown)

Knautia arvensis (p). Found in dry, grassy areas, tall stems with flat heads of blue flowers June-Oct. (150 sds/g).

1g	2 1/2g	5g	10g
£2.45	£5.40	£9.60	£17.25

WFS150 Oxeye Daisy

Leucanthemum vulgare (p). Familiar and attractive grassland perennial. June - Aug (2,000 sds/g).

15g	25g	50g	100g
£5.30	£8.30	£15.15	£27.85

WFS330 Birdsfoot Trefoil
Lotus corniculatus (p). Creeping yellow flowered perennial, flowering in grassy places from May - Sept. (500 sds/g).

2 ¹ / ₂ g	5g	10g	15g
£2.95	£5.30	£9.50	£13.10

WFS340 Ragged Robin
Lychnis flos-cuculi (p). Tallish stems with narrow petalled flowers mainly in damp meadows, May - Aug. (5,000 sds/g).

1g	2 ¹ / ₂ g	5g	10g
£2.75	£6.05	£10.80	£19.40

WFS350 Purple Loosestrife (not shown)
Lythrum salicaria (p). Tall spikes bearing purple flowers, riverbanks and damp places, June - Aug (20,000 sds/g).

1g	2 ¹ / ₂ g	5g	10g
£2.05	£4.40	£7.85	£14.15

WFS360 Musk Mallow (not shown)
Malva moschata (p). Tallish stems with large deep pink, (edible!) flowers, grassy places, July-Aug. (500 sds/g).

2 ¹ / ₂ g	5g	10g	15g
£2.95	£5.25	£9.45	£13.05

WFS370 Wild Marjoram
Origanum vulgare (p). This aromatic herb grows naturally in dry, grassy places, flowering July-Sept, very attractive to bees and butterflies. (11,000 sds/g).

1g	2 ¹ / ₂ g	5g	10g
£2.05	£4.50	£8.00	£14.35

PAP072 Red Field Poppy
Papaver rhoeas (a). Please see Papaver on page 107.

WFS390 Hoary Plantain
Plantago media (p). Rosette of dark green leaves, with flower spikes appearing in May - Aug amongst grasses. (2,000 sds/g).

1g	2 ¹ / ₂ g	5g	10g
£4.90	£10.65	£19.00	£34.20

1g	2 ¹ / ₂ g	5g	10g
£3.60	£7.90	£14.10	£25.40

Technical

Annuals - marked (a)

Can be plug-raised, sown either in the Autumn or early Spring, or sown direct into prepared, cleared ground. Annuals will generally disappear once other species become established.

Perennials - marked (p)

For best results, we suggest multi-sowing the seed into large plug trays, then raising in cool glass, polytunnel, or cloche, or a sheltered area outdoors. Growth rates vary between species. Do not allow the plants to dry out. Then plant out in Spring or Autumn, or pot up into 8cm pots for spring plant sales.

Wild Flower Seed Mixtures

		100g	250g	500g	1kg
WFS140	Mix of Cornfield Annuals (contains no grass)	£20.20	£45.40	£85.00	£160.35

Our wild flower mixtures are suitable for a wide range of environments, carefully formulated to provide interest and natural balance. Each mixture contains grass and wild flower species, (Except WFS140 which contains no grass) for a natural meadow look. 100% native UK origin. Full cultural instructions can be found on our website, but the key points to bear in mind are:

- Select the correct mixture for the soil type and drainage characteristics of your site.
- Prepare a firm, weed-free tilth. Low nutrient regimes are best, which can involve removing the topsoil and sowing onto subsoil.
- Sowing time throughout the year, with best results sowing March/April and August/September.
- Sowing rate 5g/m² - bulk up the mixtures with silica sand when sowing to make it easier to broadcast the seeds evenly. Then rake the seed lightly into the surface.

Professional Amenity Grass Seed

Working in conjunction with a leading breeder of amenity grass seed, we have put together a range of professional quality amenity grass seed mixes. All the cultivars within the mixes have been independently tested by the Sports Turf Research Institute (STRI), to measure the vigour, colour, visual appearance and disease resistance.

Cultivar types

Bent: gives a fine, tightly-knit texture to the turf. Maintains a green colour during the winter.

Fescue: there are three main Fescue types: *Chewings*: fine leaved, tolerates close mowing. *Creeping Red*: compact growth, used to bind the sward together. *Hard*: good cold tolerance, ideal for low maintenance situations.

Amenity & Sports Ryegrass: fast establishing and hard-wearing. Our mixes use dwarf varieties designed to give fine leaves with a high shoot density.

GroMax treatment: some of our mixes are treated with a coating called GroMax that improves establishment, stimulates root growth, improves tolerance to stress and enhances water and nutrient uptake. Biostimulants assist a seedlings ability to take advantage of the soils own inherent reserves of nutrient by stimulating the soils microflora, resulting in improved root growth and establishment.

GroMax is a dry formulation of:

Natural humates and humic acid - rich in auxin type substances that enhance antioxidant synthesis; food source for micro-organisms.

Seaweed extract - stimulates root growth after damage; contains cytokinins to promote cell division.

Sucrose - acts as high energy food source.

Vitamins (B complex and K) and potash - enhance plant development and disease resistance.

The product is compatible with most micro-nutrients, fertilisers and pesticides. Please note this is not a chemical treatment.

VGR52 Greens

A good quality traditional 80/20 mixture that produces a dense, fine leaved sward with good colour throughout the year. Tolerates close mowing. Suited to Bowling and Golf greens. Cutting height 5mm. Sow at 35g/m²; oversow at 25g/m². GroMax treated. Contains:

40% *Wagner Chewings Fescue*

40% *Samanta Slender Creeping Red Fescue*

20% *Highland Browntop Bent*.

£12.35	£49.35	£95.55
25kg	50kg	100kg
£225.00	£431.55	£801.40

VGR95 Horse Paddock

Especially formulated for horse paddocks, providing balanced grazing with a dense turf. Can be grazed throughout the season, with good repairing qualities. Ideal for heavy usage. Also suitable for intermittent rests to allow cropping for hay. Designed to work well with moderate nitrogen inputs, but a good application before closing off for hay will produce the best results. Sow at 10-15Kg/acre. Contains:

45% *Premium Intermediate Amenity Ryegrass*

30% *Majestic Late Amenity Ryegrass*

15% *Maxima Strong Creeping Red Fescue*

10% *Winnetou Timothy*.

Vegetable Seed - Conventional and Organic

Treatments

Many of our products are available in both a treated and untreated format, however regrettably this is not always possible. While we make no extra charge for treated or untreated seed when in stock, we reserve the right to make an additional charge to cover the costs of any specific requirements, such as having a product treated to order. If you have a particular request for treated or untreated seed please state this at the time of ordering to avoid delays in the supply of the required seed. We reserve the right to make a handling charge for seed returned due to it being treated or untreated when a particular request was not made at the time of ordering.

Grades

The Open Pollinated (OP) and F1 hybrid vegetable seed is supplied as natural seed, except for the majority of the F1 brassica and F1 carrot seed which is supplied as graded seed. Some products are stocked as both graded and natural seed, and these are shown in the catalogue. In addition to this, we have the capability to grade most of our products to order, depending upon the product and quantity concerned. If you need graded seed please contact us with your requirements and we will be pleased to quote a price.

Organic

Our seed is produced on farms which have been officially authorised as meeting all the required organic standards. The seed crops are grown on soil which has taken at least five years to reach the required standard and the crops themselves are hand maintained and weeded without the use of artificial chemicals in the form of herbicides, pesticides or fertilisers. The seed is harvested using traditional methods and there are no chemicals used in the seed cleaning process. The seed is inspected for quality and authenticity by the organic governing body in the country of origin and is then packed in a non-chemical environment. All our organic seed is certified by the Soil Association.

For your guidance these icons are used throughout the vegetable section:

- YP** Popular for retail young plant sales
Poly Suitable for production under polythene
Glas Suitable for production under glass

Artichoke (Globe)

An unusual perennial species suitable for sales to such outlets as restaurants, and the specialist greengrocery trade. Also useful as an architectural plant in large herbaceous border settings. A high value crop which is also suitable for young plant sales. 25 seeds per gram. Sow March-April at 16-18°C in modules, or April in open ground. Plant out 1m apart in late April-early May. Harvest the following year. Pick heads before they flower. Usually starts cropping in year 2, and remains productive for up to four years.

VAR30 Violet de Provence

YP

A purple globe variety, similar to Green Globe in habit, but with a finer flavour, and attractive large purple thistle-like flowerheads.

Asparagus

Combines a high return with a productive life of around 20 years. Requires relatively little maintenance, and the crop is suitable for fresh market and roadside sales. F1 hybrid 'all male' varieties are far higher yielding than the traditional types. Crowns are established roots which are lifted and packed immediately before despatch. Sow seeds (45-60/g) in January into modules at 16-18°C, following a 24 hour soak. Transplant in April or early May. Otherwise sow seeds into seedbed outdoors March to early May. Plant out crowns at 30 x 90cm, harvest a small crop the following year. Plant population approx. 20,000 per hectare for white spears, and approx. 25,000 per hectare for green or purple spears. Harvest small crop in year two, then crop normally in subsequent seasons. Cultural leaflet available upon request.

Seed

VAS05 F1 Gijnlim

Very early-cropping (harvest mid March to mid June). Produces top quality, medium thickness spears. Suitable for both white and green spear production.

25sd	50sd	100sd
£9.15	£17.00	£32.25
250sd	500sd	
£73.55	£139.15	

VAS09 F1 Pacific Purple

A late season hybrid variety that produces super-sweet dark purple spears. The spears are very low in fibre allowing for tip to butt consumption. Spear diameter is typically medium to large. Also suitable for super-sweet white spear production.

25sd	50sd	100sd
£6.25	£11.55	£21.90
250sd	500sd	
£49.95	£94.50	

Portlim

VAS22 F1 Portlim

A 100% male hybrid that is ideal for green spear production. Developed to crop later than Gijnlim but deliver similar high quality spears, allowing for greater continuity of supply. Attractive, cylindrical, smooth spears. Tips remain tightly closed even during warmer weather.

25sd	50sd	100sd
£9.15	£17.00	£32.25
250sd	500sd	
£73.55	£139.15	

Connover's Colossal

VAS10 Connover's Colossal

An open pollinated variety producing a reasonable crop of fairly thick spears. Also used in flower arranging, as a foliage item.

25g	50g	100g
£4.25	£7.85	£14.50
250g	500g	1kg
£33.55	£62.10	£115.00

Millennium

VAS24 F1 Millennium

A class leading hybrid developed for green spear production. Produces a high yield of straight spears, with tight heads. Excellent vigour. Good flavour. A late cropping variety allowing harvesting in July.

25sd	50sd	100sd
£7.80	£14.45	£27.40
250sd	500sd	
£62.45	£118.15	

1 Year Old Crowns

Please order by mid March for delivery in March/April. Please note: separate delivery charges apply to Asparagus crown orders - please see page 238-239 for details.

Aubergine

A high revenue crop which is becoming more 'mainstream'. Has a flexible growing regime, as it can be grown in heated glass, cool glass and under plastic. 200 seeds per gram. Sow early October to November, or mid November to December, or late January to February, germinates at 20-25°C. For early/late crop allow 46cm between plants, for maincrop allow 38cm. Sowing rate 50,000 seeds per hectare. Harvest from April onwards. A cultural leaflet is available to download from our website.

VAU05 F1 Bonica

£4.00	£7.40	£14.00
250sd	500sd	
£31.95	£60.40	

VAU30 F1 Farmers Long

YP Poly Glas

A vigorous, erect plant producing long slender purple red fruit. Early, prolific producer of top quality fruit measuring 30cm long x 3cm in diameter. White tender flesh with good flavour. Tolerant of bacterial wilt.

100sd	250sd	500sd
£1.90	£4.20	£7.90
1,000sd	2,500sd	
£15.00	£33.75	

VAU40 F1 Green Knight

YP Poly Glas

Produces a prolific crop of glossy jade green fruits, which are approximately 17cm in length. Smooth skin with good internal texture. A popular ingredient for Asian cuisine.

50sd	100sd	250sd
£3.55	£6.70	£15.30
500sd	1,000sd	
£28.90	£55.00	

VAU42 F1 White Knight

YP Poly Glas

Attractive shimmery white fruits that are typically 17cm in length. The delicious flavour makes them ideal for roasting, baking or serving fresh. Works well with the other varieties in the Knight series.

50sd	100sd	250sd
£3.55	£6.70	£15.30
500sd	1,000sd	
£28.90	£55.00	

VAU44 F1 Violet Knight

(not shown)

YP Poly Glas

Another member of the Knight series. The variety produces striking violet fruits that contain minimal seeds and no bitter taste. Fruits 15-17cm long. Transplant to harvest is approximately 60 days.

50sd	100sd	250sd
£3.55	£6.70	£15.30
500sd	1,000sd	
£28.90	£55.00	

Bean (Broad)

This crop provides early cash returns plus has beneficial uses as a green manure, fixing nitrogen in the soil, and also adding bulk to soil. Also popular for loose seed sales in garden centres and shops.

Approx. 650 seeds per kilo (1300 for small bean varieties such as Scorpio). Germinates between 5 and 20°C. Plant spacing 20 x 60cm. Harvest from May to October (sow February to March unless otherwise stated). The old plants can also be ploughed in as a green manure. Seed requirement is approximately 80Kg/acre (200Kg/Ha).

VBB60 The Sutton

YP

Dwarf variety, growing to 45cm in height. Suitable for autumn and spring sowings. A good choice for exposed areas. Good yields of approx. 6-8 white beans per pod.

500g	1kg	2½kg
£4.90	£7.70	£16.95
5kg	10kg	25kg
£31.25	£57.50	£126.50

VBB45 Monica (not shown)

Probably the quickest maturing spring sown bean currently available, making it ideal for early, mid and late sowings. Can also be used for overwintered crops. Produces a heavy yield of large sized, white beans.

250g	500g	1kg
£4.40	£7.05	£11.00

**VBB62 Duet**

A very compact variety producing small, tasty beans, typically 12-15mm in size. Approximately 4-5 beans per pod. Suitable for both fresh market and industrial use.

250g	500g	1kg
£5.05	£8.10	£12.70
2½kg	5kg	10kg
£27.95	£51.65	£95.00

VBB70 Scorpio

Small to medium beans, that average 15mm in width. Around 6-8 beans per pod, with good flavour and texture. White seeded. A very heavy cropper.

250g	500g	1kg
£5.05	£8.10	£12.70
2½kg	5kg	10kg
£27.95	£51.65	£95.00

Bean (Climbing French)

To crop under glass sow from February onwards (germinates between 16 and 25°C). Sow in modules for transplanting outside in May. Alternatively sow direct outside in May. Use a plant spacing of 25 x 75cm. Harvest from July onwards. Support netting or staking required. 2000 seeds per kilo. Seed requirement around 75-100 kilos per hectare.

Flat-podded**VCF15 Algarve**

Flat podded Hunter type, but with larger pods, and an earlier harvest time. Suited to early and late sowings. Performs well under varying conditions; excellent vigour and very productive variety.

100g	250g	500g	1kg
£4.75	£10.95	£20.25	£37.50

**organic seed****VOG075 Limka**

Early maturing, suited to glasshouse, tunnel and open field production. Performs well under difficult conditions. Pods are 22mm wide, averaging 22-24cm long. Suited to early, main and late season work. Excellent plant vigour and a very heavy cropper.

100g	250g	500g	1kg
£4.75	£10.95	£20.25	£37.50

**VCF45 Hunter**

White seeded, flat podded variety suited to early and maincrop production. A high-yielding variety with pods 25cm x 20mm, suited to protected and outdoor production.

100g	250g	500g	1kg
£5.05	£11.70	£21.60	£40.00

organic seed**VOG040 Eva (not shown)**

Suited to early production with dark green oval pods of 26-28cm in length. For protected or field production. Resistant to BCMV race 1 & 2.

100g	250g	500g	1kg
£5.05	£11.70	£21.60	£40.00

**VCF50 Goldfield**

High quality variety with flat yellow pods. Good vigour with a long harvest period. Pods are 26-28cm in length and 25mm in width. Stringless. Resistant to BCMV race 1.

100g	250g	500g	1kg
£5.05	£11.70	£21.60	£40.00

VCF80 Borlotto Lingua di**Fuoco (not shown)**

A flat podded variety with highly coloured green and red pods. Can be used for both edible pods and shelled dry beans.

100g	250g	500g	1kg
£2.35	£5.40	£10.00	£18.50

**Round ('pencil') podded****VCF20 Blue Lake Stringless (not shown)**

White seeded. Quick to mature. Dark green pencil pods, approximately 15cm x 11mm. A popular choice for plant sales. Tolerant of BCMV.

250g	500g	1kg
£6.40	£10.20	£16.00
2½kg	5kg	10kg
£35.30	£65.25	£120.00

VCF55 Fasold (not shown)

Black seeded. Quick to mature, but slow to seed, allowing for a longer harvest period. Pods are long, round and stringless, with superb flavour. An excellent choice for plant sales. Tolerant of BCMV and Anthracnose.

250g	500g	1kg
£6.65	£10.65	£16.70
2½kg	5kg	10kg
£36.80	£67.95	£125.00

**VCF70 Cobra**

Very high quality with a long harvest period. Long, round pods which remain very straight and have a bright green, smooth surface. Especially developed for the fresh market, pods are 20cm x 7-9mm, the variety is black-seeded with very good vigour. Stringless. Resistant to BCMV race 1.

100g	250g	500g	1kg

VCF75 Sunshine

A prolific variety producing a good yield of attractive pale gold coloured beans. The pods are straight, typically 17-18cm in length, and round in profile, typically 9-10.5mm in size. The pods are stringless. This variety has white flowers and is white seeded.

100g	250g	500g	1kg
£5.70	£13.15	£24.30	£45.00

Bean (Dwarf French)

Dwarf French beans give a high return for limited space and outlay. Suitable for fresh sales and for processing; also popular for pick-your-own use. 2000 seeds per kilo. To crop under glass sow from February onwards. Germinates between 16 and 25°C. Sow in modules for transplanting outside in May, alternatively sow direct outside in May. Plant spacing 25 x 75cm. Harvest from July onwards. Seed requirement is 75-100 kilos per hectare.

Pencil-podded

VDF35 Nautica

A vigorous, black seeded variety producing high yields of very fine pencil pods, typically 13cm in length with a consistent sieve size of 6-7mm. Excellent flavour. Medium to dark green colour; stringless. Early maturity. Resistant to Halo blight, Anthracnose and BCMV.

250g	500g	1kg
£7.70	£12.35	£19.35
2½kg	5kg	
£42.65	£78.80	

VDF72 Faraday

Excellent plant habit coupled with high yields of uniform pods. Plant height typically 50cm. Pods are 6-8mm in diameter and 13cm long. Resistant to Halo blight, Anthracnose and BCMV.

250g	500g	1kg
£8.00	£12.75	£20.00
2½kg	5kg	
£44.15	£81.55	

VDF45 Martini

A very well structured, compact plant with uniform pod set. Typically three days quicker to point of harvest than Stanley. Pods are 9-10mm in diameter and 11cm in length. Resistant to Halo blight, Anthracnose and BCMV.

250g	500g	1kg
£6.55	£10.45	£16.35
2½kg	5kg	
£36.05	£66.60	

VDF60 Stanley

A white flowering, white seeded variety that reliably delivers impressive yields of top quality beans. Medium green pods, 14cm x 10mm in size. Early maturity. Suitable for early and late sowings. Resistant to Halo blight, Anthracnose and BCMV.

250g	500g	1kg
£6.40	£10.20	£16.00

£5.85	£9.15	£20.15
5kg	10kg	
£37.25	£68.50	

Unusual-podded

VDF91 Dior

A high quality dwarf wax bean, with strong frame and upright habit. Beans are carried off the ground, with a canopy of leaves for protection. The yellow pods are uniform in shape; typically 12-14cm x 8-9mm. The compact plant habit makes this variety suitable for use in containers.

250g	500g	1kg
£6.65	£10.65	£16.70
2½kg	5kg	
£36.80	£67.95	

VDF96 Voltage

An excellent dwarf wax bean with vibrant yellow pods. Upright plant habit makes for easy harvest, with good presentation of pods. The uniform pods are typically 14-15cm x 9.5-10mm.

250g	500g	1kg
£6.40	£10.20	£16.00
2½kg	5kg	
£35.30	£65.25	

**VDF92 Capitano**

A yellow, flat podded Romano type bean. Vigorous plant with even pod set. Pods typically 15cm in length, by 2cm wide. Pod colour develops at early stage. Plant typically 50cm in height.

250g	500g	1kg
£6.65	£10.65	£16.70
2½kg	5kg	
£36.80	£67.95	

**VDF86 Dwarf Borlotto**

This dwarf Borlotto variety produces a heavy crop of colourful beans. Good vigour even in unfavourable conditions; early to mature. Pods typically 16-18cm long and predominantly red in colour, with 8-9 beans per pod. Resistant to BCMV. Approximately 1,500 seeds per kilo.

100g	250g	500g	1kg
£5.05	£11.70	£21.60	£40.00

VDF95 Purple Queen**(not shown)**

As the name suggests, this variety produces slightly curved, long dark purple pods, which are round in profile. Excellent flavour and stringless. Best picked when pods are young. Turn dark green when cooked. Resistant to BCMV and Anthracnose.

250g	500g	1kg
£5.85	£9.35	£14.70
2½kg	5kg	
£32.35	£59.80	

**Bean (Runner)**

Runner beans are gaining popularity both as a finished product and for young plant sales. With a high crop to space ratio, runner beans are suitable for loose seed sales, fresh market, and pick-your-own. The crop has good storage and handling characteristics. 650-1000 seeds per kilo. Sow under glass in late April for planting out in May. Alternatively, sow direct outside in May-June. Germinates between 12-25°C. Allow 22-25cm between plants. Crop from July onwards. Seed requirement 100-150 kilos per hectare.

Red Flowered Varieties**VRB05 Polestar (not shown)**

A high quality variety, showing consistent results in trials. Stringless, straight podded variety, pod dimensions 37 x 2.5cm. Relatively early to crop.

250g	500g	1kg
£10.90	£17.45	£27.35
2½kg	5kg	10kg
£60.30	£111.45	£205.00

**VRB08 Guinness Record**

A red flowered variety that produces extra long pods, averaging around 45cm in length. If the clusters are pruned to one pod per cluster at an early stage then it is possible for the pod to reach 50cm in length. Excellent plant vigour. Resistant to virus races 1 and 2.

250g	500g	1kg
£12.75	£20.40	£32.00
2½kg	5kg	10kg
£70.60	£130.45	£240.00

VRB12 Crusader

One of the longest podded varieties currently available, typically producing pods up to 40cm in length. A vigorous variety that will set well under varying conditions. Resistant to all known bean related viruses. Black/red seeded variety.

250g	500g	1kg
£8.25	£13.20	£20.70
2½kg	5kg	10kg
£45.60	£84.25	£155.00

VRB15 Armstrong (not shown)

This is a vigorous variety, producing high yields of stringless pods, 40cm x 2.5cm. Early maturing and quick to establish. Resistant to virus races 1 and 2.

250g	500g	1kg
£8.25	£13.20	£20.70
2½kg	5kg	10kg
£45.60	£84.25	£155.00

VRB20 Achievement**(not shown)**

Popular variety for loose seed sales to the home gardener.

250g	500g	1kg
£6.15	£9.80	£15.35
2½kg	5kg	10kg
£33.85	£62.50	£115.00

**VRB22 Firestorm**

A red flowered variety that is a cross between a runner bean and a French bean, which gives this variety easy setting and very high yielding characteristics. The good flavoured pods are typically 25 x 2.5cm in size.

250g	500g	1kg
£11.95	£19.15	£30.00
2½kg	5kg	10kg
£66.20	£122.30	£225.00

**VRB30 Enorma**

Reselected Prizewinner type, with straight, long pods, 30-32cm in length. Red flowers with purple seed. Good flavour. Popular variety, especially with competition growers.

250g	500g	1kg
£6.65	£10.65	£16.70
2½kg	5kg	10kg
£36.80	£67.95	£125.00

£6.15	£9.80	£15.35
2½kg	5kg	10kg
£33.85	£62.50	£115.00

**VRB90 Scarlet Empire**

A modern and much improved version of Scarlet Emperor. Produces smooth, narrow, stringless pods, which typically measure 30 x 2.5cm. Excellent vigour with long cropping period. Resistant to all relevant viruses.

250g	500g	1kg
£8.50	£13.60	£21.35
2½kg	5kg	10kg
£47.10	£87.00	£160.00

Bean (Runner) (contd.)**White Flowered Varieties**

VRB25 Moonlight (not shown)
This variety features all the benefits of a good quality, white flowered variety coupled with some attributes of French beans. The result is a runner bean with good flavour and texture, plus the potential for self pollination. The pods are normally 30cm long.

250g	500g	1kg
£11.95	£19.15	£30.00
2½kg	5kg	10kg
£66.20	£122.30	£225.00

**VRB60 Equator**

A white flowered, semi self-pollinating variety. Good vigour and high yields. Suitable for early, main and late season sowings. Excellent drought tolerance so it will still produce a crop in warm, dry summers. Pod length typically 24-26cm. Resistant to all relevant viruses.

250g	500g	1kg
£8.50	£13.60	£21.35
2½kg	5kg	10kg
£47.10	£87.00	£160.00

VRB66 White Lady**(not shown)**

A modern white flowered variety with excellent flavour. The mid green pods are slender, smooth and fleshy, and typically reach 30cm in length. Stringless. Good pod set even in hot weather.

250g	500g	1kg
£11.70	£18.70	£29.35

Unusual Types**Jackpot Series**

Jackpot is a range of dwarf runner beans that produce wonderfully bushy, free-flowering plants that require no support and will not grow higher than 50cm making them perfect for patio containers or the front of the flower border. Jackpot sets masses of tender delicious pods which should be picked regularly to ensure continuous flowering and further pod development. They have been carefully bred under British conditions to 'set' very freely and easily to ensure big crops of quality tasty beans whatever the weather.

VRB80 Solitaire

White flowered.

VRB82 Queen of Hearts

Red flowered.

VRB84 Sweepstake

Red/white flowered.

VRB45 Painted Lady

YP

(not shown)

An old variety but still one of the best flavoured varieties available. Features attractive red and white bi-coloured flowers, making it popular both as a plant sales item and for decorative use in the garden. Produces relatively short pods which are very tender.

250g	500g	1kg
£6.40	£10.20	£16.00
2½kg	5kg	10kg
£35.30	£65.25	£120.00

**Beet (Leaf)**

This is an extremely versatile crop, becoming very popular in salad leaf mixtures. Perpetual spinach is also popular as a long-term crop providing a high yield of leaves over two seasons, for fresh market sales. Cultural directions as for beetroot. 40-100 seeds per gram.

**VEB90 Chard Bright Lights**

A range of colours including white, cream, yellow, orange, pink, lipstick, and red. Terrific colour splashes for use in salad packs, or for growing as large plants.

10g	25g	50g
£2.15	£5.00	£9.20
100g	250g	500g
£17.05	£39.40	£72.90

VEB95 Flamingo (not shown)

As the name suggests this variety produces attractive pinky-red stems. Can be picked small for baby leaf applications, or left to mature. Ideal for mixed salad packs and novelty box schemes.

10g	25g	50g
£2.05	£4.70	£8.70
100g	250g	500g
£16.10	£37.20	£68.85

VEB85 Canary Yellow**(not shown)**

Produces bright yellow stems, adding interest to mixed salad packs. Can be picked small for baby leaf applications, or left to mature. Also ideal novelty for box schemes, etc.

10g	25g	50g
£2.05	£4.70	£8.70
100g	250g	500g
£16.10	£37.20	£68.85

VEB60 Perpetual Spinach

More or less trouble free crop suited to summer and autumn production. Can be overwintered - will last up to 2 seasons. Use as an alternative 'cut and come again' spinach crop.

Beetroot

A range of uses, including fresh sales, processing, roadside (farm shop) and pick-your-own, and also becoming increasingly popular as a 'mini-veg'. Approximately 40-100 seeds per gram. Sow mid March-July, or under glass in January-February to crop May onwards. Germinates between 8-25°C. Sowing rate 5 kilos per hectare for early bunching crops, 10 kilos per hectare for the fresh market maincrop, 15 kilos per hectare for pickling and mini beet. Monogerm varieties have only one seed per fruit and therefore require less thinning; drill at 650,000 seeds per hectare.

Hybrid Round

VBE03 F1 Pablo Poly Glas
High quality, with smooth skin, good deep red internal colouring. A good choice for 'baby beet' production and fresh market sales. Suitable for early, maincrop and late production.

Open Pollinated Round

organic seed

VOG100 Detroit 2 Bolivar

Good quality, smooth skinned globe beet with strong skin and flesh colour. High yielding variety with very low nitrate content, for open field production during summer and autumn.

10g	25g	50g
£3.05	£7.00	£12.95
100g	250g	
£23.95	£55.40	

VBE30 Boltardy (not shown)

A popular variety for early and maincrop sowings. Round roots with good internal colouring. A good resistance to bolting. For fresh market and processing.

50g	100g	250g
£2.75	£5.05	£11.70

£25.55	£47.25	£87.50

Other Types

VBE15 Albina Ice (not shown)

A truly white beetroot which does not bleed when cut. Excellent flavour and texture. Wavy topped leaves can be used like spinach.

10g	25g	50g
£2.95	£6.80	£12.60
100g	250g	500g
£23.30	£53.95	£99.90

VBE20 Chioggia

This traditional Italian globe shaped beetroot has dark green leaves and deep red stems. When sliced unusual red and white rings are exposed, adding an attractive element to the salad plate. Sweet taste. Suitable for use in salads or as a hot vegetable.

25g	50g	100g
£2.20	£4.10	£7.60
250g	500g	1kg
£17.50	£32.40	£60.00

VBE35 Golden

Attractive globe shaped, orange-yellow roots that turn golden yellow when cooked. Has a sweet taste, fine texture and tender, even when large. Leaves are light green and can be steamed or used raw in mixed salads.

10g	25g	50g
£3.45	£7.90	£14.65
100g	250g	500g
£27.10	£62.70	£116.10

VBE45 Egyptian (not shown)

A flat round variety with smooth purple red skin and flesh. Matures very early.

50g	100g	250g
£3.10	£5.70	£13.15
500g	1kg	
£24.30	£45.00	

VBE55 Cylindra (not shown)

As the name suggests, a long, slim, cylindrical shaped beetroot, with a dark red colour to both the outer smooth skin and the inner sweet tasting flesh. Ideal variety for slicing. Matures medium early.

50g	100g	250g
£3.10	£5.70	£13.15
500g	1kg	
£24.30	£45.00	

Borecole (Kale)

Popular supply of winter greens when other brassicas are not available. For bunching and leaf sales. Also used as a game cover crop. 300-450 seeds per gram. Germinates between 10 and 25°C. Sow between mid May and July, at 250-500g per hectare for a transplanted crop, or around 2 kilos per hectare for direct drilled crop. Plant spacings 60 x 60cm. Harvest in autumn and winter.

VBO20 Dwarf Green Curled (not shown)

One of the best of the open pollinated varieties, well flavoured with good cold tolerance; the variety is also suitable as winter fodder and game cover.

25g	50g	100g
£1.90	£3.40	£6.30
250g	500g	1kg
£14.60	£27.00	£50.00

VBO75 Kapral

YP

A medium early variety that is best suited to fresh consumption applications. The lower height, typically 40-60cm, makes it ideal for more exposed production areas. The dark green leaves are heavily blistered and very curly. A wide framed variety. Also makes an ideal babyleaf subject.

10g	25g	50g
£2.15	£5.00	£9.20
100g	250g	500g
£17.05	£39.40	£72.90

VBO60 Emerald Ice

Excellent eating qualities. The textured, ruffled, green leaves develop a very striking white centre as they mature. Very sweet flavour coupled with crisp texture. The ruffled leaves give great bag-fill performance. Suitable for baby, teen and bunching work; also suits multiple cuts.

50sd	100sd	250sd
£4.90	£7.80	£15.60
500sd	1,000sd	2,500sd
£24.95	£39.90	£79.70

VBO65 F1 Kapitan

A medium early hybrid, producing a sturdy plant, typically 70cm in height. The leaves are very curly with a medium green colour. Wide frame. Good tolerance of low temperatures.

100sd	250sd	500sd
£4.75	£9.50	£15.15
1,000sd	2,500sd	10,000sd
£24.25	£48.45	£155.00

VBO16 F1 Eden **NEW**

A hybrid green curly kale, with good colour and texture. The long petiole and refined leaf shape make this variety particularly suitable for bunching. Delivers excellent yields even under changeable growing conditions.

100sd	250sd	500sd
£5.05	£10.10	£16.15
1,000sd	2,500sd	10,000sd
£25.80	£51.60	£165.00

VBO70 Kadet (not shown)

A medium to late variety that normally grows to between 60-80cm tall. The medium green leaves are blistered and very curly. Narrower frame than some varieties. Highly resistant to frost.

10g	25g	50g
£2.15	£5.00	£9.20
100g	250g	500g
£17.05	£39.40	£72.90

VBO48 Red Ruble

Developed for mixed salad bags, this variety has a distinctive dark wine-red colour to its Red Russian style shaped leaves. Iron content is typically ten times higher than for other kale varieties. Ideal for babyleaf crops; intense colour fades as plant matures so less suitable for large leaf production.

25g	50g	100g
£3.90	£7.15	£13.25
250g	500g	1kg
£30.65	£56.70	£105.00

VBO12 F1 Sunbor

A distinctive curly kale. Features purple-red veins and green leaves with a purple tinge early in the season but turns a deep red colour late in the season as the temperature lowers. Late season colour is darker than Redbor. Suitable for baby, salad and full leaf production.

50sd	100sd	250sd
£5.25	£8.40	£16.80
500sd	1,000sd	2,500sd
£26.90	£43.00	£85.95

VBO10 F1 Redbor (not shown)

Strongly coloured red borecole, very frilly leaved and suited both to salad leaf and full sized production. A very attractive and worthy addition to any salad leaf production system.

50sd	100sd	250sd
£5.25	£8.40	£16.80
500sd	1,000sd	2,500sd
£26.90	£43.00	£85.95

organic seed

VOG107 F1 Redbor

50sd	100sd	250sd
£6.40	£10.25	£20.50
500sd	1,000sd	2,500sd
£32.75	£52.40	£104.70

VBO80 Scarlet (not shown)

A medium to late variety that produces tall plants, typically up to 120cm in height. The leaves are violet-green, blistered and very curly. Freezing temperatures intensify the colour to a very attractive violet blue. Highly frost resistant. Also makes a very attractive babyleaf subject.

10g	25g	50g
£2.40	£5.55	£10.20
100g	250g	500g
£18.90	£43.75	£81.00

VBO50 Red Russian

(not shown)

Blue-green colour to leaves with purple accents to the veins. Leaves are flat with frilly edges. Often used for baby leaf. Can be steamed, and used for stir-fry and salads. Colour intensifies with colder temperatures. Sweet flavour.

25g	50g	100g
£2.60	£4.80	£8.85
250g	500g	1kg
£20.45	£37.80	£70.00

VBO36 F1 Yurok

A hybrid Nero di Toscana (Black Tuscany) type. Produces very uniform and compact plants, that showed a lower incidence of disease when compared to other varieties in recent trials. Superb flavour. Attractive dark green leaves for harvest from late summer through to early winter.

50sd	100sd	250sd
£4.30	£6.90	£13.75
500sd	1,000sd	2,500sd
£22.00	£35.20	£70.35

VBO38 Black Magic

An improved Cavalo Nero (Black Tuscany type) with better uniformity and plant habit. It has striking dark, narrow, well textured leaves; with improved bolting resistance and cold tolerance.

500sd	1,000sd	2,500sd
£4.65	£7.40	£17.60
10,000sd	25,000sd	
£58.85	£137.50	

VBO40 Black Tuscany

(not shown)

Large strap-leaved plant with very dark leaves. Also known as 'Palm cabbage' because of its appearance. Well flavoured hardy plant.

25g	50g	100g
£2.95	£5.45	£10.10
250g	500g	1kg
£23.35	£43.20	£80.00

Broccoli (sprouting)

Very early season crop for fresh market sales, providing early season revenue - plants are popular as a 'cut and come again' crop, and for young plant sales. 250-400 seeds per gram. Sow April-June for transplanting June-July. Germinates at between 10 and 25°C. Harvest July - May.

VBRO16 Rudolph

Very early variety of high quality, well-coloured, good sized purple spears ideal for early fresh market sales. High yielding. Harvest November to February.

250sd	500sd	1,000sd
£4.30	£6.75	£10.70
2,500sd	10,000sd	
£25.45	£85.10	

VBRO06 F1 Red Fire

A hardy variety that produces uniform, erect plants that mature from the end of January through to the start of March. Easy to pick. Excellent colour to the medium to large sized heads.

50sd	100sd	250sd
£4.70	£7.50	£15.00
500sd	1,000sd	2,500sd
£23.95	£38.30	£76.60

For green heading Broccoli and for stem type brassica products please see Calabrese on Page 186.

VBRO32 White Eye

A quality OP variety producing white spears, for cropping in February and March. Good quality tender spears. Early to crop.

250sd	500sd	1,000sd
£4.40	£6.90	£11.00
2,500sd	10,000sd	
£26.10	£87.25	

VBRO10 Early Purple

Sprouting (not shown) YP

A popular amateur variety, for harvesting in February and March. Spears can be harvested over several weeks.

25g	50g	100g
£2.40	£4.45	£8.20
250g	500g	1kg
£18.95	£35.10	£65.00

VBRO03 F1 Burbank

A hybrid white variety. Produces a high yield of succulent spears on a strong, vigorous plant. Plant in early August for cropping between mid February and early April.

25sd	50sd	100sd
£4.20	£6.70	£10.70
250sd	500sd	1,000sd
£21.40	£34.20	£54.75

VBRO14 F1 Mendocino

An excellent early maincrop variety producing good yields of top quality, uniform purple spears. Plant in early August for cropping between mid-March and mid-April.

25sd	50sd	100sd
£4.40	£7.00	£11.15
250sd	500sd	1,000sd
£22.30	£35.70	£57.05

VBRO34 Cardinal Re-Intro

A purple variety producing large deep purple spears with very good flavour. Harvest from mid March through to mid May.

500sd	1,000sd	2,500sd
£6.75	£10.70	£25.45
10,000sd	25,000sd	
£85.10	£198.75	

VBRO05 F1 Claret

Maturing in April. A hybrid variety producing thick spears with good quality and colour.

25sd	50sd	100sd
£4.30	£6.90	£11.00
250sd	500sd	1,000sd
£22.00	£35.20	£56.30

VBRO28 Purple Heart NEW

A high quality open pollinated selection that was bred to bridge the gap between the long season and summer varieties. The plants yield large, purple-headed spears from early May onwards. The spears can be harvested over a longer window than with some hybrid alternatives.

50sd	100sd	250sd
£4.15	£6.60	£13.15
500sd	1,000sd	
£21.05	£33.60	

VBRO35 Summer Purple

Summer cropping variety, from late June to October, depending upon sowing date and location. Excellent colour and well formed spears.

250sd	500sd	1,000sd
£4.30	£6.75	£10.70
2,500sd	10,000sd	
£25.45	£85.10	

VBRO08 F1 Santee

Successor to the excellent variety F1 Bordeaux, this variety requires no cold exposure. Very uniform habit. Transplant from April to August, harvested from June to March.

25sd	50sd	100sd
£3.90	£6.25	£9.95
250sd	500sd	1,000sd
£19.90	£31.75	£50.80

organic seed

VOG116 F1 Santee

25sd	50sd	100sd
£6.90	£11.00	£17.60
250sd	500sd	1,000sd
£35.15	£56.20	£89.90

VBRO22 F1 Purple Rain

An excellent hybrid variety that crops through the summer and autumn. Good heat tolerance. Heavy yield of flavoursome spears with a deep purple colour. Sow successionaly from March to June for cropping between July and November.

25sd	50sd	100sd
£3.90	£6.25	£9.95
250sd	500sd	1,000sd
£19.90	£31.75	£50.80

Brussels Sprouts

A mainstay of the winter vegetable cropping programme, used for processing and fresh market either loose or on the stalk; ideal for roadside sales. Approximately 250 seeds per gram. Sow early varieties mid February into modules under cold glass. Sow main season varieties late March to end of April. Germinates between 10 and 25°C. Seed requirement approximately 500g per hectare; with a target plant population of around 27,000 per hectare. Spacing 60 x 60cm. Harvest from mid August to mid March.

Hybrid: Early Varieties

VBR058 **F1 Abacus**

(not shown)

A superb variety combining early cropping with uniform cylindrical button development. Very good standing ability, and very uniform quality and grade out. Ideal for February sowings and autumn sown over-wintered transplant crops.

50sd	100sd	250sd
£8.15	£13.00	£26.00
500sd	1,000sd	2,500sd
£41.55	£66.45	£132.85

VBR062 **F1 Crispus**

(not shown)

A clubroot resistant Maximus type variety. Attractive dark colour to buttons, which have a small butt. Features excellent standing ability and good vigour. The plants are slightly taller and crop slightly earlier than Maximus.

25sd	50sd	100sd
£7.35	£11.75	£18.80
250sd	500sd	1,000sd
£37.60	£60.10	£96.15

VBR056 **F1 Churchill**

A first early variety, maturing late August to October. Produces a good yield of tight, evenly spaced buttons with attractive dark green colour and superb flavour.

250sd	500sd	1,000sd
£8.25	£12.90	£20.55
2,500sd	10,000sd	25,000sd
£48.80	£163.20	£381.25

VBR060 **F1 Maximus**

A relatively early variety that can also be sown later for midseason and pre-Christmas harvest. Medium vigour. Produces a high yield of round, smooth, very dense buttons which are well spaced on the stalk. A high percentage of marketable sprouts at harvest period. Shows tolerance of ring spot, powdery mildew and white blister. With good shelf life and well flavoured sweet sprouts.

25sd	50sd	100sd
£4.85	£7.75	£12.40
250sd	500sd	1,000sd
£24.75	£39.60	£63.30

VBR070 **F1 Dagan**

An early variety, maturing from September to early November depending upon production location. Fresh green colour to buttons. Good standing ability.

50sd	100sd	250sd
£6.30	£10.10	£20.20
500sd	1,000sd	2,500sd
£32.25	£51.60	£103.15

organic seed

VOG112 **F1 Nautic**

(not shown)

A tall early to mid season hybrid giving a high yield of smooth round buttons. Good standing ability. Resistant to white blister, ring spot and powdery mildew. Harvest October to early December.

25sd	50sd	100sd
£6.15	£9.85	£15.75
250sd	500sd	1,000sd
£31.50	£50.35	£80.50

VBR148 **F1 Bosworth**

(not shown)

Second early variety for late autumn to Christmas production. Excellent holding ability and high yields. Well spaced buttons with sweet flavour. Suits loose or complete stalk sales.

250sd	500sd	1,000sd
£8.25	£12.90	£20.55
2,500sd	10,000sd	25,000sd
£48.80	£163.20	£381.25

VBR064 **F1 Brigitte**

A very vigorous variety that can be used on low or high fertility soils with a minimal risk of lodging. Suitable for use on light to medium soils. Produces a very high proportion of medium sized buttons. Excellent flavour.

50sd	100sd	250sd
£4.70	£7.50	£15.00
500sd	1,000sd	2,500sd
£23.95	£38.30	£76.60

Mid Season Varieties

VBR068 **F1 Brest** (not shown)

A tall variety with a high yield of medium sized buttons, which are very round with a small butt. Suitable for cropping on less fertile soils and low fertiliser systems. Good resistance to leaf and button diseases. Excellent flavour.

50sd	100sd	250sd
£6.05	£9.65	£19.25
500sd	1,000sd	2,500sd
£30.80	£49.25	£98.45

VBR090 **F1 Brel** **NEW**

A mid-season variety for harvesting in November and December, but will hold until early January in some regions. Tall stalk with a very high yield of buttons, that have a mild sweet taste. Small tops. Performs well in less fertile soils.

25sd	50sd	100sd
£3.90	£6.25	£9.95
250sd	500sd	1,000sd
£19.90	£31.75	£50.80

VBR110 **F1 Trafalgar**

(not shown)

A tall variety for the November and December cropping period. Plant stands erect with strong root system. Medium size smooth buttons with excellent flavour.

250sd	500sd	1,000sd
£8.25	£12.90	£20.55
2,500sd	10,000sd	25,000sd
£48.80	£163.20	£381.25

£6.90	£11.00	£17.60
250sd	500sd	1,000sd
£35.15	£56.20	£89.90

VBR142 F1 Brechin

A high yielding variety that produces uniform sized, smooth, deep green buttons. Ideal for harvest between mid December and late February. Small tops. Very good holding ability. Good resistance to light leaf spot.

50sd	100sd	250sd
£7.20	£11.50	£22.95
500sd	1,000sd	2,500sd
£36.65	£58.65	£117.20

VBR144 F1 Ruby Crunch **NEW**

Bred to cover the all important Christmas market, this variety produces exceptionally uniform, sweet buttons that are easily picked. Good holding ability. Colder weather intensifies the colour. Best steamed or roasted to preserve colour when cooking.

25sd	50sd	1000sd
£4.90	£7.85	£12.55
250sd	500sd	1,000sd
£25.05	£40.10	£64.10

Open Pollinated Varieties

VBR160 Bedford Darkmar 21 (not shown)

An open pollinated type which is well suited to plant sales, less uniform and vigorous than the hybrid types.

10g	25g	50g
£1.90	£4.05	£7.50
100g	250g	500g
£13.90	£32.10	£59.40

VBR180 Evesham Special (not shown)

Well-known variety with amateur growers, which lacks the vigour and uniformity of the modern hybrid varieties. Ideal for the plant sales market.

10g	25g	50g
£1.90	£4.05	£7.50
100g	250g	500g
£13.90	£32.10	£59.40

VBR175 Red Ball (not shown)

Reasonable quality, red buttons from this OP variety. Performance is better than the standard red variety Rubine. Colour develops better with cold weather.

500sd	1,000sd	2,500sd
£4.80	£7.60	£18.10
10,000sd	25,000sd	
£60.50	£141.25	

Flower Sprout

VBR190 Kalettes Garden

Also known as Flower Sprout. An interesting combination of Brussels sprout and kale, producing attractive 'kale florets' on a sprout stalk. Supplied as a combination of green, purple and bi-coloured (green/purple) varieties. Grow as per mid season Brussels Sprout.

25sd	50sd	1000sd
£5.95	£9.45	£15.15
250sd	500sd	1,000sd
£30.25	£48.40	£77.40

Cabbage

Cabbage can be produced throughout the year, providing growers with a continuous supply to their outlets. Faster-maturing spring greens are ideal for utilising redundant polytunnel or glasshouse space over the winter months. Cabbages are popular for young plant sales to home gardeners. 200-400 seeds per gram. Germinates between 10 and 25°C. Sowing and harvesting times as given in the charts. Seed rate approx. 600g per hectare transplanted, 1.25-2.5 kilos per hectare direct sown. Spacings 30 x 60cm, up to 60 x 90cm.

Cabbage (Pointed)

Hybrid Varieties

VCA010 F1 Winterjewel

An excellent hybrid that is ideal for the overwinter production of greens. Very compact and slow to heart. Best suited to April to June harvest but can also be used in other seasons. Ideal for successive sowings. Produces a large number of evenly sized, smooth, dark green heads. High tolerance of bolting and stem-extension; excellent basal quality.

250sd	500sd	1,000sd
£4.40	£6.90	£11.00
2,500sd	10,000sd	25,000sd
£26.10	£87.25	£203.75

VCA012 F1 Tantour

A well shaped hybrid suitable for greens production during the spring, summer and autumn, and hearts production in the spring and autumn. Attractive dark green outer leaves with bright green inner head. Inner leaves are tender and crunchy, with a sweet, mild cabbage flavour. Uniform with good field holding.

50sd	100sd	250sd
£4.15	£6.60	£13.15
500sd	1,000sd	2,500sd
£21.05	£33.60	£67.20

VCA050 F1 Duncan

Produces a high percentage of the yield marketable over 70 grams, this variety features good base quality, uniformity and colour. Produces solid hearts rapidly, and resistant to bolting. For summer to autumn greens production.

50sd	100sd	250sd
£4.90	£7.80	£15.60
500sd	1,000sd	2,500sd
£24.95	£39.90	£79.70

VCA022 F1 Verve **NEW**

A vigorous all year round greens variety, with thick strong leaves that hold their colour well after harvest. Resistance to anthocyanin and yellow leaf. Typical head weight is between 400-500g. Very slow to heart allowing for flexible programming. Good for both bagging and processing.

100sd	250sd	500sd
£3.85	£7.65	£12.25
1,00sd	2,500sd	10,000sd
£19.55	£39.10	£125.00

VCA020 F1 Summerjewel

A uniform variety that produces heads for cropping in the summer and autumn from spring and early summer sowings. Compact frame typically around 250 grams. Smooth, dark green leaves with a neat, non-stalky base. Slow to heart.

250sd	500sd	1,000sd

Cabbage (Ballhead)

Kalibos

VCA245 Kalibos

A pointed cabbage variety with distinctive red leaves. Suited to 'greens' and hearted production. Suitable for autumn cropping. Best used raw as a salad cabbage (leaves do not hold colour or structure when cooked).

10g	25g	50g	100g
£3.60	£8.30	£15.35	£28.35
250g	500g	1kg	
£65.65	£121.50	£225.00	

Sunta

VCA105 F1 Sunta**YP**

A fast growing variety that matures after 55-60 days. Produces round heads with an average weight of 1-1.3kg. Compact frame, uniform growth, with attractive shiny green colour. Tender, sweet texture. Strong bolting resistance. Suited to early production under fleece and standard open field cropping.

250sd	500sd	1,000sd
£5.35	£8.35	£13.25
2,500sd	10,000sd	
£31.55	£105.40	

Magnus Cresco

VCA097 F1 Magnus Cresco

Early maturing, round, green variety, producing dense, compact round heads. Attractive smooth green leaf structure with good holding ability. Typically matures 60-65 days after transplanting. Good resistance to bolting.

£6.15	£12.25	£19.55
1,000sd	2,500sd	
£31.30	£62.50	

VCA145 F1 Marabel

A quality January King type that produces large, dense heads. High yielding with very good standing ability.

100sd	250sd	500sd
£4.20	£8.40	£13.45
1,000sd	2,500sd	
£21.50	£43.00	

Calabrese

Can be grown over a long season, often succeeding where other brassicas fail. Suitable for fresh sales and prepack, also once the main heads are removed, small sideshoots form, which are ideal for florets. 250-400 seeds per gram. Sow March-July, sowing rate 500g per acre. Germinates between 7 and 30°C. Plant out April-July at around 23 x 30cm, for harvesting June-December. Later maturity is possible in milder climates. Stated maturity times are from transplant to harvest

Hybrid Varieties

VCA325 F1 Marathon

(not shown)

YP

Produces small evenly sized buds with good bud colour, deep well formed heads suitable for early and late sowings, as well as for maincrop. Tolerant of downy mildew, a good choice for plant sales. NIAB listed variety. Matures after 75-95 days.

250sd	500sd	1,000sd
£4.75	£7.40	£11.80
2,500sd	10,000sd	
£28.00	£93.65	

VCA330 F1 Ironman

An excellent variety for harvesting late June - November. Excellent quality heads with very good dome shape. Fine bead, good head weight and very uniform. Suitable for processing and fresh market use. Excellent shelf-life. Matures after 70-80 days.

250sd	500sd	1,000sd
£7.85	£12.25	£19.50
2,500sd	10,000sd	
£46.40	£155.15	

VCA332 F1 Titanium

(not shown)

A development from Ironman, this variety produces a smoother, taller stem for easier harvesting (both hand and mechanical). Dense, smooth heavy crown with a fine bead size. Improved shelf life and field holding. Maturing after approximately 70-80 days.

£41.45	£82.85	

VCA322 F1 Kimono

An early maturing variety, typically 80-85 days after transplanting. Produces a highly uniform crop that is easy to harvest. Large dark green heads, with good density and weight. Excellent stem quality.

250sd	500sd	1,000sd
£7.70	£12.05	£19.20
2,500sd	10,000sd	
£45.60	£152.50	

VCA334 F1 Steel

Produces a uniform crop with domed shaped heads. Solid crown with a fine bead. Also suitable for smaller head programmes. Good tolerance to hollow stem, crown rot and systemic mildew. A good follow on to Ironman. Maturing after approximately 80-90 days.

100sd	250sd	500sd
£5.35	£10.70	£17.10
1,000sd	2,500sd	
£27.35	£54.70	

VCA345 F1 Stromboli

(not shown)

A vigorous variety producing good quality, dark green heads. Nice dome to heads with long branched florets. Suitable for both standard and overwintered module raised crops. Excellent resistance to blindness. Matures after 100-110 days.

250sd	500sd	1,000sd
£6.90	£10.80	£17.15
2,500sd	10,000sd	
£40.80	£136.45	

VCA328 F1 Zen (not shown)

Maturing after approximately 90-100 days, this variety has excellent high domed, dark green heads, with a solid stem. Easy to trim. Tolerant of downy mildew. Crops best in autumn, from a June planting.

250sd	500sd	1,000sd
£5.25	£8.15	£13.00
2,500sd	10,000sd	
£30.90	£103.30	

VCA320 F1 Monclano

A robust variety bred to be resistant to both clubroot and mildew. Tight domed head with a good bead; reduced incidence of hollow stem. Heavy yields with good flavour. Successional plantings give cropping from August through to November.

Stem Type Varieties

Delistem F1 Series

A group of varieties developed to produce edible stem-type brassicas. Can be grown as per normal calabrese but pinching out the first head at an early stage encourages side shoot development.

VCA342 Kale

Technically a sprouting kale, this variety produces dark green spears on edible stems. The stems can be marketed with or without the side leaves, and both can be eaten. Maturing after approximately 90-100 days.

50sd	100sd	250sd
£5.25	£8.40	£16.80
500sd	1,000sd	
£26.90	£43.00	

VCA344 Green **NEW**

The closest product to the now discontinued Sticcoli, this variety produces long, tender stems, with good colour and sweet flavour. Matures after approximately 70-80 days.

50sd	100sd	250sd
£5.25	£8.40	£16.80
500sd	1,000sd	
£26.90	£43.00	

VCA346 White **NEW**

Derived from cauliflower breeding, this variety produces multiple 'Broccoli style' side stems. The long and slender florets have a tender texture and good flavour. Matures after approximately 60-70 days.

25sd	50sd	100sd
£4.75	£7.55	£12.10
250sd	500sd	
£24.15	£38.60	

Carrot

Another all-season crop offering various sales options - bunching, prepack, loose and processing. Long shelf life and good storage/handling abilities make carrots a good choice for the grower. 800-900 seeds/g. Germinates between 8 and 30°C. Spacing 2.5-7.5cm within, 40-75cm between rows.

Hybrid Varieties

VCA368 F1 Mercurio

A cylindrical, early bulking Nantes variety for first season harvests from June to August. Flexible and uniform, with well-attached foliage. Smooth roots with good colour. High level of bolting tolerance. Ideal for bunching.

2,500sd	5,000sd	10,000sd

£16.20	£37.75	

VCA365 F1 Laguna

(not shown)

A first early Nantes type ideal for harvesting from June through to September. Produces cylindrical roots, typically 18-20cm long and 35-45mm in diameter. Good texture and flavour, with attractive deep colour. Typical maturity 100 days. Suitable for bunching and fresh market sales.

2,500sd	5,000sd	10,000sd
£3.80	£6.45	£12.10
25,000sd	50,000sd	
£28.15	£52.25	

VCA375 F1 Flyaway

(not shown)

Well known for its tolerance of Carrot Root Fly. Whilst not resistant, it is not attractive to the egg laying flies, and the maggots do not grow well on it. Flyaway has good shape, good colour and a smooth skin.

5,000sd	10,000sd	25,000sd

Carrot (contd.)**Hybrid Varieties (contd.)****VCA416 F1 Sugarsnax 54**

An Imperator variety that produces long, tapered roots, up to 25cm in length. The extra sweet flavour and high beta carotene content makes this variety ideal for both processing and fresh market applications. Good colour and smooth texture.

2,500sd	5,000sd	10,000sd
£5.00	£8.55	£16.05
25,000sd	50,000sd	
£37.40	£69.50	

organic seed**VOG175 F1 Napoli (not shown)**

A good quality Nantes variety, ideal for bunching and fresh ware use. The roots are slightly tapered, with good internal and external colour. Dark green foliage and strong tops. Approximately 90 days from sowing to maturity. A very flexible variety that can be used for very early to late sowings.

2,500sd	5,000sd	10,000sd
£7.20	£12.355	£23.10
25,000sd	50,000sd	
£53.90	£100.05	

**VCA428 F1 Norwich**

An excellent Nantes variety featuring good foliage vigour, upright habit and outstanding health. Produces bulky, smooth and cylindrical roots, typically 17-20cm in length. Approximately 104 days from sowing to maturity; potential for strawed overwintering. Ideal for pre-pack, ware and bunching. Performed well in recent trials.

2,500sd	5,000sd	10,000sd
£4.45	£7.65	£14.30
25,000sd	50,000sd	
£33.30	£61.85	

**VCA382 F1 Resistaflly**

Nantes type with good tolerance of Carrot Root Fly. Top quality cylindrical roots with good colour and skin quality.

2,500sd	5,000sd	10,000sd
£3.65	£6.20	£11.65
25,000sd	50,000sd	
£27.15	£50.35	

**VCA405 F1 Charisma**

A hybrid Chantenay type, suitable for both standard and high density production. Triangular shaped root with blunt tip; standard production gives roots typically 15cm in length. High resistance to bolting. Sow at 3.5 million seeds per acre for high density work.

5,000sd	10,000sd	25,000sd
£5.10	£9.60	£22.30
50,000sd	100,000sd	
£41.45	£76.50	

**VCA377 F1 Maestro**

An excellent maincrop Nantes type which shows good establishment and early vigour. The tops are very clean, showing tolerance of Alternaria, and are strongly attached allowing very late top lifting. Roots are smooth, very uniform, and tolerant of violet root rot, crown rot and cavity spot. Suitable for prepack, ware and bunching.

2,500sd	5,000sd	10,000sd
£4.85	£8.25	£15.45
25,000sd	50,000sd	
£36.05	£66.95	

**VCA384 F1 Nazareth**

A maincrop variety that features outstanding, healthy and vigorous foliage. The Nantes type roots are uniform with bright colour and good texture. Well buried roots allow for potential frost tolerance.

2,500sd	5,000sd	10,000sd
£5.20	£8.90	£16.65
25,000sd	50,000sd	
£38.80	£72.05	

**organic seed****VOG178 F1 Miami**

Versatile, consistent and reliable variety, with vigorous early growth. Features healthy, upright foliage and strong, high quality, cylindrical roots. Attractive roots with excellent flavour. Suitable for use over a broad production window.

2,500sd	5,000sd	10,000sd
£6.60	£11.30	£21.20
25,000sd	50,000sd	
£49.45	£91.80	

VCA402 F1 Eskimo (not shown)

A late maincrop type with very strong roots, giving excellent resistance to breakage and splitting. Good colour and excellent flavour. Strong tops for lifting. Intermediate resistance to cavity spot and very good resistance to frost damage.

2,500sd	5,000sd	10,000sd
£5.05	£8.65	£16.20
25,000sd	50,000sd

Cauliflower

Can be harvested during most of the year. Good shelf life and storage possibilities - also fresh market and young plant sales. Specialist crops such as Romanesco types are increasing in popularity due to their raised profile; cauliflowers can be added into production programmes following on from other main season crops. 250-450 seeds per gram. Germinates between 8 and 30°C. Spacing early summer types 46 x 61cm (41,000 plants per hectare), others 61 x 61cm (27,000 per hectare).

Summer and Autumn Varieties

VCA488 F1 Nautilus (not shown)
Gives high quality, very round, pure white, solid heavy curds. Sow February-May for mid-June-October cropping.

VCA550 F1 Clapton (not shown)

The first commercially available variety with clubroot resistance. 85 day cycle. Very erect habit and a well wrapped curd.

25sd	50sd	100sd
£8.55	£13.70	£21.85
250sd	500sd	1,000sd
£43.70	£69.90	£111.75

VCA462 Amazing (not shown)

A well maintained open pollinated variety producing a good yield of first class curds during summer and early autumn.

250sd	500sd	1,000sd
£5.40	£8.45	£13.45
2,500sd	10,000sd	
£32.00	£107.00	

VCA470 F1 Seoul

A 75-85 day summer and autumn variety that produces very white, very dense curds. Each curd has a high yield of compact florets, with short petioles. Good vigour. Ideal for fresh market and cut mixed vegetable packs.

50sd	100sd	250sd
£7.75	£12.40	£24.75
500sd	1,000sd	2,500sd
£39.60	£63.30	£126.60

VCA530 F1 Boris

Excellent summer and early autumn variety with good vigour, and a compact, erect leaf habit to aid packing. Very dense curds with good holding ability. 95-105 day maturity for spring sown crops; 85-90 day maturity for crops sown in October and over-wintered in modules under glass.

25sd	50sd	100sd
£5.40	£8.60	£13.75
250sd	500sd	1,000sd
£27.50	£44.00	£70.35

VCA532 F1 Toledo

A strong, vigorous variety with solid compact heads. Excellent quality curd. An ideal autumn cropping variety. Matures approximately 90 days after transplanting.

25sd	50sd	100sd
£4.95	£7.90	£12.60
250sd	500sd	1,000sd
£25.20	£40.30	£64.50

VCA478 F1 Skywalker

An excellent autumn variety, with a 95-110 maturity time. Deep white curd that is well protected. Very clean base. Ideal for October harvesting.

25sd	50sd	100sd
£5.10	£8.15	£13.00
250sd	500sd	1,000sd
£26.00	£41.55	£66.45

organic seed

VOG195 F1 Skywalker

25sd	50sd	100sd
£5.75	£9.20	£14.70
250sd	500sd	1,000sd
£29.35	£46.90	£75.05

VCA468 F1 Bodilis

Produces dense curds with outstanding colour and firmness. Ideal for cutting between mid September and early November depending upon locality. Vigorous plants with good cover, giving protection from early frosts. High resistance to leaf diseases. 95-110 day variety.

25sd	50sd	100sd
£5.35	£8.50	£13.60
250sd	500sd	1,000sd
£27.20	£43.50	£69.55

VCA480 F1 Rafale

(not shown)

A compact variety with very uniform, pure white curds. Easy to harvest, with nice round frame. Ideal for fresh market sales. Suitable for high density planting.

25sd	50sd	100sd
£5.10	£8.15	£13.00
250sd	500sd	1,000sd
£26.00	£41.55	£66.45

VCA460 F1 Belot

Solid curd with smooth texture - a strong frame with excellent leaf protection. Very high percentage of Class 1 heads.

25sd	50sd	100sd
£5.45	£8.70	£13.90
250sd	500sd	1,000sd
£27.80	£44.45	£71.15

VCA493 F1 Optimist (not shown)

Hybrid autumn giant type - hardy, with good disease resistance. Performs well even in cold, wet conditions. High quality, dense packed curds, good foliage protection and easy to cut.

25sd	50sd	100sd
£6.35	£10.15	£16.20
250sd	500sd	1,000sd
£32.40	£51.80	£82.85

Winter Varieties

VCA545 **F1 Triumphant**
Roscoff x autumn hybrid. Robust, semi-erect foliage gives attractive appearance and good protection to dense curds. A mid-July planting gives cropping from Christmas to mid-January in Kent, and mid-December to mid-January in Cornwall.

25sd	50sd	100sd
£6.55	£10.45	£16.65
250sd	500sd	1,000sd
£33.30	£53.25	£85.20

organic seed
VOG207 **F1 Medaillon**
A Roscoff hybrid producing good quality heads with nice curd. For harvest February to mid-March.

25sd	50sd	100sd
£6.30	£10.05	£16.05
250sd	500sd	1,000sd
£32.10	£51.30	£82.10

VCA507 **F1 Redoubtable**
For production throughout the UK. Uniform, dense heads which are larger than most other Roscoff types. Harvest from January to March depending on location and sowing date. Very vigorous with good habit.

25sd	50sd	100sd
£5.95	£9.45	£15.15
250sd	500sd	1,000sd
£30.25	£48.40	£77.40

VCA682 **F1 Mengwenn**
A high performing variety for harvesting from late February (Cornwall) to early April (Lincolnshire). Vigorous plants with good wrap even when the curd is fully mature. Dark green foliage on compact frame. Intermediate resistance to ringspot.

25sd	50sd	100sd
£6.35	£10.15	£16.20
250sd	500sd	1,000sd
£32.40	£51.80	£82.85

VCA675 **F1 Gerona**
A strong, healthy variety with good cover to the attractive white curd. Highly recommended.

25sd	50sd	100sd
£5.80	£9.30	£14.85
250sd	500sd	1,000sd
£29.65	£47.40	£75.85

VCA670 **Aalsmeer (not shown)**
A vigorous variety with good quality curds which are well protected. A Walcheren winter type, therefore more hardy than the Roscoff types.

250sd	500sd	1,000sd
£8.55	£13.30	£21.20
2,500sd	10,000sd	
£50.40	£168.55	

VCA492 **F1 Clipper**
A spring into summer cropping variety with good vigour. Features an erect habit with a taller stem for easy cutting. White curd with good density for an early type. Maturity approximately 87-97 days from transplant. Sow into modules in October, plant out March and cut May-June.

25sd	50sd	100sd
£5.35	£8.50	£13.60
250sd	500sd	1,000sd
£27.20	£43.50	£69.55

Cauliflower (contd.)

Unusual Varieties

VCA502 F1 Celio (not shown)
Early large framed Romanesco type. Produces very high quality, pinnated heads in an attractive green colour.

25sd	50sd	100sd
£5.75	£9.20	£14.70
250sd	500sd	1,000sd
£29.35	£46.90	£75.05

Navona

VCA515 F1 Navona

A Romanesco cauliflower producing a uniform crop of dark green, turreted curds with no bracts. It is a vigorous variety with good field holding properties.

25sd	50sd	100sd
£6.60	£10.55	£16.80
250sd	500sd	1,000sd
£33.65	£53.75	£86.00

organic seed

VOG202 F1 Veronica

(not shown)

An excellent Romanesco variety for harvesting in late summer and autumn. Tolerant of riceyness and red discolouration.

25sd	50sd	100sd
£5.95	£9.45	£15.15
250sd	500sd	1,000sd
£30.25	£48.40	£77.40

VCA720 Minaret

(not shown)

An open pollinated Romanesco variety producing reasonable mid-green coloured heads. Not as uniform as the hybrid versions.

5g	10g	25g
£3.00	£5.50	£12.70
50g	100g	250g
£23.50	£43.50	£100.60

VCA520 F1 Lazio (not shown)

A Romanesco cauliflower variety developed to extend the cropping period; will go through to late December in milder areas. Has a semi-erect habit, with good vigour and high mildew resistance. Typical maturity is 125-135 days from transplant. A good variety to follow F1 Navona.

25sd	50sd	100sd
£6.95	£11.10	£17.75
250sd	500sd	1,000sd
£35.45	£56.70	£90.65

AMO125

VCA525 F1 AMO 125

A revolutionary bright orange Romanesco variety. The turreted curd remains orange even when cooked. Vigorous habit; strong against mildew. Maturity 125 days.

25sd	50sd	100sd
£11.65	£18.65	£29.80
250sd	500sd	1,000sd
£59.60	£95.30	£152.40

VCA475 F1 Graffiti

(not shown)

This stunning purple coloured cauliflower is a great improvement on the older purple types. The colour intensifies with exposure to light. An open plant habit should be encouraged in cultivation; this can be achieved with lower than normal nitrogen inputs during production.

25sd	50sd	100sd
£9.70	£15.50	£24.75
250sd	500sd	1,000sd
£49.50	£79.15	£126.60

VCA485 F1 Sunset

(not shown)

One of the best orange varieties. Performs best when used for September and October harvesting. Colour most pronounced when used for 'baby' veg work, but colour still vibrant in full size heads. Small compact frame.

25sd	50sd	100sd
£9.10	£14.55	£23.25
250sd	500sd	1,000sd
£46.45	£74.25	£118.80

Trevi

VCA508 F1 Trevi

Uniform, lime green heads contrasting well with Graffiti in mixed packs, or attractive on its own. Plant from June, heading September-October.

25sd	50sd	100sd
£5.95	£9.45	£15.15
250sd	500sd	1,000sd
£30.25	£48.40	£77.40

Celeriac

Ideal for stewpacks and for fresh sales. Long storage and shelf life. Relatively easy to produce, with good examples commanding a premium. Suited to fresh market and processing.

Approx. 2500 seeds per gram - produces approximately 1000 plants per gram. Germination temperature optimum 20°C, minimum 18°C. Sow into modules between February - April, then transplant at around 18 per m² (under glass), 10 per m² (for fresh market, under fleece), 6 per m² outdoors without protection.

Monet

VCE02 F1 Monet

An early hybrid variety, suitable for both fresh sales and storage uses. Resistant to bolting; tolerant of Septoria.

250sd	500sd	1,000sd
£5.00	£9.45	£18.00
2,500sd	5,000sd	
£40.50	£79.40	

pelleted seed

VCE08 Prinz (not shown)

Top quality, light skinned variety, with excellent bolting resistance, so it is suitable for early cultivation under glass, plastic and fleece, as well as field cultivation. Ideal for fresh sales and processing.

100plt	250plt	500plt	1,000plt
£4.90	£10.30	£18.90	£33.75

organic pelleted seed

£5.95	£12.55	£23.10	£41.25

VCE10 Giant Prague

(not shown)

Well shaped smooth celeriac, vigorous roots, upright foliage. Round, relatively smooth skin with good inner quality. Suited to fresh market and storage.

10g	25g	50g
£2.30	£5.35	£9.90
100g	250g	500g
£18.30	£42.30	£78.30

Celery

Self-blanching types are now a mainstay of salad vegetables. Ideal for fresh market sales, long standing crops with high yield per acre. Can also be sold as a young plant item. 3,000-4,000 seeds per gram. Sow 250g per hectare. Sow under heated glass (germinates 10-22°C) from early February, transplant under protection in April, spacing 25 x 30cm, or into cold glass (mild heat) in March, to plant out May-early June. Sow maincrop March-April in cold frames to plant out May to June. Do not cover seed except for primed pellets. To maintain viability primed pellets must be kept cool.

VCE15 F1 Victoria (not shown)

UK-bred. Attractive mid-green colour, tall with fleshy stalks. Self blanching, erect habit.

250sd	500sd	1,000sd
£4.65	£7.30	£11.60
2,500sd	10,000sd	
£27.55	£92.05	

primed pelleted seed

VCE35 F1 Victoria

100plt	250plt	500plt	1,000plt
£6.70	£14.10	£25.90	£46.25

Greensleeves

VCE70 F1 Greensleeves

Produces a high yield of bright green sticks, with excellent flavour and reduced stringiness. Good bolting tolerance in early crops and cold tolerance in late crops. Good holding ability.

500sd	1,000sd	2,500sd
£3.60	£5.75	£13.60
10,000sd	25,000sd	
£45.50	£106.25	

organic seed

VOG235 Tall Utah

(not shown)

A tall, crisp, stringless green celery. Tightly folded hearts and thick, well rounded stalks.

5g	10g	25g
£2.05	£3.75	£8.65
50g	100g	
£16.00	£29.60	

VCE20 Celebrity (not shown)
Self blanching type, short stalks that hold well. Slightly quicker to mature than Victoria. Very little stringiness for a self-blanching type.

1g	2½g	5g
£5.70	£13.15	£24.35
10g	25g	50g
£45.10	£104.35	£193.20

VCE40 Golden Self Blanching (not shown)

Yellow to green stalks which, if block-planted will self blanch **YP**

5g	10g	25g
£2.15	£4.00	£9.20
50g	100g	250g
£17.05	£31.50	£72.90

VCE45 Green Soup

(not shown)

A dark green variety of 'cutting' or 'soup' celery.

10g	25g	50g
£1.90	£3.70	£6.80
100g	250g	500g
£12.60	£29.20	£54.00

Red Soup

VCE50 Red Soup

A good quality selection of this popular type of 'cutting' or 'soup' celery.

10g	25g	50g
£2.40	£5.55	£10.20
100g	250g	500g
£18.90	£43.75	£81.00

Chicory

Approximately 600 seeds per gram. Sow May-June, thinning to around 20cm. Harvest October to December, trim off the leaves, then store in a frost-free place. When required for forcing, place several in a large pot, exclude light, and force at room temperature for around 3-4 weeks until ready.

VCH10 Brussels Whitloof (not shown)

Large, thick-stemmed leaves; stalks and leaves are used for salads when blanched.

25g	50g	100g
£1.90	£3.40	£6.30
250g	500g	1kg
£14.60	£27.00	£50.00

organic seed

VOG238 Brussels Witloof (not shown)

5g	10g	25g
£1.90	£3.10	£7.20
50g	100g	250g
£13.30	£24.60	£56.90

Cover Crops & Green Manures

Cover crops and green manures are plants grown to improve soil structure, improve the nutrient content of the soil, suppress weed development, reduce soil erosion and reduce the incidence of some pests, such as nematodes. The term cover crop is often used for seed mixes while green manures are often referred to as straight products. The term catch crop is also used, but essentially they all do the same job. These products can be incorporated into a crop rotation programme.

The choice of product will depend upon local climate and soil type, time of year, length of gap in production, the aim of the treatment and the follow on crop.

Straights

VGR10 Alfalfa (not shown)

A hardy perennial normally grown as a short-term (2-3 month) green manure. Adds bulk plus some nitrogen fixation to the soil. Sow between April and July at a rate of 10kg/acre (2.5 grams/sqm). Avoid acidic or waterlogged soils.

250g	500g	1kg	2½kg
£8.00	£12.75	£20.00	£44.15

Buckwheat

VGR12 Buckwheat

A rapidly establishing weed suppressor that is effective at rejuvenating low fertility soils. Can also attract beneficial insects depending upon stage at turn in. For sowing April-August at 40kg/acre (10 grams/sqm). Height typically 60-80cm. Not frost hardy.

250g	500g	1kg	2½kg
£3.45	£5.55	£8.70	£19.15

VGR22 Forage Pea (not shown)

Nitrogen-fixing plant, up to one metre tall. For over-wintering. Sow September-November at 35kg per acre (8.75 grams/sqm).

1kg	2½kg	5kg	10kg
£5.35	£11.80	£21.75	£40.00

VGR25 Forage Rye (not shown)

For August-November sowings at 35kg/acre (8.75 grams/sqm). Best suited for turning in early April or May. Suitable for most soil types, and copes well with heavier soils.

1kg	2½kg	5kg	10kg
£6.00	£13.25	£24.50	£45.00

VGR27 Mustard, Brown (not shown)

A quickly establishing green manure that can help reduce Potato Cyst Nematodes when turned in. Also good for weed suppression. For sowing early March-September at 18kg/acre (4.5 grams/sqm). Height typically 60-90cm. More frost hardy than other mustards.

250g	500g	1kg	2½kg
£4.55	£7.25	£11.35	£25.00

VGR28 Mustard, White

(not shown)

A quality Mustard variety that develops a high level of green matter and residual fibre. For sowing early March-September at 18kg/acre (4.5 grams/sqm). Quick growing, to a height of 60-90cm, good standing ability. Turn in before flowering.

500g	1kg	2½kg	5kg
£5.55	£8.70	£19.15	£35.35

Phacelia tanacetifolia

VGR30 Phacelia

Tanacetifolia

For sowing March-September. Quick-maturing, with dense plant foliage, height up to one metre. Recommended sowing rate is 4kg/acre (1 gram/sqm). Turn in prior to flowering.

250g	500g	1kg	2½kg
£10.65	£17.00	£26.70	£58.85

VGR35 Red Clover (not shown)

This provides excellent nitrogen fixation performance. Best on good loams. Sow April-August. Sow at 8kg/acre (2 grams/sqm).

250g	500g	1kg	2½kg
£8.50	£13.60	£21.35	£47.10

VGR38 White Clover

(not shown)

A blend of broad, small and medium varieties, providing a long growth period and good regeneration rate. Sow April-August. Sow at 4kg/acre (1 gram/sqm).

250g	500g	1kg	2½kg
£8.50	£13.60	£21.35	£47.10

VGR40 Winter Tares

(not shown)

Also known as Purple Vetch. A nitrogen-fixing plant for sowing at 22kg/acre (5.5 grams/sqm), March-May or July-September for over-wintering. Not recommended for acidic soils.

500g	1kg	2½kg	5kg
£5.10	£8.00	£17.65	£32.65

Mixes

VCO010 Green Mix (not shown)

A rapidly establishing, high biomass, mix for ground cover and nitrogen fixation. Contains 60% Rye, 30% Vetch and 10% Mustard. Can be sown during the spring, summer and autumn at a rate of 20kg/acre (5 grams/sqm).

500g	1kg	2½kg	5kg
£3.85	£6.00	£13.25	£24.50

VCO020 Super Mix

(not shown)

A quickly establishing mix for ground cover, compaction reduction and nitrogen fixation with added Phacelia for aiding biodiversity. Contains 80% Oats, 15% Vetch and 5% Phacelia. Can be sown during the spring and early summer at a rate of 20kg/acre (5 grams/sqm).

500g	1kg	2½kg	5kg
£4.25	£6.70	£14.75	£27.20

Soil+ Mix

VCO030 Soil+ Mix

A deep rooting mix to reduce soil compaction, with the benefit of nitrogen fixation and added organic matter. Contains 70% Rye, 20% Vetch and 10% Oilseed Radish. Can be sown during the spring and summer at a rate of 20kg/acre (5 grams/sqm).

500g	1kg	2½kg	5kg
£3.85	£6.00	£13.25	£24.50

VCO040 PreCob Mix

(not shown)

A mix developed to precede a Maize or Sweetcorn crop, which reduces compaction, fixes nitrogen and adds biomass. Contains 70% Rye, 15% Vetch, 10% Tillage Radish and 5% Phacelia. Can be sown during the spring, summer and early autumn at a rate of 20kg/acre (5 grams/sqm).

100g	250g	500g	1kg
£2.35	£5.40	£10.00	£18.50

VCO050 PreSpud Mix

(not shown)

Designed to precede a potato crop this biofumigation mix reduces nematodes, relieves compaction and adds biomass. Contains 80% Brown Mustard and 20% Tillage Radish. Can be sown during the spring, summer and early autumn at a rate of 4kg/acre (1 gram/sqm).

100g	250g	500g	1kg
£2.60	£6.00	£11.10	£20.55

More green manures are available via our website

Cress

Approximately 350 seeds per gram; sow at approximately 25g per square metre.

VCR10 Plain or Common

Cress (not shown)

A well known variety which is used extensively for salad work. Can also be used as a green manure.

250g	500g	1kg
£1.90	£3.40	£6.25

Cresso

organic seed

VOG271 Cresso

Fast maturing, plain cress variety, making it ideal for punnet production. Also suitable for use as a green manure.

250g	500g	1kg
£8.80	£14.05	£22.00
2 1/2 kg	5kg	10kg

£2.60	£4.80	£11.10
500g	1kg	
£20.55	£38.00	

Louisa

For grafting clips suitable for use with Cucumbers please see under Sundries

Cucumber

A productive crop for greenhouse or outdoors, with a well established sales history, and the potential to offer high returns. Cucumbers are also very popular for young plant sales. 35 seeds per gram. Sow December-April depending upon cropping type. Germination requires a minimum of 20°C. For cultural advice, please request a technical leaflet.

Greenhouse Varieties

Carmen

VCU013 F1 Carmen

For summer and autumn cropping, 34-40cm long, slightly ribbed, smooth fruit. Resistant to scab and leaf spot, bitter free, also a high resistance to powdery mildew and partially tolerant of downy mildew. All female.

25sd	100sd	500sd	1,000sd
£13.40	£47.90	£225.75	£430.00

Femspot

VCU070 F1 Femspot

All female flowered, quick, strong grower, earlier than most other cucumbers, bitter free, ribbed. This is our best selling variety for the plant trade.

25sd	100sd	500sd	1,000sd
£9.20	£32.85	£154.90	£295.00

VCU060 F1 Louisa

All female (parthenocarpic) variety producing a high yield of uniform, dark green, bitter-free fruits. Very early to crop and delivers a good crop even under hot conditions. Fruits typically measure 35cm in length and weigh around 500 grams. Resistant to powdery mildew, Ccu and Cca. The ideal plant sales variety.

25sd	100sd	500sd	1,000sd
£11.25	£40.10	£189.00	£360.00

Saturn

VCU075 F1 Saturn

A mid-early all female (parthenocarpic) hybrid variety, ideally suited to production under glass and plastic. Suitable for both heated and cold production. Produces a good yield of smooth, dark green fruits; typically 30-35cm in length. A good choice for the hobby plant sales market.

25sd	100sd	500sd	1,000sd
£8.25	£29.50	£139.15	£265.00

Flamingo

Organic seed

VOG280 F1 Flamingo

All female variety. Tolerant of downy mildew and pythium, and resistant to target leaf spot, and scab. Vigorous, robust plants that perform well even in relatively low light levels. Suitable for production in soil. Large fruited, dark green, slightly ribbed type, for production throughout the season.

25sd	100sd	500sd	1,000sd
£27.90	£99.65	£469.90	£895.00

Paska

organic seed

VOG300 F1 Paska

All female (parthenocarpic) greenhouse variety; medium-short fruited (22-25cm) for summer and autumn production. Good storage ability and long shelf life. Smooth skinned with slight ribbing. Resistant to scab and powdery mildew, and highly tolerant of downy mildew and CMV. Heavy yielding.

25sd	100sd	500sd	1,000sd
£25.70	£91.85	£433.15	£825.00

Greenhouse or Outdoor

VCU015 F1 Passandra

(not shown)

YP

A powdery mildew resistant variety, which when picked regularly produces small size fruit of 15-18cm. The fruits are slightly ribbed, cylindrical and dark green. Tolerant of mosaic virus, powdery and downy mildew. Sow from the beginning of February. All female.

25sd	100sd	500sd	1,000sd
£10.45	£37.30	£175.90	£335.00

organic seed

VOG295 F1 Passandra

25sd	100sd	500sd	1,000sd
£12.15	£43.45	£204.75	£390.00

Pony

VCU140 F1 Pony

YP

A prolific producer of 'snack sized' fruits, typically up to 10cm in length and weighing up to 100 grams. The fruits have a smooth skin, with excellent flavour and texture. Most productive when used for heated indoor production but can also be used for outdoor production during the summer. Ideal for containers; a good plant sales item. Parthenocarpic.

25sd	100sd	500sd	1,000sd
£9.35	£33.40	£157.50	£300.00

Delistar

VCU160 F1 Delistar

YP

This unusual variety features very thin, translucent skin, which means there is no need to peel the fruit and reduces the possibility of digestive problems that can be associated with cucumber consumption. A medium sized, thin skinned variety with a crunchy sweet taste. Fruit length typically 16-18cm, width 3-4cm and weight 80-100g. High dry matter content gives crunchy texture and sweet aromatic taste.

25sd	100sd	500sd	1,000sd
£9.20	£32.85	£154.90	£295.00

VCU165 Peticue

YP

A short vining/bush slicing variety bred to stay compact, with the vines using only a third of the space of a standard variety. Plants mature in 45 days. Pick fruit at 18-23cm in length for best tasting, crunchy sweet cues. Regular harvest increases yield.

25sd	100sd	500sd	1,000sd
£5.45	£19.50	£91.90	£175.00

VCU100 Telegraph

Improved (not shown)

Reliable, well-established OP variety, ideal for retail plant sales.

Alhambra

VCU095 F1 Alhambra

An early parthenocarpic, pickling variety, which produces a heavy crop of 'warty' fruits. Length to width ratio is typically 3.6:1. Fruits have an attractive dark green colour and large warts. No bitterness. Resistance to CMV, Cladosporium cucumerinum, Podospora xanthii, ZYMV and CVYV.

25sd	100sd	500sd	1,000sd
£5.00	£17.85	£84.00	£160.00

Partner

VCU097 F1 Partner

Amid-early parthenocarpic variety, with mainly female flowers, that produces a high yield of medium to dark green fruits. Slightly hairy with smooth skin; length to width ratio of 3.3:1. Resistant to CMV, scab and powdery mildew. High tolerance of downy mildew. Suits indoor and outdoor production. A superb pickling variety.

25sd	100sd	500sd	1,000sd
£5.00	£17.85	£84.00	£160.00

VCU106 F1 Enforcer

(rootstock) (not shown)

Rootstock variety. Interspecific (Shintoza (Maxima X Moschata)) hybrid variety suitable for use as a rootstock for the grafting of cucumbers. Used to improve plant vigour and strengthen disease resistance; also aids root establishment in colder growing conditions. All glasshouse F1 all female varieties listed may be used as scion material with this rootstock. Resistant to Fon (0,1,2), Fom (0,1,2), Vd, Mi, Mj. Also suitable for use with Melon and Watermelon varieties..

25sd	100sd	500sd	1,000sd
£5.60	£20.05	£94.50	£180.00

VCU110 F1 Burpless Tasty

Green (not shown) YP

A favourite variety for outdoor production, suited to amateur plant sales and field production - dark green medium to long fruits.

VCU125 Lemon (not shown)

An unusual cucumber variety that produces 'lemon shaped' fruits. Light yellow skin and white flesh. Matures after around 60 days. Rust and drought resistant.

5g	10g	25g
£1.90	£2.95	£6.80
50g	100g	
£12.60	£23.30	

Endive

Endive is similar to lettuce but with a more bitter taste. Frisée types have curled, often deeply dissected leaves, while scarole types have broader leaves. The bitterness can be reduced by blanching. Crop time approx. 12 weeks, add two weeks for blanched crops.

Kokyta

split pills

VEN35 Kokyta

An excellent Scarole variety, ideally suited to late summer and early autumn production. Light green coloured rounded leaves, with indented edges. Full wrapped heart and full bottom. Easy to blanch. Good bolting resistance.

100plt	250plt	500plt	1,000plt
£2.45	£5.15	£9.45	£16.90

Dafne

split pills

VEN45 Dafne

The ideal follow-on to Kokyta, this Scarole is best suited to autumn and early winter cropping. Light green coloured rounded leaves, with indented edges. Good vigour and good resistance to yellowing at low temperatures.

Florence Fennel

This type of fennel is mainly grown for its bulbous roots, which are becoming more popular for use in specialist cuisine. Suitable for fresh sales and the catering trade - also popular as a mini-vegetable. 250 seeds per gram. Sow April-July, germinates at 10-30°C. Spacing 20-30cm by 60-100cm, giving plant population of 30-90,000 per hectare. Harvest July-September.

VFE12 F1 Rondo Moles Best Seller!

A quick growing hybrid variety, producing uniform, round shaped bulbs. Matures approx. 75 days after transplanting. Best used for summer production.

Kohl Rabi

A versatile and popular niche crop, suitable for open ground and protected cropping. For fresh sales and PYO, can be sown over a long period, and can command a relatively high price premium. 200 seeds per gram. Sow early February-mid July, germinates at 10-30°C. Spacing 10 x 40cm, crop May to October. 250,000 seeds per hectare drilled. Can be sown under glass. Can be sown at high density for 'baby' production.

VKO30 Kohl Rabi Purple

Micro (not shown)

A Kohl Rabi variety produced specifically for microgreen production. The microgreens produced feature a green leaf and purple stem. 300 sds/gram.

Leeks

Leeks are another mainstay of the winter cropping programme. Plant sales is a popular market for this product. Early varieties are the most suitable for baby leek production. The later blue-green types are also used as a dot plant in bedding schemes. A good crop for harvesting over a long period, with good shelf life performance. 320-480 seeds per gram. Sow mid March-May, at 1.1-1.9kg per hectare (transplanted) or 1.9-3.4kg per hectare (direct drilled). Space 5-15cm x 30-90cm.

VLE015 Zermatt (not shown)

An early Swiss Giant variety with long shaft and erect foliage. Features good base and some rust resistance. Good storage characteristics. Suitable for baby leek production.

Lettuce

A mainstay amongst salad crops. For protected all year round cropping and open ground production. Curly and coloured lettuce are popular with consumers and retailers alike. Well suited to sales in packs and as young plants. The wide range of colours and textures available makes lettuce ideal for mixed salad packs and 'baby leaf' products.

Approximate crop spacing

- Mini and small Cos: 15cm x 20cm
- Butterhead: 25cm x 30cm
- Other types: 35cm x 38cm

In row x between rows. (Actual spacing varies with production technique).

Seed count: see variety entry.

Lettuce types

Butterheads: flattish, rounded heads, soft texture, heart forming, can be grown nearly all-year-round.

Little Gem / Cos / Romaine: Tall and upright, sweet flavour, loose heart forming. Both large and small types.

Crisp / Iceberg / Batavian: crisp leaves, compact hearts. Iceberg: very crisp leaves. Batavian: thinner leaves than Icebergs, but thicker and crispier leaves than Butterheads.

Curled / Oak Leaf / Salad Bowl: mainly non-hearting types. Wide variety of leaf textures and colours. Multi and Eazyleaf® are developed to have the base cut off, leaving many similar sized, individual leaves.

Lollo Bionda / Lollo Rossa: non-hearting types with very deeply curled leaves. Lollo Bionda varieties are green, Lollo Rossa varieties are red (triple red has a more intense red colour than double red).

Butterhead - protected - Long Day

Frank

split pills

VLE240 Frank

A medium sized lettuce with a well closed base. This variety is slow bolting and strong against tipburn. Ideal for late spring, summer and early autumn production. Resistant to Lettuce Aphid (*Nasonovia ribisnigri*) and Bremia BL 16-25.

Products suitable for MICROGREENS are located within their respective product groups. For a list of suitable products please visit our website.

Onion (Salad)

Standard salad crop for bunching; relatively low maintenance, and some varieties are also suitable for overwintering for early lifting. Suitable for fresh market and prepack use. Salad onion information; 240-360 seeds per gram. Germinates 5-30°C. Sow March-April for spring crop, overwintering type July-August, pickling type mid February-March. Seed rate 15-20kg per hectare, at a population of 65-70 per metre row length.

A. cepa Varieties

Reddy

VON185 Reddy

A long day variety that produces superb red bunching onions when grown as a salad onion from a spring sowing. Thick skin with deep red colour. This variety will also produce bulbing onions when grown at a wider spacing.

A. fistulosum Varieties

Ishikura

VON165 Ishikura

A vigorous Japanese bunching onion with long, slender white stalks and no bulbing. Sow March-June, harvest May-October.

10g	25g	50g	100g
£2.40	£5.55	£10.20	£18.90
250g	500g	1kg	
£43.75	£81.00	£150.00	

Entita

VON162 Entita

A productive Japanese bunching type, with dark green, erect, foliage. Resistant to both bulbing and bolting. Ideal for spring and early summer sowings. Medium early maturity.

10g	25g	50g	100g
£2.95	£6.80	£12.60	£23.30
250g	500g	1kg	
£53.95	£99.90	£185.00	

Onion (Bulbing)

A popular crop - long storage lives make for a good continuity of supply. Also popular for plant sales and competition growing. 240-360 seeds per gram. Germinates between 5 and 30°C, sowing date mid February - March, Japanese (overwintering) types second or third week in August. Seed rate 4-5kg per hectare, 2.5-10 x 40-60cm spacing.

Main Season

VON236 F1 Hybound
An early Rijnsburger variety that produces attractive brown bulbs. Excellent skin quality. Early maturing variety that is also suitable for long term storage.

£5.60	£9.50	£16.10

2,500sds	10,000sds
£34.10	£118.65

Onion (Sets)

The advantages of growing onions from sets, rather than from seed, are that there is a shorter time to maturity, less sensitivity to soil types and a lower incidence of pest and disease.

In addition to the popular variety Sturon, we have put together a range of top quality commercial varieties to bring you the latest breeding enhancements.

Approx. 180-200 bulbs per kilo.

Planting

Space 10cm (in row) x 25cm (between rows). Plant onions so that the tip of the bulb is just visible above the soil. Best results achieved from planting mid March to mid April. Planting into cold wet ground can cause bolting so do not plant too early. Heat treatments are used to kill the flower embryo this prevents bolting in early plantings.

Our bulbs

Our bulbs are produced in the UK to ensure that they are ideally suited to UK growing conditions. All bulbs supplied are within the size range of 14/21, however we aim to grade them to a more precise specification where possible, e.g. 17/21. Most set bulbs are lifted in the early autumn but need to dry and mature in order to achieve the best results. We therefore recommend delivery of bulbs from mid-March onwards. If you require delivery earlier than this then please contact us for advice on availability and suitability. Please order by early March.

Please note: separate delivery charges apply to Onion sets - please see page 238-239 for details.

A wider range of sets, including overwintered, are available on our website

VOS020 F1 Corrado

Matures around mid July. Semi globe shape, with strong skins. Produces high yields. Suited to storage applications.

1kg	2½kg	5kg
£3.15	£6.95	£12.80

10kg	25kg
£23.50	£51.70

VOS030 F1 Cupido

For lifting towards the end of July, this hybrid produces high yields of semi-globe, dark skinned bulbs. Stuttgarter type. Suited to long term storage.

1kg	2½kg	5kg
£3.15	£6.95	£12.80

10kg	25kg
£23.50	£51.70

VOS035 F1 Contado

An early Stuttgarter type that typically matures 3-5 days before Sturon. Semi-globe shape with good skins and thin to medium necks.

£3.15	£6.95	£12.80

10kg	25kg
£23.50	£51.70

VOS040 Sturon (not shown)

The established favourite for set based production, this open pollinated variety produces good quality round bulbs. Ready to lift in early August. Suitable for storage.

1kg	2½kg	5kg
£2.90	£6.35	£11.70

10kg	25kg
£21.50	£47.30

VOS045 Red Baron

A good quality red onion. Nice skin colour and texture. Thick necked, globe to semi-globe shape - medium storage ability.

500g	1kg	2½kg
£3.05	£4.75	£10.50

5kg	10kg	25kg
£19.40	£35.65	£78.45

Oriental and Unusual

Oriental vegetables are becoming an important market for the producer as an increasingly culturally diverse population has led to the wider culinary use of such products. Speciality leaves are now an established sector of the salads market. The colour, texture, shape and flavour of these products adds interest to mixed salad packs and baby leaf mixes.

Chinese Cabbage

VOR002 Wong Bok

(not shown)

Large, barrel shaped heads, with crisp, light green leaves and white midribs. Head weights typically up to 2.5kg. Not as uniform as an F1 variety. 400 sds/gram.

VOR012 Michihili (not shown)

Tall, cylindrical shaped head, with crisp, light green leaves. Excellent in stir-fry cooking. 400 sds/gram.

10g	25g	50g	100g
£1.90	£2.95	£5.45	£10.10

250g	500g	1kg
£23.35	£43.20	£80.00

VOR004 F1 Preduro

(not shown)

A fast developing variety with good weight and dark green colour. Cylindrical shape. Very strong against bolting; ideal for early plantings. Harvest 55 days after transplanting. Intermediate resistance to clubroot.

250sds	500sds	1,000sds
£4.60	£7.20	£11.45

2,500sds	10,000sds
£27.20	£90.95

VOR007 F1 Questar

An excellent variety, with a good shape and nice dark green colour. Suitable for spring to early summer production. Harvest 60 days after planting. Trials show it has good resistance to clubroot.

250sds	500sds	1,000sds
£4.60	£7.20	£11.45

2,500sds	10,000sds
£27.20	£90.95

Oriental and Unusual (contd.)

Chinese Cabbage (contd.)

VOR009 F1 Scarvita

A new type of Chinese Cabbage. The outer leaves are dark green through to red, while the heart leaves are an intense red-pink colour. Ideal for salads and stir fries. Best suited to autumn production. Harvest approximately 60-65 days from planting.

25sd	50sd	100sd
£6.40	£10.25	£16.35
250sd	500sd	1,000sd
£32.70	£52.30	£83.65

Pak Choi

VOR016 F1 Red Lady

A hybrid red Pak Choi that offers excellent vigour. The very upright, long petioled habit makes for easy baby leaf harvesting. Oval leaves in deep wine red with green undersides; green stems and red veins. 400 sds/gram.

5g	10g	25g
£1.90	£3.35	£7.75
50g	100g	250g
£14.30	£26.45	£61.25

VOR045 F1 Mei Qing Choi (not shown)

Very pale green stems with rich green foliage. Good for baby or full head production. Also suitable for baby leaf production. Very good bolt resistance, tolerant of hot and cold temperatures.

250sd	500sd	1,000sd
£4.35	£6.75	£10.80
2,500sd	10,000sd	
£25.60	£85.60	

VOR047 F1 Yuushou (not shown)

A very vigorous green variety that is suitable for year round cropping. Quick to put on weight and slow to bolt. Mature plants produce 250 gram heads, which have a compact habit, bold base and good flavour. Broad light green petioles tapering to large, lime green leaves. Protected drillings: October to the end of March (use heat during propagation to minimise bolting).

500sd	1,000sd	2,500sd
£1.90	£3.05	£7.20
10,000sd	25,000sd	
£24.10	£56.25	

VOR046 F1 Goku

A slow bolting hybrid, ideal for spring and early summer plantings. Attractive glossy green leaves with long petioles that form high quality neat heads. Quick to bulk up but also holds well for flexibility at harvest time.

250sd	500sd	1,000sd
£5.30	£8.25	£13.15
2,500sd	10,000sd	
£31.20	£104.35	

VOR050 F1 Joi Choi

Vigorous hybrid, white stemmed variety, matures to 25-35cm, dense heavy heads, slow-bolting pure white petioles (leaf stalks) and rich green leaves. Suitable for baby leaf.

250sd	500sd	1,000sd
£4.35	£6.75	£10.80
2,500sd	10,000sd	
£25.60	£85.60	

VOR054 Dwarf Canton

White (not shown)

An open pollinated dwarf white Pak Choi variety, with compact habit. Produces plump, juicy white stems that contrast with lightly savoyed dark green leaves. 425 sds/gram.

10g	25g	50g
£2.00	£4.60	£8.50
100g	250g	500g
£15.75	£36.45	£67.50

VOR058 F1 Baraku (not shown)

An excellent quality hybrid Pak Choi with very dark, nearly black, colour to the leaves. Leaves are oval in shape with serrated margins, with light green petioles. Ideal for baby leaf production. 425 sds/gram.

5g	10g	25g
£2.40	£4.40	£10.10
50g	100g	250g
£18.75	£34.65	£80.20

Pak Choi Micro

Bred and produced for microgreen production, these Pak Choi varieties feature the distinctive Pak Choi flavour, with either green or white stems. 375 sds/gram.

VOR060 Green (not shown)

VOR062 White (not shown)

50g	100g	250g
£4.45	£8.20	£18.95
500g	1kg	
£35.10	£65.00	

Tatsoi

VOR080 Tah Tsai (not shown)

Suitable for both baby leaf and whole head production. Features dark green, nearly black, thick, spoon shaped leaves and short light green leaf stalks. Matures to form a rosette. Cold tolerant. 400 sds/gram.

10g	25g	50g
£2.15	£5.00	£9.20
100g	250g	500g
£17.05	£39.40	£72.90

VOR088 F1 Rozetto

A hybrid Tatsoi that is suitable for both baby leaf and whole head production. Dark green, thick glossy leaves on strong, vigorous upright habit. Less sensitive to yellowing under cold stress. 450 sds/gram.

10g	25g	50g
£2.80	£6.45	£11.90
100g	250g	500g
£22.05	£51.05	£94.50

VOR086 Tatsoi Micro

(not shown)

A green Tatsoi variety produced specifically for microgreen production. 450 sds/gram.

50g	100g	250g
£3.10	£5.70	£13.15
500g	1kg	
£24.30	£45.00	

VOR084 F1 Red (not shown)

Suitable for both baby leaf and whole head. Mature plants have a semi upright habit and exhibit a rosette of rounded, savoyed, purple green leaves on slender, light green stalks. 400 sds/gram.

10g	25g	50g
£3.10	£7.20	£13.30
100g	250g	500g
£24.60	£56.90	£105.30

Mustard

Mustard Giant

Broad leaves with a slight savoyed texture. Can be cut at baby leaf stage or left to mature to 40-45cm. 840 sds/gram.

VOR035 Red (not shown)

VOR037 Green (not shown)

10g	25g	50g
£1.90	£3.35	£6.15
100g	250g	500g
£11.35	£26.25	£48.60

Mustard Streaks

A highly attractive, finely dissected leaf which has a sweet mustard flavour. Good texture for salad packs and processing. 500 sds/gram.

VOR090 Golden (not shown)

VOR092 Ruby (not shown)

5g	10g	25g
£2.55	£4.70	£10.85
50g	100g	250g
£20.10	£37.20	£86.05

Amaranth

VOR095 Red Aztec

An improved Red Amaranth variety, with an intense red colour. The distinctive flavour makes this a popular microgreen variety. Not hardy but thrives in the summer. (Please note that there is often a small percentage of green foliage). 1,240 sds/gram.

5g	10g	25g

£28.35	£65.65	£121.50

VOR098 Sorrel, Red Veined

Attractive bright green leaves contrast sharply with the red stems and red veins. Leaves have sharp and tangy Sorrel flavour. 1,000 sds/gram.

2½g	5g	10g
£2.10	£3.90	£7.15
25g	50g	100g
£16.55	£30.65	£56.70

VOR076 Texsel Greens

(not shown)

Derived from Ethiopian Mustard, this is a tasty, nutritious, leafy green. The plants are quick growing. The young leaves are tender enough to eat raw, with a pleasant mild cabbage flavour. 310 sds/gram.

25g	50g	100g
£2.95	£5.45	£10.10
250g	500g	1kg
£23.35	£43.20	£80.00

Oriental & Unusual (contd.)

Babyleaf & Salad Mixes

A range of mixes that can be used for cut leaf production, or for use as growing salads when sold in containers. The varieties are matched so that leaf development and flavours complement each other. Production time can be as short as four weeks. The mixes can be used as supplied or mixed with other products, such as lettuce, to provide bespoke mixes.

VOR180 Spicy Greens Mix
Mix includes Salad Rocket, Red Giant Mustard, Green Wave Mustard and Mizuna.

£59.80	£110.70	£205.00	

Parsley

Multi-use crop for raising for pot herb sales, or for full grown plants. Also suited as a standard crop for harvesting one-off or cut and come again. Can be grown as a half-hardy perennial, but best treated as annual. Popular as a garnish for supply to the hotel trade, or for bunching. 440-500 seeds per gram. Germinates between 10 and 25°C. Sow from February to July, and September. Sowing rate 5-7.5kg per hectare. Spacing 10-30cm x 30-90cm. Harvest June onwards (spring sown) or April onwards (autumn sown).

VPA10 Bravour YP
Long-stemmed vigorous plants, with tightly curled heads of good colour and texture.

Parsnip

Long standing, low maintenance crop, popular as a large standard crop harvested over a long period (or cleared at one time), or as a 'mini-veg' crop. Good standing ability and long shelf life. 200-240 seeds per gram. Germinates at 5-20°C. Sow February-April, at 2.5-4.5 kg per hectare. Spacing 5-10cm x 45-90cm. Harvest from October to February.

primed, graded seed
VPA73 F1 Gladiator (not shown)
Market standard variety, extremely high marketable yield of large roots with very good canker resistance. Roots have a shallow crown to reduce wastage. Suited to prepack and fresh market.

£20.45	£37.80	£70.00

VPA55 White Gem (not shown)
This is a good wedge-shaped variety, medium sized with good resistance to canker. Suited to fresh market sales. Strong flavoured, with good texture and skin quality.

25g	50g	100g
£2.40	£4.45	£8.20
250g	500g	1kg
£18.95	£35.10	£65.00

Peas

A popular market garden and pick-your-own crop. Sugar snap and mange-tout varieties command a good premium and are popular with the restaurant trade. Sales of 'pea tips' and 'in the pod' products have also been gaining popularity recently.

We are also able to supply seed for loose seed shop sales to the home gardener.

3,000-6,000 seeds per kg, 8,000 seeds per kg for petit pois types. Germinates at 5-25°C. Sow from March to June (November for overwintering varieties). Sowing rate 150-190kg per hectare. Spacing 2.5-7.5cm x 60-120cm. Harvest from early May onwards.

First Early Varieties

VPE025 Meteor

(not shown)

A neat, compact variety with excellent winter hardiness. Suitable for overwintered crops. First early, round seeded. Height typically 45cm.

500g	1kg	2½kg
£4.25	£6.70	£14.75
5kg	10kg	25kg
£27.20	£50.00	£110.00

VPE012 Avola **NEW**

(not shown)

An early maturing variety, which produces tender pods that normally contain 6-8 peas. Suitable for both fresh and frozen. Height typically 60cm.

500g	1kg	2½kg
£4.70	£7.35	£16.20
5kg	10kg	25kg
£29.90	£55.00	£121.00

Second Early Varieties

VPE152 Jubilee

A second early variety, normally growing to a height of 60-70cm. Produces a heavy crop of dark green peas, with two pods per node. Suitable for all soil types. Resistant to Pea Wilt Race 1 and powdery mildew; moderate resistance to downy mildew.

500g	1kg	2½kg
£3.85	£6.00	£13.25
5kg	10kg	25kg
£24.50	£45.00	£99.00

VPE038 Element **NEW**

(not shown)

A second early afila (semi leafless) type that delivers very high yields. Double pod set to nodes. Resistant to Pea Wilt Race 1 and powdery mildew, with moderate resistance to downy mildew. Height 55cm.

VPE205 Sweet Horizon

A high quality, late maturing, snow pea variety that produces a very heavy yield of straight, dark green pods. Pod size typically 22mm wide and 9-10cm long. Vigorous and upright habit; pods are set in doubles. Mildew resistant.

250g	500g	1kg
£6.15	£9.80	£15.35
2½kg	5kg	10kg
£33.85	£62.50	£115.00

VPE250 Shiraz

A purple podded snow pea variety producing attractive flat, purple pods with good flavour. Very slow seed development. Resistant to *Erysiphe pisi* (powdery mildew).

250g	500g	1kg
£9.30	£14.90	£23.35
2½kg	5kg	10kg
£51.50	£95.15	£175.00

VPE200 Oregon Sugar Pod (not shown)

Sugar pea, 120cm tall, producing flat, 10cm pods for eating whole as a mange-tout. Pick whilst young, before the pods become too bulky.

250g	500g	1kg
£4.25	£6.80	£10.70
2½kg	5kg	10kg
£23.55	£43.50	£80.00

VPE215 Delikett

A high quality sugar snap pea with compact habit and high yields. Can be harvested over long period. Stringless at early stages with excellent flavour. Height 65cm. Pods 8-9cm long, 13mm wide. White flowering.

250g	500g	1kg
£5.85	£9.35	£14.70
2½kg	5kg	10kg
£32.35	£59.80	£110.00

VPE220 Lusaka

A high yielding sugar snap pea that is stringless at the point of picking. Long harvest window. Excellent flavour with attractive medium green pods. Compact habit; clustered pods. Pods 8-9cm long, 15mm wide. White flowering. Resistant to powdery mildew.

250g	500g	1kg
£6.40	£10.20	£16.00
2½kg	5kg	10kg
£35.30	£65.25	£120.00

VPE260 Purple Magnolia

Produces distinctive purple podded sugar snap peas on tall vines. Sweet flavour that is best if picked before the pods get too big; also sweet when immature. Vines typically 150-180cm tall. Tendrils help secure plant to support.

100g	250g	500g	1kg
£3.80	£8.75	£16.20	£30.00

Pepper

High value crop for the greenhouse or under plastic, also well suited for plant sales for the home gardener. High yielding over a long period. Becoming increasingly popular. 120-200 seeds per gram. Germinates between 25 and 30°C. Sow early December-January, or for maincrop March-April. Seed rate 400-425g per hectare. Spacing 30-60cm x 45-90cm. Grow on at 16-23°C. Harvest from early April/May, or maincrop from July. Please note that germination can be slow and erratic on some open pollinated hot peppers.

Hot - F1 Hybrids

VHP30 Cheyenne (not shown)

A compact chili pepper (45cm in height) with medium sized, orange fruits, ideal for plant sales in pots or packs. Ideal for patios and windowsills, with prolific fruiting throughout the summer season. Fruit size 10-13cm.

50sd	100sd	250sd
£9.05	£16.20	£36.05
500sd	1,000sd	
£64.40	£115.00	

VHP84 Basket of Fire

A compact semi-trailing plant that produces a prolific crop of small, hot fruits. The fruits mature from deep purple to cream, to orange and then red at maturity. Ideal for containers and baskets.

50sd	100sd	250sd
£11.40	£20.40	£45.45
500sd	1,000sd	
£81.20	£145.00	

Gusto

Medium hot varieties that produce flavoursome fruits, which typically measure 55mm x 17mm. Plant habit suits a range of pots, from 15cm upwards. High yields. Fruits mature from green to red, or purple to red, and can be picked prior to maturity.

VHP80 Green (not shown)

VHP82 Purple

500sd	1,000sd	
£42.00	£75.00	

VSW120 Bell Boy

(not shown)

Deep coloured green to red blocky fruits, with thick walls and crispy flesh. An excellent plant sales variety. Tm resistant.

50sd	100sd	250sd
£4.25	£7.60	£16.95
500sd	1,000sd	
£30.25	£54.00	

organic seed

VOG570 Bendigo (not shown)

This green-red pepper has a strong, open habit and attractive, blocky fruit which is produced evenly throughout the season. High yielding - sets easily and is resistant to sunscald and blossom end rot. Resistant to Tm race 0.

50sd	100sd	250sd
£23.15	£41.45	£92.45
500sd	1,000sd	
£165.20	£295.00	

VSW192 Mohawk

A dwarf Sweet Pepper very similar to Redskin, but it produces medium sized orange fruits. Good for use in patio containers.

50sd	100sd	250sd
£9.05	£16.20	£36.05
500sd	1,000sd	
£64.40	£115.00	

VSW160 Mavras (not shown)

A purple coloured Sweet Pepper. In the unripe stage the fruit is shiny purple, later turning into dark red. This large block type is thick walled and 3-4 lobed. Tm 2 resistant.

50sd	100sd	250sd
£14.95	£26.70	£59.55
500sd	1,000sd	
£106.40	£190.00	

VSW275 Nirvana

Developed to complement F1 Paradise, this variety also produces square, blocky fruits on a compact plant habit. The fruits are regular in shape with a good texture to the flesh. Fruits mature from medium green to yellow.

50sd	100sd	250sd
£8.25	£14.75	£32.90
500sd	1,000sd	
£58.80	£105.00	

VSW190 Redskin

A true dwarf bell pepper, which is ideal for growing in pots and containers. Very early fruiting, with an excellent yield of medium sized fruits which turn red. Ideal for plant sales.

50sd	100sd	250sd
£9.05	£16.20	£36.05
500sd	1,000sd	
£64.40	£115.00	

VSW270 Paradise

(not shown)

A medium-early variety that produces square blocky fruits, which are typically around 7-8cm square. The fruits are regular in shape with a good texture to the flesh. Fruits mature from dark green to red. Compact growing habit makes it ideal for containers.

50sd	100sd	250sd
£8.25	£14.75	£32.90
500sd	1,000sd	
£58.80	£105.00	

Sweet - Open Pollinated

Dream Series

A prolific crop of peppers are produced on these attractive, compact bushes. The brightly coloured, tapered fruits are typically 8cm long and are ideal for stuffing, grilling, pickling or eating straight off the plant.

VSW162 Lemon

Matures to bright yellow colour.

VSW164 Tangerine

Matures to orange-red colour.

50sd	100sd	250sd
£3.15	£5.65	£12.55
500sd	1,000sd	
£22.40	£40.00	

Potatoes

Potatoes remain one of the most popular and productive crops grown by amateur and professional alike, and continue to be a staple part of most diets. Potatoes can be grown in almost any soil type, and are ideal for 'cleaning up' previously uncropped land. Potatoes can also be grown in containers.

Potato types

First Earlies: chitting essential; plant mid to late March at a depth of 10cm, spaced 30cm in row and 45cm between rows; harvest as 'new' potatoes in June and July when the first flowers appear.

Second Earlies: chitting essential; plant early to mid April, space as per First Earlies; harvest as 'new' potatoes in July and August when the first flowers appear.

Salad: treat as per First Earlies.

Maincrop: chitting beneficial but not essential; plant mid to late April at a depth of 10cm, spaced 38cm in row and 68cm between rows; harvest between August and October when the foliage dies back; can be stored.

Cultivation terms

Chitting: when delivered lay tubers out in tray with rose end (most eyes) uppermost. Keep in frost free, light room until sprouts form (normally after 6 weeks).

Earthing-up

When the haulm (foliage) is approximately 20cm tall draw up soil around stem to form a flat ridge. Earthing-up improves drainage and growing environment for the plant giving a much improved yield. Earthing-up is also essential for reducing greening.

Our tubers

All our tubers are produced in Scotland and are certified by FERA as reaching the high quality standards required to be classified as 'Certified Seed Potatoes'. Please note that due to marketing and trade agreements not all varieties of Potato can be shipped outside of the UK, please contact us for further details.

Our seed potatoes are available for delivery around mid December or mid January, please specify your preferred delivery period when ordering. Please note: separate delivery charges apply to Potatoes - please see page 238 for details.

First Earlies

Swift

A very early, modern scraper, suitable for growing in containers, under polythene or glass, and field production. Oval shape, cream coloured flesh and good flavour. Moderate blight resistance and high scab resistance. Little discolouration when cooked, fairly firm flesh. Suitable for boiling and salad use.

VPT005N	2.5kg	£4.80
VPT005B	25kg	£34.50

Pentland Javelin

A very popular early scraper. Produces oval shaped tubers with white flesh. A flavoursome variety with excellent cooking qualities. Low blight resistance and high scab resistance. Resistant to Eelworm (PCN Ro1). Minimal discolouration when cooked, fairly firm flesh. Suitable for general purpose, boiling and salad use.

VPT010N	2.5kg	£4.80
VPT010B	25kg	£34.50

Casablanca

A modern first early variety with smooth white skin, shallow eyes and creamy flesh. Excellent cooking performance makes it suitable for chipping, baking and boiling. Also gathering a following for showbench use. Can be grown in containers. Cropping can be in as little as 62 days. Resistant to blackleg and Eelworm (PCN Ro1).

VPT018N	2.5kg	£4.80
VPT018B	25kg	£34.50

Premiere **NEW**

A quick maturing first early that can be harvested in approximately 10-12 weeks from planting. The tubers are oval to round in shape, with shallow eyes and yellow skin and flesh. Ideal for baking, boiling, chipping, roasting and salad use. Resistant to blight, common scab, powdery scab, spraing and Eelworm (PCN Ro1).

VPT020N	2.5kg	£4.80
VPT020B	25kg	£34.50

organic tubers

Colleen

A modern, disease resistant early scraper. A medium oval shape with white skin and creamy flesh. Fairly firm texture with minimal discolouration on cooking. High blight resistance and high scab resistance. Suitable for general uses, boiling and salads.

VOG952N	2.5kg	£5.60
VOG952B	25kg	£44.50

Second Earlies

Kestrel

An exhibition quality variety that produces good yields of tasty tubers. Long oval shape, white coloured flesh, white skin with blue eyes. High blight resistance and moderate scab resistance. Slug resistant. No discolouration when cooked, fairly firm flesh. Suitable for general purpose, chipping and baking applications.

VPT030N	2.5kg	£4.80
VPT030B	25kg	£34.50

Wilja

Probably the most popular Second Early, producing high yields of large, yellow coloured, long oval tubers. Good flavour and excellent cooking qualities. Moderate blight resistance and high scab resistance. No discolouration when cooked, and very firm flesh. For general purpose and boiling use.

VPT035N	2.5kg	£4.80
VPT035B	25kg	£34.50

Nadine

A modern disease resistant potato that reputedly produces world record yields. A short oval, white-yellow variety with top exhibition appearance. Moderate blight resistance and high scab resistance. Resistant to Eelworm (PCN Ro1). No discolouration when cooked, and fairly firm flesh. Very waxy. For general purpose, boiling and salads use.

VPT040N	2.5kg	£4.80
VPT040B	25kg	£34.50

Maincrop

Rooster

An increasingly popular variety, which is easy to grow and very versatile. Oval tubers with red skin and yellow flesh. Floury texture and delicious flavour. Moderate blight and scab resistance. Good resistance to spraing. Suitable for mashing, steaming, roasting, chipping and crisping.

VPT060N	2kg	£4.80
---------	-----	--------------

Desiree (not shown)

Probably the world's favourite red variety, and clearly the potato of choice for celebrity TV chefs. Produces long, oval shaped tubers. Firm with little discolouration when cooked. Strong flavour. Drought resistant. Some resistance to blight and scab.

VPT057N	2.5kg	£4.80
VPT057B	25kg	£34.50

Potatoes (contd.)

Maincrop continued

Cara

A popular variety that produces high yields of short oval tubers, with white skin and red eyes. High blight resistance and high scab resistance. Resistant to Eelworm (PCN Ro1). No discolouration when cooked, and firm flesh. Suitable for general purpose uses. The perfect variety for allotments.

VPT050N	2.5kg	£4.80
VPT050B	25kg	£34.50

organic tubers

Cara

VOG967N	2.5kg	£5.60
VOG967B	25kg	£44.50

Caledonian Rose

A versatile maincrop variety that produces tubers with attractive bright red skin and pale yellow flesh. Wonderful flavour and texture. Suitable for boiling, mashing, baking and roasting. Good resistance to common scab, Eelworm (PCN Ro1) and blackleg.

VPT062N	2.5kg	£4.80
VPT062B	25kg	£34.50

Marvel

An early maincrop variety that is particularly well suited to making french fries. Oval-long shaped tubers with medium depth eyes and yellowish skin. Has good resistance to dry rot, Eelworm (PCN Ro1) and partial resistance to Eelworm (PCN Pa2/3). Resists external damage.

VPT068N	2.5kg	£4.80
VPT068B	25kg	£34.50

Apache **NEW**

A maincrop variety with distinctive bright red skin and cream eyes. Produces a heavy yield of round tubers with smooth skin. Suitable for boiling, roasting and salad use. Blanch before roasting to maintain bright skin colours. Sweet, buttery, chestnut flavour to flesh.

VPT064N	2.5kg	£4.80
VPT064B	25kg	£34.50

Salads

Charlotte (not shown)

A popular variety and probably the best salad type currently available. Produces high yields of tasty, uniform, long oval, pale yellow tubers. High blight resistance and high scab resistance. Suitable for boiling and salad applications.

VPT065N	2.5kg	£4.80
VPT065B	25kg	£34.50

Jazzy

A recently introduced salad variety that delivers a prolific yield of small, waxy tubers. Great flavour. Suitable for boiling, mashing, roasting or steaming. Winner of RHS Award of Garden Merit.

VPT071N	2.5kg	£4.80
VPT071B	25kg	£34.50

Nicola

A tried and tested variety producing excellent, well flavoured salad potatoes. The firm, long oval tubers have yellow skin and light yellow flesh. Tasty hot or cold. Well suited to roasting, boiling and salad uses. Has low blight resistance but high scab resistance. Resistant to Eelworm (PCN Ro1).

VPT080N	2.5kg	£4.80
VPT080B	25kg	£34.50

Radicchio

Also known as 'Red Hearted Chicory', gaining popularity as a salad crop, yielding a strong red leaf for use in salad packs and as whole heads. Popular salad leaf for the restaurant trade that can be produced over a long season. A mainstay of prepared leafy salad packs. 400-800 seeds per gram. Germinates between 10 and 30°C. Sow from March to May in modules, crop from June to November. Spacing 30 x 30cm, approx 110,000 plants per hectare.

VRA005 Palla Rossa 3

(not shown)

An autumn cropping variety that produces bright red leaves with white ribs. Uniform well wrapped round heads, although also very popular as a babyleaf product. 480 seeds per gram.

£1.90	£4.05	£7.50

100g	250g
£13.90	£32.10

For more radish products suitable for sprouting and microgreens please see 'Sprouting Seeds' section

Rhubarb

An ideal low maintenance crop, and popular for plant and crown sales. The use of seed-bed raised one-year-old crowns will speed up the time from crop establishment to first harvest, and will provide a crop in the second year, from March onwards. 50-80 seeds per gram. Germinates between 10°C and 30°C. Sow from February-April. Spacing 60-120cm x 90-150cm. 5,000-18,000 plants per hectare.

Seed**VRH20 Victoria (not shown)**

Very popular maincrop variety. This heavy yielding, long stalked variety is ideal as a good low maintenance crop.

5g	10g	25g
£1.95	£3.60	£8.30

50g	100g	250g
£15.35	£28.35	£65.65

VRH30 Champagne

(not shown)

A popular mid season variety producing long stems with a pale pink colour. Very sweet flavour.

5g	10g	25g
£2.15	£4.00	£9.20

50g	100g	250g
£17.05	£31.50	£72.90

Crowns

Please order by the end of February for delivery February - March.

Please note: separate delivery charges apply to Rhubarb crowns - please see pages 238-239 for details.

**VPL40 Victoria (not shown)**

See seed product for description.

VPL44 Raspberry Red

(not shown)

An early cropping variety that produces thick, deep red stalks. Delicious sweet flavour. Vigorous growth that doesn't require forcing.

VPL46 Goliath

A mid-season variety that produces a heavy crop. The red stalks are thick but not tough or stringy. Excellent flavour. Plant height typically 90-120cm.

5 crowns	£12.85
----------	---------------

Rocket

Rocket remains a popular ingredient of mixed salad packs. The tangy leaves add a distinctive flavour to salads. The development of cultivated x wild hybrids has added to the popularity of this product, particularly with the restaurant trade. Produce outside during the spring and summer, and under protection during the winter. Sowing depth 1cm. Spacing (final and for cut-and-come-again) 15cm in row, 15cm between rows.

VRO10 Cultivated (not shown)

Plain Rocket. Leaves can be picked individually for a distinctive peppery-flavoured leaf. Very useful in mixed salad packs. Long, strap like, serrated leaves, dark green in colour. Very quick-maturing. 700 sds/gram.

Spinach

Spinach consumption is showing an upturn, and has benefited from positive marketing. Excellent as a choice for 'baby veg' leaf, both fresh and pre-packed. Well regarded by the restaurant trade. 80-100 seeds/g. Sow 10-30°C. Sow March to mid July, seed rate for fresh market 20-25kg per hectare, for processing 32-50kg per hectare. Spacing 5-15cm x 30-90cm.

VSP22 F1 Harp

Oriental spinach with attractive serrated leaves. Thick leaves with a smooth leaf surface and dark green colour. Excellent flavour. Upright growth aids picking. Suitable for baby, teen and bunching production. Suitable for sowing January-March and October-December under glass. Mildew resistance 1-12,14-16,19.

Squash

Courgette

The courgette crop has recently benefited from the increased interest in gourmet cooking. Courgette flowers and yellow fruited varieties also fulfil a specialist demand from the restaurant market, while recently introduced top quality round courgettes add extra interest. Very prolific, cost-effective croppers. Can be grown early or late under glass to extend the season, when there is a price premium. 5-7 seeds per gram. Sow from early April to early June, at 3.5-5kg per hectare. Space at 60-120 by 90-150cm, giving a plant population of around 5,000-18,000 per hectare. Harvest from July onwards.

The majority of the varieties listed as courgettes can also be used to produce marrows, however we recommend the use of the varieties listed for marrow production to achieve the best results.

Courgettes - Round

Eight Ball

VMA070 F1 Eight Ball YP

A hybrid courgette variety producing dark green, uniform, round fruits. More even cropping with higher yields than open pollinated round varieties. Bush habit.

50sd	100sd	250sd	500sd
£6.30	£11.25	£25.10	£44.80

One Ball

VMA075 F1 One Ball YP

A bright yellow round fruited hybrid courgette variety. Works well in combination with F1 Eight Ball. Bush habit. Ideal for novelty sales.

50sd	100sd	250sd	500sd
£6.30	£11.25	£25.10	£44.80

Courgettes - Standard

VMA080 Green Bush YP

(not shown)

Produces dark green fruits; well suited to plant sales. Can be picked as standard sized courgettes, or left to mature into marrows.

(not shown)

The dark green, glossy fruits are produced on a very compact plant. High yielding. Completely spineless making it easy to pick.

50sd	100sd	250sd	500sd
£5.70	£10.20	£22.75	£40.60

VMA022 F1 Precioza

(not shown)

A superb variety delivering high yields of mid green, straight, shiny fruits. Open, upright habit makes for easy harvesting. Highly recommended for all levels of production. Tolerant of cucumber mosaic virus, melon mosaic virus, zucchini yellow mosaic virus and powdery mildew.

50sd	100sd	250sd	500sd
£14.15	£25.30	£56.40	£100.80

Safari

VMA030 F1 Safari

YP

A unique variety that produces high yields of striking green striped, cylindrical, fruits. Spine free, bush habit. Contrasts well with conventional courgette varieties.

50sd	100sd	250sd	500sd
£5.70	£10.20	£22.75	£40.60

Atena

VMA038 F1 Atena

YP

An early hybrid variety that produces a heavy crop of golden-yellow courgettes. Sweet flavour to creamy flesh with good internal texture. Semi-compact plant frame; easy picker. Fruits best harvested when 15-20cm in length.

50sd	100sd	250sd	500sd
£3.55	£6.35	£14.10	£25.20

VMA085 F1 Gold Rush

(not shown) YP *Re-Intro*
Lacks the high yields and uniformity of the more modern hybrids, but still produces a good number of decent yellow courgettes. Ideal for the plant sales trade.

5g	10g	25g	50g
£3.65	£6.75	£15.65	£28.95

Marrows

Bush Baby

VMA095 F1 Bush Baby

A baby marrow variety bred to satisfy market demands for a smaller marrow. Grows to approximately three quarters the size of a standard variety. Distinctive stripes on green fruit. Suitable for field and container production. Produces a high yield per plant.

50sd	100sd	250sd	500sd
£6.10	£10.90	£24.30	£43.40

Tiger Cross

VMA065 F1 Tiger Cross

Striped Green Bush type hybrid. Early to crop. Resistant to cucumber mosaic virus.

50sd	100sd	250sd	500sd
£6.10	£10.90	£24.30	£43.40

Pumpkins

The Hallowe'en pumpkin market is as popular as ever. Relatively easy to produce, with good storage qualities. Also gaining popularity for its culinary uses. Good for young plant sales and for P.Y.O. use. 4-10 seeds per gram. Germinates between 15 and 30°C. Sow from late March-May into modules, or June direct. Spacing 90-150cm x 180-240cm. Harvest from July to October. All our varieties are vine types unless stated otherwise.

VSQ210 F1 Jill Be Little

A high yielding variety that produces wide, flattened, ribbed fruits, with an attractive orange colour. Fruits typically 200-250 grams in size. Intermediate resistance to powdery mildew (Px).

50sd	100sd	250sd	500sd
£4.85	£9.15	£20.85	£39.40

VSQ230 F1 Casperita

A hybrid 'Munchkin' type producing small, white pumpkins, typically 750 grams in size. Fruits feature excellent skin finish and strong handles. Fruit diameter 12-14cm in size. Recommended cropping of 5-10 fruits per plant.

50sd	100sd	250sd	500sd
£9.65	£18.25	£41.65	£78.75

VSQ290 F1 Chucky

An orange hybrid that delivers a very high yield of small, uniform fruits. Strong, dark green handles. Fast maturity. Fruits typically 0.9-1.4Kg in size.

50sd	100sd	250sd	500sd
£7.40	£14.00	£31.95	£60.40

VSQ300 F1 Snowball **NEW**

A smaller, white hybrid variety. The round fruits feature a bright white skin, fine ribbing and dark green handles. Colour holds well even under stress conditions. The perfect pumpkin for painting. Fruits typically around 1.0-2.0Kg in size.

25sd	50sd	100sd	250sd
£5.20	£9.65	£18.25	£41.65

VSQ310 Zombie **NEW**

A scary looking warty variety that is great for enhancing Hallowe'en displays. A high concentration of warts. Good yields on trailing plant habit. Fruits typically around 1.5-2.5Kg in size. Thick skin allows for extended storage periods.

25sd	50sd	100sd	250sd
£4.35	£8.05	£15.25	£34.70

VSQ320 F1 Spitfire

A hybrid variety producing small, slightly flattened fruits with good orange colour. Fruits typically around 2.0Kg in size. Intermediate resistance to powdery mildew (Px).

50sd	100sd	250sd	500sd
£6.75	£12.80	£29.15	£55.15

VSQ340 F1 Hot Chocolate

A great novelty addition to a pumpkin display with its unique chocolate colour. Strong handles. Fruit typically 2.3-3.6Kg in size.

25sd	50sd	100sd	250sd
£5.35	£9.95	£18.90	£43.05

VSQ460 F1 Racer (not shown)

A semi-bush variety producing fruits typically 4-7Kg in size. Good colour and strong handles. Consistently delivers high yields. An ideal Hallowe'en pumpkin.

50sd	100sd	250sd	500sd
£5.45	£10.35	£23.60	£44.65

VSQ440 F1 Harvest Moon

An early maturing and compact plant that produces fruits typically 4-5Kg in size. Flat globe shape with strong handles and attractive colour. Ideal for making Hallowe'en lanterns.

50sd	100sd	250sd	500sd
£6.75	£12.80	£29.15	£55.15

VSQ490 F1 Mellow Yellow

A unique variety producing bright lemon yellow coloured fruits that are typically 5.4-7.3Kg in size. Adds a touch of novelty to any pumpkin range

25sd	50sd	100sd	250sd
£5.55	£10.30	£19.50	£44.40

VSQ580 F1 Jack Of All

Trades

A classic Hallowe'en pumpkin variety re-introduced due to popular demand. Produces medium sized fruits (typically 4-5Kg in size) with a bright orange colour and slight ribs. The fruits have a round shape and flat base, making them a popular choice for carving. The orange flesh is ideal for soups and pies.

50sd	100sd	250sd	500sd
£4.35	£8.25	£18.75	£35.45

organic seed

VOG655 Jack O' Lantern (not shown)

A long established favourite with the Hallowe'en market. Fruit size 4-7Kg. Medium orange colour and sweet flavoured flesh. Lacks the uniformity of hybrids so shapes and sizes can vary.

50sd	100sd	250sd	500sd
£2.60	£4.90	£11.10	£21.00

VSQ520 F1 Knuckle Head

An excellent Hallowe'en hybrid variety, with distinctive warts for added effect. Medium vigour vine. Fruit size 5-7Kg; typically 30cm tall by 25cm wide. Matures from dark green to deep orange. Ideal for both carving and culinary uses.

25sd	50sd	100sd	250sd
£5.00	£9.30	£17.65	£40.25

VSQ582 F1 Corvette

A modern hybrid variety with the added benefit of powdery mildew (Px) resistance. The semi-bush habit produces attractive round fruits with good colour. Smooth skin and slight ribbing, with strong, well attached handles. Fruits typically 5-7Kg. Also exhibits tolerance to viruses ZYMV and WMV.

25sd	50sd	100sd	250sd
£4.35	£8.05	£15.25	£34.70

More Pumpkins overleaf

Squash (contd.)

Pumpkins (contd.)

VSQ550 **F1 Wicked**

A trailing variety producing fruits typically 6-8Kg in size. Bred to work well in cooler climates, this early maturing variety will also store well due to good soft rot tolerance. Deep orange colour and smooth skin, which is easy to carve. An ideal large Hallowe'en pumpkin.

50sd	100sd	250sd	500sd
£7.10	£13.40	£30.55	£57.75

VSQ510 **F1 Carrie (not shown)**

Produces attractive round fruits that are dark burnt orange in colour. Strong, dark green handles. Fruits typically 7-9Kg in size. Semi-bush habit. Intermediate resistance to powdery mildew (Px).

25sd	50sd	100sd	250sd
£4.35	£8.05	£15.25	£34.70

VSQ450 **F1 Cargo** **NEW**

A traditional Jack O' Lantern style pumpkin with the added benefit of intermediate resistance to powdery mildew. Fruits typically 8-10Kg in size. Bright orange colour and strong green handles. Ideal for PYO and commercial applications as well as the hobby market.

25sd	50sd	100sd	250sd
£8.35	£15.85	£36.10	£68.25

VSQ500 **F1 Magic Lantern**

(not shown)

A classic Hallowe'en variety, with upright shape and classy appearance. Good deep orange colour and strong handle; well defined ribs. Fruit typically 6.8-11.4Kg depending upon number left on vine. Produces a high yield. Intermediate resistance to powdery mildew.

50sd	100sd	250sd	500sd
£6.75	£12.80	£29.15	£55.15

VSQ240 **Atlantic Giant**

(not shown)

A very large pumpkin, ideal for plant sales or shows; often used for competitions.

25sd	50sd	100sd	250sd
£2.95	£5.45	£10.35	£23.60

VSQ584 **F1 Camaro**

(not shown)

A recently introduced hybrid variety with improved levels of powdery mildew (Px) resistance. The reduced vine habit produces attractive round fruits with classic orange coloured rind. Smooth skin and slight ribbing, with strong, well attached handles. Fruits typically 9-11Kg.

25sd	50sd	100sd	250sd
£4.35	£8.05	£15.25	£34.70

VSQ570 **F1 Gladiator**

(not shown)

A popular variety that typically produces fruits 9-14Kg in size. Excellent deep orange colour; deep round shape to pumpkins. Vigorous variety. Intermediate resistance to powdery mildew.

50sd	100sd	250sd	500sd
£7.10	£13.40	£30.55	£57.75

VSQ530 **F1 Big Loretta**

A hybrid that produces extra large fruits, that typically exceed 14Kg in size. Thick, strong handles and attractive dark burnt orange colour to the skin.

25sd	50sd	100sd	250sd
£5.00	£9.30	£17.65	£40.25

VSQ590 **F1 Polar Bear**

An extra-large white pumpkin, with fruit typically over 15Kg in size. Good white colour that is retained well after harvest. Vine habit. Upright shape to ribbed fruit. Best grown with one fruit per plant.

25sd	50sd	100sd	250sd
£6.40	£11.90	£22.55	£51.35

VSQ595 **Rouge Vif d'Etamps** **NEW**

An heirloom variety from France. Often known as the 'Cinderella' pumpkin due to a classic shape that is often seen in fairytale illustrations. Flattened globe shaped fruits with ribs/lobes. Striking red-orange colour. A sweet flavour that is ideal for soups, roasting and pies. Fruits typically around the 6-8Kg size but can get much bigger.

50sd	100sd	250sd	500sd
£4.50	£8.55	£19.45	£36.75

Winter Squash

VSQ080 **F1 Hunter**

One of the first varieties of butternut squash developed for the UK climate. Matures after 105 days, producing 6-7 fruits, each weighing about 1Kg. Light tan colour with bright orange flesh and sweet taste.

50sd	100sd	250sd	500sd
£4.40	£8.30	£18.90	£35.70

VSQ150 **Waltham**

£36.10	£68.25	£130.00

VSQ680 **F1 Ambermax**

A hybrid variety that produces striking coloured red fruits, with sweet, bright orange, high quality flesh. Fruits typically 1.5-2.0Kg in size. Compact vine habit.

50sd	100sd	250sd	500sd
£5.80	£10.95	£25.00	£47.25

VSQ760 **F1 Red October**

A hybrid Hubbard variety that produces striking dark red fruits. Excellent uniformity and yield. Fruits typically 3-5Kg in size. Good for storage.

25sd	50sd	100sd	250sd
£3.80	£7.10	£13.40	£30.55

**VSQ050 F1 Harlequin**

A hybrid 'Acorn' squash with exceptionally sweet flesh. The green and cream striped fruits typically weigh around 750 grams. Reduced vine habit. Prolific cropper that is early maturing with good storage potential.

50sd	100sd	250sd	500sd
£4.85	£9.15	£20.85	£39.40

**VSQ730 F1 Honey Bear**

The mini Acorn shaped fruits are typically around 10cm in diameter. Attractive flesh with sweet flavour. Compact plant. Powdery mildew resistant. Fruits weigh up to 500g.

25sd	50sd	100sd	250sd
£4.00	£7.40	£14.00	£31.95

**VSQ800 F1 Celebration**

A light yellow 'Acorn' squash with orange sutures and flecking. Orange coloured flesh. Fruit typically 600-700 grams in weight. Very good eating quality and flavour when mature. Intermediate resistance to powdery mildew.

50sd	100sd	250sd	500sd
£4.85	£9.15	£20.85	£39.40

**VSQ250 F1 Crown Prince**

Grey-skinned variety with bright orange flesh, that contrasts extremely well. Excellent culinary variety weighing on average 3-4Kg. Sweet, rich, nutty flavour, and the fruits are round and flat in shape.

25sd	50sd	100sd
£4.35	£8.05	£15.25
250sd	500sd	
£34.70	£65.65	

**VSQ990 F1 Rosie NEW**

A stunning pink Kabocha type squash with a great texture to the flesh. The skin has a pale pink colour at harvest. Suitable for long term storage, with the best eating qualities at around 2-5 months after harvest. Squashes typically weigh between 1.3 and 1.8Kg.

25sd	50sd	100sd	250sd
£5.70	£10.60	£20.10	£45.80

**VSQ280 F1 Fairy**

An early, vigorous variety with small leaves on a long vine. Fruit is oval shaped with orange-yellow smooth skin and golden yellow thick flesh. Fruit typically weighs about 1Kg. Excellent storage performance. Good resistance to viruses and powdery mildew.

50sd	100sd	250sd	500sd
£4.85	£9.15	£20.85	£39.40

VSQ180 Turks Re-Intro Turban

Ornamental, edible, large fruit with striped orange skin, a striking novelty crop which stores well.

25sd	50sd	100sd	250sd
£2.95	£5.45	£10.35	£23.60

VSQ740 F1 Stripetti

A hybrid spaghetti squash variety, delivering traditional style interior 'noodles' but with a sweeter flavour and much improved texture. The distinctive striped fruits turn from a cream to orange tinge when ripe. A uniform cropper with excellent storage performance.

50sd	100sd	250sd	500sd
£4.05	£7.60	£17.35	£32.85

VSQ750 Spaghetti**(not shown)****YP**

Also known as spaghetti marrow or vegetable spaghetti. Produces fruit up to 1.2Kg in weight. Cook fruits whole by baking, boiling or steaming. When cooked the flesh forms ribbons, which are similar in appearance to spaghetti, with a slightly sweet flavour.

10g	25g	50g
£2.00	£4.60	£8.50
100g	250g	500g
£15.75	£36.45	£67.50

**VSQ980 F1 Kabocha**

This type of squash is becoming increasingly popular. We offer a small fruited variety. The fruits are flattened globe in shape, dark green in colour and reach approximately 1Kg in weight. Good flavour and good storage performance.

25sd	50sd	100sd	250sd
£4.50	£8.35	£15.85	£36.10

**VSQ820 F1 Sweet Lightning**

A reduced vine hybrid variety that produces flat dumpling shaped fruits. Yellow coloured skin with orange stripes. Tender flesh with exceptional eating qualities. Fruits typically 0.5Kg in size.

25sd	50sd	100sd	250sd
£4.35	£8.05	£15.25	£34.70

Stripetti

**Summer Squash****VSQ880 F1 Zephyr**

These distinctive slender fruits are predominantly yellow in colour with faint white stripes and light -green blossom ends. Best harvested when fruits are 10-15cm in length. Features a delicious nutty flavour and firm texture. Edible flowers.

50sd	100sd	250sd	500sd
£4.85	£9.15	£20.85	£39.40

Patty Pan

A range of excellent hybrid pie-shaped patty pan varieties, with scallop edged fruits. All mature after 45-50 days. Good flavour and texture; with a small scar. Suited for both baby and standard sized fruit production.

VSQ900 F1 Lunar Eclipse

Light green skin and pale green-white flesh.

50sd	100sd	250sd	500sd
£5.45	£10.35	£23.60	£44.65

VSQ940 F1 Sunbeam

Golden yellow skin, with minimal green colour to scar.

50sd	100sd	250sd	500sd
£4.50	£8.55	£19.45	£36.75

Swede

A crop going through a mini revival, increasing in acreage by some 30% in recent years. Good storage qualities and improved breeding has made swede more grower friendly for sale fresh and as a processed product. A good source of winter revenue. 280-480 seeds per gram. Germinates between 12°C and 30°C. Sow May-mid June; seed rate 0.75-3.5kg per hectare. Spacing 12-20cm x 45-90cm. Harvest autumn onwards.

graded seed

VSU034 F1 Tweed

An excellent purple skinned hybrid variety. Produces uniform, globe shaped roots with a vigorous early growth habit.

Sweetcorn

This is a versatile, popular crop for fresh market sales, P.Y.O., prepack and processing. Works very well as a roadside sales item. Sweetcorn is also suitable for use as young plant sales for the home gardener. Germinates at between 18°C and 30°C. Sow April to June, spacing 20-30cm x 75-95cm, drilling rate 45,000 - 65,000 per hectare (18,000 - 26,000 per acre). Harvest August to October.

Main classifications for sweetcorn:

- 1) Normal sugar type (su)
- 2) Sugar enhanced (se)
- 3) Super sweet (sh2)
- 4) SuperSeedWare® (sh2)

Note: sh2 varieties should be grown separately from other types to avoid cross pollination, which can cause a reduction in quality and flavour.

None of our sweetcorn varieties are genetically modified.

SuperSeedWare® (sh2)

a naturally developed gene type that dramatically improves the performance of the seed, especially with earlier sowings into wetter or colder soil. Other benefits include stronger, more uniform growth and enhanced flavour.

VSU075 F1 Golden Eagle

A mid-early SSW® variety that produces medium sized, yellow cobs. Typically 16-18 rows of grains on a 20cm long cob. Very sweet flavour with tender texture to grains. Medium height to plant.

Sugar Enhanced (se)

sweeter, more tender kernel than standard types, with longer shelf-life.

**VSW094 F1 Ambrosia**

A mid-season sugar enhanced (se) variety that produces good sized, yellow and white bicoloured cobs. A solid performer with good disease resistance.

250sd	500sd	1,000sd
£6.75	£10.55	£16.85
2,500sd	10,000sd	
£40.00	£133.75	

Unusual types:**VSW090 F1 Minipop (not shown)**

Very tender pericarp makes this an ideal variety for mini sweetcorn. Best grown at high density, and harvested when cobs approximately 10cm in length. Produces 5-6 cobs per plant. This variety normally crops after approximately 65 days, and does not require pollination to produce cobs.

250sd	500sd	1,000sd

Tomato

We offer a wide range of varieties designed to meet most growers' requirements. While the old established favourites are still popular, the recent hybrid introductions have resulted in plants which not only perform better but taste better, an important characteristic in any tomato variety. New hybrid varieties with more unusual fruit shapes, colours and sizes are proving very popular both with fresh market sales and retail plant sales. For varietal fruit shape, size, colour and suitability please see the relevant table. Technical leaflet available.

For a key to the various tomato pathogen codes shown in varietal descriptions, please refer to the chart on page 231

Indeterminate (Cordon) Types - listed in order of fruit size, smallest first**VTO012 F1 Sungrape**

A productive, early maturing, variety with red, baby grape shaped fruits. Thin skins but resistant to splitting. Sweet, sharp flavour. Resistant to ToMV (2), Fol (1), Va, Vd and Mj.

50sd	100sd	250sd	500sd
£7.10	£12.65	£28.20	£50.40

**VTO014 Sweet Aperitif**

A prolific indeterminate variety producing an excellent yield of tasty, bite sized fruits. The fruits have a shiny red colour, thin skins and a sweet flavour. Makes a good subject for plant sales. Suitable for growing under protection and outdoors during the summer months.

50sd	100sd	250sd	500sd
£5.10	£9.15	£20.40	£36.40

**VTO235 F1 Golden Sweet**

Grape shaped fruit with distinctive orange-yellow colour. Good flavour with fine, firm, sweet flesh. Fruit resists cracking. Tolerant of Pi, Pf (1-5).

50sd	100sd	250sd	500sd
£10.60	£19.00	£42.30	£75.60

**VTO010 F1 Modus**

An indeterminate mini plum type, with small, oval shaped fruits, with a high sugar content. Attractive colour. Good storage performance; suitable for loose and on the vine sales. Resistant to Fol (1), Va, Vd.

50sd	100sd	250sd	500sd
£7.10	£12.65	£28.20	£50.40

**VTO350 F1 Tremolo**

A great flavoured red cherry variety. Vigorous and open habit, with trusses that typically feature 18-20 fruits. Firm fruits; attractive colour. Strong against cracking. Resistant to ToMV (0-2), ToANV, Pf (1-5), Fol (1&2) and TYLCV.

50sd	100sd	250sd	500sd
£11.40	£20.40	£45.45	£81.20

VTO024 F1 Honeycomb

An exquisitely flavoured golden-orange tomato. The cherry sized fruit are elegantly arranged on long trusses. Exceptional flavour with a high level of sweetness, with a delightful aftertaste described in trials as being somewhat like honey. Resistant to Fol (0,1,2), ToMV, Pi, Pst, Xcv plus some blight resistance.

50sd	100sd	250sd	500sd
£5.10	£9.15	£20.40	£36.40

**VTO026 F1 Merrygold**

A blight resistant orange-fruited variety. Produces a bountiful crop of brightly coloured cherry sized fruits. Sweet and tangy flavoured. Ideally grown under protection this variety also works outdoors in milder areas. Also resistant to Fol (0,1,2) and Pi.

50sd	100sd	250sd	500sd
£5.10	£9.15	£20.40	£36.40

VTO276 Gardener's Delight (not shown)

An old variety but still as popular as ever. The numerous small fruits have a fine tangy flavour. We offer the originator's selection.

250sd	500sd	1,000sd	2,500sd
£4.05	£7.20	£12.85	£32.15

**VTO278 F1 Allure**

An indeterminate variety producing attractive mini oval shaped fruits, that mature to red. Sweet flavour, with an average Brix 9° in recent trials. Good storage performance. Resistant to ToMV (0-2), Fol (0&1) TYLCV; intermediate resistance to ToLCV.

25sd	100sd	500sd	1,000sd
£3.90	£13.95	£65.65	£125.00

Tomato (contd.)

VTO305 F1 Sungold

Small, delicious tasting orange coloured fruits on long trusses - ideal for salads. Resistant to ToMV, Fol (1)

50sd	100sd	250sd	500sd
£9.85	£17.60	£39.20	£70.00

VTO122 F1 Crokini

A sweet (Brix 8.5°) cherry variety with a light acidic taste. Typically 10-12 fruits per truss. Good on-vine performance with no cracking. A recent AAS winner. Resistant to ToMV (0-2), Pf (A-E), Fol (0), Ma, Mi, Mj, Pi and TYLCV.

50sd	100sd	250sd	500sd
£9.45	£16.90	£37.60	£67.20

VTO128 F1 Santa Victoria

A mini plum variety with a **NEW** great flavour. Produces a high yield of bright red coloured fruit on long trusses. Ideal for plant sales but also works well with rootstocks for long season commercial cropping under glass. Resistant to ToMV (0,2), Fol (0), Pf (1-5), and intermediate resistance to TYLCV.

50sd	100sd	250sd	500sd
£9.45	£16.90	£37.60	£67.20

VTO272 Rubinka

An early maturing variety that produces small, tasty, cherry sized fruits. Trusses are long and branched with up to 35 fruits per truss. Suitable for outdoor and cold protected cropping. Fruits resistant to cracking. Resistant to Fol (0). Approximately 400 seeds per gram.

1g	2½g	5g
£3.40	£7.30	£13.60
10g	15g	25g
£25.50	£36.80	£58.25

VTO020 Black Cherry

(not shown)

An old variety that still has a following due to its sweet and juicy flavour. Produces blackish-purple skinned, cherry sized, fruits, with dark red flesh.

50sd	100sd	250sd	500sd
£6.30	£11.25	£25.10	£44.80

VTO132 F1 Floridity

An indeterminate variety that produces attractive mini plum shaped red fruits. Crunchy texture, juicy flesh and sweet flavour (Brix 9.5°). Resistant to cracking. Resistant to Fol (1); intermediate resistance to Ma, Mi, Mj.

50sd	100sd	250sd	500sd
£7.10	£12.65	£28.20	£50.40

VTO025 F1 Miele

(not shown)

An indeterminate mini plum variety that produces a prolific crop of intense yellow coloured fruits. A high sugar content gives a very sweet taste, while the flesh has a good texture. Good on-truss fruit presentation. Suitable for loose and on the vine sales. Resistant to Fol (1&2), Ma, Mi and Mj.

25sd	100sd	500sd	1,000sd
£8.10	£28.95	£136.50	£260.00

VTO032 F1 Trilly

A mini San Marzano type that produces a very high yield of sweet, tasty fruits, typically around 20g in weight. Suitable for both cluster and single fruit harvest. Resistant to Fol (0), Va, Vd.

50sd	100sd	250sd	500sd
£12.60	£22.50	£50.15	£89.60

VTO030 F1 Bottondoro

A vigorous, indeterminate variety that produces a prolific crop of really intense orange coloured, cherry sized fruits. High sugar and beta carotene content. Good flavour and texture; superb when eaten fresh from the plant. Ideal for loose sales. Resistant to Fol (1&2), Va, Vd and Pst.

25sd	100sd	500sd	1,000sd
£4.20	£15.05	£70.90	£135.00

VTO236 F1 Golden Ruby

Attractive mini plum fruits that mature to an eye-catching orange colour. Sweet flavour (Brix typically around 9°), coupled with tasty flesh. Quick to deliver first trusses. Good storage performance. Resistant to Fol (2).

50sd	100sd	250sd	500sd
£9.85	£17.60	£39.20	£70.00

VTO284 F1 Sweet Million

A productive variety that produces a mass of cherry sized fruits. Ideal for cold glasshouse production but can also be used for outdoor container work, such as sunny patios. Popular for plant sales. Excellent flavour.

50sd	100sd	250sd	500sd
£5.70	£10.20	£22.75	£40.60

VTO034 F1 Cherrola

An early maturing cocktail variety suitable for production in both heated and cold glass. The fruits are round, red and small; typically weighing 20-30 grams. Approximately 20 fruits per cluster.

50sd	100sd	250sd	500sd
£5.10	£9.15	£20.40	£36.40

VTO058 F1 Black Moon

An extremely tasty variety with distinctive black-red coloured fruits. The firm and juicy texture delivers a complex flavour that has proved to be extremely popular in taste tests. The slightly elongated fruits are typically 3-4cm in diameter and weighing 30-40 grams. Resistant to Fol (1), Pf, Pi and TYLCV.

50sd	100sd	250sd	500sd
£5.90	£10.55	£23.50	£42.00

VTO044 F1 Cocktail Crush

A blight resistant variety that produces classic 'cocktail' sized red fruits, typically 35-45 grams in weight. The flavour is sweet with a slightly acidic tang. Suitable for growing under heated or cold protection, outdoors and in containers.

50sd	100sd	250sd	500sd
£5.10	£9.15	£20.40	£36.40

Honey Delight

VTO062 F1 Honey Delight

A hybrid cocktail variety that produces bright yellow fruits, typically around 40 grams in weight. A regular winner in taste tests due to its excellent sugar-acid balance. Prolific cropper. Resistant to Fol (0&1).

50sd 100sd 250sd 500sd
£5.10 £9.15 £20.40 £36.40

VTO054 F1 Gallant

Suitable for both heated and cool production, as well as outdoor use in milder areas. Produces a good yield of round, red, fruits that do not crack or fall prematurely. Up to 12 fruits per truss and can be harvested as whole clusters. Resistant to ToMV (1-3), Fol (0&1) and Vd (0).

50sd 100sd 250sd 500sd
£5.90 £10.55 £23.50 £42.00

VTO180 Ailsa Craig (not shown)

A semi-greenback variety producing bright red, medium sized fruits. Famous for its flavour. Matures early. 400 seeds per gram.

1g 2½g 5g
£2.50 £5.45 £10.10
 10g 15g 25g
£19.00 £27.40 £43.40

VTO190 Alicante (not shown)

A greenback-free version of Moneymaker. Early cropper with smooth skinned, fleshy fruits. Still a popular plant sales item. 400 seeds per gram.

1g 2½g 5g
£2.50 £5.45 £10.10
 10g 15g 25g
£19.00 £27.40 £43.40

Gallant

VTO250 Moneymaker

(not shown)

Medium size, heavy cropper, very popular for the plant trade. 375 seeds per gram.

1g 2½g 5g
£2.50 £5.45 £10.10
 10g 15g 25g
£19.00 £27.40 £43.40

Shirley

VTO110 F1 Shirley

Early, short-jointed type with large trusses giving heavy yields of good-shaped fruits. Good for colder crops. A top seller for young plant sales. Resistant to TMV (1&2), Pf (1-5), Va, Vd.

50sd 100sd 250sd 500sd
£7.50 £13.35 £29.80 £53.20

Pannovy

VTO080 F1 Pannovy

A vigorous and well proven variety, suitable for use in soil or in substrate. Very high quality fruit with bright red colour, round shape and excellent flavour. Fruit size is 47-57mm and very uniform. Resistant to ToMV (0-2), Va, Vd, Fol (1&2) and Pf (1-5).

50sd 100sd 250sd 500sd
£20.05 £35.85 £79.90 £142.80

Please see overleaf for more varieties and tomato pathogen codes.

Tomato (contd.)

VTO078 F1 Bauna **NEW**
Bred as an improved Shirley, this variety produces classic, round, red fruits with good flavour. Early maturity. Suitable for both cluster and single harvest. Resistant to ToMV (0-2), Va (0), Vd (0), Fol (0-2), Pf (1-5), For and intermediate resistance to TYLCV.

50sd	100sd	250sd	500sd
£9.45	£16.90	£37.60	£67.20

VTO120 F1 Sparta
A vigorous plant habit with short internodes. Fruits are slightly flat round and firm. Suitable for both protected and outdoor cropping. Good shipping and storage ability. Resistant to ToMV, Va, Vd, Fol (0&1), Pf (1-5), Ma, Mi, Mj.

50sd	100sd	250sd	500sd
£10.60	£19.00	£42.30	£75.60

VTO134 F1 Cindel **NEW**
Early cropping variety suited to tunnel production and cool glass. Fruits are firm and bright red. Open habit with good vigour. Resistance ToMV (0-2), Va (0), Vd (0), Fol (0&1).

50sd	100sd	250sd	500sd
£7.65	£13.70	£30.55	£54.60

organic seed

VOG725 F1 Cindel

50sd	100sd	250sd	500sd
£15.30	£27.40	£61.10	£109.20

VTO225 F1 Akron
A long shelf-life variety suitable for both heated and cold glasshouse production. Also suitable for outdoor production in warmer areas. The fruit is medium to large in size, round, smooth and without ribbing. Fruit typically weighs 130-145 grams. Resistant to splitting. Resistant to Fol (1&2).

50sd	100sd	250sd	500sd
£5.90	£10.55	£23.50	£42.00

VTO270 Super Marmande
Large, somewhat uneven fruited variety. Very well flavoured. Strong, vigorous plants, which are popular for retail young plant sales. 400 seeds per gram.

1g	2½g	5g
	Crop failure	
10g	15g	25g
	Crop failure	

VTO405 F1 Crimson Crush
An excellent blight resistant variety, that produces a heavy yield of large, round, red, tomatoes. Not only is the blight resistance good but so is the flavour. The variety is not excessively vigorous and so could be used as a semi-determinate variety if needed.

50sd	100sd	250sd	500sd
£7.85	£14.05	£31.35	£56.00

VTO150 F1 Golden Shine
A tall variety producing distinctive large, bright orange-yellow round fruits of up to 250 grams in weight. 4-6 fruits per cluster. A distinctive and tasty flavour. Tolerant of cracking. An ideal product for fresh market sales. Resistant to Fol (1)

50sd	100sd	250sd	500sd
£6.30	£11.25	£25.10	£44.80

VTO408 F1 Big Mama
The ideal variety to grow for paste production. The large (typically 8cm long by 4cm wide) plum-shaped fruits benefit from having very meaty flesh. If par-boiled the skins can be peeled off really easily. Ideal for making delicious, thick creamy sauce. Resistant to Fol (0&1) and Va (0).

50sd	100sd	250sd	500sd
£5.10	£9.15	£20.40	£36.40

VTO430 F1 Big Pink
The ideal slicing variety with its distinctive rosy pink skin. Packed with flavour. Adds a distinctive touch to sandwiches, burgers and salad. Medium height plant with strong vigour. Resistant to ToMV (1-3), Fol (0&1) and Va (0).

50sd	100sd	250sd	500sd
£5.10	£9.15	£20.40	£36.40

VTO446 F1 Orange Wellington

Smooth, orange fruit with vibrant colour, while the flesh is firm, dense and nearly seedless. Awarded an Award of Garden Merit from the Royal Horticultural Society. Resistant to Va, Fol (0&1).

50sd	100sd	250sd	500sd
£5.10	£9.15	£20.40	£36.40

VTO450 F1 Buffalosteak

A quality hybrid producing large, fleshy, ribbed, Beefsteak fruits. Fruits typically 250-350 grams in size but can reach up to 500 grams. The red fruits have good flavour with juicy but firm flesh. Seedless. Ideal for slicing, sandwiches and burgers. Resistant to ToMV (0-2), Fol (0), Ma, Mi, Mj, Va, Vd.

50sd	100sd	250sd	500sd
£10.60	£19.00	£42.30	£75.60

VTO452 F1 Buffalosun

All the character and flavour of an heirloom variety but with the performance of a modern hybrid. Late blight tolerant. Produces large, fleshy, ribbed, Beefsteak fruits with a unique yellow/red flamed colour. Sweet, tender flesh with an attractive marbled interior. Fruits typically 250-350 grams in size but can reach up to 750 grams. Resistant to Fol (0-2), Va, Vd, Pi, TSWV (T0).

50sd	100sd	250sd	500sd
£10.60	£19.00	£42.30	£75.60

VTO436 F1 Big Daddy
Bred from the ever popular Big Boy, this variety produces an impressive yield of round, ruby-red fruits. Meaty flesh with good flavour. Long harvest window. Short internodes for easier maintenance. Resistant to Fol (0&1) and Va (0).

50sd 100sd 250sd 500sd

VTO448 F1 Knockout

This variety produces probably the largest fruit we have ever trialled. The large, red, Beefsteak fruits can typically weigh between 0.9-1.4Kg, depending upon the growing conditions. Bursting with flavour and luscious flesh. Resistant to Va.

50sd 100sd 250sd 500sd
£5.10 £9.15 £20.40 £36.40

Rootstock Types

VTO610 F1 Arnold (Rootstock) (not shown)

Using a roostock can improve a variety's vigour and disease resistance. Excellent commercial roostock variety. Fruit: N/A. Resistant to ToMV, Fol (1&2), Va, Vd, Ff(Cf) (1-5), For, Ma, Mi, Mj, PI, Si.

50sd 100sd 250sd 500sd
£20.05 £35.85 £79.90 £142.80

VTO615 F1 Protector (Rootstock) (not shown)

A generative type rootstock, giving increased fruit production coupled with additional disease resistance. Strong root system. Resistant to ToMV, Fol (1,2,3), Va, Vd, For, Ma, Mi, Mj, PI.

50sd 100sd 250sd 500sd
£15.30 £27.40 £61.10 £109.20

A technical leaflet on the use of rootstocks is available on our website @ www.molesseeds.co.uk

For grafting clips and other items relating to tomato production please see page 233.

Semi-determinate and Determinate (Bush) Types

- listed in order of fruit size, smallest first

F1 Balconi

A very compact bush variety producing large trusses of very tasty, cherry sized fruits. Ideal for container growing; works well in mixed baskets but the compact nature means that many plants are needed for a straight tomato basket.

VTO380 Red

VTO385 Yellow

100sd 250sd 500sd 1,000sd
£5.65 £12.55 £22.40 £40.00

VTO482 F1 Baby Boomer

A bush variety ideal for use in containers and smaller borders; will also work under protection. Produces a prolific crop of tasty, red, cherry tomatoes; typically 300 per plant. Resistant to Va, Fol (0&1).

50sd 100sd 250sd 500sd
£5.10 £9.15 £20.40 £36.40

VTO484 F1 Veranda

A compact dwarf variety that is ideal for container growing; works well in pots from 11cm to 16cm in diameter. The fruits are cherry sized with an attractive red colour. Sweet flavour. Support only needed when grown on to around 45cm in height. Resistant to Fol (0,1), Va and PI.

50sd 100sd 250sd 500sd
£5.10 £9.15 £20.40 £36.40

VTO492 F1 Cherry Falls

As the name suggests, this variety produces an abundance of cherry red coloured fruits, which can be picked over a four or five week period. Good flavour to the fruit. A bush type that works well in hanging baskets and other semi-trailing applications. Resistant to Fol (0).

50sd 100sd 250sd 500sd
£5.10 £9.15 £20.40 £36.40

Tomato (contd.)

VT0320 **F1 Tumbler** (not shown)

A determinate variety producing up to 2kg of fruit per plant. Ideal for use in hanging baskets (one plant per 12" basket).

50sd	100sd	250sd	500sd
Crop failure			

Tumbling Tom Red

Tumbling Tom Yellow

Tumbling Tom

Cascading, highly productive variety for basket and container work. Sweetly flavoured cherry fruits which look very attractive on the plant.

VT0330 **Red**

VT0335 **Yellow**

100sd	250sd	500sd	1,000sd
£8.10	£18.05	£32.20	£57.50

Tropical Ruby

VT0160 **F1 Tropical Ruby**

A semi-determinate variety producing attractive oval shaped, bright red coloured fruits. High sugar content gives an excellent sweet flavour. Popular for both retail plant and fresh market sales. Resistant to Fol (1).

50sd	100sd	250sd	500sd
£7.50	£13.35	£29.80	£53.20

Terenzo

VT0520 **F1 Terenzo**

A hybrid 'Tumbler' type producing a prolific yield of cherry sized, red, round fruits. Fruits typically weigh 18-20 grams, with a Brix reading of 6°Bx.

50sd	100sd	250sd	500sd
£6.70	£11.95	£26.65	£47.60

Red Profusion

VT0525 **F1 Red Profusion**

A very early to mature bush variety that forms a good tidy structure with an excellent branching habit. One plant is capable of filling a 30cm basket. Produces a decent crop of sweet cherry fruits, typically 18-22 grams in weight. Ideal for growing in containers. Works well outside due to good weather tolerance.

100sd	250sd	500sd	1,000sd
£7.75	£17.25	£30.80	£55.00

Orangeto

VT0530 **F1 Orangeto**

A late blight resistant orange-fruited variety. Produces a sumptuous yield of intensely sweet flavoured fruits, with a typical Brix of 11.5°. It is not unknown for a single plant to produce 4Kg of fruit. The bushy habit makes it ideal for containers. Also known as Sungold Super Sweet.

50sd	100sd	250sd	500sd
£9.05	£16.20	£36.05	£64.40

VT0360 **Roma VF** (not shown)

A highly productive variety with delicious fleshy, plum-shaped fruits. Ideal for sauces and soups - may need some support. 375 seeds per gram.

1g	2½g	5g

---------------	---------------	---------------

BushSteak

VT0590 **F1 BushSteak**

A compact bush variety that typically grows to 50-60cm in height. Ideal for patio, container and small garden applications. Produces a bountiful crop of large red fruits that weigh up to 180 grams each. Good flavour. Early to mature. Resistant to Fol (0&1) and Va (0).

50sd	100sd	250sd	500sd
£5.10	£9.15	£20.40	£36.40

Turnip

Very fast-maturing item for all season production, under glass and in open ground. Marketed during summer as a mini-veg, or later on as full grown product. Good shelf life. 360-600 seeds per gram. Germinates between 10 and 30°C. Sow early crop from March-May, late crop July-August. Seed rate 2.5-4.5kg per hectare. Spacing 5-15cm x 30-90cm. Harvest June to November.

Falko

VTU60 **F1 Falko**

Round shaped hybrid Milan type, with high uniformity. Excellent internal quality; smooth skin. High heat tolerance. Maturity is around 55 days from sowing. Suitable for early protected cropping and maincrop field production.

1,000sd	2,500sd	5,000sd

£6.50	£11.60	£25.85	£46.20

Pyramid cane cap

ZSN330 Support Hook **NEW**

Pre-wound wire support hooks that are mainly used for tomato cultivation but can also be used for other crops. The wire hooks are 22cm in length. The supplied twine is 10 metres in length and is bio-degradable, allowing it to be composted on the stems once the cropping is complete. The twine is soft but strong and does not cut into the plant stems as much as some plastic derived alternatives.

5pcs	10pcs	25pcs	50pcs
£4.65	£8.75	£19.90	£38.05

ZSN300 Grafting Clip (plastic)

A sprung plastic clip designed to securely hold both the scion and rootstock together during grafting. Removes the need for sticky tape, which can be awkward to remove.

25pcs	50pcs	100pcs	250pcs
£5.45	£9.85	£17.60	£39.20

ZSN310 Grafting Clip (silicone)

A disposable silicone grafting clip suitable for most solanaceae and curcubitaceae species. These flexible and transparent clips aid successful grafting. 2mm diameter hole for graft.

50pcs	100pcs	250pcs	500pcs
£4.75	£8.45	£18.80	£33.60

ZSN340 Support Clip

A professional quality clip designed to hold plant stems, such as tomatoes and cucumbers, to crop support strings. 25mm.

50pcs	100pcs	250pcs	500pcs
£2.35	£4.25	£9.40	£16.80

ZSN350 Truss Clip

A handy truss clip designed to add support to heavily laden tomato trusses. Prevents truss damage through kinking. 6mm slot. Professional quality.

50pcs	100pcs	250pcs	500pcs
£2.35	£4.25	£9.40	£16.80

Please note that the information given is for guidance purposes only. The above information is for standard production under 'normal' growing conditions; actual results may vary depending upon timing, weather conditions, geographical location, etc. Many varieties can now be grown outside of these 'traditional' seasons, please see individual crop/product listings for details									

Seed Technology

The following seed product forms are available throughout the catalogue. For any additional requirements please contact head office or your sales representative.

Coated Seed

These seeds have had a polymer coating to reduce friction and clumping when sowing. In addition their improved visibility aids sowing. Sometimes chemical additives are added to reduce pest and disease incidence.

Graded Seed

Seed is graded to a uniform size to enable easier sowing.

Multi-Seeded Pellets

These pellets have more than one seed per pellet. The result is a strong clump of seedlings on varieties that need multi sowing.

Natural Seed

In general normal seed has not been subjected to additional processes after cleaning.

Organic Seed

Our seed is produced on farms which have been officially authorised as meeting all the required organic standards. The seed is harvested using traditional methods and there are no chemicals used in the seed cleaning process. All our organic seed is certified by the Soil Association.

Pelleted Seed

Very small seed encased in a usually inert polymer to make it easier to sow. Unlike coated seed it no longer resembles the shape of the seed.

Primed Seed

Seed in which the germination process has been started in a controlled environment. The advantages of primed seed are:

- The ability to germinate in conditions that are not optimum.
- Faster and more uniform emergence.
- Higher Emergence rates.

Split Pills

A pellet that is unique for its splitting character. The pellet does not melt but splits open and creates optimum conditions for quick development of the seedling.

Treated Seed

Chemical additives applied to the seed coat to reduce pest or disease incidence. Many of our products are available in both treated and untreated forms. If you have a particular request for treated or untreated seed please state this at the time of ordering.

Available Seed Range

Please see individual catalogue entries for further details. In addition, we offer a wide selection of organic vegetable seed. We also supply, on request, perennials - enhanced germination seeds. Please ask for further details.

Coated Seed

Coated Seed

Natural Seed

Pelleted Seed

Seed Testing

We have recently updated our in-house germination testing facilities building a new Laboratory area and purchasing new purpose built germination testing cabinets. As part of our quality control system, we routinely carry out in-house testing of our seed. This includes germination and emergence tests to check the viability, vigour and purity of the seed.

Conditions of Sale

1. GENERAL

- 1.1 Every order is accepted subject to these conditions which shall apply in conjunction with the terms of business contained in our catalogue.
- 1.2 Nothing in our catalogue shall constitute an offer to sell.
- 1.3 The sending or giving to us of an order constitutes an offer which we may accept or decline to accept.
- 1.4 The sending or giving to us of an order shall constitute agreement to and acceptance of all terms of business including (but not limited to) these conditions, and the buyer if not prepared to accept such terms and conditions must return the goods to us forthwith (and in any case within 48 hours).
- 1.5 No order which seller has accepted may be cancelled by buyer except with the written agreement of seller and on the terms that buyer shall indemnify seller in full against all losses (including loss of profit) costs damages charges and expenses incurred by seller as a result of such conditions.

2. TITLE AND RISK

- 2.1 Until payment in full has been made to us all goods supplied by us remain our property which shall be kept on the buyer's premises separately from the buyer's own goods or those of any other person and in such manner as shall render them readily identifiable as our goods and they shall be properly stored protected and insured until such time as the property in the goods passes to the buyer.
- 2.2 Until payment in full has been made the buyer shall hold the goods as bailee of and in trust for us as legal and beneficial owners of the goods and the buyer shall at all times take proper care of the goods.
- 2.3 The risk in the goods shall pass to the buyer at the time of delivery of the goods to the buyer or the buyer's agent.
- 2.4 Until such time as the property in the goods shall pass to the buyer we shall be at liberty at any time to require the buyer to deliver up the goods to us and if the buyer fails to do so forthwith (and in any case within 48 hours) we shall be entitled to enter upon any premises where the goods are stored and repossess the goods and the buyer hereby grants us an irrevocable licence to do so which shall continue in force notwithstanding the termination of the contract for any reason.

3. FORCE MAJEURE

- 3.1 We shall not be responsible for any delay in delivery or for non-delivery of any goods or any part of them caused by any act of God action by any government or any department of central government or any local government or any strike lockout industrial action riot civil commotion breakdown of machinery or vehicle power failure inclement weather fire failure of crop loss at sea detention at sea or port or any other event or contingency beyond our control.
- 3.2 If any of the goods shall be rendered unfit for delivery by reason of any of the above-mentioned acts events or contingencies the contract shall so far as it relates to those goods be deemed to be discharged without liability on our part.

4. PRICE

- 4.1 All goods are sold at prices current at the date of contract notwithstanding anything in our catalogue.
- 4.2 Value added tax at the rate or rates for the time being in force in respect of the goods shall be payable by the buyer in addition to the price.
- 4.3 We shall be entitled to adjust the price of the goods whether before or after the making of the contract in the event of any variation in the cost to us of supplying the goods or any part thereof by reason of (a) any increase in the cost of the goods required by us for the completion of the contract; (b) any increase in any royalty payable under the Plant Varieties and Seeds Act 1964 or any statutory modification or re-enactment thereof for the time being in force (c) any other matter beyond our control including (but not limited to) fluctuations in exchange rates between monetary currencies or the action of any government or other authority anywhere in the world or any labour problems.
- 4.4 All prices are subject to alteration without notice.

5. COMPLAINTS

- 5.1 No complaint under the terms of these conditions can or will be considered unless clear proof can be and is given that seed sown and alleged to have performed unsatisfactorily was in fact the seed supplied by us and that it was sown on ground suitably prepared and was treated carefully and correctly throughout and subject only to such conditions as were likely to produce a favourable crop.
- 5.2 All seeds are offered and sold for production of consumer crops and not for reproduction of seed.
- 5.3 No responsibility whatsoever will be accepted by us for any seed crops produced.

6. TERMS OF PAYMENT

- 6.1 Goods are invoiced net and accounts will be regarded as overdue if unpaid after 30 days from date of invoice.
- 6.2 Interest will be charged at the rate of 2% per month on accounts still unpaid after 60 days from date of invoice (as well after as before any judgment).
- 6.3 We reserve the right to withhold deliveries under the contract until all outstanding payments under any contract have been received by us.
- 6.4 If any cheque is returned by the bank after presentation or re-presentation of it for payment any bank charges incurred by us together with a handling charge shall be reimbursed to us by the buyer.
- 6.5 Any card chargebacks that are instigated by the card holder without giving us due opportunity to resolve any matter relating to the order/chargeback may be deemed unreasonable and the chargeback left as a debt owing by the customer.

7. INSOLVENCY

- 7.1 If the buyer (a) has a receiver or liquidator or administrator appointed in respect of any property or business undertaking (b) announces that the buyer has ceased or is ceasing to trade (c) fails to make any payment when due or suspends payment (d) notifies any creditor that the buyer is unable to meet debts or that he is about to suspend payment of any debts (e) calls or holds a meeting of creditors (f) commits an act of bankruptcy or is adjudicated bankrupt or has an administration order made (g) being a limited company enters into liquidation (other than for the purpose of reconstruction or amalgamation) (h) enters into any arrangement or composition with or

for the benefit of creditors or (i) suffers any distress or execution to be levied upon the buyer's goods then notwithstanding any previous arrangement for deferred payments all sums payable by the buyer to us shall immediately become due and we shall have the right (without prejudice to any other right or remedy available to us) to cancel or suspend further deliveries under the contract.

- 7.2 On the exercise of any rights or remedies we shall not be liable to pay any compensation to the buyer.

8. DAMAGE, DELAY OR LOSS IN TRANSIT

- 8.1 We are to be notified immediately of any damage or delay or loss in transit.
- 8.2 On receipt of goods the buyer is to inspect them carefully and if there is any sign of damage he is to sign for the goods as "damaged in transit" and to indicate that a claim will be made.
- 8.3 The buyer must notify us immediately by telephone or e-mail and immediately confirm such notification by first-class post or e-mail of any goods received damaged.
- 8.4 All liability is excluded for any loss resulting from the need to provide additional documentation at the point of import into a customers country, trade territory or any other administrative zone. Furthermore, all liability is excluded for any import duties, taxation or any other charges levied upon the customer at the point of import. We will endeavour to comply with all import/export requirements wherever possible but does not accept any liability relating to such requirements; customers are strongly advised to seek out guidance on such matters from the relevant authority before placing an order. No liability is accepted for any loss or damage resulting from the goods being destroyed by the authorities at the point of entry.

9. AVAILABILITY

- 9.1 Orders are only accepted subject to availability of goods.
- 9.2 If a particular variety is not available we may substitute what in our opinion is the most suitable alternative.
- 9.3 The buyer shall be deemed to have accepted the substitute unless the goods are returned in good condition to us within ten days of the receipt of them in which case we will credit their value to the buyer's account.
- 9.4 If no suitable substitute is available any relevant contract will be deemed to be cancelled without any liability on either party's part and in that case if payment for the goods has already been made we will credit the value of them to the buyer's account.

10. LIABILITY

- 10.1 We warrant that the seed supplied shall be of the species and type specified in the contract. Should a quantifiable breach of this warranty occur we will either replace the defective seeds free of charge to the buyer or refund all payments made by the buyer in respect of the breach and this shall be the limit and extent of our obligation. Any such cases will be considered on an individual basis.
- 10.2 Subject to the provisions of sub-clause 1 of this clause if any seeds sold shall not comply with the express terms of the contract of sale or if any seed of the correct species and type shall prove defective in varietal purity we will either replace the defective seeds free of charge to the buyer or refund all payments made by the buyer in respect of the defective seeds and this shall be the limit and extent of our obligation. Any such cases will be considered on an individual basis.
- 10.3 All liability is excluded for any loss or damage arising from the use of any seed supplied and for any consequential loss or damage arising from the failure in the performance of or from any disease or any defect in any seeds supplied and for any other loss or damage including (without prejudice however to the generality of the foregoing) any failure whether total or partial of the resultant crop. Any such cases will be considered on an individual basis.
- 10.4 Any express or implied conditions, statements, representations or warranties statutory or otherwise not stated in these conditions are hereby excluded.
- 10.5 Our liability under the warranty hereinbefore contained shall automatically cease and determine if the buyer shall not have paid by the due date for all goods supplied by us (whether under this or any other contract between the buyer and us)
- 10.6 If specially treated or tested seed is contracted to be sold we accept no liability beyond undertaking that the treatment or test has been carried out and (at our option) to refund the price or to replace the seed if the treatment or test has not been carried out.
- 10.7 The price of seeds sold or offered for sale by us is based upon the foregoing limitation upon our liability.
- 10.8 In accepting the goods upon these conditions the buyer acknowledges that the limitation of our liability is fair and reasonable and undertakes to insure against all risks hereby excluded.
- 10.9 All information given in our catalogue or otherwise provided by us or by any agent employee or representative on our behalf relating to varieties varietal characteristics or periods of maturity or otherwise relating to the performance of seeds and seed count is given for general guidance (and for general guidance only) to our customers and does not constitute a warranty or representation on our part as to such matters or any of them and must not be relied upon as such but must be seen only as general guidance, for which no responsibility is accepted and which the buyer if he acts thereon must do so entirely at his own risk.

11. ARBITRATION

We shall be at liberty to require any dispute arising out of the contract or any question relating thereto to be referred to arbitration under the provisions of the Arbitration Acts 1950 and 1979 or any statutory modification or re-enactment thereof for the time being in force.

12. LAW AND INTERPRETATION

- 12.1 These conditions and every contract made pursuant thereto shall be governed by and construed in accordance with English law.
- 12.2 The headings of these conditions is for convenience only and shall not affect the construction of the conditions.
- 12.3 If any of the provisions of these conditions shall at any time be held to be unenforceable unlawful or invalid in any respect the validity and enforceability of the remaining provisions hereof shall not be affected or impaired by any unenforceable unlawful or invalid provision.

Important: please read before ordering

Ordering online

Please visit our secure website at: www.molesseeds.co.uk

Ordering by e-mail

sales@molesseeds.co.uk

Ordering by post

When ordering by post it helps us if you use our order form but this is not essential. When ordering please ensure you state the product code, product name and quantity required. We can provide pre-printed order forms upon request; a pdf copy of the order form can be downloaded from our website.

Ordering by phone

Telephone: +44 (0)1206 213213.

Our telephone is staffed from 8.00am to 5.00pm, Monday to Friday. Our answerphone operates outside these hours. All orders and messages left on our answerphone are dealt with as soon as our office opens. Please note phone calls to Moles Seeds may be recorded for training purposes.

When placing an order that you intend to pay for on collection, please be sure to state this at the time of ordering.

If you place an order and subsequently send a written confirmation it must be clearly marked Confirmation of phone order. We reserve the right to make a handling charge for any orders that are duplicated through failure to do this.

Trade counter

This is open for the placing and collection of orders from 8.00am until 5.00pm Monday to Friday. Lunch break is 12.30pm until 1.30pm. If you wish to collect more than five items it would assist us if you phone, post or fax your order in advance, to save any unnecessary delay.

If making a long journey please telephone first to ensure your requirements are in stock.

Seed treatments

Where treated seed is supplied the treatment will be printed on the packet label and data sheets will be available on request. If you have a specific request for treated or untreated seed please state on your order. Please note alternatives are not always available.

Terms of business

This list is current from October 2023 and cancels all previous lists. All prices are subject to alteration without notice and all seeds are offered subject to crop and being available upon receipt of order.

Prices

All seed prices are as listed. The minimum quantity supplied of any item is the lowest amount listed in the catalogue. We are always pleased to quote prices for quantities larger than those listed. All prices listed are exclusive of VAT. At the time of printing there is no VAT on vegetable seeds, herb seeds, grass seed, asparagus crowns, rhubarb crowns, onion sets, seed potatoes and soft fruit. All flower seed (including wild flower seed) and delivery are subject to the current rate of VAT. VAT is calculated at the time of despatch/invoice.

Forward orders

It would be helpful if a delivery week number rather than a date was specified for forward orders.

Euro cheques/non-Sterling (£) payments

Ideally all payments are to be made in pounds sterling. Any charges we incur when converting non sterling payments will be deducted from your payment.

Orders to Northern Ireland

It is possible for us to send seed to Northern Ireland but the documents required vary greatly depending upon the products and quantities involved. The arrangements are subject to change at the time of going to print so please contact us with your requirements and we will endeavour to advise you of the costs and complications involved.

Export orders to the EU and the Rest of the World

The movement of seed around the world is tightly controlled and the entry documents required vary greatly from country to country. Any shipping prices quoted for export orders are just for guidance and exclude any document charges. Please contact us with your requirements and we will endeavour to advise you on the costs and complications involved.

Delivery charges

Please refer to pages 238-239.

Seed returns

We can only accept seed returns as a result of incorrect ordering, and at our discretion. They must not be returned to us without prior notification and must be in our sealed packets as supplied, and the packets in a suitable box or padded envelope. They will be subject to a handling charge. We must be notified within 7 days of receipt. Under no circumstances can we accept returns of non-catalogue items. We reserve the right to charge for, or withhold a refund for, additional services (e.g. bespoke backing, additional testing, obtaining export documents, etc.) relating to orders that are delivered and returned or cancelled prior to despatch, where the costs have been incurred prior to confirmation of cancellation when said charges are accepted by the customer at the time of ordering.

Non-catalogue items

We are pleased to obtain items not listed in our catalogue subject to a minimum value of £15.00 per item.

The minimum order is £12.50

The minimum order value is £12.50 after any discount, excluding VAT and carriage charges. Please see pages 238-239 for any applicable delivery charges.

Discount for online orders

We offer 3% discount for credit/debit card payment with online orders, providing that there are no other accounts outstanding. All orders received on this basis will automatically be sent an itemised VAT receipt.

Credit accounts

All invoices are due within 30 days from date of issue. All accounts outstanding 60 days and over will be subject to 2% interest per month and credit facilities may be withdrawn. Credit facilities are available providing our credit account application form has been processed successfully.

When making a payment by BACS or cheque, please ensure we can easily identify the payer, for example include the invoice number to which the payment refers. Please make all cheques payable to Moles Seeds (UK) Ltd. Please note we do not accept credit cards for payment of account invoices.

New customers

Payment with order please. If you would like to open a credit account please ask for a credit application form.

BACS payments

When customers are paying by BACS please use their Moles Seeds Customer Account Number as the payment reference, and send a remittance confirmation. If e-mailing a remittance confirmation please send to remittance@molesseeds.co.uk

Our VAT number is GB285 3757 20 Our Company number is 6301851 Our EORI number is GB285375720000

Delivery Charges

How delivery is charged

Delivery is charged on a per product category basis, i.e. seeds and sundries, vegetable plants, onion sets, and seed potatoes. The categorisation is because we have to ship from a number of locations, with different products being shipped at different times of the year.

Please note that the quoted shipping charges are based upon courier tariffs; for larger orders, e.g. 10 x 25Kg sacks of seed potatoes, we may be able to secure more competitive pallet network rates so please contact us if you have a specific requirement. Furthermore, we may be able to collate shipments to reduce the charges but this may not always be possible; again, if you have a specific requirement please let us know. The shipping rates and restrictions may be subject to change at any time so please check our website for the latest information regarding rates and restrictions on the movement of goods.

How to calculate the shipping charge: worked example

The shipping charge on an order being shipped to UK Mainland, consisting of £45.00 of various seeds including 2Kg of Broad Beans, £2.35 of Onion Sets weighing a total of 1Kg, £28.00 of Seed Potatoes weighing a total of 25Kg, vegetable plants (25 Asparagus crowns and 5 Rhubarb crowns) costing a total of £39.85, would be calculated like this:

Step 1. Determine shipping zone: UK Mainland is in Zone 1

Step 2. Determine shipping charge for each product category:

Seeds and sundries	Chargeable item(s) weight is 2Kg, so category charge = £8.55
Onion Sets	Total category weight is 1Kg, so category charge = £5.35
Seed potatoes	Total category weight is 25Kg, so category charge = £10.95
Vegetable Plants	Total category weight is 3.5Kg (1 x 2.5Kg for each 25 Asparagus crowns plus 1 x 1Kg for each pack of five Rhubarb crowns), so category charge = £8.55 (for pack weights see 'Vegetable Plants' table notes)

Step 3. Then add the category charges together to get the total charge:	£8.55
	£5.35
	£10.95
	£8.55
Total shipping charge:	£33.40 (excluding VAT)

Please note: due to recent changes in the regulations concerning VAT we are now required to add VAT to all our carriage charges.

Shipping Methods:

Goods are shipped by the 1st Class postal service, 'Signed For' postal service, Priority Airmail, or via a courier or pallet network. We reserve the right to charge for any additional costs incurred, such as phytosanitary certificates, re-directions, or any other special delivery instructions. Please allow up to 28 days for delivery. All goods shipped via a 'signed for' or courier service must be signed for by the customer upon receipt. Requests to leave goods as 'unsigned' must be made at the time of ordering, and any such requests are made with the customer accepting liability. If you have any special delivery instructions please state these at the time of ordering. Re-direction requests made once the goods have been despatched may incur a charge. We can offer guaranteed delivery time, e.g. by 10.30am, afternoon only and Saturday morning delivery services by courier however there are additional charges; please contact us if these services are required.

Shipping Zones
Zone 1: Mainland UK
This zone includes all parts of the UK not defined in Zone 2, 3 or 4. All goods despatched to this area via our couriers should be with you within 2-3 days of the date of despatch from our premises; postal services may take longer.
Zone 2: Scottish Highlands & Islands, Scilly Isles, Isle of Wight & Isle of Man
This zone includes all parts of the UK defined by the following postal codes: IV,HS,KA27-28,KW,PA20-49,PA60-78,PH17-26,PH30-44,PH49-50,ZE,BT,GY,JE,TR21-25,PO30-41 and IM. All goods despatched to this area via our couriers should be with you within 2-3 days of the date of despatch from our premises; postal services may take longer.
Zone 3: Channel Isles
This zone includes all parts of the UK defined by the following postal codes: GY,JE. All goods despatched to this area via our couriers should be with you within 3-4 days* of the date of despatch from our premises; postal services may take longer. *Subject to any delays at the point of duty inspection.
Zone 4: Northern Ireland
This zone includes all parts of the UK defined by the following postal code: BT. All goods despatched to this area via our couriers should be with you within 3-4 days* of the date of despatch from our premises; postal services may take longer. *Subject to any delays at the point of import inspection.
Zone 5: Canada, Falklands Islands and Iceland
These areas have agreements with the UK that allow relatively easy movement of seed and so we can provide a shipping price and allow online ordering. Due to plant health restrictions we are unable to supply some non-seed products to these areas. All goods despatched to these areas via our couriers should be with you within 6-10 days* of the date of despatch from our premises; postal services may take longer. *Subject to any delays at the point of import inspection.
Zone 6: EU, Switzerland and the Rest of the World
Due to the complicated rules regarding seed shipments it is not possible to give an instant price for shipping and certification to these areas. Please contact us via e-mail with your requirements and we will be pleased to advise what is possible and the likely costs. Due to plant health restrictions we are unable to supply some non-seed products to these areas. All goods despatched to these areas via couriers should be with you within 10-12 days* of the date of despatch from our premises although this does vary greatly depending upon the destination; postal services may take longer. *Subject to any delays at the point of import inspection.
