Welcome to...

...the 2027 Moles Seeds catalogue

Dear Customer,

Welcome to our new 2027 catalogue. As always, we would like to start by thanking all those customers who purchased from us over the previous year.

Here in Essex the late spring and summer of 2026 ended up being even hotter and drier than the summer of 2025, meaning that irrigating crops became a necessity and the withdrawal of abstraction licences a big concern. The knock-on effects of the very hot and dry weather have been many fold, including germination failures of lettuce, celery and pansies (due to thermodormancy) and the premature flowering of some traditionally overwintered crops, such as wallflower. Pumpkin and squash crops have suffered less from disease than previous years but in general fruits have matured earlier and smaller than would normally be expected. Amenity lawns suffered during the drought and there has been increased demand from people looking to re-sow. For seed production the weather conditions both in the UK and further afield have led to potential shortages, particularly in crops such as carrots and onions.

Looking forward to 2027, we have further strengthened our range of home grown and semi-professional cut flower varieties, including the addition of select colours from the Sweet Pea Spring Sunshine series. Other exciting ornamental introductions include the Digitalis DiBella series (a compact first year flowering range, ideal for pots and containers) and Nemesia F1 Tiny Treasure series (providing cutting raised performance from a seed raised format). Established series have also been enhanced with the inclusion of additional colours, such as the new purple and red added to the Antirrhinum Twinny series and Rose Star added to the Petunia Mambo series. The vegetable range continues to be updated as new varieties are developed to further enhance field performance, disease resistance, etc.. A good example of this would be lettuce, where the constant battle against Bremia means new varieties are always being bred. Seed imports, particularly of some products such as tomatoes and peppers, continue to be a challenge and so we always recommend placing orders for these items as soon as your production programmes are decided upon. After the turbulence of last year's tomato seed supply, we have changed quite a few varieties to ensure that the seed can be available more consistently.

As with previous years, we continue to supply all kinds of businesses and organisations, as well as allotment societies and keen individuals, in fact anybody who appreciates good quality seed, backed up by good quality service. If you are new to Moles Seeds then we hope you find something of interest within this catalogue and we look forward to hearing from you very soon.

We wish all our customers good luck for their 2027 season.

Easy to grow border/container plant. Intense crimson foliage and flowers. Makes a great cut flower. (2,100 seeds per gram). 150cm.

¼g	½g	1g	2½g
£3.50	**£6.40**	**£11.95**	**£26.80**

AMA40 **Paniculatus Foxtail**

Long, upright, deep blood red spikes over bronze-red foliage. 60cm.

2½g	5g	10g	15g
£4.30	**£7.70**	**£13.80**	**£19.10**

Ammi majus

Annual - sow March onwards into module trays, germinates at 15-18°C. Plant at 25cm in rows 1 metre apart, or direct sow at approximately 100 seeds per linear metre April-May. Low fertilization requirement. Tall, so support netting can be useful.

AMM20 **Queen of Africa**

Graceland type. Dark green foliage and large flat flower umbels. Strong and straight stems with very uniform growth producing quality stems. The large flat flower umbels with clear white flowers are highly versatile for mixed bouquets. 100cm.

End Use: Fresh cut flower, back of borders.

500sd	1,000sd	2,500sd	5,000sd
£2.70	**£5.10**	**£11.50**	**£22.50**

Ammobium

Annual - sow March-May into module trays, germinates at 15-18°C. Plant at 20cm in rows, approx 12 weeks crop time. 2,100 seeds per gram.

AMM10 **Grandiflorum**

Produces 'everlasting' yellow-white flowers that can be dried. Does well in sandy soils. 60cm.

End Use: Fresh and dried flower, garden hardy annual.

2½g	5g	10g	15g
£2.25	**£4.20**	**£7.85**	**£11.35**

Anacyclus

Perennial, sow June-July, germinates 2-3 weeks at 18-20°C, cover seed lightly with vermiculite.

ANA05 **Depressus Garden Gnome**

Small white daisy like flowers, petals deep red on reverse. A good early flowering perennial for pot sales. 6cm.

Sell in: 8cm pots.
End Use: Rockeries

500sd	1,000sd	2,500sd	5,000sd
£5.35	**£10.15**	**£22.85**	**£44.80**

Anchusa

Biennial/Perennial, sow July-August, or grow as Annual, sow January, germinates 2 weeks at 18-20°C. 400 seeds per gram.

ANC10 **Blue Angel**

Forget-me-not-like flowers of bright blue produced through the Summer. 25cm.

Sell in: 9cm or larger pots.
End Use: Borders.

2½g	5g	10g	15g
£2.90	**£5.40**	**£10.15**	**£14.65**

Anemone

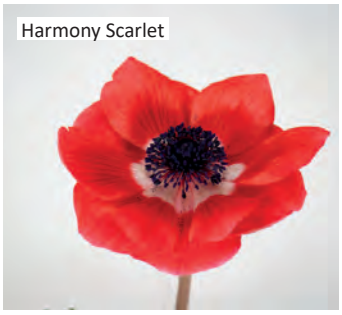

Anemones alpina and pulsatilla are listed under Pulsatilla.

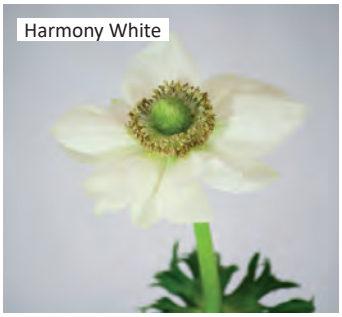

Coronaria - See individual items for technical details.

Hupehensis - Perennial, sow March-April at 22°C, cover with a thin layer of vermiculite. Germinates in 14 days. Plug crop 13-15 weeks. Will flower August-October. Pot Size 13-15 cm. Requires damp compost, do not let plants dry out.

Coronaria

Harmony Series

Perennial, sow August to December for flowering February to May. Germinate at 15°C. After radicle emergence (approx. 6-7 days) lighly cover with a peat/vermiculte blend. Compact plants with large flowers on strong stems. Great for Spring sales. 30cm.
Sell in: 13 cm or larger pots.
End Use: Containers, borders.

ANE02 **Blue**

ANE05 **Scarlet**

ANE07 **White**

25sd	50sd	100sd	250sd
£4.60	**£8.55**	**£16.20**	**£36.95**

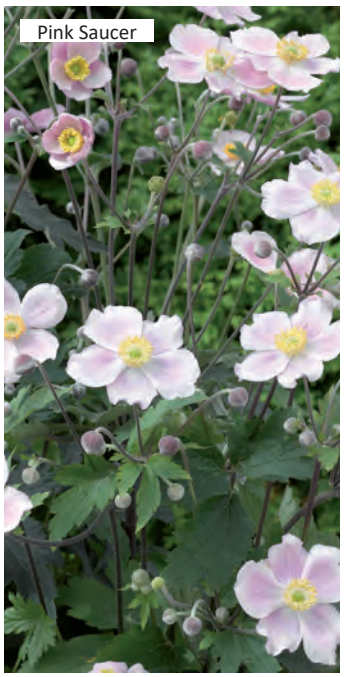

ANE10 **Mona Lisa Mixed**

Greenhouse cut flower. Sow March-June, germinates 2-3 weeks at 18-21°C, cover seed with vermiculite. Use large cell trays for best results. Flowering October to April at cool temperature (8-12°C). Takes around 20 weeks sowing to start of flowering. Final plant density 20-40 per square metre. Commercial cut flower item producing blooms up to 10cm in diameter, on sturdy stems up to 45cm long, around 15 per plant. Vivid colours, and a generally disease free crop. With the use of growth regulators, Mona Lisa can be produced as a 9cm pot subject. Cultural Leaflet available.

Sprawling perennial producing masses of daisy-like yellow flowers in Summer. 75cm. (2,100 seeds per gram).

Sell in: 9cm or larger pots.
End Use: Borders.

2½g	5g	10g	15g
£2.70	**£4.80**	**£8.60**	**£11.90**

Antirrhinum

Snapdragon. Annual, which can be sown early and sold April onwards as it is tolerant of low temperatures. Sow January - February, germinates 7-10 days at 18-21°C. Sowing-flowering 14-16 weeks. Cultural Leaflet avaliable.

Compact varieties such as **Floral Showers** are sold in 6 or 9 packs in bud or in flower. They can also be sown in June-July and sold in flower in pots in Autumn.

Taller varieties are sold in 9-packs or strip trays as green plants with label. F1 hybrids such as **Liberty** and **Sonnet** are ideal for formal bedding schemes.

Cut Flower varieties - **Madame Butterfly** and **Rocket**.

A range of semi-professional Cut Flowers (see page 158-160 for explanation of terminology) can be found on our website.

F1 Compact Types

ANT190 **Floral Showers Mixed**
Bright mixture, very early flowering, for Spring and Autumn sell in flower in packs or 9cm pots. 20cm.

500sd	1,000sd	2,500sd	5,000sd
£6.20	**£11.75**	**£26.45**	**£51.85**

Snappy Series

An early flowering dwarf Antirrhinum with a strong branching habit and closely spaced flowers. Great for pack production and use in beds and containers. Suitable for early spring and autumn sales. Garden height 20-25cm.

ANT440 **Rose**

ANT480 **White**

ANT490 **Mixed**

Antirrhinum (contd.)

Cut Flower Types

Cut Flower Technical Information. Sow at 18-21°C, transplant into modules. Sow September onwards for planting out in unheated glass / tunnels for Spring cropping. Sow February for planting outdoors May onwards for Summer Cropping. Or sow July for cropping under unheated glass/tunnels in late Autumn. Plant out at 25x25cm, pinching out tips. Thin to 4-5 of strongest shoots per plant. Requires support with crop netting. Cut when spikes are one third open. Feed crop well.

F1 Varieties

Madame Butterfly Bronze

Madame Butterfly Ivory

Madame Butterfly Pink

Madame Butterfly Red

Madame Butterfly Cherry Bronze

Madame Butterfly Series

Double open form and larger florets, this tall series make an excellent cut flower, as well as an impressive display for beds and borders. 50-75cm

ANT242 **Bronze**

ANT244 **Bronze/White**

ANT246 **Ivory**

ANT248 **Pink**

Deep rose-carmine flowers. 15cm. Approximately 4,000 seeds per gram. Sow 1g for 1,000 plants.

½g	1g	2½g	5g	10g
£3.95	**£7.55**	**£16.40**	**£30.45**	**£57.25**

Aralia

Fatsia japonica. Greenhouse perennial, sow April-September, cover seeds with vermiculite, germinates in around 3 weeks at 19-24°C.

ARA50 **Sieboldii**

Large, glossy green palmate leaves. 1m.

Sell in: 13cm or larger pots.

50sd	100sd	250sd	500sd
£3.35	**£6.40**	**£14.50**	**£27.45**

Arctotis

Perennial grown as Annual, sow March-April, cover seeds with vermiculite, germinates in 2-3 weeks at 18°C. 150 seeds per gram.

ARC10 **Harlequin Mixed**

Bold daisy-like flowers (which tend to close up in dull weather) in a bright colour range, on long stems, over cut grey-green foliage. 50cm.

Sell in: 9cm pots.
End Use: Borders.

1g	2½g	5g	10g
£2.10	**£4.50**	**£8.35**	**£15.70**

Arenaria

Perennial, sow April-June, cover lightly with vermiculite, germinates in around 4 weeks at 20°C. 800 seeds per gram, sow 3g for 1,000 plants.

ARE10 **Montana**

Dwarf, cushion forming rockery plant, white flowers in May and June. 15cm.

Sell in: 9cm pots.
End Use: Rockeries.

⅛g	¼g	½g	1g
£3.15	**£5.70**	**£10.00**	**£19.10**

Armeria

Thrift. Perennial, sow March-June, cover with vermiculite, germinates in around 3-4 weeks at 15-18°C, can be erratic. 900-1700 seeds per gram , sow 5g for 1,000 plants.

Sell in: 8-10cm pots.
End Use: Rockeries

Armada Series

Much earlier flowering and more uniform than traditional varieties. Very free flowering after vernalization, producing up to 40 flower stems. Great for spring and summer sales. 15-20cm.

ARM10 **Armada Pink**

ARM15 **Armada Rose**

ARM20 **Armada White**

100sd	250sd	500sd	1,000sd
£2.90	**£6.60**	**£12.50**	**£23.75**

£3.05	**£5.70**	**£10.75**	**£24.55**

Aster - Annual Cut Flower Varieties

Technical details - cut flower types

1. Sowing under glass and transplanting outdoors:

Sow Feb-April into seed trays, blocks or module cell trays at 15-18°C, cover seed (400 seeds/g). Germinates in 7-10 days. Transplant into borders mid May onwards at 25x25cm. Crop will be slightly earlier in unheated tunnel, otherwise around 100 days sowing to flowering. Support to prevent collapse.

2. Direct sowing into open ground: Sow thinly into rows 25cm apart in April. Thin to required spacing. The disadvantage of this method over transplanting is that weed control is less easy.

3. Whole production under glass: This method will provide a late extension to the crop, i.e. into October. Sowing is carried out in June, and the young plants are planted out into suitable prepared soil in glasshouses and beds. Aster Wilt (Fusarium oxysporum callistephi) is the greatest threat to aster production (plants wilt just before flowering); avoid it by rotating the crop (one crop per 7 years) to prevent build-up.

For furthur semi-professional cut flower Asters see website.

Gala Series

Upright and sturdy habit with ideal presentation of the the fully double pincushion type 9-10 cm flowers. Extra strong stems qualify this series for commercial production. 80cm.

Aster bedding

Annual, sow February-April, cover seed with vermiculite, germinates in 7-10 days at 18-20°C, prick out into multicell trays after 4-5 weeks. Grow on at 12-15°C. To encourage a compact habit, growth regulators can be used, according to the manufacturers' recommendations. Sowing to flowering 14 weeks. 450 seeds per gram (sow 5g for 1,000 plants). Drench compost with a suitable fungicide to prevent wilt disease.

Milady Series

This well-known dwarf bedding Aster is also perfect for pot bedding sales late in the Summer. Well branched habit, Chrysanthemum-type flowers. 25cm.

Aster alpinus

Sow April-June germinates in around 2-4 weeks at 12-15°C, cover with vermiculite.

Sell in: 9cm pots or larger, as green plant with label.
End Use: Borders.

AST212 **Happy End**

An attractive perennial aster. Plants form a low clump of bright green leaves. Branching stems of single daisy-shaped, pink with yellow eye flowers appear late spring and early summer. 25cm

250sd	500sd	1,000sd	2,500sd
£4.40	**£8.35**	**£15.85**	**£35.70**

Astilbe

Perennial, 5-6 weeks at 15-18°C, sow February-July on the compost surface (Astary can be sown in December for Spring flowering). Germination can be slow and erratic.

Sell in: 13cm pots or larger, as green plant with label or in flower.
End Use: Borders (moist locations).

AST235 **Showstar**

A dwarf variety of Astilbe arendsii producing a magnificent display in a range of colours from white and cream to pinks and reds. 30-40cm.

pelleted seed

100plt	250plt	500plt	1,000plt
£5.00	**£11.40**	**£21.50**	**£40.95**

AST248 **Astary Mixed**

A real breakthrough, unlike other Astilbe, Astary does not need vernalization for flowering. Flowering plants can be produced in 20-23 weeks. The flowering time and plant habit are very uniform. In a range of colours from white to cream to pinks and reds. 30cm.

pelleted seed

50plt	100plt	250plt	500plt
£7.00	**£13.30**	**£30.30**	**£57.25**

Astrantia

Perennial, cold germinator, sow Autumn to early Winter, 8-10 days at 15-18°C followed by 4-6 weeks at 2-4°C.

AST250 **Primadonna**

Attractive bushy plants with maple-like leaves. Deep red flower umbels of 4cm in diameter. 75cm.

Sell in: 9cm pots as green plant with label or in flower in 2 litre pot.
End Use: Borders (moist locations), also cut flower.

100sd	250sd	500sd	1,000sd
£4.70	**£10.70**	**£20.20**	**£38.45**

Atriplex

Annual germinates in around 14 days at 20-22°C. Suitable for direct sowing April-May approximatlely 10-15 weeks from sowing to flowering.
End use: Fresh and dried cut flower.

ATR100 **Red Plume**

Deep red plumes of attractive papery seed pods on strong stems. Excellent for adding texture to floral arrangements. Plumes 30-40cm in length.

2½g	5g	10g	15g
£2.20	**£4.05**	**£7.55**	**£10.90**

Aubrietia

Perennial, 2-3 weeks at 10-18°C, sow June-July. Can be direct-sown into cell trays - do not exclude light. After 4-5 weeks prick out into 9cm pots, and grow on at 12-15°C. 2,400 seeds per gram, 1g for 1,000 plants.

Sell in: 6 packs, or 9cm pots, as green plants or in flower in early Spring
End Use: Rockeries and walls.

Royal Series

Well known Spring flowering rockery plant, excellent in combination with yellow perennial Alyssum and white Arabis. 12cm.

Calendula

'Pot Marigold'. Annual, sow direct in the flowering position in September or March, thin out as required. Prefers comparatively poor soil. Otherwise, sow direct into packs in March, cover seeds with vermiculite, grow cool, and treat with growth regulators according to the manufacturers' recommendations, to ensure a compact habit for sale. 150 seeds per gram. 10g for 1,000 plants.

Sell in: 6 packs. End Use: Borders, except Touch of Red, Double Choice and Balls Improved (cut flowers), and Wintersun (containers).

CAL090 **Fiesta Gitana Superior Mixed**

A mix of orange and yellow shades with many bicolours. Reselected back to its original, fully double form. 20cm.

2½g	5g	10g
£3.95	**£7.05**	**£12.65**

15g	25g	50g
£17.50	**£27.45**	**£50.10**

CAL100 **Balls Improved Orange**

Double-flowering, orange - taller type for cut flowers. 60cm.

10g	15g	25g	50g
£3.80	**£5.30**	**£8.25**	**£15.10**

CAL110 **Double Extra Choice Mixed**

Large double flowers. 60cm.

10g	15g	25g	50g
£4.05	**£5.60**	**£8.80**	**£16.05**

CAL185 **Orange King**

Has large crested double orange flowers. Often seen as one of the standard varieties. 40cm.

2½g	5g	10g	15g
£3.10	**£5.50**	**£9.90**	**£13.70**

CAL130 **Calypso Orange**

Naturally compact, large-flowered Calendula. They have a neat, tidy garden habit. 25-30cm.

500sd	1,000sd	2,500sd	5,000sd
£4.70	**£8.95**	**£20.15**	**£39.50**

CAL180 **Touch of Red Mixed**

A mixture of buff, orange and yellow shades, each petal being tipped with a distinctive red. Taller type. 60cm.

£4.20	**£7.50**	**£10.40**	**£16.30**

CAN201 **F1 Cannova Gold Leopard**

Intense golden-yellow flowers with a distinctive, red-speckled pattern. Excellent branching and flower-to-foliage ratio. Ideal for eye catching plantings and premium retail sales.

25sd	50sd	100sd	250sd
£16.05	**£29.85**	**£56.60**	**£129.05**

Canterbury Bells

Sow November to the end of February - flowers late April from a November sowing, 2-3 weeks at 15-18°C, cover pellets lightly with vermiculite. Grow on at 15-18°C, and plant out at up to 25 plants per square metre. Minimum temperature 7-8°C. Supplementary lighting is not essential.

Biennial type - sow May-July, cover seed very lightly with vermiculite,
germinates 2-3 weeks at 15-20°C. 3,500 seeds per gram, 1g for 1,000 plants

Champion Series

The Champion series flowers as an annual rather than a biennial, so does not need cold temperature to initiate flowers. Flowers in around 15-16 weeks from sowing. 65cm.

End Use: Cut flower.

CAN21 **Lavender**

CAN22 **Blue**

CAN23 **Lilac**

CAN24 **Pink**

CAN25 **Rose**

Cerinthe

Annual, germination takes around 2 weeks at 18-20°C, sow January-March, 18 seeds per gram.

Sell in: 9cm or larger pots.
End Use: Borders.

CER20 **Major Purpurescens**

Rich, purple-blue nodding flowers contrast with the deep green bracts, borne on long, strong stems. The fleshy green leaves are equally attractive. 70cm.

25sd	50sd	100sd	250sd
£2.80	**£5.15**	**£9.75**	**£22.20**

Chaenorhinum

Perennial, germination takes around 3 weeks at 20°C, cover lightly with vermiculite, sow January-June. Will flower in its first season from an early sowing. Takes around 4 months sowing to flowering.

CHA010 **Blue Eyes**

This variety has masses of mid blue flowers with contrasting white eyes. Very prolific flowering. The semi-cascading habit is ideal for mixed containers

250sd	500sd	1,000sd	2,500sd
£2.50	**£4.70**	**£8.95**	**£20.15**

Cheiranthus

Also known as Siberian Wallflower. (See also Erysimum). Perennial grown as biennial, germination takes around 2 weeks at 18-20°C. Cover with vermiculite. Sow May-July, 600 seeds per gram.

Sell in: 6-packs and pots, green with label in Autumn, budded in Spring.
End Use: Borders and Winter containers.

CHE10 **Allionii Orange**

Orange flowers with a compact habit, flowers in late Spring at the same time as the main wallflower types. 30cm.

10g	15g	25g	50g
£3.75	**£5.15**	**£8.10**	**£14.75**

Chrysanthemum

Perennial, sow April-June, germination takes 2-3 weeks at 15-20°C, cover seed with vermiculite. Around 900 seeds per gram.

Sell in: 13cm and larger pots, generally in flower in Summer.
End Use: Borders.

Annual, sow February-March, germinates in around 2 weeks at 15-20°C, cover with vermiculite. For seed counts see species descriptions. Cultural leaflet available.

Sell in: 6-packs or pots. End Use: Edging plants in formal bedding schemes, and used in mixed containers. Merry is the exception, as it is a direct-sown hardy annual.

£4.25	**£8.05**	**£18.15**	**£35.50**

CHR40 **Multicaule Goblin**

Golden yellow flowers from July to October, for edging and containers. 20cm. 600 seeds per gram.

1g	2½g	5g	10g
£2.25	**£4.85**	**£9.00**	**£16.85**

Cineraria pot type

Greenhouse biennial. Surface, sow, keep moist, 14-21 days at 20°C. Protect from direct sunlight. Prick out into cell trays or small pots when large enough to handle. Then 9-13cm pots, grow cool and airy at approx. 10°C, do not overwater, liquid feed once plants have rooted to the base of the pot to ensure good leaf cover, market when flowers are half open. Sow July, flower late Dec-Jan. Sow August, flower February. Sow Sept, flower March. Sow Oct, flower April-May . *Sell in: 9-13cm pots.*
End Use: Indoor pot plant.

CIN50 **Star Wars Mixed**

Very high quality variety. The small flowers are produced in a tight mass above the foliage, excellent domed habit and colour range. For mid to late season production.

25sd	50sd	100sd	250sd
£4.35	**£8.05**	**£15.25**	**£34.70**

Cineraria maritima

Annual, sow February-March, or July for production of plants for Winter containers. Germination takes up to 21 days at 18-21°C, cover lightly with vermiculite, prick out after 5-6 weeks and grow on at 10-15°C. Ready in about 12 weeks from sowing. *Sell in: 6- or 9-packs (Silverdust).End Use: Silver-leaved contrast plant in formal bedding schemes, and mixed baskets and containers.*

CIN70 **Cirrus**

Dwarf variety with rounded silver leaves, very weather resistant. 20cm.

100sd	250sd	500sd	1,000sd
£3.30	**£7.45**	**£14.10**	**£26.85**

Coreopsis

Perennial varieties, sow January for early pack/pot sales (flowers the same year from an early sowing), otherwise sow April/May for flowering the following year; germinates in 2 weeks at 18-22°C, prick out into packs or pots as appropriate. 350 seeds per gram (5g for 1,000 plants).

Annual Varieties, sow from Febuary onwards under protection, for flowering pot sales from May or direct sow in flowering position after the last frosts.

Sell in: 9cm or larger pots, as green plant with colour label, or during the Summer in flower.
End Use: Borders.

Perennial Varieties

COR027 **Double the Sun**

A very early variety 2 to 3 weeks earlier than Early Sunrise. Large 6cm golden yellow flowers are produced *en masse*. Great for early Spring colour. 36cm.

100sd	250sd	500sd	1,000sd
£4.20	**£9.60**	**£18.15**	**£34.55**

COR028 **Presto**

This variety is very compact. For the grower this is the perfect variety to produce in a pack. The production cycle is short and the crop is easy to manage. Great for early spring perennial sales. 25cm.

100sd	250sd	500sd	1,000sd	2,500sd
£4.70	**£10.75**	**£20.30**	**£38.65**	**£87.00**

COR034 **Sterntaler**

A single flowered type. The flowers are golden yellow with an attractive mahogany brown ring. 40cm.

1g	2½g	5g	10g	15g	25g
£2.55	**£5.50**	**£10.25**	**£19.25**	**£27.75**	**£44.00**

COR030 **Early Sunrise**

A fairly early variety with good length of flowering combined with weather resistance and attractive shape. From an early sowing it will bloom in about 12 weeks. The flowers are semi-double, very uniform and golden. Very popular item for annual and perennial sales. 45cm.

100sd	250sd	500sd	1,000sd
£2.80	**£6.30**	**£11.90**	**£22.65**

COR050 **Mayfield Giants**

Taller variety, yellow flowers. 90cm.

5g	10g	15g	25g
£2.50	**£4.45**	**£6.20**	**£9.70**

COR044 **Sunglobe**

Semi double golden yellow flowers, mounded well branched plant habit. First year flowering. Height 30-35cm. Total crop time 13-15 weeks.

100sd	250sd	500sd	1,000sd
£4.30	**£9.75**	**£18.40**	**£35.00**

COR046 **Andiamo Yellow Red**

Vigourous well branched plants covered with golden yellow flowers with a deep red centre. First year flowering. Height 35-40cm.

100sd	250sd	500sd	1,000sd
£3.50	**£7.90**	**£14.95**	**£28.45**

Annual Varieties

COR052 **Corusco Cream-Red**

Compact uniform annual 20-30cm in height no PGR required. Creamy white flowers with distinctive mahogany rings. 75 days sowing to flowering. Fleuroselect Gold medal winner.

100sd	250sd	500sd	1,000sd
£2.35	**£5.30**	**£9.95**	**£18.95**

COR054 **Roulette**

Direct sow annual with dark brown-red flowers with a second row of golden brown petals which creates an interesting effect. 60-80cm in height.

2½g	5g	10g	15g
£2.45	**£4.55**	**£8.50**	**£12.25**

Cornflower

Cut flower varieties, annual, sow direct in April/May into rows 25cm apart, at 0.3g/metre of row; takes 2-3 weeks to germinate, and around 12 weeks sowing to flowering. 200 seeds per gram.
End Use: Fresh and dried cut flower.

Bedding varieties ,annual, sow March-April, 1-2 weeks at 15-18°C, cover with vermiculite, 250 seeds per gram.

Sell in: 9-10cm pots.
End Use: Borders.

Cut flower varieties

COR105 **Romantic Mixed**

An attractive pink blend great for cutting.

5g	10g	15g	25g	50g	100g
£2.70	**£4.80**	**£6.65**	**£10.40**	**£19.05**	**£35.00**

CYC100 **Sierra Mixed**

Bred for the large flowered F1 market. All the colours are well matched for early bloom time, plant habit and flower quality. The foliage is well proportioned and attractively marbled. The plants have a firm upright habit and are vigorous whilst producing an abundance of large blooms held on sturdy stems. Ideal for cropping in 28-32 weeks in medium to large sized pots.

25sd	50sd	100sd	250sd
£9.45	**£17.50**	**£33.20**	**£75.70**

Mini F1

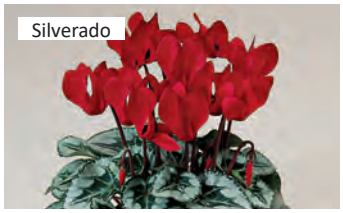

Sell in: 9cm pots, 4-packs.
End Use: Indoor houseplant, and Winter containers.

CYC200 **SeeWhy Mixed**

The most uniform compact series for Summer and Autumn production. All colours match in earliness and plant habit. They stay compact even in full bloom. Great item for Autumn containers and window boxes. 25cm.

25sd	50sd	100sd	250sd
£9.45	**£17.50**	**£33.20**	**£75.70**

CYC090 **Silverado Mixed**

Strongly marbled foliage and scented flowers make this mini cyclamen perfect for table decoration or Autumn containers. Produces a high count of flowers per plant. 15cm.

25sd	50sd	100sd	250sd
£9.45	**£17.50**	**£33.20**	**£75.70**

Hardy Outdoor Types

CYC295 **Neapolitanum**

(syn. C. hederifolium). Flowers August to November. Soft rose flowers with a carmine base. Foliage dies off in the Summer. (145 seeds per gram.)

25sd	50sd	100sd	250sd
£4.85	**£9.00**	**£17.05**	**£38.85**

CYC280 **Lify Classic Leaf Mix**

(C. hederifolium) Striking foliage with classic leaf pattern and flowers in shades of pink, white and purple. Flowers from August to November, hardy and cold resistant to -15oC. Production time 27-29 weeks. Easy to naturalise.

25sd	50sd	100sd	250sd
£4.70	**£8.70**	**£16.45**	**£37.50**

CYC305 **Coum**

Flowers December to March, pink shades (occasionally white) over marbled foliage. Produced entirely outdoors, very hardy. (300 seeds per gram.)

25sd	50sd	100sd	250sd
£4.85	**£9.00**	**£17.05**	**£38.85**

CYC310 **Koumy Classic Leaf Mix**

(C. coum) Delicate round blooms in white and shades of pink over distinctive rounded leaves with a classic leaf pattern. Flowers continuously from November to March, hardy and cold resistant to -20°C. Production time 40-42 weeks. Easy to naturalise.

25sd	50sd	100sd	250sd
£4.70	**£8.70**	**£16.45**	**£37.50**

Dahlia

Compact bedding types - annual sow February-March. Germination 7-14 days at 20°C, cover seeds with vermiculite,. Prick out after 3 weeks into 6-packs or pots, grow on at 15°C. Sowing to flowering about 12 weeks. 120 seeds per gram (sow 15g for 1,000 plants). Plant heights quoted are approximate.

Tall cut flower types - annual, sow February-March. Germination 7-14 days at 20°C, cover seeds with vermiculite. Prick out after 3 weeks into pots, grow on at 15°C. Plant out after last frost at 60 x 60cm spacing. Will flower from July until first frosts. Cut flowers early or late in the day when nearly fully open.

Compact Bedding Types

Bronze Foliaged Mixtures

DAH050 **Redskin**

Semi-double flowers over bronze foliage. 50cm.

£5.60	**£10.40**	**£19.55**

15g	25g	50g
£28.20	**£44.70**	**£85.10**

Datura

Fast growing tender perennial, sow January-March, germination takes up to 5 weeks at 20°C, cover with vermiculite. Prick out when large enough to handle into 8cm pots, then to larger pots or containers as required. Sowing to flowering approx. 24 weeks. Caution - toxic if eaten.

Sell in: 15cm pots.
End Use: Conservatory plant, and sheltered position outdoors in containers in Summer.

DAT020 **Double Eryngium Blue**

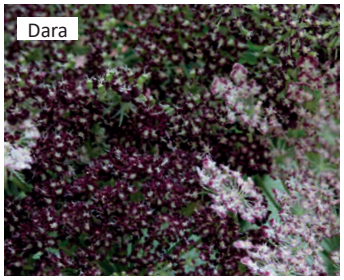

Fully double, lilac-purple flowers with frilled petal edges. 75cm.

50sd	100sd	250sd	500sd
£8.30	**£15.70**	**£35.75**	**£67.60**

Daucus

Annual - sow January under glass for flowering May-June. Can be direct sown April/ May for flowering July August. Germinates in 14-21 days at 20-30°C. 850 seeds per gram.

End Use: Cut flower.

DAU100 **Dara**

Great cut flower in red and pink shades. Producing lacy, airy, flat flowers and fern-like foliage. It is attractive to bees and butterflies. 120cm.

½g	1g	2½g	5g
£3.40	**£6.50**	**£14.10**	**£26.20**

Delphinium

Elatum - Perrenial but grown as an annual 2 weeks at about 15-20°C. Cover with vermiculite.

See cut flower focus pages 158-160 and website for additional variety ideal for the semi-professional cut flower market and pot sales.

Cultorum - 2 weeks at 15-18°C, sow May-July. cover with vermiculite, 10g for 1,000 plants.

Grandiflorum (chinense) - Perennial but grown as an annual, 2 weeks at 15-20°C, cover with vermiculite, sow January for June flowering. Cultural Guide available (Delphinium).

Nudicaule - see grandiflorum

Sell in: 9cm pots (green plant with label) up to 2 litre pots in flower. End Use: Borders.

For Delphinium consolida see Larkspur.

Elatum

Magic Fountains Series

The series was developed to produce the widest range of colours available in dwarf 'Pacific' type Delphiniums. The centre of each flower (the 'Bee') is light or dark coloured depending on the variety. 60cm.

DEL019 **Cherry Blossom**

DEL020 **Mid Blue with White Bee**

DEL021 **Dark Blue with Dark Bee**

DEL022 **Dark Blue with White Bee**

DEL023 **Lavender with White Bee**

DEL024 **Lilac Pink with White Bee**

DEL025 **Sky Blue with White Bee**

DEL026 **White with Dark Bee**

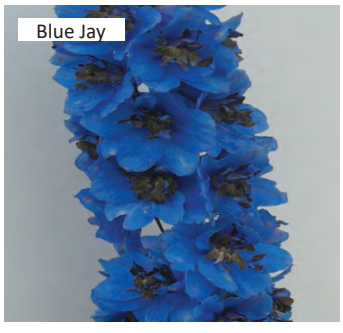

DEL027 **Pure White**

£7.25	**£13.45**	**£25.50**	**£58.15**

Nudicaule

DEL150 **Red Cap**
This nudicaule type produces many stems of striking red flowers with glossy green foliage. Flowers in the first year from early sowing. Great for 9-13cm pot sales. 30cm

50sd	100sd	250sd	500sd
£4.35	**£8.20**	**£18.70**	**£35.35**

Dianthus

Dianthus chinensis - Annual, sow January onwards, cover seed lightly with vermiculite. Germinates in around 7 days at 21°C. Prick out into packs or 9-10cm pots after 4-5 weeks. For early flowering, light levels need to be high, and daylength at least 10 hours. Sowing to flowering (packs) approx. 16 weeks. Cultural Guide available.

F1 chinensis x barbatus, F1 chinensis x superbus, D1 x hybrida nana - These types can be sold not only in the Spring, but also in flower in the Autumn, as they are hardier than the chinensis types. Sow May or June for flowering in August or September. Sow January-February for late spring flowering. Grow on the dry side.

Open Pollinated Annual Varieties - (1000 seeds per gram)

Perennial Varieties - sow May-July, cover seed with vermiculite, germinates in 2 weeks at 18-21°C. *Generally as a green plant with colour label, also in flower (more compact types).*

Sell in: 6-packs, 9cm pots.
End Use: Borders containers.

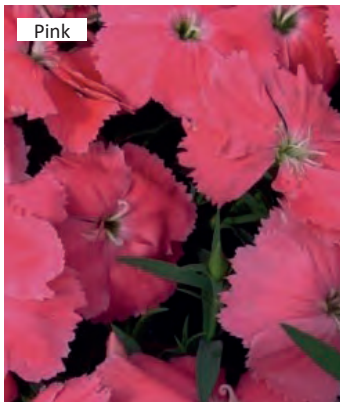

Dianthus chinensis

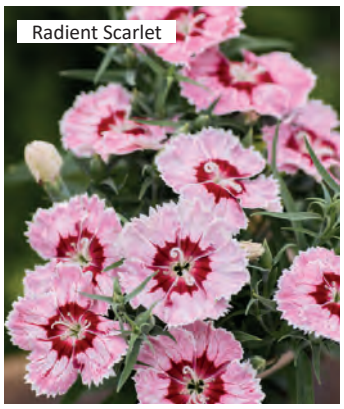

F1 Diana Series

A chinensis type, with a vigorous, low growing habit which makes outdoor performance excellent. In the pack/pot, Diana is early and compact. 20-25cm. More colours avaliable on the website.

DIA045 **Blueberry**

DIA276 **Knappii Yellow Harmony**

An unusual and interesting species. A selected form of the only yellow flowered Dianthus. It can also be grown as an Annual from an early sowing. 40cm. 950 seeds per gram.

100sd	250sd	500sd	1,000sd
£3.00	**£6.80**	**£12.90**	**£24.50**

Dichondra

Tender perennial grown as annual. Cover lightly with vermiculite. Keep soil moisture high until radicle emergence, then reduce moisture levels. Plug development is faster with drier plug culture. Germinate at 21-24°C, sow January onwards. Self branching.

Sell in: 9-10cm pots, mixed hanging baskets.
End Use: Hanging baskets, containers.

DIC18 **Emerald Falls**

Easy to handle and grow, with plants branching without the need for pinching. Creates a denser tighter plant than Silver Falls. Short internodes hold foliage close to the stem. Grows about 90 cm in length.

multi-seeded pellets

25plt	50plt	100plt	250plt
£9.35	**£17.40**	**£32.95**	**£75.15**

DIC16 **Silver Falls**

This trailing foliage plant has a number of features to make it ideal as a basket plant: cascading, silver foliage, very drought and heat tolerant, recovers well if wilted. Grows about 90 cm in length.

25sd	50sd	100sd	250sd
£6.45	**£12.00**	**£22.70**	**£51.75**

DIC40 **Silver Surfer**

An attractive trailing plant with silvery leaves. Performs well in hot and dry conditions and makes an excellent plant for hanging baskets, mixed containers and ground cover. Grows to about 150cm in length.

50sd	100sd	250sd	500sd
£9.65	**£18.25**	**£41.65**	**£78.75**

Dictamnus

Also known as 'Burning Bush.' Perennial, 8-10 weeks. Sow Nov-March in cold frame. Cover seeds with compost. 70 seeds per gram (75g for 1,000 plants).

Sell in: 2 litre pots.
End Use: Borders.

DIC20 **Fraxinella Rose**

Strongly aromatic plant with glossy dark green leaves. Spider-like fragrant flowers of carmine-rose are borne in June and July. 70cm.

2½g	5g	10g	15g
£6.90	**£12.80**	**£24.00**	**£34.60**

Didiscus

Annual, germinates in 2-3 weeks at 18-20°C. Cover lightly with vermiculite. Sow March to May. 320 seeds per gram.

Lace Series

Produces large sweetly scented umbels. Excellent for cutting and border use. Last well in water. Height 60cm.

£3.95	**£7.50**	**£14.25**	**£32.10**

Dolichos lablab

Annual, sow the large seeds straight into pots March-May. Germinates in 2-3 weeks at 15°C, 3 to 5 seeds per gram.

DOL10 **Ruby Moon**

Known as the 'Hyacinth bean', a dual purpose variety - as an ornamental it makes a showy climber with purple flowers, pods and foliage. As a vegetable, it produces small beans ideal for curries etc. 2m.

Sell in: 9cm pots.Needs staking.
End Use: Fences, trellises etc.

5g	10g	15g	25g
£4.05	**£7.25**	**£10.05**	**£15.70**

Doronicum

Perennial, sow May-July, germinates in 2-3 weeks at 18-20°C, cover with thin layer of vermiculite, grow on at 10°C, prick out into 9cm pots after around 6 weeks. To induce flowering, plants need exposure to 8-10 weeks of cold treatment. (sow 2,000 seeds for 1,000 plants).

Sell in: 9cm to 2 litre pots, generally in flower in Spring.
End Use: Borders, containers.

DOR03 **Little Leo**

This is the first Doronicum that is compact enough to be sold in flower. It has semi-double 5cm blooms of bright yellow. 30-35cm.

250sd	500sd	1,000sd	2,500sd
£5.85	**£11.00**	**£20.95**	**£47.15**

DOR10 **Caucasicum Magnificum**

Golden yellow large daisy like heads, early hardy border plant. 45cm.

250sd	500sd	1,000sd	2,500sd
£3.95	**£7.50**	**£14.25**	**£32.10**

Draba

Perennial, 2-3 weeks at 20°C, sow April-July, cover with very thin layer of vermiculite. (sow 2,000 seeds for 1,000 plants.)

DRA10 **Aizoon**

Compact plants bearing lemon yellow flowers in early spring. 3cm

Sell in: 9cm pots, green or in flower. End Use: Rockeries.

100sd	250sd	500sd	1,000sd
£3.30	**£7.45**	**£14.10**	**£26.80**

Dracocephalum

Perennial, sow June-October, germinates irregularly over a long period. Lower temperatures of 5°C may be needed for 2 weeks, then 15°C. Cover with thin layer of vermiculite, grow on at 10°C. 400 seeds per gram (sow 5g for 1,000 plants).

DRA21 **Rupestre**

These hardy perennials produce intense blue flowers. Forms bushy plants. Prefers full sun or half-shade. 30cm.

Sell in: 9cm to 1 litre pots, generally in flower in Spring.
End Use: Rockeries, borders.

100sd	250sd	500sd	1,000sd
£2.80	**£6.30**	**£11.90**	**£22.65**

Eccremocarpus

Annual climber, germinates in 2 weeks at 18°C, sow Feb-March, germination variable, 2,600 seeds per gram.

ECC10 **Scaber**

Climber with twining tendrils that cling to fences and trellises. Showy tubular flowers predominantly in shades of red with variation to oranges and occasionally deep yellow shades. If supported, vines can reach 3m in height.

Sell in: 9cm pots.
End Use: Fences, trellises etc.

¼g	½g	1g	2½g
£3.60	**£6.30**	**£12.05**	**£26.10**

EUC45 **Populnea Murray**

Great for use as a cut foliage item with its large, oval-shaped green-blue leaves. The compact habit also makes it perfect for pots, mixed containers and bedding. Light menthol scent. High germinating seed. 70cm

50sd	100sd	250sd	500sd
£4.85	**£9.15**	**£20.85**	**£39.40**

EUC50 **Pulverulenta Baby Blue**

Excellent for use as a cut foliage item for floral arrangements
Small well branched tree or bush for smaller gardens. Great in patio pots or as a house plant. Retains its bluish juvenal colour.
The foliage is very fragrant. 200cm

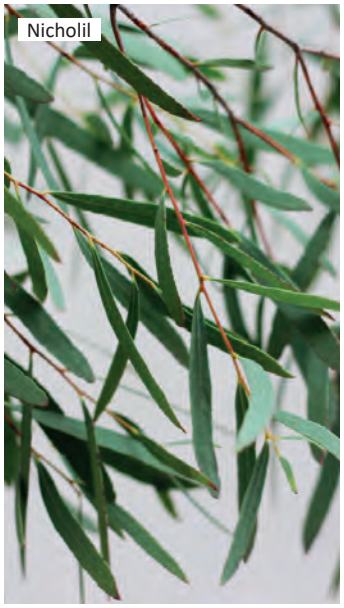

50sd	100sd	250sd	500sd
£4.25	**£8.00**	**£18.25**	**£34.50**

EUC60 **Pulverulenta Baby Blue Bouqet**

Great cut foliage type, with uniform shoots and short internodes. More compact habit than other selections. High germinating seed. 125cm

50sd	100sd	250sd	500sd
£5.10	**£9.65**	**£22.05**	**£41.65**

EUC90 **Nicholil**

Long narrow pointy leaves bluish/green in colour. Used for commercial production of floral foliage and trees.

50sd	100sd	250sd	500sd
£4.95	**£9.40**	**£21.40**	**£40.45**

Euphorbia

Annual Varieties - Sow April-June, cover seed with vermiculite, do not exclude light. Germinates in 2-3 weeks. Prick out into 9cm pots then plant up at 30cm centres if for cutting.

Perennial Varieties - Sow May-July, cover seeds with vermiculite, germinates 4-6 weeks at 15-18°C.

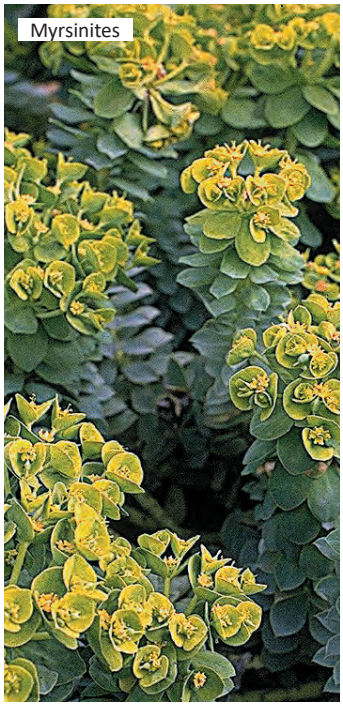

EUP20 **Snow Top**

Annual variety which leaf bracts have a petal like appearance. Variegated once planted out, great for flower arrangements (55 seeds per gram). Height 120cm.

Sell in: 9cm pots.
End Use: Borders.

5g	10g	15g	25g
£3.15	**£5.70**	**£7.90**	**£12.35**

EUP30 **Myrsinites**

Perennial variety with yellow flowers, thick grey trailing leaves. 15cm.
Sell in: 9cm pots.
End Use: Borders.

100sd	250sd	500sd	1,000sd
£5.55	**£12.60**	**£23.85**	**£45.40**

Felicia

Annual, sow February-April, 2 weeks at 20°C, cover with thin layer of vermiculite, 800 seeds per gram.

Sell in: 9cm pots and containers.
End Use: Borders and containers.

FEL10 **The Blues**

Very attractive sky blue flowers for bedding and containers. 30cm.

1g	2½g	5g	10g
£3.20	**£6.90**	**£12.85**	**£24.10**

Freesia

Greenhouse Perennial, 2-6 weeks at 20°C, cover with medium grade vermiculite. Germinate in the dark. Seed may benefit from a 24 hour soak in water at room temperature. Sow April-May.

FRE100 **Royal Crown**

Selected for extra large flowers and stem quality. In the second season the flower stems will have sufficient length for cutting. 45-65 cm.

Sell in: 10cm pots.
End Use: Containers and cutflowers.

50sd	100sd	250sd	500sd
£4.90	**£9.30**	**£21.15**	**£40.00**

Gaillardia

Perennial, 2-3 weeks at 20-23°C, sow May-July. Cover with vermiculite. Arizona and Mesa will flower in their first year from an early (January) sowing. Approximately 350-450 seeds per gram.

Sell in: 9cm or larger pots (green plant with label), and Goblin, Mesa, Arizona and Primavera can be sold in flower in Summer in 2 litre pot.
End Use: Borders and containers.

Arizona Series

First year flowering perennials which bloom earlier than other varieties. The compact, mounded habit is ideal for mixed containers and borders. Produces a mass of 10cm flowers. 35cm.

GAI01 **Apricot**

GAI03 **Sun**
Red with Yellow

GAI02 **Red Shades**

100sd	250sd	500sd	1,000sd

Geranium
(Pelargonium)

Tender perennial usually treated as annual. Approximately 220 seeds per gram. Variety selection depends on final use. Multi-headed types are especially good for early pack sales. For pots and bedding, Mavericks and Horizons are hard to beat. Ivy-leafed types (Tornado) are a fast-growing alternative to cutting-raised types. Where cost is an issue, the newer F2 types such as Cabaret and Spirit offer an alternative to the F1 varieties.

Sow December-February, or earlier (October) to overwinter cool and flower as early as April. For sales in May, sow early to mid January. Cover with vermiculite. A fungicide drench at sowing can help reduce the risk of Pythium disease.

Germination is rapid (4-6 days) at 21-23ºC, keep constant compost temperature, and do not allow the moisture level in the compost to drop too low, otherwise germination will occur in flushes. Prick out after 4 weeks into packs or pots, grow on at around 15ºC - takes 13-15 weeks from sowing to flower depending on the variety.

Always provide adequate moisture levels to maintain active growth, but be careful not to over-water as plants, especially if tightly packed, will be prone to Botrytis attacks. Because of this it is preferable to water earlier in the day, so plants can dry off before night time. Growth regulator can be used to ensure a compact habit, according to the manufacturer's guidelines.

F1 Hybrids

Falcon Orange

Falcon Salmon

Falcon Scarlet

Falcon Violet

Falcon White

F1 Falcon Series

Exciting and innovative pollen-free self-cleaning series. The lack of pollen means no seed is set and therefore there are no seed head spikes to remove as you would with conventional varieties to encourage further flowering. With Falcon the inflorescence spontaneously falls off after flowering and further flowers are produced. In addition to this self cleaning trait the inflorescence lasts more than 7 days longer and the plants produce 20% more flower than convential varieties. Cultivation methods are the same as conventional varieties. Sowing to flowering 14 - 16 weeks. Plants are well branched and compact 25cm in height without inflorescence, 35cm with inflorescence. Good tolerance of direct sun and partial shade.

Horizon Shadow Coral

Horizon Shadow Deep Orange

Horizon Shadow Light Pink

Horizon Shadow Red

Horizon Shadow Rose

Horizon Shadow Rosy Glow

Horizon Shadow Salmon

Horizon Shadow Violet

Horizon Shadow Series

Horizon Shadow comes from the same breeders as Horizon.
It has rich, dark foliage that contrasts beautifully with the bold, bright colours. This series displays natural basal branching which leads to reduced production costs with a lesser requirement for PGR applications. It is suitable for high density pot and pack production due to its earliness, uniformity and short, sturdy flower stems. In the landscape or container, Horizon Shadow's hybrid vigour makes for a stunning display all summer.

Godetia

Annual Sow January to February 15-18 °C . Cover with a thin layer of vermiculite . Germinates 1 -2 weeks

GOD05 **F1 Dwarf Satin Mixed**

Outstanding performance in 9cm pots, flowering profusely at about 17-20cm high. A formula mixture of deep rose, lavender, lilac rose, pink, red and white bi-colour, salmon, white and red. 20cm.

Sell in: 9cm pots.
End Use: Houseplant, and containers.

100sd	250sd	500sd	1,000sd
£7.25	**£16.50**	**£31.20**	**£59.35**

GOD10 **F1 Grace Mixed**

Cool temperature plant, when grown at 15-18°C day and 10°C night it will flower in about four months from sowing. Do not exceed 25°C. Can be grown both in the autumn (Glasshouse), and early spring (outdoors or under glass). Cover seed with a thin layer of vermiculite. When 7-8 true leaves appear, pinch out the tops and plant into beds at 25-30cm spacing. A sandy soil with good drainage is optimal. The lateral branches all produce five to six flowers in a cluster on top of the plant. Stems are strong and the plants are productive, with yields in the order of fifteen high quality stems per plant. Flowers 7-8cm in diameter are borne in clusters on top of the stems. Highly cold resistant. Long lasting cut flower, all buds will open when placed in vases. 50cm.

End Use: Cut Flower.

100sd	250sd	500sd	1,000sd
£6.70	**£15.25**	**£28.80**	**£54.80**

GOD20 **Dwarf Double Mixed (Azaleaflora)**

Annual open-pollinated variety. Dwarf bushy plants with large semi-double flowers. Height 50cm. Can be sown directly into open ground april-may.

End Use: Borders.

5g	10g	15g	25g
£3.25	**£5.90**	**£8.15**	**£12.75**

Gomphrena

Annual, 2 weeks at 20°C. Sow into modules in April planting at 20 cm in the row. Or direct sow outside in May.

Gomphrena Ping Pong

An easy to grow variety with strong basal branching and strong flower stems, making it an ideal home cut flower item either fresh or dried. Also, well suited to large containers, beds and borders in gardens 60cm

GOM05 **Purple**

GOM10 **White**

£3.60	**£6.75**	**£12.85**	**£28.95**

Grevillea

Greenhouse Perennial, 2 weeks at 20-25°C, generally sow in February-March, though can be grown later. 100 seeds per gram, cover seed with vermiculite. Seed should be soaked for 24 hours to speed germination.

GRE10 **Robusta**

Fine ornamental pot plant, grown for its fern-like foliage.

Sell in: 9-13cm pots. End Use: Indoor pot plant, feature plant in bedding schemes.

1g	$2^1/_2$g	5g	10g
£3.55	**£7.80**	**£13.90**	**£24.95**

Gypsophila

Pot/Basket types - Surface sow February onwards, do not exclude light, keep moist. Prick out into cell packs or small pots, sowing to flowering takes 12-14 weeks. For best results pinch the plants 4-5 weeks after sowing and 1 week before potting to encourage a bushy habit.

Annual Cut Flower types - Direct sow every 2 weeks in April-June, thinning 30cm in the row. Cut when nearly all flowers on the stem are open. 1000 seeds per gram.

End Use: Cut flower.

Taller Perennials - Sow April-July, cover seed lightly with vermiculite. Germination 2-3 weeks at 20°C, 1,200 seeds per gram.

Sell in: 9cm to 2 litre pots, as green plant with label.
End Use: Borders, and bouquet fillers.

Shorter Perennials - Sow July to August. *Sell in: 8-12 cm pots, as green plant with label, and in flower.* 1,200 seeds per gram.
End Use: Rockeries.

Pot/Basket Types

Gypsy Series

Produces an abundance of double and semi-double flowers, the first of which may be single but with the higher light levels and warm nights of the Summer they will tend to become double. 18cm.

Sell in: 9cm or larger pots and baskets.
End Use: Baskets, pots and containers.

www.molesseeds.co.uk

Impatiens

'Busy Lizzie'.

Impatiens technical information

This is a species which requires great care, particularly in the early stages, to get the best from the seed. Modern F1 hybrids are produced to yield 90-100% germination given favourable conditions during raising. Sow January-March. For first 5 days: 22-24°C, cover seed with vermiculite but do not exclude light, make sure well watered, low nutrient compost pH 6.2-6.8. For following 10 days, 22-24°C, medium moisture, ideally provide supplementary light above seedlings, give one weak strength feed. For following 10 days, reduce temperature to 20-22°C, one moderate strength feed. For next 7 days, temperature now 17-18°C, one moderate strength feed. At the end of this stage, strong seedlings should be ready for planting on into packs/pots as required.

Impatiens Downy Mildew is a potential problem for producers and users of this important bedding plant. We recommend taking professional advice regarding routine spray programmes when producing this crop. Approx. 1,000-2,500 seeds per gram.

Lollipop Mixed

IMP300 **Lollipop Mixed**

This Impatiens has been bred to be the most professional Impatiens on the market. With very high germination, the plants are naturally self-branching and fill the pot quickly. Great for baskets and containers.

LAV82 **Stoechas (French Lavender)**

An evergreen shrub, with the silver grey, aromatic leaves of all lavenders, bearing small purple flowers, topped with 'wings' of rosy-purple bracts. Flowers from May to September. 60cm (1,500 seeds per gram).

250sd	500sd	1000sd	2,500sd
£3.70	**£6.95**	**£13.20**	**£29.70**

Bandera Series

A compact fast-growing French Lavender that produces a very large number of flowers. Bandera is first year flowering with no vernalization requirement. 20cm

LAV83 **Deep Rose**

LAV84 **Pink**

LAV85 **Purple**

50sd	100sd	250sd	500sd
£4.15	**£7.90**	**£17.95**	**£33.95**

Castilliano Series

Stoechas Lavender. First year flowering vernalisation not required. Well branched with strong vigour for fast pot filling. Height 25-35cm.

LAV90 **Lilac**

LAV92 **Rose**

LAV94 **White**

100sd	250sd	500sd	1,000sd
£6.75	**£15.30**	**£28.95**	**£55.15**

Lepidium

Hardy annual. Sow indoors at about 18°C and transplant after the last frost.

LEP010 **sativum Attraxa**

Grown for the seed heads that make excellent bouquet fillers particularly when dried. 80-100cm in Height.

1g	2½g	5g	10g
£3.30	**£7.15**	**£13.30**	**£25.00**

Lewisia

Perennial, germination of Sunset may be erratic. May need to be placed in cold frame. Elise is much easier to germinate as no cold period is required. Sow Autumn or Spring, 1,700 seeds per gram. For more details download or request our cultural leaflet.

Sell in: 9cm pots or larger.
End Use: Rockeries.

LEW11 **Sunset Strain**

Rockery and bedding plant that thrives in poor soil. The mixture contains ivory white, rich orange, deep yellow, rich salmon, pink, peach, red and white with stripe.

100sd	250sd	500sd	1,000sd
£5.50	**£12.50**	**£23.65**	**£45.00**

LEW20 **Elise**

Unlike any current Lewisia this variety flowers in the first season without a cold period. Elise starts flowering 4-5 months after sowing. The flowers are pastel shades of pink, rose, salmon, orange, white, yellow and bicolour patterns. Elise is suitable for plug production and makes a great patio container plant. 14cm.

50sd	100sd	250sd	500sd
£7.70	**£14.55**	**£33.20**	**£62.75**

Liatris spicata

Perennial, sow April-July, cover seeds with vermiculite, 3 weeks at 18-20°C; 350 seeds per gram.

Sell in: 9cm pots or larger (green plant with label).
End Use: Borders, cut flowers.

LIA20 **Floristan Violet**

Excellent strain for cutting with very long spikes. 90cm.

500sd	1,000sd	2,500sd	5,000sd
£5.50	**£10.45**	**£23.55**	**£46.10**

Limnanthes

Annual, sow directly into open ground from March to May. As with all hardy annuals, sowing into rows makes weed control easier until the plants develop. 130 seeds per gram.

LIM10 **Douglasii**

The well-known 'poached egg plant'. Very floriferous, creamy white flowers with yellow centre. Popular with bees. 15cm.

End Use: Borders.

5g	10g	15g	25g
£3.40	**£6.15**	**£8.50**	**£13.30**

Linaria

Annual Varieties - Can be direct sown in spring.

Perennial Varieties - Sow May-July.

Annual Varieties

Licilia Series

Quick growing annual will flower 6 weeks from a direct sowing in Spring. Great filler in herbaceous borders or as a cut flower, good vase life. Height 50-60cm.

LIN10 **Azure**

Light blue- white flowers.

LIN12 **Peach**

Peachy tones orange with rosy red.

LIN80 **Usitatissimum**

Annual; Common Flax. Produces an abundance of sky blue flowers. Useful in borders and as a cut flower. The fibres from this plant are used for the production of linen. Height 70cm.

5g	10g	15g	25g
£2.00	**£3.75**	**£5.45**	**£8.60**

Lisianthus

Cut flower varieties please see our website for details.

Lobelia Annual

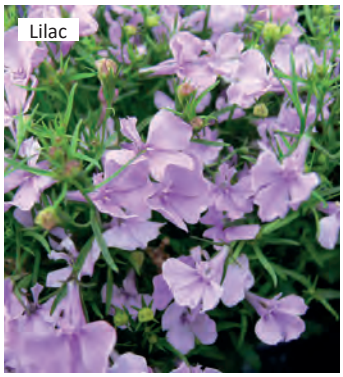

Sow January onwards on compost surface, takes 10-14 days at 21°C. Unless sown direct into final sales container (at around 10 seeds per station), prick out tufts of seedlings after 5-6 weeks into 6 or 12-pack trays. Seed can also be broadcast over cell trays.

It is necessary to observe the most scrupulous glasshouse hygiene especially in propagation areas. It is also important to be ever vigilant for any sign of disease at all stages of propagation, especially with earlier sowings where susceptibility to disease seems more prevalent, and to take prompt remedial action at the first sign of infection. Sowing to flowering around 16 weeks. 25,000 seeds per gram.

Please note white lobelia varieties contain a small proportion of blue flowers.

Sell in: 9-packs and baskets.
End Use: Borders and containers.

LOB182 **Siphilitica**

Upright spikes of large blue flowers. This easy to grow perennial bears heads of dark blue flowers through late summer, over clumps of dark-green leaves. (10-14,000 seeds per gram). 60cm.

1/8g	1/4g	1/2g	1g
£3.60	**£6.50**	**£11.40**	**£21.70**

Lonas

Annual, sow direct into open ground in April-May. 5,000 seeds per gram.

End Use: Fresh and dried cut flower, borders.

Inodora

LON10 **Inodora**

A long lasting cut flower suitable for fresh market or dried flower use. The golden-yellow flowers are reminiscent of small heads of yellow Achillea. 60cm.

5g	10g	15g	25g
£3.85	**£6.95**	**£9.60**	**£15.05**

Luffa cylindrica

Sow March-May, at 24-30°C. Approx 10 seeds per gram. For fruit production wait until fruits skin is hard and peel off. Dry fruit. Plants require staking.

Sell in: 1 litre pots upwards.
End Use: Greenhouse.

LUF010 **Luffa**

Luffa cylindrica, the sponge gourd, is an annual species of vine cultivated for its fruit, which can be dried and used as the environmentally friendly Luffa sponge.
For best results, grow like a greenhouse Cucumber.
Produces yellow flowers attractive to insects.
300cm.

5g	10g	15g	25g
£3.25	**£5.85**	**£8.05**	**£12.65**

Luffa Fruit

Lupin

Perennial Varieties - Sow April-July, or January-February for Gallery same-year flowering, germinates in 2-3 weeks at 15-18°C. After 5 weeks prick out into 9 or 10cm pots, grow on at 15°C. Sell as green plant with label, or can be sold in larger pots in bud/flower in the Spring. Poisonous if eaten.

Sell in: 9cm pots (green plant with colour label) up to 3 litres for Gallery Lupins in flower.
End Use: Borders.

Annual Varieties - sow directly into open ground in late April-early May, 50 seeds per gram.

Dark red, same habit. (1,500 seeds per gram). 60cm

Sell in: 9cm or larger pots (green plant with label).
End Use: Borders

1,000sd	2,500sd	5,000sd	10,000sd
£2.05	**£4.65**	**£9.05**	**£17.30**

LYC15 **Alpina**

Rock plant with rose flowers. 10cm. (15,000 seeds per gram).

250sd	500sd	1,000sd	2,500sd
£2.95	**£5.55**	**£10.50**	**£23.65**

Lythrum

Perennial, 3-4 weeks at 20°C, sow May-July. 13,000 seeds per gram.

Sell in: 9cm or larger pots, green plant or in flower.
End Use: Borders.

LYT20 **Rosy Gem**

Bushy plants producing rosy flower spikes. Ideal for herbaceous borders, flowering from July onwards. 1m.

½g	1g	2½g	5g
£2.25	**£4.30**	**£9.30**	**£17.30**

Malva

Perennial, sow in April-July, germinate at 15-18°C, cover lightly with vermiculite. prick out into 9 or 10cm pots. 220 seeds per gram.

Sell in: 9cm or larger pots, green plant or in flower.
End Use: Borders.

MAL010 **Sylvestris Zebrina**

A striking bicolour of pink with narrow violet stripes. A stately border plant with an old-fashioned feel, flowering from June to September. 120cm.

2½g	5g	10g	15g
£5.65	**£10.45**	**£19.65**	**£28.35**

Marigold African

Annual, sow February onwards, germinates in 4-7 days at 20°C, cover with vermiculite. Prick out after 3-4 weeks into 4-packs, 6-packs, or 9cm pots for pot bedding sales. Grow on at around 15°C, sowing to flowering around 10 weeks. Best garden performance (in terms of eventual plant size and length of time plants flower) is obtained from planting before plants have flowered, although sales appeal is lessened, this can be offset by using colour labels in the pack/pot. 300 seeds per gram (sow 5g for 1,000 plants).

Sell in: 4-packs and 9cm pots. End Use: Borders and containers. Formal bedding schemes.

F1 Varieties

Perfection Series

Probably the number one Parks choice, Perfections are also ideal for pack and pot sales. Produce a large number of blooms through the season, which show good rain tolerance. Height 35-40cm.

de-tailed seed

Mina lobata

Tender perennial, treat as annual, sow March-May, 2-3 weeks at 15-18°C. 15-18 weeks sowing to flowering. 40 seeds per gram.

MIN20 **Exotic Love**

An easily-grown climber with showy flowers ranging from scarlet-crimson to yellow and cream. It entwines every support given and makes a good patio plant. 1.5-3m.

Sell in: 13cm and larger pots, staked.
End Use: Fences, trellises etc.

50sd	100sd	250sd	500sd
£2.95	**£5.60**	**£12.75**	**£24.05**

Mirabilis

Annual, sow February-April, takes 7-10 days to germinate at 18-20°C. Prick out into 9cm pots, grow on at 12-16°C, 16 weeks sowing to flowering. 10 seeds per gram.

MIR050 **Tea Time Mixed**

As the name implies Tea Time starts to flower at around four o'clock in the afternoon until late at night all Summer long. Sturdy compact growing plants ideal for borders. The mixture consists of red, rose, yellow and white. 50cm.

Sell in: 13cm and larger pots.
End Use: Borders and containers.

10g	15g	25g	50g
£3.50	**£4.80**	**£7.55**	**£13.80**

Molucella

Bells of Ireland. Annual, sow April direct into rows 25cm apart. Takes 14-28 days to germinate, can be a little erratic. Takes 3-4 months sowing to flowering. Remove upper leaves from stems after harvest. 200 seeds per gram.

MOL10 **Molucella Laevis**

Pale green bell-like bracts, popular for fresh or dried arrangements. 60cm.

End Use: Cut flower, fresh or dried.

500sd	1,000sd	2,500sd	5,000sd
£2.55	**£4.85**	**£10.95**	**£21.40**

Monarda

Perennial, 2-3 weeks at 20°C, sow May-July. For seed count see species descriptions.

Sell in: 8cm or larger pots, green plant or in flower.
End Use: Borders, fresh and dried cut flower (Lambada).

MON06 **Lambada**

Half hardy perennial that is best grown as an annual sown Feb-March. It flowers from June until frosts in whorls of pink/white spotted flowers. An excellent border plant that can be used as a dried flower and a fresh cut flower. 90cm. (1,800 seeds per gram).

1/2g	1g	2 1/2g	5g
£3.85	**£7.30**	**£15.85**	**£29.45**

Panorama Series

A modern more uniform series. 75cm.

MON05 **Red**

MON10 **Mixed**

Special mixture with many shades of scarlet, bright red, pink, salmon and crimson.

250sd	500sd	1,000sd	2,500sd
£3.65	**£6.90**	**£13.15**	**£29.60**

Musa

Tender perennial. Soak seed in water for 24 hours. Takes 4-8 weeks at 20-30°C, germination can be erratic. Warm, bright conditions are required for growing on.

MUS100 **Ensete**

A fast-growing foliage plant with large leaves, used as a pot subject, conservatory plant and a Summer bedding 'dot plant' item.

25sd	50sd	100sd
£6.85	**£12.75**	**£24.10**

250sd	500sd
£55.00	**£104.00**

Myosotis

'Forget-me-not'. Biennial, sow June-July, germinates in 2-3 weeks at 18°C, cover lightly with vermiculite. Prick out into 6-packs or pots after 4 weeks. Grow on at 12°C, sell with colour label in the Autumn and early Spring. 1,500 seeds per gram.

Sell in: 6-packs.
End Use: Borders.

Bellamy Pink

Bellamy Series

An easy to grow, series that requires no cold period to flower. Great for early spring and autumn sales. 20cm.

MYO105 **Blue**

MYO110 **Pink**

MYO120 **White**

100sd	250sd	500sd	1,000sd
£4.20	**£9.60**	**£18.15**	**£34.55**

Oregano

Annual, Sow in March, do not cover. Germinates in 4-6 days at 20-22°C. Not frost hardy. Plug crop time 5-6 weeks . Transplant to finish 9-11 weeks. Long day plant. Keep on the dry side.

Sell in: 9-15cm pots.
End Use: Baskets, containers.

Kirigami

ORE10 **Kirigami**

This eye catching non-culinary oregano feautures large purple -green bracts, rose flowers and light green foliage that is fragrant. Dense mounded slightly trailing habit. 20-25cm.

50sd	100sd	250sd	500sd
£4.05	**£7.65**	**£17.45**	**£33.00**

Ornamental Brassica

Annual, 1 week at 15-20°C; cover with vermiculite. Usually sown June-July and used in mixed Winter containers. Grow as cool as possible for best leaf colour. Cultural leaflet available.

Sell in: 13-15cm pots, or 4 packs.
End Use: Borders, containers.

Cut Flower Varieties - These are suitable for Autumn and winter bouquets. Cold nights are needed to enhance the colours. Seed should be sown May to July. Plants are best transplanted and benefit from supporting flower nets.

F1 Hybrid Kale

Feather Leaved Varieties

Peacock Series

The leaves are all finely serrated or deeply notched, this type has a large head which is supported by a thick sturdy stem of moderate height, open habit. The plant can withstand severe cold winters.

KAL30 **White Peacock**

KAL25 **Red Peacock**

Pansy

Pansy Cultural Guide

The higher cost of the F1 hybrids may be justified in terms of uniformity, speed of flowering, clear flower colours and overall garden performance. In general the larger flowered varieties tend to flower slightly later, and are especially suitable for late Spring and Summer flowering, as flower size tends to reduce as temperatures increase. Seed count approx. 700 per gram.

Sow the seed into trays or plugs, cover lightly with vermiculite, and keep the compost moist.

Germinate at 18-20°C, shading to avoid excessive temperatures which can depress germination. Germination should be apparent in about 7-10 days.

After 4-5 weeks, prick out into 6-packs or 9cm pots. Use a slow-release fertilizer or commence liquid feeding after 2-3 weeks.

For early Spring sales, it is necessary to harden off the plants prior to sale, by gradually reducing the temperatures.

Pansies are very susceptible to stretching where temperatures are high for a significant period of time. Where reasonably low temperatures (i.e. temperatures not above 14°C) cannot be guaranteed, then growth retardant chemicals should be considered, subject to the manufacturers' guidelines. Sow **June** for sales **Aug-Sept**

Sow **July** for sales **Sept-Oct**

F1 Hybrids Pax Series

This series has been selected under U.K conditions. The criteria for this series are an even flowering time, a non-stretching plant habit and short flower stems. Flower size is medium. Pax is equally suitable for use in the Autumn and the Spring. The Pax series is excellent for pot and pack production.

PAN200 **Panola All Seasons Mixed**

An F1 Hybrid that has been produced by crossing a Pansy with a Viola, the result of which is a plant with the free flowering characteristics of a Viola, but with the larger flower size of a Pansy. It will flower within 60-65 days of sowing, with uniform habit and good flower facings on short stems that resist stretching in warmer conditions.

Freefall F1 Series

A Pansy that has been bred for use in baskets. Freefall is avaliable in a range of colours all with a vigorous spreading habit and medium sized flowers. The low spreading habit makes it ideal for late Summer production as it is less prone to stretching. Meanwhile the sustained day-length neutral flowering ensures greater colour even through the Winter months.

PEN80 **Mystica**

Penstemon digitalis. Bronze rosettes are produced in early spring. Multiple flower stems with large lavender pink flowers appear in early summer. In the Autumn leaves turn red. Sow July-August for flowering the following year. 70-80cm.

250sd	500sd	1,000sd	2,500sd
£4.95	**£9.40**	**£17.85**	**£40.20**

PEN90 **Electric Blue**

Penstemon heterophyllus. One of the most popular recent introductions. Produces multiple stems with branched spikes holding intense blue flowers. Flowers in about 16-18 weeks in a 10cm pot. 45-55cm.

50sd	100sd	250sd	500sd
£3.50	**£6.55**	**£14.95**	**£28.30**

Pentas

Greenhouse annual, 2-3 weeks at 18-20°C, sow January for May flowering, cover lightly with vermiculite. Successional sowings will provide a continuous supply of flowering plants throughout the Summer. During the growing season, never let the temperature drop below 10°C, since this will prevent the flowers opening.

Sell in: 9cm or larger pots, in flower.
End Use: Pot plant, containers.

Northern Lights - Close Up

Northern Lights

PEN02P **Northern Lights Lavender**

A breeding breakthrough. Northern Lights is more tolerant of cooler temperatures when planted out. At our trials of patio plants this Pentas was the star of the show. New flower heads appear long before the last flowers of older heads are finished providing continuous colour.

Perilla

Annual, sow Feb-April 2-3 weeks at 18°C, cover lightly with vermiculite. germination can be slow and erratic, 630 seeds per gram.

End Use: Foliage bedding plant.

Perilla Nankinensis

PER10 **Nankinensis**

This is the traditional strain of Perilla which is used for bedding and as an accent plant in Summer bedding schemes. Deep red foliage with a purple glow, slightly curled and deeply cut leaves. 60cm.

1g	2½g	5g	10g
£3.50	**£7.60**	**£14.15**	**£26.55**

Perovskia

Perennial, 3-4 weeks at 16-20°C, sow Jan-Feb for June-September flowering or May-June for overwintering. Cover lightly with vermiculite. Keep on the dry side.

Sell in: 9cm or larger pots, in flower.
End Use: Perfect landscape plant or border plant.

Blue Steel

PER25 **Blue Steel**

Aromatic, silvery foliage carries clouds of small blue flowers on strong silver stems. Pinch for better branching. Drought tolerant. Great item for late season sales. 60-90cm.

25sd	50sd	100sd	250sd
£5.65	**£10.45**	**£19.80**	**£45.10**

Petchoa

Annual, sow 1 seed per cell on the compost surface from February-April. Germinates in 7-14 days at 20-25°C, it should be noted that germination takes a few more days than Petunia. Prick out after 4-6 weeks into packs or pots as required. Grow on at 16-18°C; growth regulators can be used, according to the manufacturers' guidelines, but avoid at visible bud stage or later as it can reduce flower colour intensity. Sowing to flowering takes around 11-13 weeks. Approx 1600 seeds per gram.

Sell in: 9-10cm pots.
End Use: Baskets and containers.

Caliburst Series

The first petchoa from seed combines vibrant calibrachoa colours with the flower size, form and habit of a petunia. It has a controlled mounded, spreading habit that makes it ideal for pots, containers and baskets. Germination is cold-durable and can be produced in early spring, a flowering 9-hour daylength response means these make excellent spring and summer sales.

www.molesseeds.co.uk

Petunia

Annual, sow on the compost surface from February-April, germinates in 7-10 days at 20°C. Prick out after 4 weeks into packs or pots as required. Grow on at 12-15°C; growth regulators can be used, according to the manufacturers' guidelines. Sowing to flowering takes around 12 weeks. 9,000 seeds per gram.Note-Star and Picotee types: High temperatures, high light levels and high soil fertility, will increase the proportion of white. Conversely low temperatures, low light and low soil fertility will result in a decrease in the proportion of white. Grandifloras produce fewer, but larger, flowers than the multifloras.

Sell in: 6-packs (basket & ground cover varieties in 9-10cm pots). End Use: Baskets, containers and borders.

F1 Double Flowered Grandiflora (large flowered)

Pirouette Series

Very large flowers, a striking addition to mixed containers.

Multiflora (smaller flowered)

Double Duo Series

The Duo series stays compact in trays, pots, window boxes and in the garden, and produces more flowers per plant. These Petunias have a higher germination and flower up to one week earlier than other doubles, therefore cutting production time. The Duo series has more uniform double flowers in the widest range of colours available. Also because they are Multifloras, the plants hold up well in the garden and recover quickly after rain.

See Dianthus.

Platycodon

Perennial, 3 weeks at 20°C, sow May-July. Cover lightly with vermiculite. 1,400 seeds per gram.

PLA00 **F1 Astra Blue**

Produces large eye catching star shaped flowers. This dwarf Platycodon can be grown as an Annual pot plant from a February sowing. 20-25cm.

Sell in: 13cm pots.
End Use: Houseplant, containers.

50sd	100sd	250sd	500sd
£4.60	**£8.75**	**£19.90**	**£37.65**

PLA10 **Grandiflora Blue**

A good cut flower with strong stems. At the end of the stems are balloon shaped blue buds which open to form star like flowers. 50cm.

End Use: Borders, cut flowers.

1g	2½g	5g	10g
£3.90	**£8.40**	**£15.60**	**£29.30**

Plectranthus

Tender perennial, sow Jan-March 7-10 days at 20-24°C. Do not cover seed.

Sell in: 9-13cm pots.
End Use: Large containers.

PLE01 **Silver Shield**

Large soft silver grey leaves. Produces long flower spikes with small blue florets. Requires no pinching. 60cm.

pelleted seed

25plt	50plt	100plt	250plt
£6.70	**£12.45**	**£23.55**	**£53.75**

Polemonium

'Jacob's Ladder'. Perennial, sow April-July but can be grown as annual from January-February sowing. 2-3 weeks at 18-20°C.

Sell in: 9cm or larger pots.
End Use: Borders.

POL005 **Blue Pearl**

P. boreale. Bred to flower 3 months after sowing, therefore suitable for borders and landscape plantings. Azure blue, very long flowering. 70cm.

1,000sd	2,500sd	5,000sd	10,000sd
£3.85	**£8.70**	**£17.00**	**£32.50**

POL007 **White Pearl**

P. caeruleum album. Pure white equivalent of Blue Pearl. 70cm.

1,000sd	2,500sd	5,000sd	10,000sd
£3.85	**£8.70**	**£17.00**	**£32.50**

Polyanthus

Perennial, sow May-July, 2 weeks at 15-18°C. Temperature must not exceed 18°C. Do not cover seed with compost but keep moist, cool and shaded. Once the seed has chitted, cover with a thin layer of moist vermiculite to assist rooting of the emerging seedlings. 1,000 seeds per gram. 1,500 - 2,000 for 1,000 plants. For more details, request our cultural sheet on polyanthus.

Sell in: 6-packs, 4 packs or 9cm pots.
End Use: Borders, containers.

£5.15	**£11.60**	**£22.75**	**£43.50**

Primrose

For pot plant or perennial sales depending on variety. Sow June-July. Germination max temp 18°C, keep moist, cool and shaded, cover seed with thin layer of vermiculite to anchor the germinating seedlings. For more details download our cultural leaflet.

- Market prices for primroses remain under pressure despite their enormous popularity. To maximise their potential here are some suggestions.
- Target flowering to coincide with maximum sales demand, e.g. choose Last Dance for sales in late February-March.
- Spice up the colour range with special mixtures such as Meteor.
- Grower-retailers - consider a 'primrose special' weekend promotion to kick off the sales season at the end of February.

EARLY SEASON PRODUCTION November-January

PRI008 **Primera Mixed**

Extra early and uniform between the eight colours in the mix. Requires no cold temperatures to initiate flowering. (Replaces Quantum Mixed).

100sd	250sd	500sd
£7.30	**£16.65**	**£31.50**

1,000sd	2,500sd	5,000sd
£60.00	**£135.00**	**£264.60**

Dania Mixed

PRI009 **Dania Mixed**

Attractive, uniform Primrose for the early market. Less cold requirement, making it suitable for early sowing and flowering. Bred for natural compactness great for 9cm and 10.5 cm pots and packs.

100sd	250sd	500sd
£6.80	**£15.50**	**£29.30**

1,000sd	2,500sd	5,000sd
£55.75	**£125.45**	**£245.90**

MID SEASON PRODUCTION
December-February

PRI010 **First Kiss Mixed**

First Kiss is an excellent choice for early main season production. Bright, large flowers in a good colour range including bicolours.

100sd	250sd	500sd
£5.55	**£12.65**	**£23.95**
1,000sd	2,500sd	5,000sd
£45.60	**£102.60**	**£201.10**

PRI015 **Danova Mixed**

For sales in December and January, this mixture offers an unrivalled colour range and uniform habit, and the seed is well known for its high germination.

100sd	250sd	500sd
£7.60	**£17.35**	**£32.85**
1,000sd	2,500sd	5,000sd
£62.50	**£140.65**	**£275.65**

PRI150 **Choice Mixed**

Cheaper mixture for outdoor planting.

½g	1g	2½g	5g
£5.30	**£10.15**	**£21.95**	**£40.85**

PRI160 **Vulgaris**

Wild Primrose. Yellow flowers with deeper yellow centres, in March and April. 15cm.

⅛g	¼g	½g	1g
£3.35	**£6.05**	**£10.65**	**£20.30**

Other hardy primroses

Primula veris - see Cowslip.

Primula - Indoor Varieties

Malacodies - Greenhouse perennial, sow June-August for Winter flowering, cover with very thin layer of vermiculite, do not exclude light. germinates 3-4 weeks at 15-18°C, ideally in germination chamber. Grow on in 9cm pots, once established grow at 8-10°C to induce flowering. When budded, force for 3 weeks at around 14°C. Keep plants moist. Sowing to flowering 20-24 weeks.

Obconica - Greenhouse Perennial, sow May-September for flowering December-April. Sow on compost surface, cover very lightly with vermiculite, 1 week at 22-24°C then 18-20°C. Shade during Summer. Pot into 9-13cm pots, grow on at 10-14°C to encourage compact habit and good flowering. Keep plants moist. Cultural guide available.

Sell in: 9cm or larger pots.
End Use: Winter houseplant.

Malacoides

PRI185 **F1 Prima Mixed**

An exciting hybrid with large dense flower umbels borne on compact uniform plants. It is early flowering so should be sown mid-July to late-August, earlier sowings can result in the plants becoming too leafy.

50sd	100sd	250sd	500sd
£5.70	**£10.80**	**£24.65**	**£46.60**

PRI190 **Juliet Mixed**

The first semi double flowered mixture available. The blooms have great sales appeal. It can be grown for short periods at 5°C.

50sd	100sd	250sd	500sd
£6.15	**£11.65**	**£26.60**	**£50.30**

Obconica

PRI220 **F1 Libre Mixed**

Libre has been bred to be Primin free, thus greatly reducing the possibilities of skin irritation. It has a cropping time of 22-28 weeks and can be used for both early and late season sales. Recommended for 9-13cm pots. The mixture contains 6 bright colours.

100sd	250sd	500sd	1,000sd
£4.55	**£10.40**	**£19.65**	**£37.35**

Primula - Hardy Varieties

Auricula (pubescens) - Perennial, sow February-May on compost surface, germinates 3-4 weeks at 16-18°C 3,000 seeds per gram (1g for 1,000 plants). Grow cool through the Winter, do not overwater.

Denticulata - Perennial. Sow May-July on compost surface, germinates in 2-3 weeks at 18-22°C. Sell in 9cm pots in flower in Spring. 20,000 seeds per gram (3,000 Sds for 1,000 plants).

Rosea - Perennial. Sow May-July on compost surface, germinates in 3-4 weeks at 15-18°C. Sell in 8-10cm pots in flower in Spring. 10,000 seeds per gram.

Candelabra - Perennial. Japonica: sow on compost surface in cold frame February-April - cooling is recommended after 2-3weeks, for a period of 4-6 weeks. Other Candelabra Types: sow February-July on compost surface.

Sell in: 9-13cm pots.
End Use: Moist, semi-shaded borders.

Vialii - Orchid Primrose. Perennial. Sow May-July on compost surface, do not exclude light, keep moist, germinates in 3-4 weeks at 18-22°C. Sell in 9cm pots in flower in Spring.

Sell in: 9cm or larger pots.
End Use: Borders, rockeries.

Auricula (pubescens)

PRI265 **Auricula Mixed**

Rich colour range. Popular for hardy plant sales. 20cm.

50sd	100sd	250sd	500sd
£2.35	**£4.45**	**£10.10**	**£19.15**

Denticulata

Flowers early Spring, the ball shaped flowerheads emerging on strong stems, followed by the leaf rosettes shortly afterwards. 30cm.

PRI261 **Blue**

PRI264 **Ruby**
Carmine red with yellow centre.

PRI266 **White**

PRI270 **Mixed**

500sd	1,000sd	2,500sd	5,000sd
£2.90	**£5.50**	**£12.40**	**£24.30**

Rosea

PRI300 **Rosea Grandiflora**

Bright rose pink, large flowers.

500sd	1,000sd	2,500sd	5,000sd
£3.50	**£6.65**	**£15.00**	**£29.35**

Candelabra

PRI290 **Japonica Hybrids Mixed**

Early Summer-flowering mixture of crimson, rose and white, for moist, shaded borders. 50cm. 4,500 seeds per gram.

1/4g	1/2g	1g	2 1/2g
£3.45	**£6.10**	**£11.60**	**£25.20**

PRI315 **Candelabra Mixed**

These tall, Spring/early Summer flowering perennials produce graceful flower spikes in a range of colours, arranged in spaced whorls up the stem. (2,800 seeds per gram). 70cm

1/4g	1/2g	1g	2 1/2g
£6.65	**£12.30**	**£22.70**	**£51.30**

PRI318 **Beesiana**

Beautiful pink flowers with a yellow eye. Like all candelabra types, can be 'naturalised' in damp, shaded areas. Great for hardy plant sales in flower. 40cm.

100sd	250sd	500sd	1,000sd
£2.40	**£5.50**	**£10.40**	**£19.75**

Vialii

PRI310 **Vialii**

Exotic pointed flower heads with deep red buds and pink flowers on long stems. Very interesting novelty. 12,000 seeds per gram. (2,500 seed for 1000 plants).

250sd	500sd	1,000sd	2,500sd
£3.20	**£6.05**	**£11.50**	**£25.90**

Pritzelago

Perennial, sow June-July, 3 weeks at 18-20°C, Lightly cover with vermiculite. 22-26 weeks from potting to saleable plant.

Sell in: 9cm or larger pots.
End Use: Borders, rockeries.

PRI400 **Icecube**

Low growing mat forming evergreen perennial. In spring it bears clusters of small white flowers. Also known as Hutchinsia. 10cm.

100sd	250sd	500sd	1,000sd
£2.90	**£6.60**	**£12.45**	**£23.70**

Ptilotus

Annual, sow Jan March, 5-9 days at 24-26°C. Cover with light layer of vermiculite. Requires light for germination. Requires high light levels. Once potted keep on dry side.

PTI01 **Joey**

Produces 7-10cm bottlebrush flower spikes of pale pink. The foliage is silver green. 30-40cm.

Sell in: 9 -13cm pots.
End Use: Containers, pots.

25sd	50sd	100sd	250sd
£6.35	**£11.80**	**£22.35**	**£51.00**

PTI05 **Matilda**

A striking cut flower, pink bottlebrush flower spikes with a with a long vase life. Tolerant of a wide range of climates. Height 50-80cm

25sd	50sd	100sd	250sd
£7.25	**£13.50**	**£25.55**	**£58.30**

Pulsatilla

Formerly Anemone Pulsatilla. Perennial, 3 weeks at 18-20°C, Cover with vermiculite. Sow April-July.

Sell in: 9cm or larger pots.
End Use: Borders, rockeries.

PUL10 **Alpina White**

Violet or red tinged buds which open into cup-shaped white flowers. 30cm (clean seed). 200 seeds per gram.

1/2g	1g	2 1/2g	5g
£5.20	**£9.95**	**£21.55**	**£40.10**

PUL20 **Alpina Sulphurea**

Sulphur yellow flowers produced from May until July. 30cm (clean seed). 300 seeds per gram.

1/4g	1/2g	1g	2 1/2g
£3.25	**£5.70**	**£10.90**	**£23.60**

PUL30 **Vulgaris**

'Pasque flower', Spring-flowering perennial, violet. 15cm (clean seed).

100sd	250sd	500sd	1,000sd
£4.20	**£9.50**	**£18.00**	**£34.25**

Punica

Perennial, 3-4 weeks at 20-25°C, cover with vermiculite. 40 seeds per gram.

Sell in: 13cm pot.
End Use: Pot plant.

PUN10 **Dwarf Pomegranate**

Fine pot plant with orange scarlet blooms.

1g	2 1/2g	5g	10g
£6.35	**£13.70**	**£25.50**	**£47.95**

Pyrethrum

For Silver leaf type see Tanacetum.
Tall Perennials - 2 weeks at 15-20°C, sow May-July, cover with vermiculite. 650 seeds per gram.

Sell in: 9cm or larger pots (green plant with label).
End Use: Borders, cut flowers.

Foliage Varieties - Perennial, sow Feb-March, treat as an Annual, 1-2 weeks at 20°C, 6,000 seeds per gram.

Sell in: 9cm or larger pots.
End Use: Borders.

Tall perennials

PYR10 **Robinson's Single Giant Hybrids Mixed**

A mixture of large flowered varieties. 75cm.

2 1/2g	5g	10g	15g
£3.55	**£6.30**	**£11.35**	**£15.70**

PYR20 **Robinson's Red**

Medium size, rich crimson scarlet. 75cm.

2 1/2g	5g	10g	15g
£4.40	**£7.85**	**£14.10**	**£19.50**

PYR30 **Robinson's Rose**

Rose, extra large flowered. 75cm.

2 1/2g	5g	10g	15g
£4.20	**£7.45**	**£13.40**	**£18.55**

PYR40 **Aureum Golden Carpet**

A very uniform and compact variety. Makes a great edging plant in formal displays and carpet bedding. Will grow in full sun and light shade. 10cm.

250sd	500sd	1,000sd	2,500sd
£3.35	**£6.35**	**£12.05**	**£27.15**

Ranunculus

Perennial treated as biennial. Sow September, grow cool at all stages - germinates in 2-3 weeks at 10-15°C; grows slowly for first 2 months. When 2-4 leaves visible, prick out into 10cm pots, feed well, keep as cool as possible until buds visible, when may be forced into flower at 10°C. Growth retardants may be used according to manufacturers' regulations, to ensure a compact habit.

Sell in: 9cm or larger pots.
End Use: Spring containers.

RAN20 **Magic Mixed**

Naturally compact. Large fully double flowers are produced on short stems and are easy to ship. The mix contains shades of red, orange, yellow, rose and white. Ideal for use in early spring containers. Great product for 9cm pots or high value 4 packs. 15-20cm.

pelleted seed

50plt	100plt	250plt	500plt
£6.95	**£13.20**	**£30.05**	**£56.85**

Rehmannia

Perennial, 2-3 weeks at 25°C, do not cover seeds, sow May-July, 18,000 seeds per gram.

Sell in: 9cm or larger pots.
End Use: Borders.

REH10 **Angulata (Chinese Foxglove)**

The mid-pink flowers are Foxglove shaped with a yellow spotted throat. 45cm.

1/4g	1/2g	1g	2 1/2g
£4.45	**£8.20**	**£15.15**	**£34.25**

Rhodochiton

Annual climber, sow Jan-March, germinates in 1-2 weeks at 18°C. Prick out into small pots, then on into 9cm pots when large enough, grow on at 12-16°C, takes about 16 weeks from sowing to flowering. 2,000 seeds per gram.

Sell in: 9cm or larger pots, staked.
End Use: Fences, trellises etc.

RHO50 **Atrosanguineus**

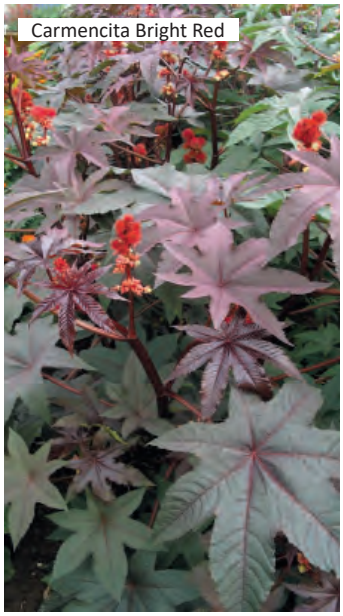

Beautiful climbing plant that can be used in pots or hanging baskets. Tubular dark purple flowers with a pink calyx.

50sd	100sd	250sd	500sd
£7.25	**£13.70**	**£31.25**	**£59.10**

Ricinus

Annual, 1 seed per gram. Sow March-April, germinates in 1-2 weeks at 20°C, transplant into 10cm pots when large enough to handle. Plant out when danger of frost is past. Warning – The seeds of these varieties are poisonous and the usual precautions should be taken when handling them.

End Use: Feature plant in formal bedding displays.

RIC10 **Carmencita Bright Red**

Intense dark brown leaves that contrast well with the bright red flower buds. Highly attractive dot plant. 1.25m.

25sd	50sd	100sd	250sd
£4.50	**£8.35**	**£15.85**	**£36.10**

500sd	1,000sd
£68.25	**£130.00**

RIC20 **Zanzibarensis**

Large palmate leaves with distinctive light coloured mid-ribs. 1.5m.

25sd	50sd	100sd	250sd
£3.20	**£5.95**	**£11.25**	**£25.65**

Rosa chinensis

Perennial, 2-3 weeks at 18°C, 200 seeds per gram, cover with vermiculite. Blooms within 5-6 months of sowing.

ROS10 **Angel Rose**

Sweetly scented miniature roses from seed. Lovely shades of rose, pink and white. 25cm.

Sell in: 9cm or larger pots.
End Use: Borders.

50sd	100sd	250sd	500sd
£3.25	**£6.10**	**£13.90**	**£26.25**

Rudbeckia

Varieties Grown as an Annual - Sow March, germinates in 2-3 weeks at 18°C. Cover lightly with vermiculite. Prick out into 9cm pots for sale during Spring and early Summer.

Sell in: 4-packs, or 9-13cm pots later in the season.
End Use: Borders.

Perennial Varieties - Germinates in 5-6 weeks, cold frame, cover with vermiculite. Use treated seed for faster and better germination. Sow May-July Echinacea types. Sow April-July, germinates 2-3 weeks at 18°C, sell in 9cm pot with colour label.

Varieties Grown as an Annual

Tall Varieties

RUD05 **Prairie Sun**

One of the finest varieties to feature in our trials. Very large yellow flowers with lime centres, on sturdy stems. A superb taller bedding plant. 80cm.

100sd	250sd	500sd	1,000sd
£5.15	**£11.75**	**£22.20**	**£42.20**

RUD40 **Goldilocks Improved**

Masses of large double and semi-double flowers in a rich shade of golden-yellow. Attractive black centre, free flowering over a long period, free branching and compact. 60cm.

500sd	1,000sd	2,500sd	5,000sd
£2.90	**£5.50**	**£12.40**	**£24.30**

RUD42 **Indian Summer**

Giant golden yellow, double and semi-double flowers up to 18cm across.

100sd	250sd	500sd	1,000sd
£3.20	**£7.25**	**£13.70**	**£26.10**

Intermediate Varieties

RUD20 **Marmalade**

Clear bright golden orange. 55cm.

500sd	1,000sd	2,500sd	5,000sd
£2.30	**£4.35**	**£9.80**	**£19.20**

RUD25 **Autumn Colours**

Attractive mixture of 'Autumn' shades bronze petals, red rings and rusty red centres. An excellent bedding plant for mixed borders and on its own. 60cm.

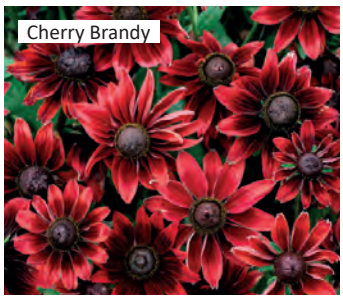

250sd	500sd	1,000sd	2,500sd
£5.70	**£10.80**	**£20.50**	**£46.15**

RUD38 **Sahara**

Sahara is a magnificent variety, producing large flowers that grow up to 13cm wide. The colours of the flowers are vintage shades of copper, amber, gold and red. Good item for containers and as a cut flower as the flowers are carried on long stems. Will flower into early autumn. 60cm

50sd	100sd	250sd	500sd
£2.75	**£5.15**	**£11.75**	**£22.20**

RUD58 **Cherry Brandy**

These robust plants have outstanding garden performance, producing cherry coloured blooms. Great for the border or container. 60cm.

50sd	100sd	250sd	500sd

⅛g	¼g	½g	1g
£2.40	**£4.35**	**£7.60**	**£14.50**

SIL30 **Sibella**

This hardy annual is great for early spring baskets and containers. The 2cm diameter flowers are intensely coloured. It can be grown as a cold crop. It flowers from early May to September. 30-40 cm

100sd	250sd	500sd	1,000sd
£4.10	**£9.35**	**£17.65**	**£33.60**

Solidago

'Golden Rod'. Perennial, 2-3 weeks at 15-18°C, sow May-July, do not cover the seed. 12,000 seeds per gram.

Sell in: 9-13cm pots.
End Use: Borders.

SOL60 **Golden Baby**

Dwarf form, large plumes of golden yellow flowers. 60cm.

1,000sd	2,500sd	5,000sd	10,000sd
£3.85	**£8.70**	**£17.00**	**£32.50**

Stachys

Perennial, 3-4 weeks at 15-18°C, sow May-July. Cover with with vermiculite. 500 seeds per gram.

Sell in: 9-13cm pots.
End Use: Borders.

STA010 **Lanata**

Silvery grey woolly foliage, deep rose flowers. 45cm.

2½g	5g	10g	15g
£4.90	**£8.75**	**£15.75**	**£21.80**

Statice (limonium)

Annual - Sow into module trays in February, cover lightly with vermiculite, germinates in 2 weeks at 15-18°C. Ready to transplant in 8-10 weeks, the last 4 weeks of which should be below 10°C to initiate flowers. Plant up at 25x30cm, and sowing to flowering takes around 5 months. See variety for seed count.

End Use: Fresh/ dried cut flower.

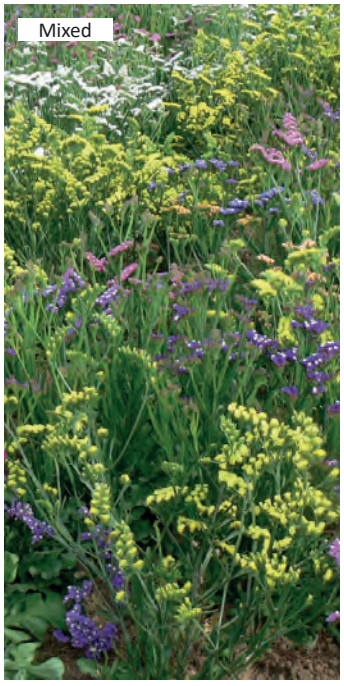

Perennial - Sow March-June, germinates in 2-3 weeks at 18°C. Prick out into 9-10cm pots after 4-5 weeks, grow on at 15°C. Plant up at 30x30cm.

Sinuata

Sunburst Series

This is the best series presently on the market and widely recognised by professional cut flower growers as a real winner. Very vigorous and even growth, suitable for both indoor and outdoor production. 75-90cm.

STA015 **Apricot**

STA020 **Dark Blue**

£2.25	**£4.20**	**£9.45**	**£18.55**

Perennial Variety

Dumosa

STA170 **Tartarica (Dumosa)**

An important flower which is used primarily as a filler for dried flower arrangements. Masses of star-like white flowers are produced on strong stems, from June to August. (approximately 1,100 seeds per gram.) 45cm.

1/4g	1/2g	1g	2 1/2g
£3.15	**£5.55**	**£10.55**	**£22.90**

Stocks (Matthiola)

Annual bedding types - Sow February-March, germinates in 1-2 weeks at 18°C, cover with vermiculite. Prick out into packs/pots as appropriate after 4 weeks, grow on at 12-15°C, sowing to flowering takes around 12-14 weeks. 600 seeds per gram (sow 3g for 1,000 plants).

Selectable Stocks - Sow at a temperature of 13-15°C. When the seed leaves have formed, drop the temperature to 10°C. When the plants are large enough to prick out, there will be two distinct colours in the seedlings. Light green plants should be kept (they are the doubles), the dark greens are the singles and should be discarded. Once this is done, temperatures can be raised again. 5g = 1,000 double plants.

Cut Flower Selectable - For glasshouse cut flower stocks varieties please see the website.

Winter Stocks - Biennial, sow June-July, 2 weeks at 15-18oC, 500 seeds per gram

Ten-Week Mixed

STO010 **Ten-Week Mixed**

Popular summer bedding type. 35cm.

Sell in: 6- or 9-packs.
End Use: Borders.

2 1/2g	5g	10g	15g

Strawberry
(Ornamental)

Our ornamental strawberry varieties have been bred predominantly for their aesthetic value, e.g. colourful flowers, however they will still produce some fruit that can be eaten. For varieties bred for culinary purposes, with enhanced fruit characteristics, please see our culinary strawberry range in the vegetable section of this catalogue. Seed raised strawberries are popular for young plant sales, and sales of flowering/fruiting plants in hanging baskets.

Sow from late January through to mid-April. Germinate at 18-22°C, cover lightly with vermiculite; the seed can take several weeks to germinate and should be kept moist during this period. Prick out when large enough into packs/pots/modules as required, grow on at 14-18°C. Plants can be hardened off at around 10°C prior to planting out, when the plants should have developed at least 4-5 leaves. Production times are typically 6 weeks from sowing to finished plug and 8 weeks from plug to saleable fruiting plant in 15cm pot. 1,800 seeds per gram.

Sell in: 6-packs, 9cm pots and baskets.
End Use: Baskets, containers.

STR03 **Frisan**

Features neon pink flowers. This vigourous variety produces many runners and is ideal for use in hanging baskets or containers. Fruit is bright red juicy and sweet.

25sd	50sd	100sd	250sd
£6.75	**£12.50**	**£23.70**	**£54.00**

STR05 **Loran**

Loran is a compact early variety with eye catching deep green leaves. It produces very few runners. The fruit is conical and large with deep red flesh.

25sd	50sd	100sd	250sd
£6.75	**£12.50**	**£23.70**	**£54.00**

STR13 **Roman**

Produces semi double appleblossom flowers. The plants are vigorous making them ideal for baskets and containers. The fruit is bright red and medium in size.

25sd	50sd	100sd	250sd
£7.40	**£13.75**	**£26.05**	**£59.35**

STR14 **Summer Breeze Rose**

Strawberry Summer Breeze produces rose like double flowers. This double type of flower keep their colour for a considerably longer period than the single types. The combination of abundant colour and fresh summer fruit will give great consumer satisfaction. Flowers appear approx 14 weeks after sowing.

25sd	50sd	100sd	250sd
£7.55	**£14.00**	**£26.50**	**£60.40**

STR16 **Summer Breeze Snow**

Summer Breeze Snow produces white double flowers. This double type of flower keeps their colour for a longer period than the single types. The combination of abundant colour and fresh summer fruit will give great consumer satisfaction. Flowers appear approx 14 weeks after sowing. The fruit is aromatic and bright red. Few if any runners are produced.

25sd	50sd	100sd	250sd
£7.55	**£14.00**	**£26.50**	**£60.40**

STR20 **Alexandria**

A perennial alpine type, vigorous runnerless variety. Heavy cropper bearing bright crimson fragrant fruits. Sow in Autumn and place in cold frame, 1,800 seeds per gram.

1g	$2^1/_2$g	5g	10g
£5.50	**£11.95**	**£22.25**	**£41.80**

Streptocarpus

Greenhouse perennial, sow January-April, sow the tiny seeds on the compost surface and keep moist; germinate at 20°C; when large enough to handle, prick out into 8-9cm pots, relatively slow-growing plants which will flower in mid to late summer from a January sowing; minimum temperature requirement is 12°C through the winter months. 35,000 seeds per gram.

Sell in: 10-12cm pots.
End Use: Houseplant.

STR50 **Dragon Mixed**

With a great range of colours this mixture is early flowering. Bred in Northern Europe, this mix of Cape Primrose makes a great houseplant.

250sd	500sd	1,000sd	2,500sd
£5.55	**£10.50**	**£19.95**	**£44.90**

www.molesseeds.co.uk

Sunflower

Pot Plant Varieties - Sow spring/summer, direct into 10-15cm pot. Rapid growth, so requires feeding with each watering. Sell with main bud in flower, and lateral buds developing.

Cut Flower Varieties - Sow April-mid June, direct into the flowering position. Row width depends on variety (up to 40cm for largest varieties); spacing between plants around 12-15cm. Sow at approx 4 kg per acre. Lightly cover seeds, and keep moist. Germination optimum 20°C, minimum 5°C. From sowing to first cutting is approximately 60 days in mid Summer - plants flower July-September. Denser plantings or excess nitrogen can lead to smaller flowerheads with less robust stems. Cut flowers just before first ray petals open. Treatment of stems with holding solution can prolong vase life. Seed count varies greatly from one variety to another. Although the following varieties are all used for cut flowers, we would especially recommend the pollenless varieties as the others will shed pollen when cut.

Pollen Free Varieties - Pollen-free types can be sown under glass September to March, and outdoors April to August. Sow directly, cover with soil and maintain temperature around 10°C. Approx. 10 days after emergence, thin out to leave the best seedlings, spaced at around 10-12cm in each direction. High density production suppresses the production of sideshoots. Minimum night temperature 8°C, with a maximum of 25°C in the daytime. Provide little or no fertilizer, and water sparingly.

Pot Plant Varieties

SUN02 **Firefox**

Dwarf double flowered variety. Striking blooms with fluffy redish centres graduated to yellow outer petals. At least two waves of flowers provide an extended bloom time. Height approximately 40cm.

25sd	50sd	100sd	500sd
£3.45	**£6.45**	**£12.20**	**£27.75**

Pacino Series

An improved pot type with better branching habit and more flowers. As the central flowers begin to open, the lateral branches have well-developed buds producing 10-12cm flowers. Height approx. 40-65cm.

SUN04 **Gold**

Bright yellow flowers with small centres.

SUN05 **Cola**

Golden yellow petals with a dark centre.

250sd	500sd	1,000sd	2,500sd
£7.55	**£14.25**	**£27.10**	**£61.00**

SUN21 **F1 Dancing Sun**

This pollen free variety is great for containers and landscape use. Good branching habit eusures good garden performance. Ideally sow in 9cm pots and move on to 24cm pots or plant out. 90-110cm.

50sd	100sd	250sd	500sd
£4.05	**£7.65**	**£17.45**	**£32.95**

SUN29 **Waooh!**

Great garden performer, given the RHS garden merit award. We tested this multi headed variety and we were really impressed by the number of flowers produced. Great for borders and larger containers. 60cm.

100sd	250sd	500sd	1,000sd
£2.65	**£6.05**	**£11.40**	**£21.65**

SUN08 **Gummy Bear**

This is a semi tall double variety for containers and beds. The dark green leaves are a great contrast to the large double lemon-yellow blooms. Produces numerous flowers on top of the plant. Great garden performer. 90-120cm. .

100sd	250sd	500sd	1,000sd
£3.40	**£7.70**	**£14.55**	**£27.65**

Pot Plant Varieties - Pollen-Free

SUN09 **Sunsation Yellow**

Sunsation is a large flowered, pollen free F1 hybrid with a black centre, producing multiple flower buds. It has dark, green, glossy foliage. The compact plants are ideal for 13 cm pots. Because of its compact habit, Sunsation needs very little if any growth regulators. The plants have good keeping qualities and have an excellent garden performance. 35-45cm.

25sd	50sd	100sd	250sd
£3.80	**£7.10**	**£13.40**	**£30.55**

SUN10 **Junior**

In our pot Sunflower trial this pollen free variety excelled. It was generally consided to be the best dwarf variety of the trial. Very good uniformity makes this variety ideal for mass production. Flower size is around 17cm with a dark disk and yellow petals. 60cm.

100sd	250sd	500sd	1,000sd
£5.00	**£11.35**	**£21.40**	**£40.75**

Suntastic Series

Suntastic is very floriferous bearing up to 20 flowers per plant. The flowers are produced in flushes. The first flowers appear 50-65 days after sowing. The flowers are pollen free. 30-45cm.

SUN11 **Yellow Black Centre**

Bright yellow flowers with dark centres.

SUN13 **Yellow Red Bicolour**

Yellow and red petals.

50sd	100sd	250sd	500sd
£4.45	**£8.45**	**£19.25**	**£36.40**

Sunflower (contd.)

SUN12 **Smiley**

Smiley is dwarf, early blooming, and day length neutral. It branches freely and is great in pots and containers. The pollen-free flowers have broad petals, it maintains an excellent shape without petal curling. 50cm

50sd	100sd	250sd
£5.00	**£9.45**	**£21.55**

500sd	1,000sd
£40.70	**£77.50**

SUN14 **Lemon Cutie**

Lemon Cutie is a new dwarf branching pollen-free type. It produces multiple heads of semi double lemon yellow flowers. It is great for pot sales, containers and borders. 40cm

50sd	100sd	250sd
£4.55	**£8.65**	**£19.65**

500sd	1,000sd
£37.15	**£70.75**

Cut Flower Varieties

SUN15 **Sonja**

Sonja has long laterals without side branches. Small flowers, of tangerine orange with dark centre. 1.1m.

250sd	500sd	1,000sd
£6.60	**£12.45**	**£23.65**

2,500sd	5,000sd
£53.25	**£104.30**

SUN22 **Soraya**

Branching type with 10-15cm rich orange flowers all with a dark centre. Soraya is the 'big sister' of Sonja with a similar flower colour, but with larger flowers and even thicker and sturdier stems. 1.8m.

250sd	500sd	1,000sd
£5.15	**£9.75**	**£18.50**

2,500sd	5,000sd
£41.65	**£81.60**

SUN23 **Soluna Lemon**

[*Helianthus debilis*]
Soluna Lemon has relativity small flowers [8cm] making it ideal for smaller bouquets. The plants are well branched and flower freely. Great variety for back of border or home cuts. 1.2m.

100sd	250sd	500sd
£2.65	**£6.00**	**£11.30**

1,000sd	2,500sd
£21.50	**£48.40**

SUN33 **Taiyo**

A single stem cut flower strain, golden yellow with black centres. Suitable for use as a border plant and home cut flowers. 1.6m.

250sd	500sd	1,000sd
£3.60	**£6.80**	**£12.95**

2,500sd	5,000sd
£29.15	**£57.15**

£8.70	**£16.45**	**£31.25**	**£70.35**

SUN30 **F1 Marley**

Beautiful bi colour flowers makes this a great cut flower variety. 130cm-180cm

50sd	100sd	250sd	500sd
£5.00	**£9.45**	**£21.55**	**£40.70**

F1 Pro Cut Series

The Pro Cuts give a great return by having a high proportion of usable plants per square metre. The post harvest performance is very reliable. Excellent for cutting be it in mass commercial production or in the border at home. Very uniform and one of the earliest come into flower 120-180cm.

SUN80 **Orange**
Intense orange with dark centre.

SUN84 **Red**
Deep burgundy red with dark centre.

SUN90 **Plum**
Bi colour plum to cream.

SUN88 **White Lite**
White with light centre.

100sd	250sd	500sd	1,000sd	2,500sd
£7.30	**£16.65**	**£31.50**	**£60.00**	**£135.00**

Vincents Choice Summer DMR

SUN62 **F1 Vincent's Choice Summer DMR**

Classic yellow with dark centre. Less sensitive to day length for more flexible programming. Allows growers to produce high quality crops early, mid and late season. Upward facing flowers with an extra ring of overlapping petals for fuller heads. Proven resistance to downy mildew. Height 100-180cm.

100sd	250sd	500sd	1,000sd
£6.10	**£13.90**	**£26.25**	**£49.95**

F1 Sunrich Series

Non-branching, high quality F1 hybrids. Long-lasting flowers of 13-15cm in diameter. Crop height approximately 130cm, blooming in 60-70 days from sowing, under optimum conditions.

SUN35 **Gold**
Golden orange with green centre.

SUN37 **Orange**
Orange with large dark centre, best seller.

100sd	250sd	500sd	1,000sd	2,500sd
£7.40	**£16.85**	**£31.85**	**£60.65**	**£136.50**

F1 Sunrich Summer Series

An earlier version of Sunrich. Flowers 5-7 days earlier allowing continuity.

SUN39 **Orange**

SUN38 **Lemon**

100sd	250sd	500sd	1,000sd
£9.00	**£20.50**	**£38.80**	**£73.85**

SUN41 **F1 Provence**
Deeper orange larger flower with improved vase life. The leaves also mark less easily. Similar in timing to summer.

50sd	100sd	250sd	500sd
£4.95	**£9.35**	**£21.25**	**£40.20**

SUN42 **F1 Premier Orange**

One of the fastest cropping varieties on the market. Height approx 30-40% less than Sunrich Orange.

50sd	100sd	250sd	500sd
£5.15	**£9.70**	**£22.15**	**£41.90**

SUN44 **F1 Premier Orange Up**

Orange Up is a non-branching F1 hybrid pollenless variety, which is ideal for bouquets as the flowers are angled upwards. This variety has a very short crop time of approximately 45-55 days from sowing with excellent uniformity. .

25sd	50sd	100sd	250sd
£2.75	**£5.15**	**£9.70**	**£22.15**

Tall Varieties

SUN31 **Kong**

A true monster reaching heights of 4m or more. Branching habit to give longer flowering than traditional types. Excellent for competitons. Flower size approx. 15-18cm, height approx. 400cm.

100sd	250sd	500sd	1,000sd
£3.60	**£8.20**	**£15.50**	**£29.45**

SUN50 **Giant Yellow Single**

The traditional Sunflower usually grown in childrens' competitions. 2-3m. 15 seeds per gram.

50g	100g	250g	500g
£3.45	**£6.35**	**£14.30**	**£26.75**

Sweet Pea

Annual - 2 weeks at 15-18°C, approx 12 seeds per gram. Sow January onwards.

Sell in: 9cm pots.
End Use: Bedding plant sales, cut flowers.

Perennial - **(Lathyrus latifolius)**
See Lathyrus

Tall Varieties

SWE165 **Cupid Pink**

A dwarf bush type Sweet Pea that is ideal for tubs and hanging baskets. The beautifully perfumed flowers are rose pink with a delicate white picotee edge. 45cm.

10g	15g	25g	50g
£3.75	**£5.20**	**£8.10**	**£14.80**

100g	250g	500g
£27.25	**£61.25**	**£114.65**

Sweet William

F1 and F2 Cut Flower Varieties - 1-2 weeks at 15-18°C. Sow June-Aug for glasshouse production, sow March-May for outdoor production. 950 seeds per gram, sow 1g to produce 800 plants.

Open pollinated Cut Flower Varieties - Sow April-July, cover with vermiculite - germinates in 2-3 weeks in a cold frame (around 12-15°C). Prick out into module trays when large enough (unless sown directly into modules), then when ready, plant up at 30x30cm, either outdoors or for earlier crop in unheated glasshouse or polythene tunnel (needs exposure to cool conditions to initiate flower buds). Crops May-June the year after sowing. Approx 1.5kg / Acre (3.6kg-4kg / Ha) 950 seeds per gram (sow 2g for 1000 plants).

Annual Bedding Varieties - Sow February-March, cover with vermiculite, germinates in 2-3 weeks at 15-18°C, transplant into packs after 4 weeks, grow on at around 10°C, sell as green plant with colour label - flowers June onwards. 1000 seeds per gram.

Sell in: 9cm or larger pots.
End Use: Borders

For furthur semi-professional cut flower Sweet William varieties see website.

F1 Hybrid Cut Flower Varieties

SWE215 **Hollandia Mixed**

A cut flower Sweet William that does not require any vernalisation to produce flowers. The sweetly scented flowers in shades of crimson, scarlet, white, pink and purple make ideal constituents of summer flower arrangements. 60-70cm.

100sd	250sd	500sd	1,000sd
£4.85	**£11.10**	**£20.95**	**£39.85**

SWE214 **Sweet Mixed**

A very uniform mixture. Can be used as a landscape plant and for home cutflowers. In addition makes an excellent cut flower for professional greenhouse and field production. Increased stem length will be achieved by greenhouse production. 45-90cm.

Tradescantia

Perennial, cold frame.

Sell in: 9cm or larger pots.
End Use: Borders.

TRA30 **Blue Andersoniana**

A hardy border plant with dull green pointed leaves. Deep blue flowers are borne freely from June to September. 60cm.

50sd	100sd	250sd	500sd
£3.20	**£6.10**	**£13.85**	**£26.20**

Tritoma

See Kniphofia (Red Hot Poker).

Trollius

'Globe Flower'. Perennial, sow in autumn, cover with vermiculite and leave to germinate over winter in a cold frame. 700 seeds per gram.

Sell in: 9cm or larger pots.
End Use: Borders.

TRO10 **Ledebourii Golden Queen**

Flowers June/July; orange flowers with prominent stamens, taller and later flowering than Trollius europaeus. 75cm.

1/2g	1g	2 1/2g	5g
£5.00	**£9.55**	**£20.75**	**£38.55**

Tropaeolum

Annual climber - Sow direct into flowering position April-May; takes 2-3 weeks to germinate, and 12 weeks to flower from sowing. 15 seeds per gram.

End Use: Fences, trellises.

TRO30 **Canariense (Canary Creeper)**

This rapid climber can reach a height of 4m in one season. It has blue-green leaves with 5 lobes, irregularly shaped yellow flowers are borne from July until October.

10g	15g	25g	50g
£4.25	**£5.85**	**£9.20**	**£16.80**

Tunica

Perennial, Sow May-July 2-4 weeks at 20-25°C, 6,200 seeds per gram, 1g for 1,000 plants.

TUN10 **Saxifraga**

Clusters of star shaped white and light pink flowers produced on wiry stems with grass like foliage. An excellent rock plant. 18cm.

Sell in: 9cm or larger pots.
End Use: Rockeries.

2½g	5g	10g	15g
£4.60	**£8.50**	**£15.95**	**£23.00**

Tulbaghia

Perennial, strong tolerance of drought and full sun. Sow at 18°C, lightly cover seeds germination may take around 4 weeks. Plug cultivation approximately 12 weeks, total cultivation time 24 weeks.

Sell in: 9cm or larger pots.
End Use: Containers, Borders, Edible flowers

Tulbaghia

Long flowering perennial with dense clump forming foliage. Ornamental and edible plant, delicate garlic flavour. Excellent pot performance thrives in well drained soil.

TUL100 **Violacea**

TUL110 **Violacea Alba**

£2.15	**£4.05**	**£7.65**	**£17.25**

Wallflower

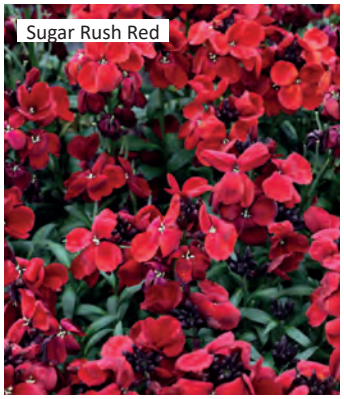

Sow at around 1.5kg/acre (3.5-4 kg/hectare). Drill in June to early July, rows 40-50cm apart, when soil is not too dry. Thin to 6-8cm in the row, to allow enough space for plants to bush out. Lift and bunch in autumn. A market also exists for pack sales, pricking out seedlings into 6- or 9-packs for sale in the Autumn. 500 seeds per gram.

Sell in: field grown and lifted, or 6-packs, 9-packs, pots and containers.
End Use: Borders, containers.

F1 Sugar Rush Series

Sweetly scented and ultra-fast in production. Not requiring cool temperatures for flowering, this F1 hybrid Cheiranthus can be sold even in late summer or early autumn from as little as just 9 weeks from sowing. Once planted out it will withstand heavy frost and wintery conditions, making a nice bushy plant that will then re-flower in early Spring. Alternatively, it can be sold as a flowering plant in early Spring in as little as 14-16 weeks from sowing. 40-50cm.

Zea

Annual, 2-3 weeks at 15-18°C, for seed count see species.

ZEA10 **Strawberry Corn**
Highly decorative mixture of small round cobs. Particularly useful for flower arrangements. 12 seeds per gram.

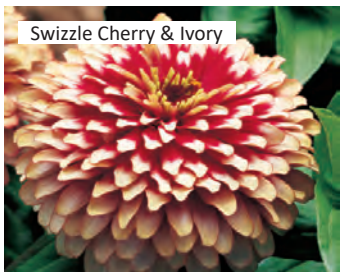

End Use: flower arrangements. Dot plant.

10g	15g	25g	50g
£3.45	**£4.80**	**£7.50**	**£13.75**

Zinnia

Annual. Zinnias resent disturbance so, for pot sales, sow directly into the pot in April, germinates in 7 days at 20°C, cover with vermiculite. Grow on at 15-18°C, sowing to flowering takes about 12 weeks. Dahlia Flowered and Benary's Giant may be sown directly into the flowering position in May. 120 seeds per gram.

Sell in: 9cm or larger pots.
End Use: Borders, containers, cut flowers

Swizzle Cherry & Ivory

Swizzle Scarlet & Yellow

Swizzle Series

The Swizzles have made a big impact with their fully double flowers, unique flower pattern and compact habit.

ZIN075 **Cherry & Ivory**
Cherry with ivory tips.

ZIN080 **Scarlet & Yellow**
Scarlet with yellow tips.

CUT FLOWERS

These next three pages focus on two product groups Antirrhinums and Stocks, from the range of semi-professional cut flowers that can be found on our website. (Semi-Professional, products for growers producing stems for profit but not in large scale glasshouses or generally as their primary income). Scan the QR code to see the full range.

Antirrhinum

Last year we extended our range of cut flower Antirrhinums adding colours from three series, Avignon, Toulon and Snapstar to compliment Potomac that we already offered. Those additions provided options to lengthen the growing season. This year we are adding some new colours to the Avignon and Toulon series and a few colours from the Orleans series which is a series that shares the same production window as Potomac and therefore offers a variety choice for this key main season production window.

The production of Antirrhinums is influenced by day length, light intensity and temperature so different varieties can be best suited to different conditions and they are therefore grouped according to growing and flowering time. The best quality blooms and stem length can be achieved by using a variety from a suitable group, although useable stems can be produced from other groups these may be of lower quality. The table below provides general guidance as to which groups are most suitable for the production window and the target flowering times through the seasons. This table is based on information from the breeders, however each growers individual conditions mean that these are just guidelines.

ANT712 **F1 Avignon II Lavender**

ANT930 **F1 Orleans III-IV White**

ANT650 **F1 Toulon V Apricot**

Season	Winter	Spring	Summer	Autumn
Light & Heat Intensity	Low	Medium	High	Medium
Sowing / Planting	Group 0			
	Group 1			
	Group 2			
	Group 3			
	Group 4			
	Group 5			
Flowering	Group 0			
	Group 1			
	Group 2			
	Group 3			
	Group 4			
	Group 5			

The groups show that some varieties are optimal for cool season production and others for warm season production, normally Antirrhinum grow best during cool weather but varieties in groups 4 and 5 have been bred for heat tolerance, this allows tall strong stems to be grown even in conditions generally considered not to be ideal. Using varieties from lower numbered groups in high light and heat conditions would result in shorter weaker stems.

All varieties need a germination temperature in the region of 18-21ºC but optimal growing temperatures vary depending on the group.

Which groups are the Semi Professional Antirrhinums we offer attributed to?

We list varieties in Group 2, Group 3, Group 4 and Group 5, currently we do not list Group 0 and Group 1 varieties as our customers have not as yet requested varieties for these production windows. See our website for the full colour range we offer in each series.

Group 2

Avignon - A group 2 cut flower Antirrhinum which has been developed to perform under average light intensity and cool to moderate temperatures. This series produces the best flowers in spring and autumn but it can be cropped through summer in cooler climates. Sowing in late winter to early spring or late summer to early autumn for overwintering.

Snapstar - A group 2 cut flower Antirrhinum. Produces strong stems that easily acheive a good length, fully double flowers.

ANT725 **F1 Avignon II Silver**

ANT800 **F1 Snapstar Champagne**

Group 3/4

Orleans - A group 3-4 cut flower Antirrhinum which is suited to cultivation during warm temperatures and higher light intensity. This series can be planted from early spring to early summer to produce stems throughout the summer. It has a short cultivation time of 8-12 weeks from planting out.

Potomac - A group 3-4 cut flower Antirrhinum. Good for production during long days. Plants produce tall strong stems providing long good quality flower spikes.

ANT920 **F1 Orleans III-IV Pink**

ANT320 **F1 Potomac Orange**

Group 4/5

Toulon - A group 4/5 cut flower Antirrhinum which is suited to cultivation under higher temperatures and high light intensity. This series can be sown from early spring through to early summer and will then provide flower stems throught the summer.

ANT660 **F1 Toulon V Pink**

Stocks

Stocks or *Matthiola* continue to be popular cut flowers with the consumer, providing them with an eye catching flower spike with a distinctive spicy clove like scent. Both sngle and double flowers are produced by the same varieties but the highest stem prices are achieved by doubles. If you the grower want to maximise your price per stem you need to be able to produce the highest number of double stems that you can and this is where selectable varieties prove useful. In a selectable variety seedlings that will produce double flowers can be chosen at the cotyledon stage and singles can be discarded if desired.

Last year we started offering the variety StoX, this variety combines the robust stem quality of Japanese types with the selectable characteristic of European types. Selecting for doubles in this variety requires the germinated seedlings (cotyledon stage) to undergo a cold treatment for 4 to 7 days at 4-5ºC followed by 1 to 2 days at 16-18ºC. Following this treatment the pale green seedlings can be identified, these seedlings will be the doubles. Two further colours Lavender and Marine have been added to this series this year.

StoX - An exciting Stock variety with durability of Japanese types and the selectability of European types. The stems are strong and it is straight forward to select for doubles following cold treatment which can result in 100% double flowers. Heat resistant, less susceptible to pests and diseases than some other varieties and short cultivation time. Stem length 65-75cm.

STO267 **StoX Lavender**

STO268 **StoX Marine**

STO260 **StoX Antique Rose**

throw to GROW

Easy! Quick! Colourful! Economical!

The urban meadow is a great option in areas that do not require the formality of bedding schemes. It is a cost effective alternative to grass with a large cost saving on mowing. It has proved immensely popular with the public for its rejuvenating effect in urban areas and its positive effect on biodiversity. Our range of non-native, direct-sown, annual and perennial mixtures makes a stunning display throughout the spring and summer months. The contents of the mixtures have a wide range of flowering times which overlap from late spring to late summer. For larger quantities, in a wider range of mixtures, please request our specialist catalogue.

When is it sown?

Throw to Grow is usually sown from the end of April to the beginning of June (depending on the location) when the soil is sufficiently warm and moist for the seeds to germinate.

What is the correct sowing rate?

In most cases, a density of between 2 and 6 grams per square metre is sufficient. An area that cannot be watered, has very stony or capping soil and is sown early (therefore at a relatively low temperature) will require a greater seed density than a plot of good soil with access to irrigation.

How should the ground be prepared?

Weeding must be carried out before and after sowing. It is not possible to sow into established lawns, meadows, etc. The seeds must be lightly covered by soil in order to germinate. It is best to cultivate the soil to prepare a fine deep seedbed. Before sowing, mix the seeds well with sand or vermiculite ($^3/_4$ of the overall weight). Sowing into rows 20cm apart allows hoeing between rows until flowers are established.

Throughout the entire sowing process, whether manual or mechanized, continue to mix the seeds well for a homogenous distribution. After sowing, use a rake to cover the seeds lightly with soil, then water well to aid germination. Over the first few weeks, water if possible to keep the soil moist and to encourage germination.

What about after care?

Throw to Grow requires significantly less management than bedding plants do. Fertilizers and pesticides are not needed and demand is low for water once established. It is important however to remove weeds when visible.

RHA067 Flowers for shady Places

This decorative mix is designed for shady spots such as the foot of hedges.

100g	**£26.75**	250g	**£60.15**
500g	**£112.55**	1kg	**£212.35**

RHA064 Patriotic Mixed

A bright mix of primarily red white and blue.

.

100g	**£26.75**	250g	**£60.15**
500g	**£112.55**	1kg	**£212.35**

RHA054 Flowers for Beneficial Insects

Sow in strips alongside vegetable crops this mix helps beneficial insects find food and shelter near plants that need to be protected from harmful insects.

100g	**£26.75**	250g	**£60.15**
500g	**£112.55**	1kg	**£212.35**

RHA075 Sunflower Rise

A great mix where a bit of extra height is needed. Grows up to 120cm.

100g	**£26.75**	250g	**£60.15**
500g	**£112.55**	1kg	**£212.35**

RHA030 Express Summer

Very fast-flowering mixture of shorter annual varieties. A top seller.

100g	**£19.25**	250g	**£43.30**
500g	**£81.00**	1kg	**£152.80**

RHA002 Little Carpet Multicolour

Great ground covering capacity for borders and stony ground. The widest and most interesting range of annual varieties.

100g	**£26.75**	250g	**£60.15**
500g	**£112.55**	1kg	**£212.35**

RHA043 Meadow Glints

Annual flower in the first year are followed by perennial species from year two. Compact enough for roundabouts etc.

100g	**£26.75**	250g	**£60.15**
500g	**£112.55**	1kg	**£212.35**

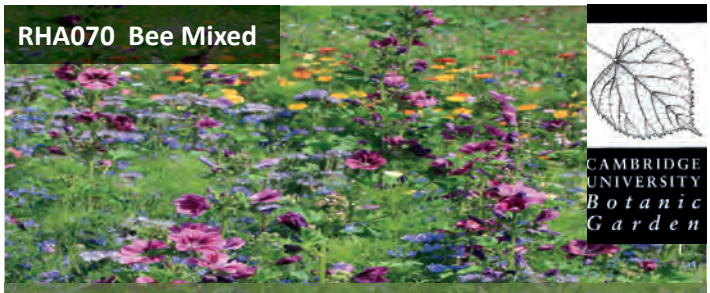

RHA028 Summer Picking Flowers

Beautiful mix of taller annual varieties ideal for cutting. Some Local Authorities use for "help yourself" beds, also great for pick-your-own.

100g	**£19.25**	250g	**£43.30**
500g	**£81.00**	1kg	**£152.80**

RHA070 Bee Mixed

Developed in conjunction with Cambridge University to get a scientifically based balance of plants. This mix is attractive to bees and other pollinating insects.

100g	**£26.75**	250g	**£60.15**
500g	**£112.55**	1kg	**£212.35**

RHA004 Medieval Carpet

Best selling mixture of "old fashioned" annual varieties such as Borage, Flax, Malope and Cornflower.

100g	**£26.75**	250g	**£60.15**
500g	**£112.55**	1kg	**£212.35**

For our complete range of mixtures and full cultural information please ask for our Throw to Grow brochure

ATTRACTRIVE TO BEES & BUTTERFLIES

Parks Budgets under Pressure?

throw to GROW *is the solution!*

Wild Flowers by Species

Attractive in their own right, these species are important components of natural ecosystems. They are ideal for wildlife projects in reserves, estates, schools, gardens, urban wildlife projects, to improve biodiversity, and for production of plants for sale. No artificial heat is required for production. Great for attracting butterflies, bees and other insects. See also our wild flower seed mixtures on the next pages, we also list Cowslip (Primula veris) in the main seed section, and Primula vulgaris with the hybrid primroses.

Technical

Annuals - marked (a)

Can be plug-raised, sown either in the Autumn or early Spring, or sown direct into prepared, cleared ground. Annuals will generally disappear once other species become established.

Perennials - marked (p)

For best results, we suggest multi-sowing the seed into large plug trays, then raising in cool glass, polytunnel, or cloche, or a sheltered area outdoors Growth rates vary between species. Do not allow the plants to dry out. Then plant out in Spring or Autumn, or pot up into 8cm pots for spring plant sales.

WFS200 **Yarrow**
Achillea millefolium (p). Grassy places. Short plants bearing flat flowerheads of white or pale pink flowers from June-Oct. (6,000 sds/g).

5g	10g	15g	25g
£3.15	**£5.60**	**£7.75**	**£12.20**

Lotus corniculatus (p). Creeping yellow flowered perennial, flowering in grassy places from May - Sept. (500 sds/g).

2½g	5g	10g	15g
£3.90	**£6.95**	**£12.50**	**£17.30**

WFS340 **Ragged Robin**
Lychnis flos-cuculi (p). Tallish stems with narrow petalled flowers mainly in damp meadows, May - Aug. (5,000 sds/g).

1g	2½g	5g	10g
£3.05	**£6.70**	**£11.95**	**£21.50**

WFS350 **Purple Loosestrife**
Lythrum salicaria (p). Tall spikes bearing purple flowers, riverbanks and damp places, June - Aug (20,000 sds/g).

1g	2½g	5g	10g
£2.30	**£5.05**	**£9.00**	**£16.20**

WFS360 **Musk Mallow**
Malva moschata (p). Tallish stems with large deep pink, (edible!) flowers, grassy places, July-Aug. (500 sds/g).

2½g	5g	10g	15g
£3.30	**£5.90**	**£10.60**	**£14.65**

WFS370 **Wild Marjoram**
Origanum vulgare (p). This aromatic herb grows naturally in dry, grassy places, flowering July-Sept, very attractive to bees and butterflies. (11,000 sds/g).

1g	2½g	5g	10g
£2.90	**£6.40**	**£11.35**	**£20.45**

PAP072 **Red Field Poppy**
Papaver rhoeas (a). Please see Papaver on page 107.

WFS390 **Hoary Plantain**
Plantago media (p). Rosette of dark green leaves, with flower spikes appearing in May - Aug amongst grasses. (2,000 sds/g).

1g	2½g	5g	10g
£5.00	**£11.00**	**£19.60**	**£35.25**

WFS400 **Selfheal**
Prunella vulgaris (p). Creeping stems with purple flowers June - Nov in areas of short grasses. (1,000 sds/g).

2½g	5g	10g	15g
£2.20	**£3.90**	**£7.05**	**£9.75**

WFS410 **Meadow Buttercup**
Ranunculus acris (p). Characteristic bright yellow flowers on tall stems in damp, grassy areas from April to October. (400 sds/g).

2½g	5g	10g	15g
£1.95	**£3.35**	**£6.00**	**£8.30**

WFS490 **Yellow Rattle**
Rhinanthus minor (a). Attractive partially parasitic annual. Will often reduce the vigour of adjacent coarse grass. Each patch triggers a succession allowing other species to establish in the vacant areas left. Apr-Jul. (300 sds/g).

2½g	5g	10g	15g
£3.35	**£5.90**	**£10.65**	**£14.70**

WFS420 **Common Sorrel**
Rumex acetosa (p). Tall flower spikes on slightly branched stems, woods and grassland May - Aug. (2,000 sds/g)

2½g	5g	10g	15g
£2.50	**£4.45**	**£7.95**	**£11.00**

WFS430 **Salad Burnet**
Sanguisorba minor (p). Roundish flower heads on long stems May - Sept, found in dry areas, often on lime. (300 sds/g).

2½g	5g	10g	15g
£1.95	**£2.85**	**£5.15**	**£7.10**

WFS440 **Red Campion**
Silene dioica (p). Tall meadow/ woodland perennial with bright pink flowers, from April until Oct. (1,000 sds/g).

5g	10g	15g	25g
£5.10	**£9.20**	**£12.70**	**£19.90**

WFS450 **Bladder Campion**
Silene vulgaris (p). A white-flowered version of the above, often grows in disturbed ground, flowers May - Sept. (1,500 sds/g).

2½g	5g	10g	15g
£2.45	**£4.35**	**£7.80**	**£10.80**

WFS460 **Betony**
Betonica officinalis (p). Shortish habit, hairy leaves, with spikes of pink flowers from June - Oct in grassland. (700 sds/g).

2½g	5g	10g	15g
£5.30	**£9.40**	**£16.95**	**£23.45**

WFS470 **Red Clover**
Trifolium pratense (p). A common sight in fields across the country, purple-pink flowers from May to Oct. (750 sds/g).

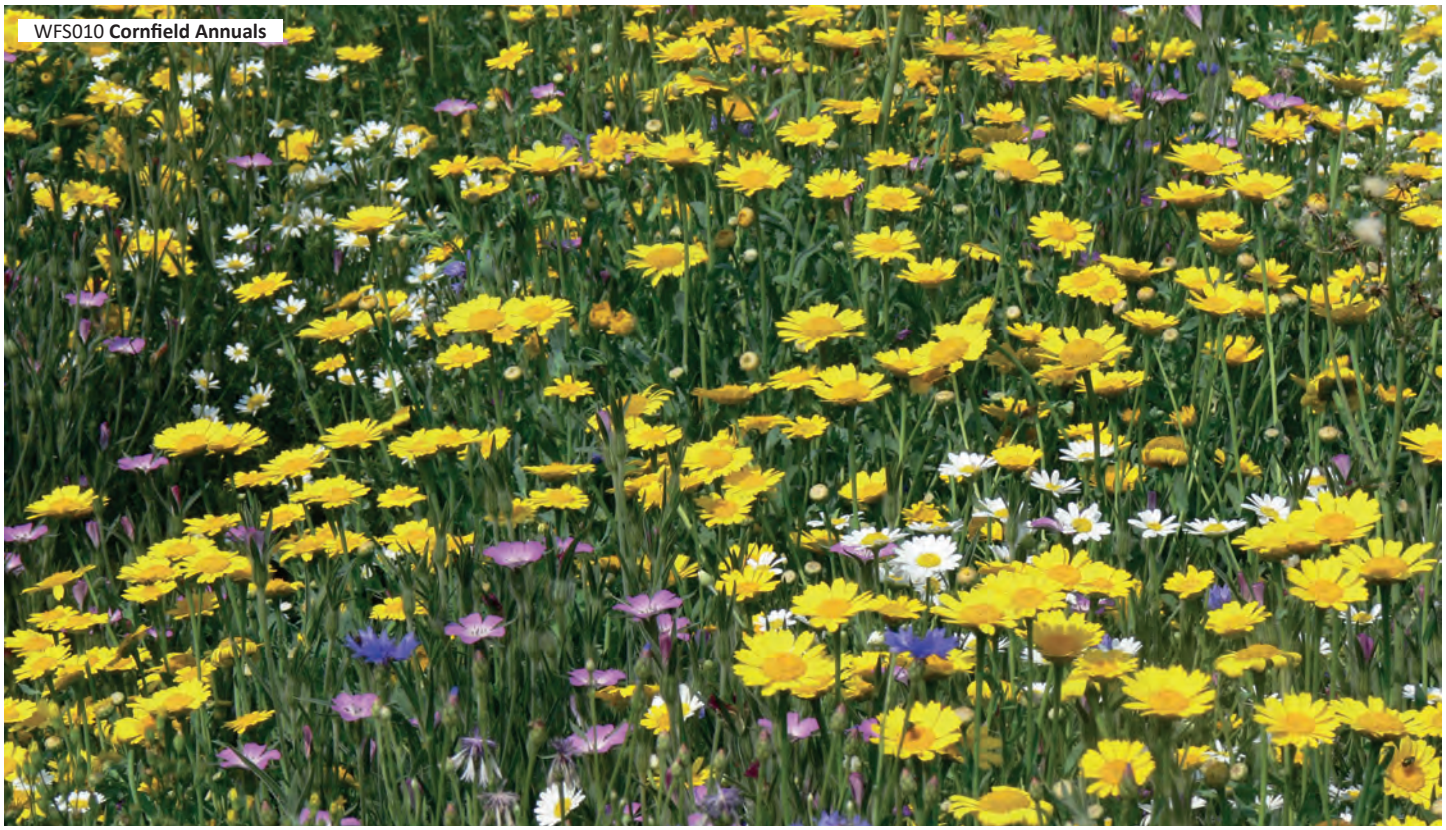

2½g	5g	10g	15g
£1.95	**£2.90**	**£5.15**	**£7.15**

WFS480 **Wild Pansy**
Viola tricolor (a/p). Growing in grassy places, field entrances etc, small (edible!) pansy flowers of variable colour but generally purple, Apr-Oct. (1,600 sds/g).

1g	2½g	5g	10g
£3.75	**£8.15**	**£14.55**	**£26.15**

Wild Flower Seed Mixtures

WFS140	**Mix of Cornfield Annuals (contains no grass)** ⌀	**£20.20**	**£45.40**	**£85.00**	**£160.35**

Our wild flower mixtures are suitable for a wide range of environments, carefully formulated to provide interest and natural balance. Each mixture contains grass and wild flower species, (Except WFS140 which contains no grass) for a natural meadow look. Full cultural instructions can be found on our website, but the key points to bear in mind are:

- Select the correct mixture for the soil type and drainage characteristics of your site.
- Prepare a firm, weed-free tilth. Low nutrient regimes are best, which can involve removing the topsoil and sowing onto subsoil.
- Sowing time throughout the year, with best results sowing March/April and August/September.
- Sowing rate 5g/m2 - bulk up the mixtures with silica sand when sowing to make it easier to broadcast the seeds evenly. Then rake the seed lightly into the surface.

Professional Amenity Grass Seed

Working in conjunction with a leading breeder of amenity grass seed, we have put together a range of professional quality amenity grass seed mixes. All the cultivars within the mixes have been independently tested by the Sports Turf Research Institute (STRI), to measure the vigour, colour, visual appearance and disease resistance.

Cultivar types

Bent: gives a fine, tightly-knit texture to the turf. Maintains a green colour during the winter.

Fescue: there are three main Fescue types: *Chewings:* fine leaved, tolerates close mowing. *Creeping Red:* compact growth, used to bind the sward together. *Hard:* good cold tolerance, ideal for low maintenance situations.

Amenity & Sports Ryegrass: fast establishing and hard-wearing. Our mixes use dwarf varieties designed to give fine leaves with a high shoot density.

GroMax treatment: some of our mixes are treated with a coating called GroMax that improves establishment, stimulates root growth, improves tolerance to stress and enhances water and nutrient uptake. Biostimulants assist a seedlings ability to take advantage of the soils own inherent reserves of nutrient by stimulating the soils microflora, resulting in improved root growth and establishment.

GroMax is a dry formulation of:

Natural humates and humic acid - rich in auxin type substances that enhance antioxidant synthesis; food source for micro-organisms.

Seaweed extract - stimulates root growth after damage; contains cytokinins to promote cell division.

Sucrose - acts as high energy food source.

Vitamins (B complex and K) and potash - enhance plant development and disease resistance.

The product is compatible with most micro-nutrients, fertilisers and pesticides. Please note this is not a chemical treatment.

VGR52 **Greens**

A good quality traditional 80/20 mixture that produces a dense, fine leaved sward with good colour throughout the year. Tolerates close mowing. Suited to Bowling and Golf greens. Cutting height 5mm. Sow at 35g/m^2; oversow at 25g/m^2. GroMax treated. Contains:

40% Wagner Chewings Fescue

40% Samanta Slender Creeping Red Fescue

20% Highland Browntop Bent.

1kg	5kg	10kg
£17.85	**£71.25**	**£138.05**
25kg	50kg	100kg
£325.00	**£623.30**	**£1,157.55**

VGR55 **Landscape**

A low maintenance ground cover mix, suitable for roadside verges and other general landscaping applications. Cutting height 25mm. Sow at 35g/m^2; oversow at 25g/m^2. Contains:

50% Double Tetraploid Amenity Ryegrass

30% Esquire Amenity Ryegrass

20% Ponderosa Amenity Ryegrass.

1kg	5kg	10kg
£10.70	**£42.75**	**£82.85**
25kg	50kg	100kg
£195.00	**£374.00**	**£694.55**

VGR57 **D.O.T. Approved**

This mixture conforms to the specifications of the official Department for Transport mixture. Ideal for roadside verges. Tolerant of poor soil types. Cutting height 75mm. Sow at 20g/m^2; oversow at 10g/m^2. GroMax treated. Contains:

40% Maxima Strong Creeping Red Fescue

25% Double Tetraploid Amenity Ryegrass

20% Dumas Hard Fescue

10% Samanta Slender Creeping Red Fescue

2.5% Higland Browntop Bent

2.5% Galway White Clover.

25kg	50kg	100kg
£250.00	**£479.45**	**£890.45**

VGR62 **Formal**

Produces an attractive, fine, dense sward for use on non ryegrass ornamental lawns and landscape areas. Also suitable for use as an economy mix for golf tees and fairways. Recovers quickly from damage. Cutting height 13mm. Sow at 35-50g/m^2; oversow at 25-50g/m^2. GroMax treated. Contains:

70% Maxima Strong Creeping Red Fescue

20% Wagner Chewings Fescue

10% Samanta Slender Creeping Red Fescue.

1kg	5kg	10kg
£12.90	**£51.50**	**£99.80**
25kg	50kg	100kg
£235.00	**£450.70**	**£837.00**

VGR82 **Action Replay**

A ryegrass mixture that will establish very quickly, producing a dense, hard wearing sward for use on all heavy-duty sports pitches and other demanding areas. Cutting height 25mm. Sow at 35-75g/m^2; oversow at 25-75g/m^2. GroMax treated. Contains:

30% Ponderosa Sports Ryegrass

25% Chardin Sports Ryegrass

25% Tetragame Tetraploid Amenity Ryegrass

20% Berlioz Sports Ryegrass.

1kg	5kg	10kg

25kg	50kg	100kg
£235.00	**£450.70**	**£837.00**

VGR97 **Haylage**

A ryegrass mixture that is designed for the production of top quality haylage. A high fibre content, with a good nose. Sow at 10-15Kg/acre. Contains:

25% Prospect Italian Ryegrass

25% Davinci Italian Ryegrass

22% Mongita Mid-season Amenity Ryegrass

20% Hymer Hybrid Ryegrass

8% Erecta Timothy.

1kg	5kg	10kg
£10.45	**£41.65**	**£80.70**
25kg	50kg	100kg
£190.00	**£364.40**	**£676.75**

VGR72 **Suburban**

An excellent multi-purpose lawn and landscape mixture, ideal for back lawns, etc. Quick to establish, with tolerance to high wear and shade. Good quality appearance. Cutting height 10mm. Sow at 35-50g/m^2; oversow at 15-25g/m^2. GroMax treated. Contains:

30% Sergei Strong Creeping Red Fescue

20% Claudine Amenity Ryegrass

15% Chardin Sports Ryegrass

10% Wagner Chewings Fescue

10% Pinafore Slender Creeping Red Fescue

10% Tetragame Tetraploid Sports Ryegrass

5% Tetradry Tetraploid Amenity Ryegrass.

25kg	50kg	100kg
£230.00	**£441.10**	**£819.20**

VGR95 **Horse Paddock**

Especially formulated for horse paddocks, providing balanced grazing with a dense turf. Can be grazed throughout the season, with good repairing qualities. Ideal for heavy usage. Also suitable for intermittent rests to allow cropping for hay. Designed to work well with moderate nitrogen inputs, but a good application before closing off for hay will produce the best results. Sow at 10-15Kg/acre. Contains:

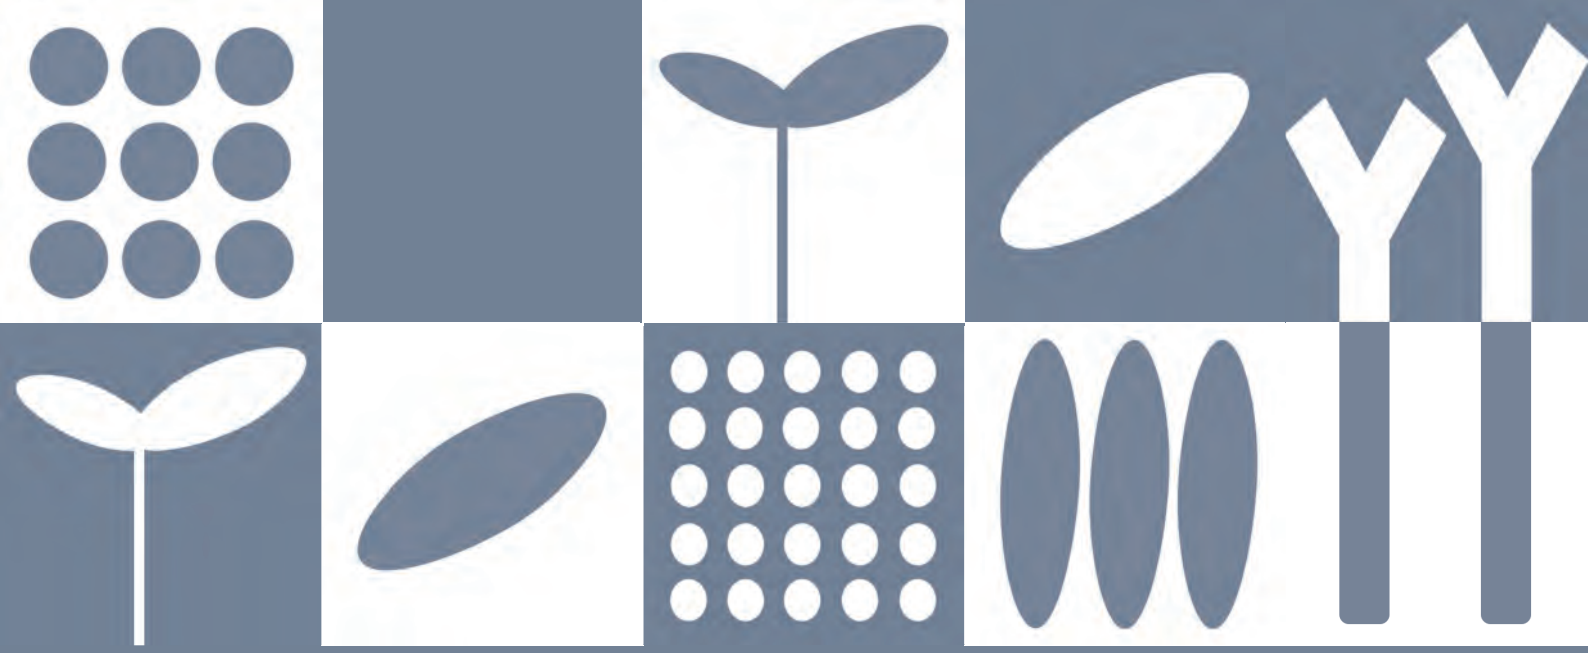

45% Premium Intermediate Amenity Ryegrass

30% Majestic Late Amenity Ryegrass

15% Maxima Strong Creeping Red Fescue

10% Winnetou Timothy.

VEGETABLES NEW FOR 2027

Aubergine F1 Baby Jack (VAU12)

Cabbage F1 Matterhorn (VCA030)

Pepper F1 Firefly (VHP03)

Tomato Ananas (VTO447)

Just some of our new range of vegetable seed for 2027...

Vegetable Seed - Conventional and Organic

Treatments

Many of our products are available in both a treated and untreated format, however regrettably this is not always possible. While we make no extra charge for treated or untreated seed when in stock, we reserve the right to make an additional charge to cover the costs of any specific requirements, such as having a product treated to order. If you have a particular request for treated or untreated seed please state this at the time of ordering to avoid delays in the supply of the required seed. We reserve the right to make a handling charge for seed returned due to it being treated or untreated when a particular request was not made at the time of ordering.

Grades

The Open Pollinated (OP) and F1 hybrid vegetable seed is supplied as natural seed, except where the seed is supplied as ***Precision*** (sized to 0.25mm range) or ***Graded*** seed (sized to 0.50mm range). Some products are stocked as both natural and graded seed and while the description may not state a sized option is available we may have precision or graded seed available. If you need a specific seed size please contact us with your requirements and we will be pleased to advise on availability and price. Seed sizes are independant of treatment options.

Organic

Our seed is produced on farms which have been officially authorised as meeting all the required organic standards. The seed crops are grown on soil which has taken at least five years to reach the required standard and the crops themselves are hand maintained and weeded without the use of artificial chemicals in the form of herbicides, pesticides or fertilisers. The seed is harvested using traditional methods and there are no chemicals used in the seed cleaning process. The seed is inspected for quality and authenticity by the organic governing body in the country of origin and is then packed in a non-chemical environment. All our organic seed is certified by the Soil Association.

For your guidance these icons are used throughout the vegetable section:

- *Popular for retail young plant sales*
- *Suitable for production under polythene*
- *Suitable for production under glass*

Artichoke (Globe)

An unusual perennial species suitable for sales to such outlets as restaurants, and the specialist greengrocery trade. Also useful as an architectural plant in large herbaceous border settings. A high value crop which is also suitable for young plant sales. 25 seeds per gram. Sow March-April at 16-18°C in modules, or April in open ground. Plant out 1m apart in late April-early May. Harvest the following year. Pick heads before they flower. Usually starts cropping in year 2, and remains productive for up to four years.

VAR30 **Violet de Provence**

A purple globe variety, similar to Green Globe in habit, but with a finer flavour, and attractive large purple thistle-like flowerheads. 20 seeds per gram.

5g	10g	25g
£2.90	**£5.35**	**£12.30**
50g	100g	250g
£22.80	**£42.20**	**£97.65**

VAR40 **Green Globe**

The standard green-headed variety, reaching up to 170cm in height. Attractive large blue thistle-like flowerheads if allowed to flower.

10g	25g	50g
£3.10	**£7.20**	**£13.30**
100g	250g	500g
£24.60	**£56.90**	**£105.30**

VAR50 **Cardoon**

Cynara cardunculus. Perennial. 25 seeds per gram. Grown for the edible stalks and midribs. Sow into modules during the spring, plant out early summer. Blanch stems in late summer, harvest 8-10 weeks later. Plants need support.

25g	50g	100g
£3.60	**£6.70**	**£12.35**
250g	500g	1kg
£28.55	**£52.85**	**£97.85**

Asparagus

Combines a high return with a productive life of around 20 years. Requires relatively little maintenance, and the crop is suitable for fresh market and roadside sales. F1 hybrid 'all male' varieties are far higher yielding than the traditional types. Crowns are established roots which are lifted and packed immediately before despatch. Sow seeds (45-60/g) in January into modules at 16-18°C, following a 24 hour soak. Transplant in April or early May. Otherwise sow seeds into seedbed outdoors March to early May. Plant out crowns at 30 x 90cm, harvest a small crop the following year. Plant population approx. 20,000 per hectare for white spears, and approx. 25,000 per hectare for green or purple spears. Harvest small crop in year two, then crop normally in subsequent seasons. Cultural leaflet available upon request.

Seed

VAS05 **F1 Gijnlim**

Very early-cropping (harvest mid March to mid June). Produces top quality, medium thickness spears. Suitable for both white and green spear production.

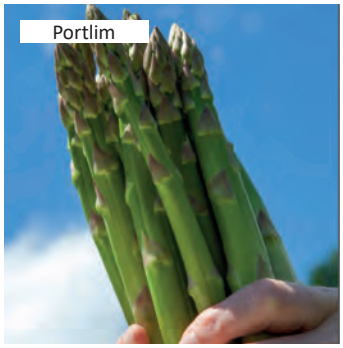

25sd	50sd	100sd
£10.10	**£18.70**	**£35.50**
250sd	500sd	
£80.90	**£153.05**	

VAS09 **F1 Pacific Purple**

A late season hybrid variety that produces super-sweet dark purple spears. The spears are very low in fibre allowing for tip to butt consumption. Spear diameter is typically medium to large. Also suitable for super-sweet white spear production.

25sd	50sd	100sd
£6.40	**£11.90**	**£22.55**
250sd	500sd	
£51.35	**£97.15**	

VAS22 **F1 Portlim**
A 100% male hybrid that is ideal for green spear production. Developed to crop later than Gijnlim but deliver similar high quality spears, allowing for greater continuity of supply. Attractive, cylindrical, smooth spears. Tips remain tightly closed even during warmer weather.

25sd	50sd	100sd
£10.10	**£18.70**	**£35.50**

250sd	500sd
£80.90	**£153.05**

VAS10 **Connover's Colossal**
An open pollinated variety producing a reasonable crop of fairly thick spears. Also used in flower arranging, as a foliage item.

25g	50g	100g
£4.35	**£8.10**	**£14.95**

250g	500g	1kg
£34.55	**£64.00**	**£118.50**

VAS24 **F1 Millennium**
A class leading hybrid developed for green spear production. Produces a high yield of straight spears, with tight heads. Excellent vigour. Good flavour. A late cropping variety allowing harvesting in July.

25sd	50sd	100sd
£8.05	**£14.95**	**£28.30**

250sd	500sd
£64.55	**£122.10**

1 Year Old Crowns

Please order by mid March for delivery in late March or early April. Please note: separate delivery charges apply to Asparagus crown orders - please see page 238-239 for details.

VPL05 **F1 Gijnlim**
See seed product for description.

250 cr.	500 cr.
£223.55	**£411.30**

Aubergine

A high revenue crop which is becoming more 'mainstream'. Has a flexible growing regime, as it can be grown in heated glass, cool glass and under plastic. 200 seeds per gram. Sow early October to November, or mid November to December, or late January to February, germinates at 20-25°C. For early/late crop allow 46cm between plants, for maincrop allow 38cm. Sowing rate 50,000 seeds per hectare. Harvest from April onwards.

A cultural leaflet is available to download from our website.

VAU12 **F1 Baby Jack**
A very compact variety that is ideal for container and patio growing. Produces small, dark purple fruits that typically weigh around 50 grams. Spineless.

25sd	50sd	100sd
£4.35	**£8.05**	**£15.25**

250sd	500sd
£34.70	**£65.65**

VAU10 **F1 Moneymaker**
Medium plant height with standard shaped dark fruits, averaging 100g in weight per fruit, an early maturing variety.

100sd	250sd	500sd
£2.90	**£6.60**	**£12.45**

1,000sd	2,500sd
£23.65	**£53.25**

VAU20 **Black Beauty**
Pear shaped, open pollinated variety, deep purple fruits and relatively early cropping. Useful for plant sales. Popular amateur variety. Fruit size approxamately 12cm long.

10g	25g	50g
£1.95	**£3.65**	**£6.75**

100g	250g	500g

£3.50	**£6.60**	**£12.50**

2,500sd	5,000sd
£28.15	**£55.15**

VAU22 **F1 Meatball**
If you are looking for a meat alternative then this variety could be the one. Probably the mightiest, meatiest variety currently available, with fruits that have dense, moist flesh that perfectly captures the flavour and texture of meat. Suitable for use in containers, outdoors and unheated glasshouses.

25sd	50sd	100sd
£4.10	**£7.60**	**£14.45**

250sd	500sd
£32.90	**£62.25**

Jewel F1 Series
A range of varieties producing egg-sized fruits in various colours. Typically 15-20 fruits per plant, which each fruit typically 10cm long and weighing 80-100g. The compact plant habit makes them ideal for containers (13-15cm pots). Support needed once plants start bearing fruit.

VAU70 **Jade**
Pale green fruit.

VAU72 **Ivory**
White fruit.

VAU74 **Jet**
Dark purple to black fruit.

VAU76 **Amethyst**
Bright coloured mid-purple fruit.

VAU78 **Marble**
A white base with purple stripes.

50sd	100sd	250sd
£3.55	**£6.70**	**£15.30**

500sd	1,000sd
£28.90	**£55.00**

Aubergine (contd.)

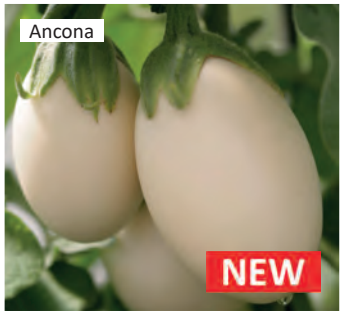

VAU50 **F1 Pinstripe**

The ideal complement to Ivory, this variety produces small, oval shaped, light purple fruits with creamy white stripes. Spine free under normal growing conditions.

25sd	50sd	100sd
£4.35	**£8.05**	**£15.25**

250sd	500sd
£34.70	**£65.65**

VAU58 **F1 Ancona**

A compact variety that produces oval shaped, creamy white fruits. Typical fruit weight around 85 grams. Ideal for use in containers. Predominantly spineless.

25sd	50sd	100sd
£4.35	**£8.05**	**£15.25**

250sd	500sd
£34.70	**£65.65**

VAU30 **F1 Farmers Long**

A vigorous, erect plant producing long slender purple red fruit. Early, prolific producer of top quality fruit measuring 30cm long x 3cm in diameter. White tender flesh with good flavour. Tolerant of bacterial wilt.

100sd	250sd	500sd
£1.95	**£4.40**	**£8.30**

1,000sd	2,500sd
£15.75	**£35.45**

VAU40 **F1 Green Knight**

Produces a prolific crop of glossy jade green fruits, which are approximately 17cm in length. Smooth skin with good internal texture. A popular ingredient for Asian cuisine.

50sd	100sd	250sd
£3.65	**£6.90**	**£15.75**

500sd	1,000sd
£29.75	**£56.65**

VAU42 **F1 White Knight**

Attractive shimmery white fruits that are typically 17cm in length. The delicious flavour makes them ideal for roasting, baking or serving fresh. Works well with the other varieties in the Knight series.

50sd	100sd	250sd
£3.65	**£6.90**	**£15.75**

500sd	1,000sd
£29.75	**£56.65**

VAU44 **F1 Violet Knight**

Another member of the Knight series. The variety produces striking violet fruits that contain minimal seeds and no bitter taste. Fruits 15-17cm long. Transplant to harvest is approximately 60 days.

Bean (Broad)

This crop provides early cash returns plus has beneficial uses as a green manure, fixing nitrogen in the soil, and also adding bulk to soil. Also popular for loose seed sales in garden centres and shops.

Approx. 650 seeds per kilo (1300 for small bean varieties such as Scorpio). Germinates between 5 and 20°C. Plant spacing 20 x 60cm. Harvest from May to October (sow February to March unless otherwise stated). The old plants can also be ploughed in as a green manure. Seed requirement is approximately 80Kg/acre (200Kg/Ha).

VBB10 **Aquadulce**

The standard variety for overwintering. Very good cold tolerance, semi-compact plants with high yields of pods containing 6-7 white beans per pod. Grows to approximately 90cm in height. A very early maturing variety. Sow Oct-Nov or Feb-Mar.

500g	1kg	2½kg
£5.95	**£9.30**	**£20.45**

5kg	10kg	25kg
£37.80	**£69.50**	**£152.90**

VBB60 **The Sutton**

Dwarf variety, growing to 45cm in height. Suitable for autumn and spring sowings. A good choice for exposed areas. Good yields of approx. 6-8 white beans per pod.

500g	1kg	2½kg
£6.40	**£10.00**	**£22.10**

5kg	10kg	25kg
£40.80	**£75.00**	**£165.00**

VBB45 **Monica**

Probably the quickest maturing spring sown bean currently available, making it ideal for early, mid and late sowings. Can also be used for overwintered crops. Produces a heavy yield of large sized, white beans.

250g	500g	1kg
£4.70	**£7.55**	**£11.80**

2½kg	5kg	10kg
£26.05	**£48.10**	**£88.50**

VBB50 **Witkiem Manita**

Early maturing variety, suited to standard and late sowings. Produces top quality white beans, approximately 5 per pod. Can be sown as late as May, and is well suited to freezing.

500g	1kg	2½kg
£5.40	**£8.50**	**£18.70**

5kg	10kg	25kg
£34.55	**£63.55**	**£139.85**

£4.55	**£7.10**	**£15.60**
5kg	10kg	25kg
£28.80	**£53.00**	**£116.60**

VBB62 **Duet**
A very compact variety producing small, tasty beans, typically 12-15mm in size. Approximately 4-5 beans per pod. Suitable for both fresh market and industrial use.

250g	500g	1kg
£5.35	**£8.50**	**£13.35**
2½kg	5kg	10kg
£29.45	**£54.35**	**£100.00**

VBB70 **Scorpio**
Small to medium beans, that average 15mm in width. Around 6-8 beans per pod, with good flavour and texture. White seeded. A very heavy cropper.

250g	500g	1kg
£5.60	**£8.95**	**£14.00**
2½kg	5kg	10kg
£30.90	**£57.10**	**£105.00**

Bean (Climbing French)

To crop under glass sow from February onwards (germinates between 16 and 25°C). Sow in modules for transplanting outside in May. Alternatively sow direct outside in May. Use a plant spacing of 25 x 75cm. Harvest from July onwards. Support netting or staking required. 2000 seeds per kilo. Seed requirement around 75-100 kilos per hectare.

Flat-podded

VCF15 **Algarve**
Flat podded Hunter type, but with larger pods, and an earlier harvest time. Suited to early and late sowings. Performs well under varying conditions; excellent vigour and very productive variety.

100g	250g	500g	1kg
£5.00	**£11.60**	**£21.45**	**£39.65**

organic seed
VOG075 **Limka**
Early maturing, suited to glasshouse, tunnel and open field production. Performs well under difficult conditions. Pods are 22mm wide, averaging 22-24cm long. Suited to early, main and late season work. Excellent plant vigour and a very heavy cropper.

50g	100g	250g	500g
£3.40	**£6.30**	**£14.60**	**£27.00**

organic seed
VOG040 **Eva**
Suited to early production with dark green oval pods of 26-28cm in length. For protected or field production. Resistant to BCMV race 1 & 2.

50g	100g	250g	500g
£3.75	**£6.95**	**£16.05**	**£29.70**

VCF45 **Hunter**
White seeded, flat podded variety suited to early and maincrop production. A high-yielding variety with pods 25cm x 20mm, suited to protected and outdoor production.

50g	100g	250g	500g
£3.10	**£5.70**	**£13.15**	**£24.30**

VCF50 **Goldfield**
High quality variety with flat yellow pods. Good vigour with a long harvest period. Pods are 26-28cm in length and 25mm in width. Stringless. Resistant to BCMV race 1.

50g	100g	250g	500g
£3.10	**£5.70**	**£13.15**	**£24.30**

VCF80 **Borlotto Lingua di Fuoco**
A flat podded variety with highly coloured green and red pods. Can be used for both edible pods and shelled dry beans.

100g	250g	500g	1kg
£2.40	**£5.55**	**£10.30**	**£19.00**

Round ('pencil') podded

VCF20 **Blue Lake Stringless**
White seeded. Quick to mature. Dark green pencil pods, approximately 15cm x 11mm. A popular choice for plant sales. Tolerant of BCMV.

250g	500g	1kg
£6.75	**£10.75**	**£16.85**
2½kg	5kg	10kg
£37.15	**£68.65**	**£126.25**

VCF55 **Fasold**
Black seeded. Quick to mature, but slow to seed, allowing for a longer harvest period. Pods are long, round and stringless, with superb flavour. An excellent choice for plant sales. Tolerant of BCMV and Anthracnose.

250g	500g	1kg
£7.25	**£11.60**	**£18.20**
2½kg	5kg	10kg
£40.15	**£74.20**	**£136.50**

VCF70 **Cobra**
Very high quality with a long harvest period. Long, round pods which remain very straight and have a bright green, smooth surface. Especially developed for the fresh market, pods are 20cm x 7-9mm, the variety is black-seeded with very good vigour. Stringless. Resistant to BCMV race 1.

50g	100g	250g	500g
£3.10	**£5.70**	**£13.15**	**£24.30**

Organic seed
VOG045 **Cobra**

50g	100g	250g	500g
£3.40	**£6.30**	**£14.60**	**£27.00**

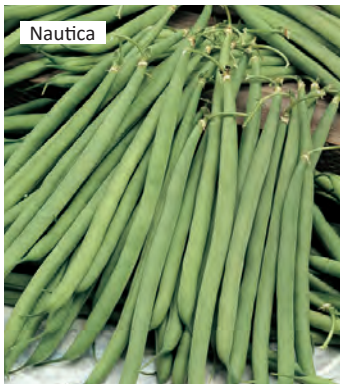

VCF75 **Sunshine**
A prolific variety producing a good yield of attractive pale gold coloured beans. The pods are straight, typically 17-18cm in length, and round in profile, typically 9-10.5mm in size. The pods are stringless. This variety has white flowers and is white seeded.

50g	100g	250g	500g
£3.35	**£6.20**	**£14.30**	**£26.45**

Bean (Dwarf French)

Dwarf French beans give a high return for limited space and outlay. Suitable for fresh sales and for processing; also popular for pick-your-own use. 2000 seeds per kilo. To crop under glass sow from February onwards. Germinates between 16 and 25°C. Sow in modules for transplanting outside in May, alternatively sow direct outside in May. Plant spacing 25 x 75cm. Harvest from July onwards. Seed requirement is 75-100 kilos per hectare.

Pencil-podded

VDF35 **Nautica**

A vigorous, black seeded variety producing high yields of very fine pencil pods, typically 13cm in length with a consistent sieve size of 6-7mm. Excellent flavour. Medium to dark green colour; stringless. Early maturity. Resistant to Halo blight, Anthracnose and BCMV.

250g	500g	1kg
£8.25	**£13.20**	**£20.70**

2½kg	5kg
£45.60	**£84.25**

VDF72 **Faraday**

Excellent plant habit coupled with high yields of uniform pods. Plant height typically 50cm. Pods are 6-8mm in diameter and 13cm long. Resistant to Halo blight, Anthracnose and BCMV.

250g	500g	1kg
£8.50	**£13.60**	**£21.30**

2½kg	5kg
£47.00	**£86.80**

VDF45 **Martini**

A very well structured, compact plant with uniform pod set. Typically three days quicker to point of harvest than Stanley. Pods are 9-10mm in diameter and 11cm in length. Resistant to Halo blight, Anthracnose and BCMV.

250g	500g	1kg
£7.05	**£11.30**	**£17.70**

2½kg	5kg
£39.00	**£72.05**

VDF60 **Stanley**

A white flowering, white seeded variety that reliably delivers impressive yields of top quality beans. Medium green pods, 14cm x10mm in size. Early maturity. Suitable for early and late sowings. Resistant to Halo blight, Anthracnose and BCMV.

250g	500g	1kg
£7.05	**£11.30**	**£17.70**

2½kg	5kg
£39.00	**£72.05**

VDF25 **Montano**

White seeded, pencil podded type, pods 15cm x 12mm, suited to May sowing. High yields of good quality beans. Ideal for open field and protected growing.

250g	500g	1kg
£6.65	**£10.65**	**£16.70**

2½kg	5kg
£36.80	**£67.95**

VDF20 **Tendergreen**

Pencil podded, brown seeded type, dark green pods 15cm x 12mm, a standard dwarf bean variety suitable for fresh market use and for plant sales. Tolerant of BCMV.

250g	500g	1kg
£4.85	**£7.75**	**£12.15**

2½kg	5kg
£26.75	**£49.40**

organic seed

VOG088 **Soliman**

A very early maturing variety, with a harvest cycle as short as 60 days from sowing (timeframe varies with growing conditions). Produces straight, dark green pods that are very fleshy. Pods typically 16-18cm in length. Brown seeded variety. Resistant to Anthracnose and BCMV.

250g	500g	1kg
£17.30	**£27.65**	**£43.35**

2½kg	5kg
£95.60	**£176.65**

Flat-podded

VDF50 **Nassau**

A flat podded variety with medium green pods 16cm x 17mm. Plant height 55cm. Has good vigour, coupled with good standing ability and long shelf life. Resistant to halo blight, anthracnose and BCMV.

250g	500g	1kg
£6.85	**£10.95**	**£17.20**

2½kg	5kg
£37.90	**£70.00**

Unusual-podded

VDF91 **Dior**

A high quality dwarf wax bean, with strong frame and upright habit. Beans are carried off the ground, with a canopy of leaves for protection. The yellow pods are uniform in shape; typically 12-14cm x 8-9mm. The compact plant habit makes this variety suitable for use in containers.

250g	500g	1kg
£7.25	**£11.60**	**£18.20**

2½kg	5kg
£40.15	**£74.20**

VDF96 **Voltage**

An excellent dwarf wax bean with vibrant yellow pods. Upright plant habit makes for easy harvest, with good presentation of pods. The uniform pods are typically 14-15cm x 9.5-10mm.

250g	500g	1kg
£6.90	**£11.05**	**£17.35**

2½kg	5kg
£38.20	**£70.60**

VDF92 **Capitano**

A yellow, flat podded Romano type bean. Vigorous plant with even pod set. Pods typically 15cm in length, by 2cm wide. Pod colour develops at early stage. Plant typically 50cm in height.

250g	500g	1kg
£7.00	**£11.20**	**£17.55**

2½kg	5kg
£38.65	**£71.40**

VDF86 **Dwarf Borlotto**
This dwarf Borlotto variety produces a heavy crop of colourful beans. Good vigour even in unfavourable conditions; early to mature. Pods typically 16-18cm long and predominantly red in colour, with 8-9 beans per pod. Resistant to BCMV. Approximately 1,500 seeds per kilo.

50g	100g	250g	500g
£2.90	**£5.35**	**£12.40**	**£22.95**

VDF95 **Purple Queen**
As the name suggests, this variety produces slightly curved, long dark purple pods, which are round in profile. Excellent flavour and stringless. Best picked when pods are young. Turn dark green when cooked. Resistant to BCMV and Anthracnose.

250g	500g	1kg
£6.15	**£9.85**	**£15.45**

2½kg	5kg
£34.10	**£63.00**

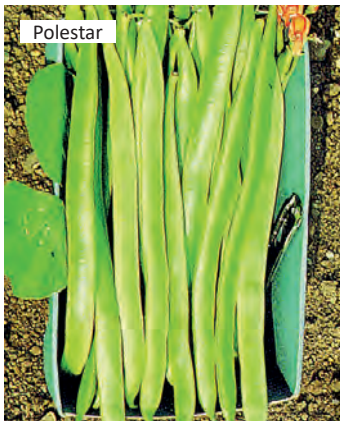

Bean (Runner)

Runner beans remain popular both as a finished product and for young plant sales. With a high crop to space ratio, runner beans are suitable for loose seed sales, fresh market, and pick-your-own. The crop has good storage and handling characteristics. 650-1000 seeds per kilo. Sow under glass in late April for planting out in May. Alternatively, sow direct outside in May-June. Germinates between 12-25°C. Allow 22-25cm between plants. Crop from July onwards. Seed requirement 100-150 kilos per hectare.

Red Flowered Varieties

VRB05 **Polestar**
A high quality variety, showing consistent results in trials. Stringless, straight podded variety, pod dimensions 37 x 2.5cm. Relatively early to crop.

250g	500g	1kg
£11.95	**£19.15**	**£30.00**

2½kg	5kg	10kg
£66.20	**£122.30**	**£225.00**

VRB08 **Guiness Record**
A red flowered variety that produces extra long pods, averaging around 45cm in length. If the clusters are pruned to one pod per cluster at an early stage then it is possible for the pod to reach 50cm in length. Excellent plant vigour. Resistant to virus races 1 and 2.

250g	500g	1kg
£13.05	**£20.85**	**£32.70**

2½kg	5kg	10kg
£72.10	**£133.15**	**£245.00**

VRB12 **Crusader**
One of the longest podded varieties currently available, typically producing pods up to 40cm in length. A vigorous variety that will set well under varying conditions. Resistant to all known bean related viruses. Black/red seeded variety.

250g	500g	1kg
£8.95	**£14.30**	**£22.40**

2½kg	5kg	10kg
£49.40	**£91.25**	**£167.85**

VRB15 **Armstrong**
This is a vigorous variety, producing high yields of stringless pods, 40cm x 2.5cm. Early maturing and quick to establish. Resistant to virus races 1 and 2.

250g	500g	1kg
£9.15	**£14.60**	**£22.90**

2½kg	5kg	10kg
£50.45	**£93.25**	**£171.50**

VRB20 **Achievement**
Popular variety for loose seed sales to the home gardener.

250g	500g	1kg
£7.20	**£11.50**	**£18.00**

2½kg	5kg	10kg
£39.75	**£73.40**	**£135.00**

VRB22 **Firestorm**
A red flowered variety that is a cross between a runner bean and a French bean, which gives this variety easy setting and very high yielding characteristics. The good flavoured pods are typically 25 x 2.5cm in size.

250g	500g	1kg
£14.10	**£22.55**	**£35.35**

2½kg	5kg	10kg
£77.95	**£144.05**	**£265.00**

VRB30 **Enorma**
Reselected Prizewinner type, with straight, long pods, 30-32cm in length. Red flowers with purple seed. Good flavour. Popular variety, especially with competition growers.

250g	500g	1kg
£7.20	**£11.50**	**£18.00**

2½kg	5kg	10kg
£39.75	**£73.40**	**£135.00**

VRB50 **Streamline**
Pod dimensions 37 x 2.5cm, medium green coloured variety suitable for plant sales and P.Y.O.

250g	500g	1kg
£7.20	**£11.50**	**£18.00**

2½kg	5kg	10kg
£39.75	**£73.40**	**£135.00**

VRB55 **Lady Di**
Early stringless type, producing very high quality pods of medium green colour, to around 30cm in length. Red flowers. Produces a high percentage of marketable yields.

250g	500g	1kg
£9.40	**£15.00**	**£23.55**

2½kg	5kg	10kg
£51.95	**£95.95**	**£176.50**

organic seed
VOG097 **Lady Di**

250g	500g	1kg
£12.50	**£20.00**	**£31.35**

2½kg	5kg	10kg
£69.15	**£127.75**	**£235.00**

VRB65 **Scarlet Emperor**
Pod dimensions 30 x 2.5cm, medium green colour, a well established variety suitable for plant sales - can also be used as a ground bean.

250g	500g	1kg
£7.20	**£11.50**	**£18.00**

2½kg	5kg	10kg
£39.75	**£73.40**	**£135.00**

VRB70 **Prizewinner**
A red flowered variety with medium length pods. Good flavour. Popular with plant sales and P.Y.O markets.

250g	500g	1kg
£7.20	**£11.50**	**£18.00**

2½kg	5kg	10kg
£39.75	**£73.40**	**£135.00**

VRB90 **Scarlet Empire**
A modern and much improved version of Scarlet Emperor. Produces smooth, narrow, stringless pods, which typically measure 30 x 2.5cm. Excellent vigour with long cropping period. Resistant to all relevant viruses.

250g	500g	1kg
£9.40	**£15.00**	**£23.55**

2½kg	5kg	10kg
£51.95	**£95.95**	**£176.50**

Bean (Runner) (contd.)

White Flowered Varieties

VRB25 **Moonlight**
This variety features all the benefits of a good quality, white flowered variety coupled with some attributes of French beans. The result is a runner bean with good flavour and texture, plus the potential for self pollination. The pods are normally 30cm long.

250g	500g	1kg
£14.10	**£22.55**	**£35.35**
2½kg	5kg	10kg
£77.95	**£144.05**	**£265.00**

VRB60 **Equator**
A white flowered, semi self-pollinating variety. Good vigour and high yields. Suitable for early, main and late season sowings. Excellent drought tolerance so it will still produce a crop in warm, dry summers. Pod length typically 24-26cm. Resistant to all relevant viruses.

250g	500g	1kg
£9.40	**£15.00**	**£23.55**
2½kg	5kg	10kg
£51.95	**£95.95**	**£176.50**

VRB66 **White Lady**
A modern white flowered variety with excellent flavour. The mid green pods are slender, smooth and fleshy, and typically reach 30cm in length. Stringless. Good pod set even in hot weather.

250g	500g	1kg
£14.10	**£22.55**	**£35.35**
2½kg	5kg	10kg
£77.95	**£144.05**	**£265.00**

VRB40 **White Emergo**
White seeded and white flowered. Very heavy cropping stick bean, with a pod length of 28-30cm.

250g	500g	1kg
£7.20	**£11.50**	**£18.00**
2½kg	5kg	10kg
£39.75	**£73.40**	**£135.00**

organic seed
VOG098 **White Emergo**

250g	500g	1kg
£12.50	**£20.00**	**£31.35**
2½kg	5kg	10kg
£69.15	**£127.75**	**£235.00**

Bi-coloured Types

VRB35 **Hestia**
This dwarf, bi-coloured variety looks great in containers. It produces good quality beans over a long period, making it ideal for sale as a 'patio vegetable' variety.

250g	500g	1kg
£12.50	**£20.00**	**£31.35**
2½kg	5kg	10kg
£69.15	**£127.75**	**£235.00**

VRB45 **Painted Lady**
An old variety but still one of the best flavoured varieties available. Features attractive red and white bi-coloured flowers, making it popular both as a plant sales item and for decorative use in the garden. Produces relatively short pods which are very tender.

250g	500g	1kg
£7.20	**£11.50**	**£18.00**
2½kg	5kg	10kg
£39.75	**£73.40**	**£135.00**

Beet (Leaf)

This is an extremely versatile crop, becoming very popular in salad leaf mixtures. Perpetual spinach is also popular as a long-term crop providing a high yield of leaves over two seasons, for fresh market sales. Cultural directions as for beetroot. 40-100 seeds per gram.

VBE90 **Chard Bright Lights**
A range of colours including white, cream, yellow, orange, pink, lipstick, and red. Terrific colour splashes for use in salad packs, or for growing as large plants.

10g	25g	50g
£2.45	**£5.70**	**£10.55**
100g	250g	500g
£19.50	**£45.05**	**£83.45**

VBE95 **Flamingo**
As the name suggests this variety produces attractive pinky-red stems. Can be picked small for baby leaf applications, or left to mature. Ideal for mixed salad packs and novelty box schemes.

10g	25g	50g
£2.10	**£4.80**	**£8.85**
100g	250g	500g
£16.40	**£37.95**	**£70.20**

VBE85 **Canary Yellow**
Produces bright yellow stems, adding interest to mixed salad packs. Can be picked small for baby leaf applications, or left to mature. Also ideal novelty for box schemes, etc.

10g	25g	50g
£2.10	**£4.80**	**£8.85**

250g	500g	1kg
£21.90	**£40.50**	**£75.00**

VBE75 **Bulls Blood Red**
An improved version of Bulls Blood, this variety produces dark red leaves, suitable for both baby and salad leaf production. The beetroot itself is large and only really suited to fodder uses.

10g	25g	50g
£1.95	**£4.35**	**£8.10**
100g	250g	500g
£14.95	**£34.55**	**£64.00**

VBE80 **Rhubarb Chard**
Less prone to bolting, the tall stems are suitable for both ornamental and culinary use. Can be picked small for salad use, or left to mature. Ideal novelty for box schemes, etc.

25g	50g	100g
£3.05	**£5.65**	**£10.40**
250g	500g	1kg
£24.10	**£44.55**	**£82.50**

Beetroot

A range of uses, including fresh sales, processing, roadside (farm shop) and pick-your-own, and also becoming increasingly popular as a 'mini-veg'. Approximately 40-100 seeds per gram. Sow mid March-July, or under glass in January-February to crop May onwards. Germinates between 8-25°C. Sowing rate 5 kilos per hectare for early bunching crops, 10 kilos per hectare for the fresh market maincrop, 15 kilos per hectare for pickling and mini beet. Monogerm varieties have only one seed per fruit and therefore require less thinning; drill at 650,000 seeds per hectare.

Hybrid Round

VBE03 **F1 Pablo**
High quality, with smooth skin, good deep red internal colouring. A good choice for 'baby beet' production and fresh market sales. Suitable for early, maincrop and late production.

1,000sd	2,500sd	5,000sd

VBE17 **Boston**
An excellent improved Boltardy selection. The round roots have a smooth skin and good internal colour and texture. Slow bolting making it ideal for early sowings.

2,500sd	5,000sd	10,000sd
£4.95	**£8.50**	**£15.90**

25,000sd	50,000sd
£37.10	**£68.85**

VBE28 **Bona**
A mid to late season variety that delivers a high yield of good quality beets. The smooth, round roots have an intensive red colour to the flesh. The high sugar content makes for a sweet, tasty flavour. Suitable for both standard and baby/pickling beet production.

25g	50g	100g
£2.60	**£4.80**	**£8.85**

250g	500g	1kg
£20.45	**£37.80**	**£70.00**

Other Types

VBE15 **Albina Ice**
A truly white beetroot which does not bleed when cut. Excellent flavour and texture. Wavy topped leaves can be used like spinach.

10g	25g	50g
£3.05	**£7.00**	**£13.00**

100g	250g	500g
£24.00	**£55.60**	**£102.90**

VBE20 **Chioggia**
This traditional Italian globe shaped beetroot has dark green leaves and deep red stems. When sliced unusual red and white rings are exposed, adding an attractive element to the salad plate. Sweet taste. Suitable for use in salads or as a hot vegetable.

25g	50g	100g
£2.20	**£4.10**	**£7.60**

250g	500g	1kg
£17.50	**£32.40**	**£60.00**

VBE35 **Golden**
Attractive globe shaped, orange-yellow roots that turn golden yellow when cooked. Has a sweet taste, fine texture and tender, even when large. Leaves are light green and can be steamed or used raw in mixed salads.

10g	25g	50g
£3.50	**£8.10**	**£15.00**

100g	250g	500g
£27.75	**£64.15**	**£118.80**

VBE45 **Egyptian**
A flat round variety with smooth purple red skin and flesh. Matures very early.

50g	100g	250g
£3.40	**£6.30**	**£14.60**

500g	1kg
£27.00	**£50.00**

VBE55 **Cylindra**
As the name suggests, a long, slim, cylindrical shaped beetroot, with a dark red colour to both the outer smooth skin and the inner sweet tasting flesh. Ideal variety for slicing. Matures medium early.

50g	100g	250g
£3.40	**£6.30**	**£14.60**

500g	1kg
£27.00	**£50.00**

Borecole (Kale)

Popular supply of winter greens when other brassicas are not available. For bunching and leaf sales. Also used as a game cover crop. 300-450 seeds per gram. Germinates between 10 and 25°C. Sow between mid May and July, at 250-500g per hectare for a transplanted crop, or around 2 kilos per hectare for direct drilled crop. Plant spacings 60 x 60cm. Harvest in autumn and winter.

VBO20 **Dwarf Green Curled**

One of the best of the open pollinated varieties, well flavoured with good cold tolerance; the variety is also suitable as winter fodder and game cover.

25g	50g	100g
£1.95	**£3.60**	**£6.65**
250g	500g	1kg
£15.35	**£28.35**	**£52.50**

VBO75 **Kapral**

A medium early variety that is best suited to fresh consumption applications. The lower height, typically 40-60cm, makes it ideal for more exposed production areas. The dark green leaves are heavily blistered and very curly. A wide framed variety. Also makes an ideal babyleaf subject.

10g	25g	50g
£2.25	**£5.15**	**£9.55**
100g	250g	500g
£17.65	**£40.85**	**£75.60**

VBO60 **Emerald Ice**

Excellent eating qualities. The textured, ruffled, green leaves develop a very striking white centre as they mature. Very sweet flavour coupled with crip texture. The ruffled leaves give great bag-fill performance. Suitable for baby, teen and bunching work; also suits multiple cuts.

50sd	100sd	250sd
£5.25	**£8.40**	**£16.80**
500sd	1,000sd	2,500sd
£26.90	**£43.00**	**£85.95**

VBO65 **F1 Kapitan**

A medium early hybrid, producing a sturdy plant, typically 70cm in height. The leaves are very curly with a medium green colour. Wide frame. Good tolerance of low temperatures.

100sd	250sd	500sd
£4.90	**£9.80**	**£15.65**
1,000sd	2,500sd	10,000sd
£25.05	**£50.00**	**£160.00**

precision seed

VBO16 **F1 Eden**

A hybrid green curly kale, with good colour and texture. The long petiole and refined leaf shape make this variety particularly suitable for bunching. Delivers excellent yields even under changeable growing conditions.

100sd	250sd	500sd
£5.65	**£11.30**	**£18.10**
1,000sd	2,500sd	10,000sd
£28.95	**£57.85**	**£185.00**

VBO70 **Kadet**

A medium to late variety that normally grows to between 60-80cm tall. The medium green leaves are blistered and very curly. Narrower frame than some varieties. Highly resistant to frost.

10g	25g	50g
£2.25	**£5.15**	**£9.55**
100g	250g	500g
£17.65	**£40.85**	**£75.60**

precision seed

VBO12 **F1 Sunbor**

A distinctive curly kale. Features purple-red veins and green leaves with a purple tinge early in the season but turns a deep red colour late in the season as the temperature lowers. Late season colour is darker than Redbor. Suitable for baby, salad and full leaf production.

50sd	100sd	250sd
£5.95	**£9.50**	**£18.95**
500sd	1,000sd	2,500sd
£30.30	**£48.45**	**£96.90**

VBO80 **Scarlet**

A medium to late variety that produces tall plants, typically up to 120cm in height. The leaves are violet-green, blistered and very curly. Freezing temperatures intensify the colour to a very attractive violet blue. Highly frost resistant. Also makes a very attractive babyleaf subject.

10g	25g	50g
£2.65	**£6.10**	**£11.25**
100g	250g	500g
£20.80	**£48.15**	**£89.10**

VBO50 **Red Russian**

Blue-green colour to leaves with purple accents to the veins. Leaves are flat with frilly edges. Often used for baby leaf. Can be steamed, and used for stir-fry and salads. Colour intensifies with colder temperatures. Sweet flavour.

25g	50g	100g
£2.75	**£5.10**	**£9.45**
250g	500g	1kg
£21.90	**£40.50**	**£75.00**

VBO36 **F1 Yurok**

A hybrid Nero di Toscana (Black Tuscany) type. Produces very uniform and compact plants, that showed a lower incidence of disease when compared to other varieties in recent trials. Superb flavour. Attractive dark green leaves for harvest from late summer through to early winter.

50sd	100sd	250sd
£4.70	**£7.50**	**£15.00**
500sd	1,000sd	2,500sd
£23.95	**£38.30**	**£76.60**

VBO38 **Black Magic**

An improved Cavalo Nero (Black Tuscany type) with better uniformity and plant habit. It has striking dark, narrow, well textured leaves; with improved bolting resistance and cold tolerance.

250sd	500sd	1,000sd
£3.65	**£5.70**	**£9.10**
2,500sd	5,000sd	
£21.60	**£72.25**	

VBO40 **Black Tuscany**

Large strap-leafed plant with very dark leaves. Also known as 'Palm cabbage' because of its appearance. Well flavoured hardy plant.

25g	50g	100g
£2.95	**£5.45**	**£10.10**
250g	500g	1kg
£23.35	**£43.20**	**£80.00**

Broccoli (Sprouting)

Very early season crop for fresh market sales, providing early season revenue - plants are popular as a 'cut and come again' crop, and for young plant sales. 250-400 seeds per gram. Sow April-June for transplanting June-July. Germinates at between 10 and 25°C. Harvest July - May.

For green heading Broccoli and for stem type brassica products please see Calabrese on Page 186.

VBR016 **Rudolph**

Very early variety of high quality, well-coloured, good sized purple spears ideal for early fresh market sales. High yielding. Harvest November to February.

250sd	500sd	1,000sd
£4.85	**£7.55**	**£12.05**
2,5000sd	10,000sd	
£28.65	**£95.80**

250sd	500sd	1,000sd
£37.30	**£59.60**	**£95.35**

VBR022 **F1 Purple Rain**

An excellent hybrid variety that crops through the summer and autumn. Good heat tolerance. Heavy yield of flavoursome spears with a deep purple colour. Sow successionally from March to June for cropping between July and November.

25sd	50sd	100sd
£4.20	**£6.70**	**£10.70**
250sd	500sd	1,000sd
£21.40	**£34.20**	**£54.75**

Brussels Sprouts

A mainstay of the winter vegetable cropping programme, used for processing and fresh market either loose or on the stalk; ideal for roadside sales. Approximately 250 seeds per gram. Sow early varieties mid February into modules under cold glass. Sow main season varieties late March to end of April. Germinates between 10 and 25°C. Seed requirement approximately 500g per hectare; with a target plant population of around 27,000 per hectare. Spacing 60 x 60cm. Harvest from mid August to mid March.

Hybrid: Early Varieties

precision seed

VBR058 **F1 Abacus**

A superb variety combining early cropping with uniform cylindrical button development. Very good standing ability, and very uniform quality and grade out. Ideal for February sowings and autumn sown over-wintered transplant crops.

50sd	100sd	250sd
£9.55	**£15.25**	**£30.50**
500sd	1,000sd	2,500sd
£48.75	**£77.95**	**£155.90**

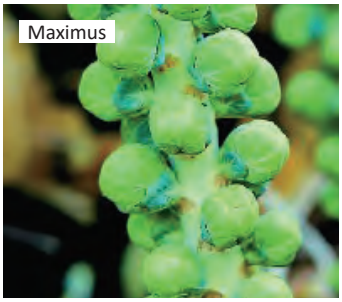

precision seed

VBR056 **F1 Churchill**

A first early variety, maturing late August to October. Produces a good yield of tight, evenly spaced buttons with attractive dark green colour and superb flavour.

250sd	500sd	1,000sd
£8.95	**£13.95**	**£22.20**
2,500sd	10,000sd	25,000sd
£52.80	**£176.55**	**£412.50**

precision seed

VBR060 **F1 Maximus**

A relatively early variety that can also be sown later for midseason and pre-Christmas harvest. Medium vigour. Produces a high yield of round, smooth, very dense buttons which are well spaced on the stalk. A high percentage of marketable sprouts at harvest period. Shows tolerance of ring spot, powdery mildew and white blister. With good shelf life and well flavoured sweet sprouts.

25sd	50sd	100sd
£6.00	**£9.55**	**£15.30**
250sd	500sd	1,000sd
£30.55	**£48.85**	**£78.15**

VBR072 **F1 Marte**

A heavy yielding variety that will crop from October onwards. Good standing ability means it can hold through to Christmas. Very vigorous. Produces large buttons with excellent eating qualities.

25sd	50sd	100sd
£4.90	**£7.85**	**£12.55**
250sd	500sd	1,000sd
£25.05	**£40.10**	**£64.10**

Mid Season Varieties

organic seed

VOG112 **F1 Nautic**

A tall early to mid season hybrid giving a high yield of smooth round buttons. Good standing ability. Resistant to white blister, ring spot and powdery mildew. Harvest October to early December.

25sd	50sd	100sd
£7.00	**£11.20**	**£17.90**
250sd	500sd	1,000sd
£35.75	**£57.15**	**£91.45**

precision seed

VBR148 **F1 Bosworth**

Second early variety for late autumn to Christmas production. Excellent holding ability and high yields. Well spaced buttons with sweet flavour. Suits loose or complete stalk sales.

250sd	500sd	1,000sd
£8.95	**£13.95**	**£22.20**
2,500sd	10,000sd	25,000sd
£52.80	**£176.55**	**£412.50**

VBR064 **F1 Brigitte**

A very vigorous variety that can be used on low or high fertility soils with a minimal risk of lodging. Suitable for use on light to medium soils. Produces a very high proportion of medium sized buttons. Excellent flavour.

50sd	100sd	250sd
£4.90	**£7.80**	**£15.60**
500sd	1,000sd	2,500sd
£24.95	**£39.90**	**£79.70**

VBR080 **F1 Cryptus**

A clubroot resistant variety that crops in November and December. Sturdy plants with excellent standing ability. Produces a high yield of round, uniform buttons. Small button base. Mild flavour.

25sd	50sd	100sd
£7.95	**£12.70**	**£20.35**
250sd	500sd	1,000sd

VBR110 **F1 Trafalgar**

A tall variety for the November and December cropping period. Plant stands erect with strong root system. Medium size smooth buttons with excellent flavour.

250sd	500sd	1,000sd
£8.95	**£13.95**	**£22.20**
2,500sd	10,000sd	25,000sd
£52.80	**£176.55**	**£412.50**

precision seed

VBR144 **F1 Ruby Crunch**

Bred to cover the all important Christmas market, this variety produces exceptionally uniform, sweet buttons that are easily picked. Good holding ability. Colder weather intesifies the colour. Best steamed or roasted to preserve colour when cooking.

25sd	50sd	1000sd
£5.20	**£8.35**	**£13.35**
250sd	500sd	1,000sd
£26.65	**£42.60**	**£68.15**

Late Season Varieties

precision seed

VBR135 **F1 Doric**

A medium tall variety giving a good yield of solid round buttons between mid December and mid February. A vigorous variety requring low nitrogen input. Good tolerance of white blister and mildew.

25sd	50sd	100sd
£5.50	**£8.80**	**£14.05**
250sd	500sd	1,000sd

organic seed

VOG114 **F1 Doric**

25sd	50sd	100sd
£7.50	**£11.95**	**£19.10**
250sd	500sd	1,000sd
£38.20	**£61.10**	**£97.70**

precision seed

VBR142 **F1 Brechin**

A high yielding variety that produces uniform sized, smooth, deep green buttons. Ideal for harvest between mid December and late February. Small tops. Very good holding ability. Good resistance to light leaf spot.

25sd	50sd	100sd
£5.05	**£8.05**	**£12.85**
250sd	500sd	1,000sd
£25.70	**£41.05**	**£65.65**

Open Pollinated Varieties

VBR160 **Bedford Darkmar 21**

An open pollinated type, which is well suited to plant sales, less uniform and vigorous than the hybrid types.

10g	25g	50g
£1.95	**£4.05**	**£7.50**
100g	250g	500g
£13.90	**£32.10**	**£59.40**

VBR180 **Evesham Special**

Well-known variety with amateur growers, which lacks the vigour and uniformity of the modern hybrid varieties. Ideal for the plant sales market.

10g	25g	50g
£1.95	**£4.05**	**£7.50**
100g	250g	500g
£13.90	**£32.10**	**£59.40**

VBR175 **Red Ball**

Reasonable quality, red buttons from this OP variety. Performance is better than the standard red variety Rubine. Colour develops better with cold weather.

500sd	1,000sd	2,500sd
£5.15	**£8.20**	**£19.55**
10,000sd	25,000sd	
£65.30	**£152.50**	

Flower Sprout

VBR190 **Kalettes Garden**

Also known as Flower Sprout. An interesting combination of Brussels sprout and kale, producing attractive 'kale florets' on a sprout stalk. Supplied as a combination of green, purple and bi-coloured (green/purple) varieties. Grow as per mid season Brussels Sprout.

25sd	50sd	100sd
£6.25	**£9.95**	**£15.90**
250sd	500sd	1,000sd
£31.80	**£50.80**	**£81.30**

Cabbage

Cabbage can be produced throughout the year, providing growers with a continuous supply to their outlets. Faster-maturing spring greens are ideal for utilising redundant polytunnel or glasshouse space over the winter months. Cabbages are popular for young plant sales to home gardeners. 200-400 seeds per gram. Germinates between 10 and 25°C. Sowing and harvesting times as given in the charts. Seed rate approx. 600g per hectare transplanted, 1.25-2.5 kilos per hectare direct sown. Spacings 30 x 60cm, up to 60 x 90cm.

Cabbage (Pointed)

Hybrid Varieties

VCA010 **F1 Winterjewel**

An excellent hybrid that is ideal for the overwinter production of greens. Very compact and slow to heart. Best suited to April to June harvest but can also be used in other seasons. Ideal for successive sowings. Produces a large number of evenly sized, smooth, dark green heads. High tolerance of bolting and stem-extension; excellent basal quality.

250sd	500sd	1,000sd
£4.70	**£7.30**	**£11.65**
2,500sd	10,000sd	25,000sd
£27.70	**£92.60**	**£216.35**

precision seed

VCA050 **F1 Duncan**

Produces a high percentage of the yield marketable over 70 grams, this variety features good base quality, uniformity and colour. Produces solid hearts rapidly, and resistant to bolting. For summer to autumn greens production.

50sd	100sd	250sd
£5.55	**£8.90**	**£17.75**
500sd	1,000sd	2,500sd
£28.35	**£45.35**	**£90.65**

precision seed

VCA022 **F1 Verve**

A vigorous all year round greens variety, with thick strong leaves that hold their colour well after harvest. Resistance to anthocyanin and yellow leaf. Typical head weight is between 400-500g. Very slow to heart allowing for flexible programming. Good for both bagging and processing.

100sd	250sd	500sd
£4.00	**£7.95**	**£12.70**
1,000sd	2,500sd	10,000sd
£20.35	**£40.65**	**£130.00**

VCA020 **F1 Summerjewel**

A uniform variety that produces heads for cropping in the summer and autumn from spring and early summer sowings. Compact frame typically around 250 grams. Smooth, dark green leaves with a neat, non-stalky base. Slow to heart.

250sd	500sd	1,000sd
£4.70	**£7.30**	**£11.65**
2,500sd	10,000sd	25,000sd
£27.70	**£92.60**	**£216.35**

precision seed

VCA006 **F1 Regency**

An excellent variety producing compact 400-500 gram heads. Healthy base, excellent flavour and good field holding capability. High yielding variety. Harvest June to October, but can be overwintered from an autumn sowing depending upon location and prevailing weather conditions.

50sd	100sd	250sd
£5.20	**£8.25**	**£16.50**
500sd	1,000sd	2,500sd
£26.40	**£42.20**	**£84.40**

Cabbage (Pointed (contd.)

Hybrid Varieties contd.

precision seed

VCA024 **F1 Baron**

Maturing slightly later than F1 Regency, this mid-to-late season variety extends the harvest window into November. Produces very uniform heads, typically weighing around 500 grams. High marketable yield with good holding ability. Good colour retention makes heads suitable for short-term storage.

500sd	100sd	250sd
£5.10	**£8.10**	**£16.20**
500sd	1,000sd	2,500sd
£25.90	**£41.45**	**£82.85**

precision seed

VCA032 **F1 Caraflex**

Very attractive pointed type, with a smooth, conical shape; uniform. Maturing approximately 75 days from planting. Not recommended for autumn sowings.

50sd	100sd	250sd
£5.25	**£8.40**	**£16.80**
500sd	1,000sd	2,500sd

250sd	500sd	1,000sd
£25.05	**£40.10**	**£64.10**

VCA030 **F1 Matterhorn**

A sweetheart variety that produces striking red pointed cabbages. Sweet and tender flavour. Head weights typically 1-1.25kg. Best flavour in raw applications but can also be cooked. Maturing approximately 70-80 days from transplant.

50sd	100sd	500sd
£6.70	**£10.70**	**£21.40**
1,000sd	2,500sd	5,000sd
£34.20	**£54.75**	**£109.40**

Open Pollinated Varieties

VCA260 **Durham Early**

Good percentage of marketable heads for greens and hearted production. Good choice for plant sales.

10g	25g	50g	100g
£1.95	**£3.40**	**£6.30**	**£11.65**
250g	500g	1kg	
£27.00	**£49.95**	**£92.50**	

VCA290 **Wheelers Imperial**

A good amount of dark green leaf on the heads. Compact plants, well suited to summer and autumn production.

10g	25g	50g	100g
£1.95	**£3.50**	**£6.50**	**£12.00**
250g	500g	1kg	
£27.70	**£51.30**	**£95.00**	

VCA170 **Greyhound**

Early spring sowing variety; few outer leaves with good size hearts and a broad base, suitable for plant sales.

10g	25g	50g	100g
£1.95	**£2.95**	**£5.45**	**£10.10**

www.molesseeds.co.uk

VCA245 **Kalibos**

A pointed cabbage variety with distinctive red leaves. Suited to 'greens' and hearted production. Suitable for autumn cropping. Best used raw as a salad cabbage (leaves do not hold colour or structure when cooked).

10g	25g	50g	100g
£3.60	**£8.30**	**£15.35**	**£28.35**
250g	500g	1kg	
£65.65	**£121.50**	**£225.00**	

Cabbage (Ballhead)

VCA105 **F1 Sunta**

A fast growing variety that matures after 55-60 days. Produces round heads with an average weight of 1-1.3kg. Compact frame, uniform growth, with attractive shiny green colour. Tender, sweet texture. Strong bolting resistance. Suited to early production under fleece and standard open field cropping.

250sd	500sd	1,000sd

Please note that this chart is for guidance only; local conditions and factors outside of our control mean that actual results, eg harvest timing, may differ from those shown.

VCA026 **F1 Constable**

An early maturing green Primo type cabbage, producing very uniform heads up to 0.9kg in weight. Good holding ability for an early variety. Typical maturity is 70-80 days. Can be sown in spring for June to September harvest, or overwintered in modules from an October sowing for May harvest.

100sd	250sd	500sd
£7.05	**£14.05**	**£22.50**

1,000sd	2,500sd
£35.95	**£71.90**

VCA100 **F1 Stonehead**

Late mid season maturity; round, medium green heads, densely packed, producing a good marketable percentage. Very compact, suited to high density production. Resistant to splitting with good field standing ability. Good for fresh market and plant sales.

250sd	500sd	1,000sd
£5.35	**£8.40**	**£13.35**

2,500sd	10,000sd
£31.70	**£105.95**

VCA160 **Golden Acre**

Very early round heads. Can be sown under glass without heat from February. Outside sowings can be made after mid March. Harvest from early July to September.

10g	25g	50g	100g
£1.95	**£4.25**	**£7.85**	**£14.50**

250g	500g	1kg
£33.55	**£62.10**	**£115.00**

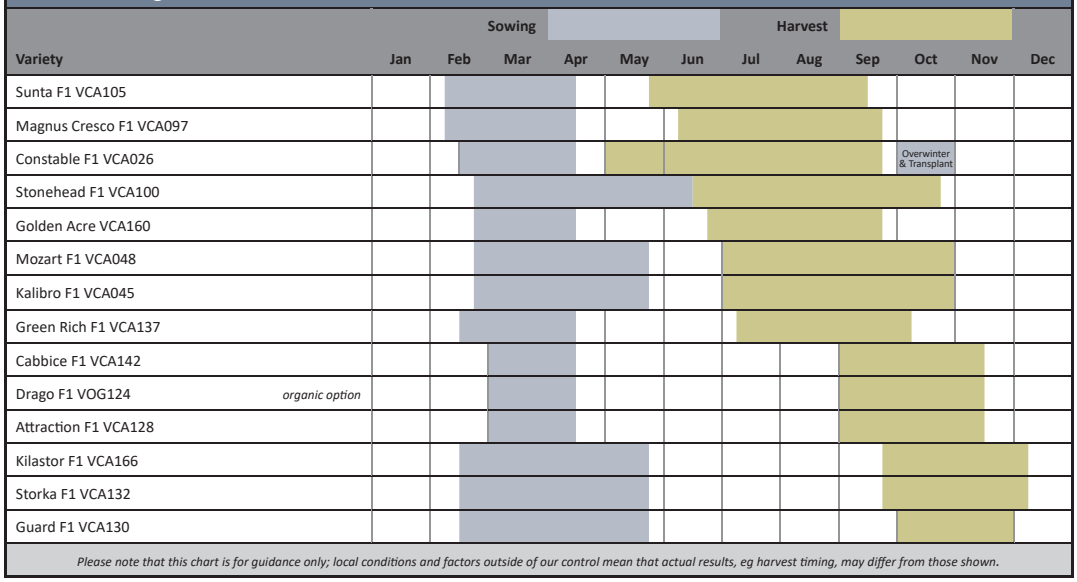

VCA048 **F1 Mozart**

A pale green ballhead variety, ideal for fresh market uses. A flexible variety with 85-95 day maturity. Excellent holding ability and size uniformity. Suitable for baby sized to 1kg heads.

50sd	100sd	250sd
£4.30	**£6.90**	**£13.75**

500sd	1,000sd
£22.00	**£35.20**

Ballhead Cabbage

Please note that this chart is for guidance only; local conditions and factors outside of our control mean that actual results, eg harvest timing, may differ from those shown.

VCA045 **F1 Kalibro**

Maturing between 85-95 days, this variety has shown good resistance to clubroot in recent trials. Nice round head with good internal structure. Head weight 2 - 3 kg. Suitable for fresh market and industrial uses.

100sd	250sd	500sd
£6.45	**£12.85**	**£20.55**

1,000sd	2,500sd
£32.85	**£65.65**

VCA137 **F1 Green Rich**

A high quality 'oriental' cabbage that can be eaten raw or cooked. Maturing in 70 days it produces a large, flat head, weighing 1.5-2kg. Green colour and sweet flavour.

100sd	250sd	500sd
£5.05	**£10.10**	**£16.15**

1,000sd	2,500sd
£25.80	**£51.60**

VCA142 **F1 Cabbice**

Maturing after approximately 90-100 days, this Primo type variety produces round, pale green heads, typically 1-2kg in size. The thick, crunchy leaves have a very mild, sweet taste, making it ideal for shredding, use as a wrap or eating raw in salads.

100sd	250sd	500sd
£6.90	**£13.75**	**£22.00**

1,000sd	2,500sd
£35.20	**£70.35**

organic seed

VOG124 **F1 Drago**

An autumn-winter variety suitable for both green fresh market and early white pre-pack work. Maturity varies with application. Vigorous growth with round, firm heads. Suitable for high density plantings.

25sd	50sd	100sd
£4.75	**£7.55**	**£12.10**

250sd	500sd
£24.15	**£38.60**

VCA128 **F1 Attraction**

An early white cabbage variety with 115 day maturity depending upon target size; can be used for both 1kg production and 3kg coleslaw production. Uniform head size with excellent eating qualities. Very vigorous with low susceptibility to early winter frosts.

100sd	250sd	500sd
£6.30	**£12.55**	**£20.05**

1,000sd	2,500sd
£32.05	**£64.10**

VCA166 **F1 Kilastor**

A high yielding variety with very good clubroot resistance. Also resistant to White Blister. Provides very uniform and reliable crops. Features good long-term storage capabilities. Attractive external green colour. Head weight 2.5 - 4kg. Suitable for fresh market and processing uses.

25sd	50sd	100sd
£5.00	**£7.95**	**£12.70**

250sd	500sd
£25.40	**£40.55**

Cabbage (Ballhead) (contd.)

VCA132 **F1 Storka**
A white storage cabbage, producing 1-3kg heads. Suitable for both high and low density crops. Uniform shape with fine internal structure. Typically matures after 130 days. Ideal for medium to long storage.

100sd	250sd	500sd
£6.00	**£11.95**	**£19.05**

1,000sd	2,500sd
£30.50	**£60.95**

VCA130 **F1 Guard**
A class-leading white cabbage developed for storage work, also ideal for fresh market applications. Produces round, smooth 1kg heads, with excellent internal structure and a short core. High resistance to mildew.

100sd	250sd	500sd
£7.05	**£14.05**	**£22.50**

1,000sd	2,500sd
£35.95	**£71.90**

Cabbage (Winter)

VCA155 **Glory of Enkhuizen**
Large semi-flat headed variety. Matures in autumn from spring sowing. Good colour and standing ability.

10g	25g	50g	100g
£1.95	**£4.45**	**£8.20**	**£15.15**

250g	500g	1kg

£4.75	**£7.55**	**£12.10**

250sd	500sd
£24.15	**£38.60**

VCA180 **Brunswick**
A 'cattle' type cabbage, producing very large, solid heads. Good standing ability.

10g	25g	50g	100g
£1.95	**£3.15**	**£5.80**	**£10.75**

250g	500g	1kg
£24.80	**£45.90**	**£85.00**

VCA115 **F1 Tundra**
Round to oval, medium to dark green heads, late maturing and very winter-hardy. Long field standing ability, dense heads, good uniformity.

100sd	250sd	500sd
£7.20	**£14.40**	**£23.00**

1,000sd	2,500sd
£36.75	**£73.45**

precision seed
VCA145 **F1 Marabel**
A quality January King type that produces large, dense heads. High yielding with very good standing ability.

100sd	250sd	500sd
£4.60	**£9.20**	**£14.70**

1,000sd	2,500sd
£23.45	**£46.90**

Cabbage (Savoy)

VCA034 **F1 Stelvio**
Summer-autumn savoy with a unique pointed shape. Very sweet flavour for a savoy. Good colour to uniform heads that typically weight 1.0-1.5kg. Can be grown at a higher density than regular savoy varieties. Good standing ability.

25sd	50sd	100sd
£6.25	**£9.95**	**£15.90**

250sd	500sd
£31.80	**£50.80**

VCA035 **F1 Capriccio**
Summer-autumn savoy with attractive fresh green foliage. Excellent presentation qualities, uniform heads of 0.8-1.2kg, dense and solid with good internal quality.

50sd	100sd	250sd
£4.70	**£7.50**	**£15.00**

500sd	1,000sd
£23.95	**£38.30**

Cabbage (Red)

precision seed

VCA072 **F1 Romanov**

An early season red variety that produces very dense, round, deep red heads. Good colour when small making it ideal for baby cabbage production. Tolerance to tipburn. Maturity 80-90 days from transplant.

50sd	100sd	250sd
£4.70	**£7.50**	**£15.00**

500sd	1,000sd
£23.95	**£38.30**

VCA074 **F1 Rovite**

A mid-season, 120 day, large heading red cabbage for fresh market and short term storage. Suitable for both 1kg and 3kg head production. Can be used for overwintered module raised crops.

50sd	100sd	250sd
£4.30	**£6.90**	**£13.75**

500sd	1,000sd
£22.00	**£35.20**

VCA200 **Red Drumhead**

Solid, round heads with good internal structure, not the quality of an F1 however.

10g	25g	50g	100g

precision seed

VCA078 **F1 Lodero**

A clubroot resistant maincrop variety, typically maturing after 135 days from transplant. Suitable for pre-packs; good storage potential.

25sd	50sd	100sd
£4.85	**£7.75**	**£12.40**

250sd	500sd
£24.75	**£39.60**

organic seed

VOG126 **F1 Klimaro**

Produces a good quality head with great internal colour. Offers both long-term standing ability and long-term storage performance. Typically matures 140 days from transplant. Suitable for both pre-pack and processing applications.

25sd	50sd	100sd
£5.20	**£8.35**	**£13.30**

250sd	500sd
£26.60	**£42.50**

precision seed

VCA075 **F1 Rodima**

Intense red, with tight heads and a short internal stalk. Very good flavour and excellent standing ability.

100sd	250sd	500sd
£8.25	**£16.50**	**£26.40**

1,000sd	2,500sd
£42.20	**£84.40**

Calabrese

Can be grown over a long season, often succeeding where other brassicas fail. Suitable for fresh sales and prepack, also once the main heads are removed, small sideshoots form, which are ideal for florets. 250-400 seeds per gram. Sow March-July, sowing rate 500g per acre. Germinates between 7 and 30°C. Plant out April-July at around 23 x 30cm, for harvesting June-December. Later maturity is possible in milder climates. Stated maturity times are from transplant to harvest

Hybrid Varieties

precision seed

VCA325 **F1 Marathon**

Produces small evenly sized buds with good bud colour, deep well formed heads suitable for early and late sowings, as well as for maincrop. Tolerant of downy mildew, a good choice for plant sales. NIAB listed variety. Matures after 75-95 days.

250sd	500sd	1,000sd
£5.50	**£8.60**	**£13.65**

2,500sd	10,000sd
£32.50	**£108.65**

precision seed

VCA330 **F1 Ironman**

An excellent variety for harvesting late June - November. Excellent quality heads with very good dome shape. Fine bead, good head weight and very uniform. Suitable for processing and fresh market use. Excellent shelf-life. Matures after 70-80 days.

250sd	500sd	1,000sd
£8.25	**£12.90**	**£20.55**

2,500sd	10,000sd
£48.80	**£163.20**

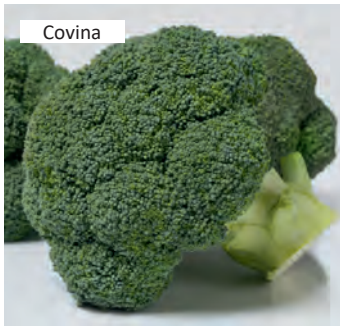

precision seed

VCA332 **F1 Titanium**

A development from Ironman, this variety produces a smoother, taller stem for easier harvesting (both hand and mechanical). Dense, smooth heavy crown with a fine bead size. Improved shelf life and field holding. Maturing after approximately 70-80 days.

100sd	250sd	500sd
£5.35	**£10.70**	**£17.10**

1,000sd	2,500sd
£27.35	**£54.70**

organic seed

VOG144 **F1 Covina**

A hybrid variety producing solid, domed heads, with medium sized beads and dark green colour. Harvest between July and November. 80 day maturity period.

50sd	100sd	250sd
£5.65	**£9.05**	**£18.05**

500sd	1,000sd
£28.85	**£46.15**

VCA322 **F1 Kimono**

An early maturing variety, typically 80-85 days after transplanting. Produces a highly uniform crop that is easy to harvest. Large dark green heads, with good density and weight. Excellent stem quality.

250sd	500sd	1,000sd
£8.80	**£13.75**	**£21.90**

2,500sd	10,000sd
£52.00	**£173.90**

precision seed

VCA334 **F1 Steel**

Produces a uniform crop with domed shaped heads. Solid crown with a fine bead. Also suitable for smaller head programmes. Good tolerance to hollow stem, crown rot and systemic mildew. A good follow on to Ironman. Maturing after approximately 80-90 days.

100sd	250sd	500sd
£5.65	**£11.30**	**£18.10**

1,000sd	2,500sd
£28.95	**£57.85**

precision seed

VCA345 **F1 Stromboli**

A vigorous variety producing good quality, dark green heads. Nice dome to heads with long branched florets. Suitable for both standard and overwintered module raised crops. Excellent resistance to blindness. Matures after 100-110 days.

250sd	500sd	1,000sd
£7.35	**£11.50**	**£18.30**

2,500sd	10,000sd
£43.55	**£145.55**

VCA328 **F1 Zen**

Maturing after approximately 90-100 days, this variety has excellent high domed, dark green heads, with a solid stem. Easy to trim. Tolerant of downy mildew. Crops best in autumn, from a June planting.

250sd	500sd	1,000sd
£6.75	**£10.55**	**£16.85**

2,500sd	10,000sd
£40.00	**£133.75**

VCA320 **F1 Monclano**

A robust variety bred to be resistant to both clubroot and mildew. Tight domed head with a good bead; reduced incidence of hollow stem. Heavy yields with good flavour. Successional plantings give cropping from August through to November.

25sd	50sd	100sd
£4.75	**£7.55**	**£12.10**

250sd	500sd
£24.15	**£38.60**

Open Pollinated Varieties

VCA360 **Green Sprouting**

Sow April for cutting in early August.

Stem Type Varieties

Delistem F1 Series

A group of varieties developed to produce edible stem-type brassicas. Can be grown as per normal calabrese but pinching out the first head at an early stage encourages side shoot development.

VCA342 **Kale**

Technically a sprouting kale, this variety produces dark green spears on edible stems. The stems can be marketed with or without the side leaves, and both can be eaten. Maturing after approximately 90-100 days.

50sd	100sd	250sd
£5.45	**£8.65**	**£17.35**

500sd	1,000sd
£27.70	**£44.30**

VCA344 **Green**

The closest product to the now discontinued Sticcoli, this variety produces long, tender stems, with good colour and sweet flavour. Matures after approximately 70-80 days.

50sd	100sd	250sd
£5.45	**£8.65**	**£17.35**

500sd	1,000sd
£27.70	**£44.30**

VCA346 **White**

Derived from cauliflower breeding, this variety produces multiple 'Broccoli style' side stems. The long and slender florets have a tender texture and good flavour. Matures after approximately 60-70 days.

25sd	50sd	100sd
£5.10	**£8.20**	**£13.10**

250sd	500sd
£26.15	**£41.80**

Carrot

Another all-season crop offering various sales options - bunching, prepack, loose and processing. Long shelf life and good storage/ handling abilities make carrots a good choice for the grower. 800-900 seeds/g. Germinates between 8 and 30°C. Spacing 2.5-7.5cm within, 40-75cm between rows.

Hybrid Varieties

precision seed

VCA368 **F1 Mercurio**

A cylindrical, early bulking Nantes variety for first season harvests from June to August. Flexible and uniform, with well-attached foliage. Smooth roots with good colour. High level of bolting tolerance. Ideal for bunching.

2,500sd	5,000sd	10,000sd
£4.80	**£8.20**	**£15.30**

25,000sd	50,000sd

Carrot (contd.)

Hybrid Varieties contd.

precision seed

VCA416 **F1 Sugarsnax 54**

An Imperator variety that produces long, tapered roots, up to 25cm in length. The extra sweet flavour and high beta carotene content makes this variety ideal for both processing and fresh market applications. Good colour and smooth texture.

2,500sd	5,000sd	10,000sd
£5.80	**£9.90**	**£18.55**

25,000sd	50,000sd
£43.25	**£80.30**

organic seed

VOG175 **F1 Napoli**

A good quality Nantes variety, ideal for bunching and fresh ware use. The roots are slightly tapered, with good internal and external colour. Dark green foliage and strong tops. Approximately 90 days from sowing to maturity. A very flexible variety that can be used for very early to late sowings.

1,000sd	2,500sd	5,000sd
£3.30	**£7.75**	**£13.25**

10,000sd	25,000sd
£24.85	**£58.00**

VCA382 **F1 Resistafly**

Nantes type with good tolerance of Carrot Root Fly. Top quality cylindrical roots with good colour and skin quality.

2,500sd	5,000sd	10,000sd
£3.90	**£6.70**	**£12.50**

25,000sd	50,000sd
£29.20	**£54.20**

precision seed

VCA428 **F1 Norwich**

An excellent Nantes variety featuring good foliage vigour, upright habit and outstanding health. Produces bulky, smooth and cylindrical roots, typically 17-20cm in length. Approximately 104 days from sowing to maturity; potential for strawed overwintering. Ideal for pre-pack, ware and bunching. Performed well in recent trials.

2,500sd	5,000sd	10,000sd
£4.70	**£8.00**	**£15.00**

25,000sd	50,000sd
£35.00	**£65.00**

VCA405 **F1 Charisma**

A hybrid Chantenay type, suitable for both standard and high density production. Triangular shaped root with blunt tip; standard production gives roots typically 15cm in length. High resistance to bolting. Sow at 3.5 million seeds per acre for high density work.

5,000sd	10,000sd	25,000sd
£5.10	**£9.60**	**£22.30**

50,000sd	100,000sd
£41.45	**£76.50**

precision seed

VCA377 **F1 Maestro**

An excellent maincrop Nantes type which shows good establishment and early vigour. The tops are very clean, showing tolerance of Alternaria, and are strongly attached allowing very late top lifting. Roots are smooth, very uniform, and tolerant of violet root rot, crown rot and cavity spot. Suitable for prepack, ware and bunching.

2,500sd	5,000sd	10,000sd
£5.20	**£8.90**	**£16.65**

25,000sd	50,000sd

10,000plt	25,000plt
£18.40	**£42.90**

precision seed

VCA383 **F1 Sylvano**

A Nantes x Kuroda hybrid, with superb sweet flavour and distinctive colour. Shouldered shape and smooth skin; ideal as a premium range product. Ideal for maincrop and overwintering use but not early sowings.

2,500sd	5,000sd	10,000sd
£4.80	**£8.20**	**£15.30**

25,000sd	50,000sd
£35.70	**£66.30**

precision seed

VCA422 **F1 Octavo**

A high yielding Nantes variety producing very strong roots with excellent colour and flavour. Good cavity spot resistance and resistant to splitting and breakage. Suitable for both commercial and competition growing.

2,500sd	5,000sd	10,000sd
£5.05	**£8.65**	**£16.20**

25,000sd	50,000sd
£37.75	**£70.10**

precision seed

VCA424 **F1 Volcano**

A late maturing variety. Produces long, tapered, smooth-skinned roots with good colour and texture. Vigorous foliage for late top-lifting. Strong roots that resist breakage and splitting. High resistance to cavity spot, crown disease and late season re-growth. Ideal for bunching.

2,500sd	5,000sd	10,000sd
£5.30	**£9.05**	**£16.95**

25,000sd	50,000sd
£39.50	**£73.30**

Open Pollinated Varieties

VCA400 **Amsterdam Forcing 2**

Amsterdam (cylindrical) type, early-maturing with slim roots. Uniform, heavy yielder, very well suited to early glasshouse growing. Sow February-April, harvest May-July.

25g	50g	100g
£2.40	**£4.45**	**£8.20**

250g	500g	1kg
£18.95	**£35.10**	**£65.00**

VCA406 **Karotina**

A mid-early Nantes type; suitable for both forcing and normal field production. The roots are 18-22cm in length, cylindrical with a very smooth surface. Sweet and crisp flesh; high carotene content. Sowing to harvest time is typically 120-130 days.

25g	50g	100g
£3.60	**£6.65**	**£12.30**

250g	500g	1kg
£28.45	**£52.65**	**£97.50**

VCA410 **Early Nantes 2**

A 2nd early and maincrop Nantes (tapered stump) type, virtually coreless with good texture, colour and flavour. Sow March-August, harvest July-October.

25g	50g	100g
£2.75	**£5.10**	**£9.45**

250g	500g	1kg
£32.10	**£59.40**	**£110.00**

VCA423 **Paris Market Atlas**

An improved high quality version of the popular Paris Market type. An early variety with superb almost round roots. Excellent colour. Ideal for shallow soils.

25g	50g	100g
£3.70	**£6.80**	**£12.60**
250g	500g	1kg
£29.20	**£54.00**	**£100.00**

VCA417 **Amsterdam 2 Maxi**

An excellent 'baby' carrot variety producing slender, cylindrical roots. Good colour with minimal core. Firm foliage that holds well. Will not produce oversize carrots even when harvested late.

25g	50g	100g
£3.50	**£6.50**	**£12.00**
250g	500g	1kg
£27.70	**£51.30**	**£95.00**

VCA390 **Berlicum 2**

An open pollinated variety suitable for maincrop production. Good colour and texture, cylindrical stump-shaped roots, often reaching up to 20cm in length in lighter soils.

25g	50g	100g
£2.95	**£5.45**	**£10.10**
250g	500g	1kg

25g	50g	100g
£4.05	**£7.50**	**£13.90**
250g	500g	1kg
£32.10	**£59.40**	**£110.00**

VCA415 **Saint Valery**

A well established maincrop variety, with good storage ability. The long tapered roots have strong tops and good texture. Popular for showing. Sow March-August, harvest June-October.

25g	50g	100g
£2.75	**£5.10**	**£9.45**
250g	500g	1kg
£21.90	**£40.50**	**£75.00**

VCA420 **Chantenay**

An older variety regaining popularity due to its exceptionally sweet flavour when used for baby carrot production. Evenly shaped, tapered stump root with smooth skin and excellent colour. Uniform crop. For baby production use a high density sowing of 4.5-5.0kg per acre. Sow April-October, harvest July-October.

25g	50g	100g
£2.75	**£5.10**	**£9.45**
250g	500g	1kg
£21.90	**£40.50**	**£75.00**

VCA391 **Darina**

A late Berlicum variety with the potential to deliver very high yields. The roots are 20-22cm in length, oval to cylindrical in profile with a medium-blunt to blunt tip. Highly resistant to splitting and to Alternaria dauci. Good texture, flavour and shelf life. Harvest time is approximately 137-142 days from sowing.

Cauliflower

Can be harvested during most of the year. Good shelf life and storage possibilities - also fresh market and young plant sales. Specialist crops such as Romanesco types are increasing in popularity due to their raised profile; cauliflowers can be added into production programmes following on from other main season crops. 250-450 seeds per gram. Germinates between 8 and 30°C. Spacing early summer types 46 x 61cm (41,000 plants per hectare), others 61 x 61cm (27,000 per hectare).

Summer and Autumn Varieties

VCA488 **F1 Nautilus**

Gives high quality, very round, pure white, solid heavy curds. Sow February-May for mid-June-October cropping.

50sd	100sd	250sd
£7.95	**£12.70**	**£25.40**
500sd	1,000sd	2,500sd
£40.55	**£64.90**	**£129.70**

VCA498 **F1 Aviso**

Adaptable variety with extra white deep curds, ideal for fresh market. Vigorous plants give excellent protection with mid-green, semi-erect twisting leaves. Very good disease resistance and cold tolerance, performing well in damp conditions.

50sd	100sd	250sd
£9.00	**£14.40**	**£28.75**
500sd	1,000sd	2,500sd
£45.95	**£73.50**	**£146.90**

VCA430 **All Year Round**

For March-May sowings, suitable for plant sales and successional sowings.

5g	10g	25g
£1.95	**£3.10**	**£7.20**
50g	100g	250g
£13.30	**£24.60**	**£56.90**

precision seed

VCA435 **F1 Freedom**

Suitable for all work including standard and mini vegetable production. Approximately 70-80 days from transplant to harvest.

25sd	50sd	100sd
£5.20	**£8.35**	**£13.30**
250sd	500sd	1,000sd
£26.60	**£42.50**	**£68.00**

organic seed

VOG205 **F1 Liria**

A summer and early autumn variety producing medium sized curds with fine structure and a good wrap. Approximately 80 days from transplant to harvest.

25sd	50sd	100sd
£7.10	**£11.40**	**£18.20**
250sd	500sd	1,000sd
£36.35	**£58.15**	**£93.00**

VCA550 **F1 Clapton**

The first commercially available variety with clubroot resistance. 85 day cycle. Very erect habit and a well wrapped curd.

25sd	50sd	100sd
£9.20	**£14.75**	**£23.55**
250sd	500sd	1,000sd
£47.05	**£75.25**	**£120.35**

VCA462 **Amazing**

A well maintained open pollinated variety producing a good yield of first class curds during summer and early autumn.

250sd	500sd	1,000sd
£5.70	**£8.90**	**£14.15**
2,500sd	10,000sd	
£33.60	**£112.35**	

precision seed

VCA470 **F1 Seoul**

A 75-85 day summer and autumn variety that produces very white, very dense curds. Each curd has a high yield of compact florets, with short petioles. Good vigour. Ideal for fresh market and cut mixed vegetable packs.

50sd	100sd	250sd
£8.35	**£13.30**	**£26.60**
500sd	1,000sd	2,500sd
£42.50	**£68.00**	**£135.95**

VCA530 **F1 Boris**

Excellent summer and early autumn variety with good vigour, and a compact, erect leaf habit to aid packing. Very dense curds with good holding ability. 95-105 day maturity for spring sown crops; 85-90 day maturity for crops sown in October and over-wintered in modules under glass.

25sd	50sd	100sd
£5.75	**£9.20**	**£14.70**
250sd	500sd	1,000sd
£29.35	**£46.90**	**£75.05**

precision seed

VCA532 **F1 Toledo**

A strong, vigorous variety with solid compact heads. Excellent quality curd. An ideal autumn cropping variety. Matures approximately 90 days after transplanting.

25sd	50sd	100sd
£5.35	**£8.50**	**£13.60**
250sd	500sd	1,000sd
£27.20	**£43.50**	**£69.55**

precision seed

VCA478 **F1 Skywalker**

An excellent autumn variety, with a 95-110 maturity time. Deep white curd that is well protected. Very clean base. Ideal for October harvesting.

25sd	50sd	100sd
£5.55	**£8.90**	**£14.25**
250sd	500sd	1,000sd
£28.45	**£45.45**	**£72.70**

organic seed

VOG195 **F1 Skywalker**

25sd	50sd	100sd
£6.45	**£10.35**	**£16.50**
250sd	500sd	1,000sd
£33.00	**£52.80**	**£84.40**

VCA468 **F1 Bodilis**

Produces dense curds with outstanding colour and firmness. Ideal for cutting between mid September and early November depending upon locality. Vigorous plants with good cover, giving protection from early frosts. High resistance to leaf diseases. 95-110 day variety.

25sd	50sd	100sd
£5.70	**£9.10**	**£14.55**
250sd	500sd	1,000sd
£29.05	**£46.45**	**£74.25**

VCA483 **F1 Meridien**

An autumn variety with excellent holding ability, allowing for harvest flexibility. Heavy, firm, rounds heads with smooth curd. Strong outer and inner cover. 102-112 day maturity from transplant.

25sd	50sd	100sd
£5.35	**£8.50**	**£13.60**
250sd	500sd	1,000sd
£27.20	**£43.50**	**£69.55**

precision seed

VCA460 **F1 Belot**

Solid curd with smooth texture - a strong frame with excellent leaf protection. Very high percentage of Class 1 heads.

25sd	50sd	100sd
£5.80	**£9.30**	**£14.85**
250sd	500sd	1,000sd
£29.65	**£47.40**	**£75.85**

VCA493 **F1 Optimist**

Hybrid autumn giant type - hardy, with good disease resistance. Performs well even in cold, wet conditions. High quality, dense packed curds, good foliage protection and easy to cut.

25sd	50sd	100sd
£6.90	**£11.00**	**£17.60**
250sd	500sd	1,000sd
£35.15	**£56.20**	**£89.90**

Winter Varieties

VCA545 **F1 Triomphant**

Roscoff x autumn hybrid. Robust, semi-erect foliage gives attractive appearance and good protection to dense curds. A mid-July planting gives cropping from Christmas to mid-January in Kent, and mid-December to mid-January in Cornwall.

25sd	50sd	100sd
£7.05	**£11.30**	**£18.05**
250sd	500sd	1,000sd
£36.05	**£57.65**	**£92.25**

organic seed

VOG207 **F1 Medaillon**

A Roscoff hybrid producing good quality heads with nice curd. For harvest February to mid-March.

25sd	50sd	100sd
£6.90	**£11.00**	**£17.60**
250sd	500sd	1,000sd
£35.15	**£56.20**	**£89.90**

VCA507 **F1 Redoubtable**

For production throughout the UK. Uniform, dense heads which are larger than most other Roscoff types. Harvest from January to March depending on location and sowing date. Very vigorous with good habit.

25sd	50sd	100sd
£6.75	**£10.80**	**£17.30**
250sd	500sd	1,000sd
£34.55	**£55.20**	**£88.35**

VCA682 **F1 Mengwenn**

A high performing variety for harvesting from late February (Cornwall) to early April (Lincolnshire). Vigorous plants with good wrap even when the curd is fully mature. Dark green foliage on compact frame. Intermediate resistance to ringspot.

25sd	50sd	100sd
£6.95	**£11.10**	**£17.75**
250sd	500sd	1,000sd
£35.45	**£56.70**	**£90.65**

VCA676 **F1 Jerome**

A good protective wrap with deep white curds. Vigorous with strong hardiness. RHS Award winner.

25sd	50sd	100sd
£6.70	**£10.70**	**£17.15**
250sd	500sd	1,000sd
£34.25	**£54.75**	**£87.55**

VCA670 **Aalsmeer**

A vigorous variety with good quality curds which are well protected. A Walcheren winter type, therefore more hardy than the Roscoff types.

250sd	500sd	1,000sd
£9.15	**£14.30**	**£22.75**
2,500sd	10,000sd	
£54.10	**£180.85**	

VCA492 **F1 Clipper**

A spring into summer cropping variety with good vigour. Features an erect habit with a taller stem for easy cutting. White curd with good density for an early type. Maturity approximately 87-97 days from transplant. Sow into modules in October, plant out March and cut May-June.

25sd	50sd	100sd
£6.05	**£9.65**	**£15.45**
250sd	500sd	1,000sd
£30.90	**£49.35**	**£78.95**

Cauliflower (contd.)

Unusual Varieties

VCA502 **F1 Celio**
Early large framed Romanesco type. Produces very high quality, pinnacled heads in an attractive green colour.

25sd	50sd	100sd
£6.70	**£10.70**	**£17.15**
250sd	500sd	1,000sd
£34.25	**£54.75**	**£87.55**

VCA515 **F1 Navona**
A Romanesco cauliflower producing a uniform crop of dark green, turreted curds with no bracts. It is a vigorous variety with good field holding properties.

25sd	50sd	100sd
£7.05	**£11.30**	**£18.05**
250sd	500sd	1,000sd
£36.05	**£57.65**	**£92.25**

organic seed
VOG202 **F1 Veronica**
An excellent Romanesco variety for harvesting in late summer and autumn. Tolerant of riceyness and red discolouration.

25sd	50sd	100sd
£6.40	**£10.25**	**£16.35**
250sd	500sd	1,000sd
£32.70	**£52.30**	**£83.65**

VCA720 **Minaret**
An open pollinated Romanesco variety producing reasonable mid-green coloured heads. Not as uniform as the hybrid versions.

5g	10g	25g
£3.00	**£5.50**	**£12.70**
50g	100g	250g
£23.50	**£43.50**	**£100.60**

VCA520 **F1 Lazio**
A Romanesco cauliflower variety developed to extend the cropping period; will go through to late December in milder areas. Has a semi-erect habit, with good vigour and high mildew resistance. Typical maturity is 125-135 days from transplant. A good variety to follow F1 Navona.

25sd	50sd	100sd
£7.20	**£11.55**	**£18.45**
250sd	500sd	1,000sd
£36.85	**£58.90**	**£94.20**

VCA525 **F1 AMO 125**
A revolutionary bright orange Romanesco variety. The turreted curd remains orange even when cooked. Vigorous habit; strong against mildew. Maturity 125 days.

25sd	50sd	100sd
£11.95	**£19.10**	**£30.55**
250sd	500sd	1,000sd
£61.10	**£97.70**	**£156.30**

VCA476 **F1 Hipster**
Produces uniform heads with firm curds and domed shape. Striking deep purple colour that is retained even when steamed or boiled. Colour intesifies with exposure to light. Improved version of the popular variety Graffiti. Typically 80 days from transplant to maturity.

25sd	50sd	100sd
£10.10	**£16.15**	**£25.85**
250sd	500sd	1,000sd
£51.65	**£82.60**	**£132.10**

VCA485 **F1 Sunset**
One of the best orange varieties. Performs best when used for September and October harvesting. Colour most pronounced when used for 'baby' veg work, but colour still vibrant in full size heads. Small compact frame.

25sd	50sd	100sd
£9.55	**£15.30**	**£24.45**
250sd	500sd	1,000sd
£48.90	**£78.20**	**£125.05**

VCA508 **F1 Trevi**
Uniform, lime green heads contrasting well with Graffiti in mixed packs, or attractive on its own. Plant from June, heading September-October.

25sd	50sd	100sd
£6.15	**£9.85**	**£15.75**
250sd	500sd	1,000sd
£31.50	**£50.35**	**£80.50**

Celeriac

Ideal for stewpacks and for fresh sales. Long storage and shelf life. Relatively easy to produce, with good examples commanding a premium. Suited to fresh market and processing.

Approx. 2500 seeds per gram - produces approximately 1000 plants per gram. Germination temperature optimum 20°C, minimum 18°C. Sow into modules between February - April, then transplant at around 18 per m^2 (under glass), 10 per m^2 (for fresh market, under fleece), 6 per m^2 outdoors without protection.

VCE02 **F1 Monet**
An early hybrid variety, suitable for both fresh sales and storage uses. Resistant to bolting; tolerant of Septoria.

250sd	500sd	1,000sd
£5.15	**£9.75**	**£18.50**
2,500sd	5,000sd	
£41.65	**£81.60**	

primed pelleted seed
VCE08 **Prinz**
Top quality, light skinned variety, with excellent bolting resistance, so it is suitable for early cultivation under glass, plastic and fleece, as well as field cultivation. Ideal for fresh sales and processing.

50plt	100plt	250plt	500plt
£3.80	**£6.85**	**£14.45**	**£26.60**

organic primed pelleted seed
VOG232 **Prinz**

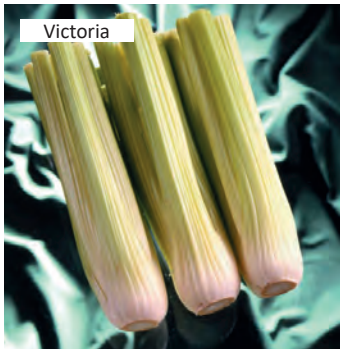

50plt	100plt	250plt	500plt
£4.70	**£8.50**	**£17.90**	**£32.90**

VCE10 **Giant Prague**
Well shaped smooth celeriac, vigorous roots, upright foliage. Round, relatively smooth skin with good inner quality. Suited to fresh market and storage.

10g	25g	50g
£2.30	**£5.35**	**£9.90**
100g	250g	500g
£18.30	**£42.30**	**£78.30**

Celery

Self-blanching types are now a mainstay of salad vegetables. Ideal for fresh market sales, long standing crops with high yield per acre. Can also be sold as a young plant item. 3,000-4,000 seeds per gram. Sow 250g per hectare. Sow under heated glass (germinates 10-22°C) from early February, transplant under protection in April, spacing 25 x 30cm, or into cold glass (mild heat) in March, to plant out May-early June. Sow maincrop March-April in cold frames to plant out May to June. Do not cover seed except for primed pellets. To maintain viability primed pellets must be kept cool.

VCE15 **F1 Victoria**
UK-bred. Attractive mid-green colour, tall with fleshy stalks. Self blanching, erect habit.

250sd	500sd	1,000sd
£5.00	**£7.80**	**£12.40**
2,500sd	10,000sd	
£29.45	**£98.45**	

primed pelleted seed
VCE35 **F1 Victoria**

100plt	250plt	500plt	1,000plt
£6.70	**£14.10**	**£25.90**	**£46.25**

VCE70 **F1 Greensleeves**
Produces a high yield of bright green sticks, with excellent flavour and reduced stringiness. Good bolting tolerance in early crops and cold tolerance in late crops. Good holding ability.

500sd	1,000sd	2,500sd
£3.70	**£5.85**	**£13.95**
10,000sd	25,000sd	
£46.55	**£108.75**	

VCE20 **Celebrity**
Self blanching type, short stalks that hold well. Slightly quicker to mature than Victoria. Very little stringiness for a self-blanching type.

1g	2½g	5g
£6.00	**£13.90**	**£25.70**
10g	25g	50g
£47.55	**£110.05**	**£203.75**

VCE40 **Golden Self Blanching**
Yellow to green stalks which, if block-planted will self blanch.

5g	10g	25g
£2.15	**£4.00**	**£9.20**
50g	100g	250g
£17.05	**£31.50**	**£72.90**

VCE45 **Green Soup**
A dark green variety of 'cutting' or 'soup' celery.

10g	25g	50g
£1.95	**£3.70**	**£6.80**
100g	250g	500g
£12.60	**£29.20**	**£54.00**

Chicory

Approximately 600 seeds per gram. Sow May-June, thinning to around 20cm. Harvest October to December, trim off the leaves, then store in a frost-free place. When required for forcing, place several in a large pot, exclude light, and force at room temperature for around 3-4 weeks until ready.

VCH10 **Brussels Whitloof**
Large, thick-stemmed leaves; stalks and leaves are used for salads when blanched.

25g	50g	100g
£1.95	**£3.40**	**£6.30**
250g	500g	1kg
£14.60	**£27.00**	**£50.00**

organic seed
VOG238 **Brussels Witloof**

5g	10g	25g
£1.95	**£3.10**	**£7.20**
50g	100g	250g
£13.30	**£24.60**	**£56.90**

Cover Crops & Green Manures

Cover crops and green manures are plants grown to improve soil structure, improve the nutrient content of the soil, supress weed development, reduce soil erosion and reduce the incidence of some pests, such as nematodes. The term cover crop is often used for seed mixes while green manures are often referred to as straight products. The term catch crop is also used, but essentially they all do the same job. These products can be incorporated into a crop rotation programme.

The choice of product will depend upon local climate and soil type, time of year, length of gap in production, the aim of the treatment and the follow on crop.

Straights

VGR10 **Alfalfa**
A hardy perennial normally grown as a short-term (2-3 month) green manure. Adds bulk plus some nitrogen fixation to the soil. Sow between April and July at a rate of 10kg/acre (2.5 grams/sqm). Avoid acidic or waterlogged soils.

250g	500g	1kg	2½kg
£9.30	**£14.90**	**£23.35**	**£51.50**

VGR12 **Buckwheat**
A rapidly establishing weed supressor that is effective at rejuvenating low fertility soils. Can also attract beneficial insects depending upon stage at turn in. For sowing April-August at 40kg/acre (10 grams/sqm). Height typically 60-80cm. Not frost hardy.

250g	500g	1kg	2½kg
£3.75	**£5.95**	**£9.35**	**£20.60**

VGR22 **Forage Pea**
Nitrogen-fixing plant, up to one metre tall. For over-wintering. Sow September-November at 35kg per acre (8.75 grams/sqm).

1kg	2½kg	5kg	10kg
£6.00	**£13.25**	**£24.50**	**£45.00**

VGR25 **Forage Rye**
For August-November sowings at 35kg/acre (8.75 grams/sqm). Best suited for turning in early April or May. Suitable for most soil types, and copes well with heavier soils.

1kg	2½kg	5kg	10kg
£6.00	**£13.25**	**£24.50**	**£45.00**

VGR27 **Mustard, Brown**
A quickly establishing green manure that can help reduce Potato Cyst Nematodes when turned in. Also good for weed supression. For sowing early March-September at 18kg/acre (4.5 grams/sqm). Height typically 60-90cm. More frost hardy than other mustards.

250g	500g	1kg	2½kg
£4.80	**£7.65**	**£12.00**	**£26.50**

VGR28 **Mustard, White**
A quality Mustard variety that develops a high level of green matter and residual fibre. For sowing early March-September at 18kg/acre (4.5 grams/sqm). Quick growing, to a height of 60-90cm, good standing ability. Turn in before flowering.

500g	1kg	2½kg	5kg
£5.95	**£9.35**	**£20.60**	**£38.05**

VGR30 **Phacelia Tanacetifolia**
For sowing March-September. Quick-maturing, with dense plant foliage, height up to one metre. Recommended sowing rate is 4kg/acre (1 gram/sqm). Turn in prior to flowering.

250g	500g	1kg	2½kg
£11.20	**£17.85**	**£28.00**	**£61.80**

VGR35 **Red Clover**
This provides excellent nitrogen fixation performance. Best on good loams. Sow April-August. Sow at 8kg/acre (2 grams/sqm).

250g	500g	1kg	2½kg
£9.05	**£14.45**	**£22.70**	**£50.00**

VGR38 **White Clover**
A blend of broad, small and medium varieties, providing a long growth period and good regeneration rate. Sow April-August. Sow at 4kg/acre (1 gram/sqm).

250g	500g	1kg	2½kg
£9.05	**£14.45**	**£22.70**	**£50.00**

VGR40 **Winter Tares**
Also known as Purple Vetch. A nitrogen-fixing plant for sowing at 22kg/acre (5.5 grams/sqm), March-May or July-September for over-wintering. Not recommended for acidic soils.

500g	1kg	2½kg	5kg
£5.55	**£8.70**	**£19.15**	**£35.35**

Mixes

VCO010 **Green Mix**
A rapidly establishing, high biomass, mix for ground cover and nitrogen fixation. Contains 60% Rye, 30% Vetch and 10% Mustard. Can be sown during the spring, summer and autumn at a rate of 20kg/acre (5 grams/sqm).

500g	1kg	2½kg	5kg
£4.05	**£6.35**	**£14.00**	**£25.85**

VCO020 **Super Mix**
A quickly establishing mix for ground cover, compaction reduction and nitrogen fixation with added Phacelia for aiding biodiversity. Contains 80% Oats, 15% Vetch and 5% Phacelia. Can be sown during the spring and early summer at a rate of 20kg/acre (5 grams/sqm).

500g	1kg	2½kg	5kg
£4.25	**£6.70**	**£14.75**	**£27.20**

VCO030 **Soil+ Mix**
A deep rooting mix to reduce soil compaction, with the benefit of nitrogen fixation and added organic matter. Contains 70% Rye, 20% Vetch and 10% Oilseed Radish. Can be sown during the spring and summer at a rate of 20kg/acre (5 grams/sqm).

500g	1kg	2½kg	5kg
£4.05	**£6.35**	**£14.00**	**£25.85**

VCO040 **PreCob Mix**
A mix developed to preceed a Maize or Sweetcorn crop, which reduces compaction, fixes nitrogen and adds biomass. Contains 70% Rye, 15% Vetch, 10% Tillage Radish and 5% Phacelia. Can be sown during the spring, summer and early autumn at a rate of 20kg/acre (5 grams/sqm).

100g	250g	500g	1kg
£2.35	**£5.40**	**£10.00**	**£18.50**

VCO050 **PreSpud Mix**
Designed to preceed a potato crop this biofumigation mix reduces nematodes, relieves compaction and adds biomass. Contains 80% Brown Mustard and 20% Tillage Radish. Can be sown during the spring, summer and early autumn at a rate of 4kg/acre (1 gram/sqm).

100g	250g	500g	1kg
£2.60	**£6.00**	**£11.10**	**£20.55**

Cress

Approximately 350 seeds per gram; sow at approximately 25g per square metre.

VCR10 **Plain or Common Cress**
A well known variety which is used extensively for salad work. Can also be used as a green manure.

250g	500g	1kg
£1.95	**£3.60**	**£6.65**

organic seed
VOG271 **Cresso**
Fast maturing, plain cress variety, making it ideal for punnet production. Also suitable for use as a green manure.

250g	500g	1kg
£9.85	**£15.75**	**£24.70**
2½kg	5kg	10kg
£54.45	**£100.55**	**£185.00**

VCR20 **Water Cress**
Tall growing, strong-flavoured; requires moist conditions.

10g	25g	50g
£5.10	**£11.75**	**£21.80**
100g	250g	500g
£40.35	**£93.35**	**£172.80**

VCR30 **Land Cress**
Hardy, glossy-leaved substitute for Water Cress.

50g	100g	250g
£2.60	**£4.80**	**£11.10**
500g	1kg	
£20.55	**£38.00**	

For grafting clips suitable for use with Cucumbers please see under Sundries

Cucumber

A productive crop for greenhouse or outdoors, with a well established sales history, and the potential to offer high returns. Cucumbers are also very popular for young plant sales. 35 seeds per gram. Sow December-April depending upon cropping type. Germination requires a minimum of 20°C. For cultural advice, please request a technical leaflet.

Greenhouse Varieties

VCU013 **F1 Carmen**
For summer and autumn cropping, 34-40cm long, slightly ribbed, smooth fruit. Resistant to scab and leaf spot, bitter free, also a high resistance to powdery mildew and partially tolerant of downy mildew. All female.

25sd	100sd	500sd	1,000sd
£13.40	**£47.90**	**£225.75**	**£430.00**

VCU070 **F1 Femspot**
All female flowered, quick, strong grower, earlier than most other cucumbers, bitter free, ribbed. This is our best selling variety for the plant trade.

25sd	100sd	500sd	1,000sd
£9.20	**£32.85**	**£154.90**	**£295.00**

VCU060 **F1 Louisa**
All female (parthenocarpic) variety producing a high yield of uniform, dark green, bitter-free fruits. Very early to crop and delivers a good crop even under hot conditions. Fruits typically measure 35cm in length and weigh around 500 grams. Resistant to powdery mildew, Ccu and Cca. The ideal plant sales variety.

25sd	100sd	500sd	1,000sd
£12.00	**£42.85**	**£202.15**	**£385.00**

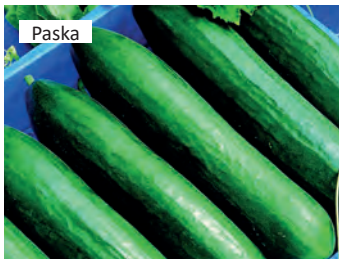

VCU075 **F1 Saturn**
A mid-early all female (parthenocarpic) hybrid variety, ideally suited to production under glass and plastic. Suitable for both heated and cold production. Produces a good yield of smooth, dark green fruits; typically 30-35cm in length. A good choice for the hobby plant sales market.

25sd	100sd	500sd	1,000sd
£9.20	**£32.85**	**£154.90**	**£295.00**

Organic seed
VOG280 **F1 Flamingo**
All female variety. Tolerant of downy mildew and pythium, and resistant to target leaf spot, and scab. Vigorous, robust plants that perform well even in relatively low light levels. Suitable for production in soil. Large fruited, dark green, slightly ribbed type, for production throughout the season.

25sd	100sd	500sd
£31.15	**£111.30**	**£525.00**

organic seed
VOG300 **F1 Paska**
All female (parthenocarpic) greenhouse variety; medium-short fruited (22-25cm) for summer and autumn production. Good storage ability and long shelf life. Smooth skinned with slight ribbing. Resistant to scab and powdery mildew, and highly tolerant of downy mildew and CMV. Heavy yielding.

25sd	100sd	500sd
£28.05	**£100.20**	**£472.50**

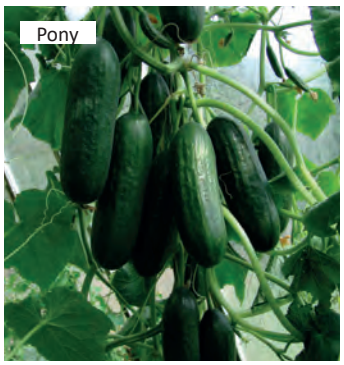

Greenhouse or Outdoor

VCU015 **F1 Passandra**
A powdery mildew resistant variety, which when picked regularly produces small size fruit of 15-18cm. The fruits are slightly ribbed, cylindrical and dark green. Tolerant of mosaic virus, powdery and downy mildew. Sow from the beginning of February. All female.

25sd	100sd	500sd	1,000sd
£10.45	**£37.30**	**£175.90**	**£335.00**

organic seed
VOG295 **F1 Passandra**

25sd	100sd	500sd	1,000sd
£12.30	**£44.00**	**£207.40**	**£395.00**

VCU140 **F1 Pony**
A prolific producer of 'snack sized' fruits, typically up to 10cm in length and weighing up to 100 grams. The fruits have a smooth skin, with excellent flavour and texture. Most productive when used for heated indoor production but can also be used for outdoor production during the summer. Ideal for containers; a good plant sales item. Parthenocarpic.

25sd	100sd	500sd	1,000sd
£9.35	**£33.40**	**£157.50**	**£300.00**

VCU160 **F1 Delistar**
This unusual variety features very thin, translucent skin, which means there is no need to peel the fruit and reduces the possibility of digestive problems that can be associated with cucumber consumption. A medium sized, thin skinned variety with a crunchy sweet taste. Fruit length typically 16-18cm, width 3-4cm and weight 80-100g. High dry matter content gives crunchy texture and sweet aromatic taste.

25sd	100sd	500sd	1,000sd
£9.65	**£34.50**	**£162.75**	**£310.00**

VCU165 **Peticue**
A short vining/bush slicing variety bred to stay compact, with the vines using only a third of the space of a standard variety. Plants mature in 45 days. Pick fruit at 18-23cm in length for best tasting, crunchy sweet cues. Regular harvest increases yield.

25sd	100sd	500sd	1,000sd
£5.45	**£19.50**	**£91.90**	**£175.00**

VCU100 **Telegraph Improved**
Reliable, well-established OP variety, ideal for retail plant sales.

25sd	100sd	500sd	1,000sd
£3.00	**£10.60**	**£49.90**	**£95.00**

organic seed
VOG312 **Sonja**
Robust variety for production in tunnels and outdoors, which gives prolific crops of 25cm long dark green, bitter-free fruits. Ideal for plant sales.

1g	2½g	5g
£2.85	**£6.60**	**£12.20**

10g	25g	50g
£22.55	**£52.20**	**£96.60**

VCU095 **F1 Alhambra**
An early parthenocarpic, pickling variety, which produces a heavy crop of 'warty' fruits. Length to width ratio is typically 3.6:1. Fruits have an attractive dark green colour and large warts. No bitterness. Resistance to CMV, Cladosporium cucumerinum, Podospora xanthii, ZYMV and CVYV.

25sd	100sd	500sd	1,000sd
£5.00	**£17.85**	**£84.00**	**£160.00**

VCU097 **F1 Partner**
A mid-early parthenocarpic variety, with mainly female flowers, that produces a high yield of medium to dark green fruits. Slightly hairy with smooth skin; length to width ratio of 3.3:1. Resistant to CMV, scab and powdery mildew. High tolerance of downy mildew. Suits indoor and outdoor production. A superb pickling variety.

25sd	100sd	500sd	1,000sd
£5.00	**£17.85**	**£84.00**	**£160.00**

VCU106 **F1 Enforcer (rootstock)**
Rootstock variety. Interspecific (Shintoza (Maxima X Moschata)) hybrid variety suitable for use as a rootstock for the grafting of cucumbers. Used to improve plant vigour and strengthen disease resistance; also aids root establishment in colder growing conditions. All glasshouse F1 all female varieties listed may be used as scion material with this rootstock. Resistant to Fon (0,1,2), Fom (0,1,2), Vd, Mi, Mj. Also suitable for use with Melon and Watermelon varieties..

25sd	100sd	500sd	1,000sd
£5.60	**£20.05**	**£94.50**	**£180.00**

VCU110 **F1 Burpless Tasty Green**
A favourite variety for outdoor production, suited to amateur plant sales and field production - dark green medium to long fruits.

1g	2½g	5g
£2.60	**£6.05**	**£11.15**

10g	25g	50g
£20.65	**£47.75**	**£88.45**

VCU120 **Marketmore**
A popular ridge slicer type producing straight, dark green fruits, approximately 18-20cm in length. Good disease resistance.

10g	25g	50g
£1.95	**£4.45**	**£8.20**

100g	250g

£2.50	**£5.70**	**£10.55**

100g	250g
£19.55	**£45.20**

VCU125 **Lemon**
An unusual cucumber variety that produces 'lemon shaped' fruits. Light yellow skin and white flesh. Matures after around 60 days. Rust and drought resistant.

5g	10g	25g
£1.95	**£3.45**	**£7.90**

50g	100g
£14.65	**£27.10**

Endive

Endive is similar to lettuce but with a more bitter taste. Frisée types have curled, often deeply dissected leaves, while scarole types have broader leaves. The bitterness can be reduced by blanching. Crop time approx. 12 weeks, add two weeks for blanched crops.

split pills
VEN45 **Dafne**
The ideal follow-on to Kokyta, this Scarole is best suited to autumn and early winter cropping. Light green coloured rounded leaves, with indented edges. Good vigour and good resistance to yellowing at low temperatures.

100plt	250plt	500plt	1,000plt
£2.55	**£5.35**	**£9.80**	**£17.50**

split pills
VEN82 **Primafine**
A fine curled Endive variety with attractive dark colour and fine frills to leaves. Copes well with both warm and cold temperatures. Large number of serrated leaves in heart.

100plt	250plt	500plt	1,000plt
£4.80	**£10.10**	**£18.55**	**£33.15**

Florence Fennel

This type of fennel is mainly grown for its bulbous roots, which are becoming more popular for use in specialist cuisine. Suitable for fresh sales and the catering trade - also popular as a mini-vegetable. 250 seeds per gram. Sow April-July, germinates at 10-30°C. Spacing 20-30cm by 60-100cm, giving plant population of 30-90,000 per hectare. Harvest July-September.

VFE14 **F1 Solaris**
A quick growing hybrid variety, producing uniform, round shaped bulbs. Matures approx. 75 days after transplanting. Best used for summer production.

For Green Manures see Cover Crops on page 193

Herbs

A range of annuals, biennials and perennials grown for culinary and medicinal purposes. Ideal for plant sales. Sell in 9cm pots and upwards. Best sold as green plant with label.

VHE010 **Angelica**

(Angelica archangelica)

Biennial: 170 seeds per gram. Plant grows up to 2 metres in height, with a long hollow stem and fleshy roots. Useful for medicinal purposes and for confectionery. Approximately 25 grams for 1,000 plants.

5g	10g	25g
£3.55	**£6.55**	**£15.10**

50g	100g
£27.90	**£51.65**

VHE020 **Anise**

(Pimpinella anisum)

Annual: 220 seeds per gram. Bushy plant up to 50cm in height. Seeds used in liquors, cakes, soups and stews. 15 grams for 1,000 9cm pots.

10g	25g	50g
£1.95	**£3.70**	**£6.80**

100g	250g
£12.60	**£29.20**

VHE030 **Balm, Lemon**

(Melissa officinalis)

Perennial: 2,000 seeds per gram. Often called Lemon Balm. Height 40-60cm. Used for medicinal purposes, seasoning and for flavouring fruit cordials.

2½g	5g	10g
£1.95	**£3.10**	**£5.75**

25g	50g	100g

100g	250g
£16.40	**£37.95**

VHE100 **Burnet**

(Poterium sanguisorba)

Perennial: 150 seeds per gram. Young leaves cucumber flavoured. Height 30-60cm. Used in salads. 150 grams for 1,000 9cm pots.

25g	50g	100g
£2.75	**£5.10**	**£9.45**

250g	500g
£21.90	**£40.50**

VHE115 **Catnip**

(Nepeta cataria)

Perennial: 1500 seeds per gram. Height 50-80cm. Also known as Catmint. Greyish plant with whitish purple flowers. The leaves have a mint-like smell. Leaves used fresh or dry in tea and cat toys. 2 grams for 1,000 9cm pots. 12kg per hectare for direct drilling.

2½g	5g	10g
£2.15	**£4.00**	**£7.40**

25g	50g
£17.10	**£31.65**

VHE120 **Chamomile, Sweet**

(Chamaemelum nobilis)

Perennial: 6,500 seeds per gram. Single daisy-like flowers, sweet smelling foliage. Height 15-30cm. Used for ground cover. 1 gram for 1,000 9cm pots.

1g	2½g	5g
£1.95	**£3.35**	**£6.25**

10g	25g
£11.50	**£26.65**

VHE130 **Chamomile**

(Matricaria chamomilla)

Annual: 20,000 seeds per gram. Height 10-40cm. Flowers used in hair rinses and in teas to aid digestion and insomnia.

2½g	5g	10g
£1.95	**£2.80**	**£5.20**

£2.20	**£4.05**	**£9.40**

50g	100g
£17.35	**£32.15**

VHE152 **Chives, Polystar**

Perennial: 300 seeds per gram. A fast growing variety with medium-rough leaf blades. Recommended for pot based production and early open field crops. 30 seeds per 11cm pot.

2½g	5g	10g
£2.30	**£4.25**	**£7.90**

25g	50g
£18.20	**£33.70**

VHE160 **Chives, Garlic**

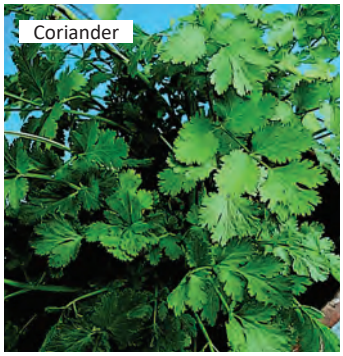

(Allium tuberosum)

Perennial: 200 seeds per gram. Pleasant mild garlic flavour; the small white flowers are also edible. Leaves are approx. 40cm high and broader than normal chives.

5g	10g	25g
£2.30	**£4.25**	**£9.75**

50g	100g
£18.05	**£33.40**

Herbs (contd.)

VHE170 **Coriander**

(Coriandrum sativum)

Annual: 90 seeds per gram. Long established popular herb. Height 30-50cm. Used chiefly in soups and confectionery. 30 grams for 1,000 9cm pots.

50g	100g	250g
£1.95	**£2.55**	**£5.85**

500g	1kg
£10.80	**£20.00**

VHE168 **Coriander Confetti**

Annual: 120 seeds per gram. Specially bred for leaf production this variety has distinctive very fine leaves. Suitable for use throughout the season.

25g	50g	100g
£2.75	**£5.10**	**£9.45**

250g	500g
£21.90	**£40.50**

VHE172 **Coriander Santos**

Annual: 140 seeds per gram. Standard leaf variety for early season production, sow from early spring to mid-June. Very good resistance to running to seed. Seed rate: 5kg per acre.

50g	100g	250g
£2.05	**£3.80**	**£8.75**

500g	1kg
£16.20	**£30.00**

VHE173 **Coriander Cruiser**

Annual: 135 seeds per gram. Now establishing itself as a market leader, this variety is both high yielding and slow to bolt. Compact plants with large, dark green, shiny leaves. Suitable for all season field production and pot production. Seed rate: 5kg per acre.

50g	100g	250g
£3.75	**£6.95**	**£16.05**

500g	1kg
£29.70	**£55.00**

organic seed

VOG770 **Coriander Slobolt**

Annual: 140 seeds per gram. A variety for leaf production that performs well under organic production techniques. Resistant to running to seed. Seed rate: 5kg per acre.

25g	50g	100g
£3.15	**£5.80**	**£10.75**

250g	500g
£24.80	**£45.90**

VHE174 **Coriander Calypso**

Annual: 140 seeds per gram. An excellent leaf Coriander variety, which is extremely slow to bolt. Excellent flavour and colour. Seed rate: 5kg per acre.

25g	50g	100g
£2.95	**£5.45**	**£10.10**

250g	500g
£23.35	**£43.20**

VHE175 **Cumin**

(Cuminum cyminum)

Annual: 300 seeds per gram. Grass like leaves, small white flowers. Height 15-25cm. Aromatic seeds that can be used for flavouring. 25 grams for 1,000 9cm pots.

10g	25g	50g
£1.95	**£3.35**	**£6.15**

100g	250g
£11.35	**£26.25**

VHE180 **Dill**

(Anethum graveolens)

Annual: 900 seeds per gram. Height 90cm. Used as a condiment and in pickling. 25 grams for 1,000 9cm pots.

50g	100g	250g
£2.40	**£4.45**	**£10.25**

£2.15	**£5.00**	**£9.20**

100g	250g
£17.05	**£39.40**

VHE182 **Dill Diana**

Annual: 900 seeds per gram. A very upright and stable selection. Very leafy with an attractive dark green colour. Compact growth habit. Especially robust against bolting. 25 grams for 1,000 9cm pots.

25g	50g	100g
£3.60	**£6.65**	**£12.30**

250g	500g
£28.45	**£52.65**

organic seed

VOG790 **Dill Hera**

Annual: 900 seeds per gram. A compact variety with attractive blue green foliage. Ideal for pot production, baby leaf and bunching. Resistant to bolting. 25 grams for 1,000 9cm pots.

10g	25g	50g
£3.05	**£7.00**	**£12.95**

100g	250g
£23.95	**£55.40**

VHE184 **Dill Dukat**

Annual: 900 seeds per gram. Bushy upright growth with dark green foliage, ideal for leaf production. Very neat plant habit. Height 80cm. 25 grams for 1,000 9cm pots.

50g	100g	250g
£2.60	**£4.80**	**£11.10**

500g	1kg
£20.55	**£38.00**

For Florence Fennel see page 195

VHE190 **Fennel, Common**

(Foeniculum vulgare)

Perennial: 230 seeds per gram. Erect growing plant with dark green foliage. Fern-like leaves of aniseed flavour used for flavouring. Height 60-120cm. 20 grams for 1,000 9cm pots.

25g	50g	100g
£3.15	**£5.80**	**£10.75**

250g	500g
£24.80	**£45.90**

VHE200 **Fennel, Bronze**

(Foeniculum purpureum)

Perennial: 420 seeds per gram. Similar to the above with dark foliage. 20 grams for 1,000 9cm pots.

2½g	5g	10g
£3.15	**£5.80**	**£10.75**

25g	50g
£24.80	**£45.95**

VHE230 **Hyssop Blue**

(Hyssopus officinalis)

Perennial: 850 seeds per gram. Aromatic bushy plant with small leaves and blue flowers. Height 55cm. Beekeeper's plant, with strong rather bitter flavour. 2 grams for 1,000 9cm pots.

2½g	5g	10g
£2.45	**£4.50**	**£8.35**

25g	50g
£19.30	**£35.75**

VHE232 **Hyssop, Pink**

(Hyssopus officinalis)

Perennial: 850 seeds per gram. Similar to Hyssop Blue, this plant features masses of small flowers, making it an attractive ornamental as well as a culinary herb. Height 50cm. 2 grams for 1,000 9cm pots.

2½g	5g	10g
£2.50	**£4.65**	**£8.60**

25g	50g
£19.85	**£36.75**

VHE255 **Lemon Grass**

(Cymbopogon flexuosus)

Perennial: 1,000 seeds per gram. East Indian strain growing to 20-30cm in height. Grow as tender perennial. Used for flavouring and scents.

1g	2½g	5g
£2.65	**£6.05**	**£11.20**

10g	25g
£20.75	**£47.95**

VHE260 **Lovage**

(Levisticum officinalis)

Perennial: 300 seeds per gram. Yellow flowers with dark leaves used for flavouring vegetable stews and root vegetables. 150-200cm. 50 grams for 1,000 9cm pots.

2½g	5g	10g
£1.95	**£3.40**	**£6.30**

25g	50g
£14.55	**£26.90**

VHE270 **Marigold, Pot**

(Calendula officinalis)

Annual: 150 seeds per gram. Orange flowers. Height 60cm. Petals used as a substitute colouring for Saffron in rice, etc, and added fresh to salads. Also used medicinally.

5g	10g	25g
£1.95	**£3.60**	**£8.30**

50g	100g
£15.35	**£28.35**

VHE280 **Marjoram, Pot**

(Origanum vulgare)

Perennial: 7,200 seeds per gram. Erect densely hairy stems, pale pink flowers are borne on oblong heads. Height 40-60cm. 5 grams for 1,000 9cm pots.

1g	2½g	5g
£1.95	**£3.25**	**£6.00**

10g	25g

£1.95	**£3.95**	**£7.30**

10g	25g
£13.50	**£31.25**

VHE290 **Marjoram Sweet**

(Origanum majorana)

Annual: 4,000 seeds per gram. Very popular herb for both seasoning and medicinal purposes. Height 50cm. 5 grams per 1,000 9cm pots.

5g	10g	25g
£2.60	**£4.80**	**£11.05**

50g	100g
£20.45	**£37.80**

VHE320 **Mertensia, Silver Ocean** N

(Mertensia maritima)

Perennial: 300 seeds per gram. Also known as Oysterleaf and Oysterplant. An edible ornamental with silver-blue and green crispy leaves that taste like fresh oysters. Also suitable for use in borders, baskets and containers. Very winter hardy. Requires vernalization for flower initiation. Precision herb seed.

50sd	100sd	250sd
£3.55	**£6.70**	**£15.30**

500sd	1,000sd
£28.90	**£55.00**

VHE312 **Mint, Green**

(Mentha viridis)

Perennial: 13,500 seeds per gram. Similar to spearmint, this mint has dark green, roughly oval shaped leaves, with serrated margins. Do not cover seed for germination. Used for cooking. Should be multi-seeded when used in modules or pots. 2 grams for 1,000 9cm pots.

1g	2½g	5g
£2.80	**£6.45**	**£11.90**

10g	25g
£22.00	**£50.90**

For Parsley see page 212

VHE315 **Pennyroyal**

(Mentha pulegium)

Perennial: 12,000 seeds per gram. Spreading plant, clusters of lilac flowers. Height 25-30cm. Please note: concentrated oil may be toxic. 2 grams for 1,000 9cm pots.

1g	2½g	5g
£2.35	**£5.35**	**£9.90**

10g	25g
£18.35	**£42.45**

For Rocket see page 219

VHE350 **Rosemary**

(Salvia rosmarinus)

Perennial: 900 seeds per gram. Evergreen shrub with grey-green pinnate leaves. Height 30-60cm. Used for seasoning. 10 grams for 1,000 9cm pots.

1g	2½g	5g
£4.10	**£9.50**	**£17.60**

25g	50g
£17.10	**£31.65**

VHE380 **Savory, Summer** ***(Satureja hortensis)***
Annual: 1,500 seeds per gram. Bushy plant with pinnate foliage. Height 35-40cm. Peppery, aromatic leaves and young shoots used for flavouring and potpourris. 10 grams for 1,000 9cm pots.

25g	50g	100g
£2.95	**£5.45**	**£10.10**

250g	500g
£23.35	**£43.20**

VHE390 **Savory, Winter** ***(Satureja montana)***
Perennial: 2,500 seeds per gram. A stronger more pungent flavour than Summer Savory. Small purple to almost white flowers in the axils of the leaves. Height 20-30cm. 10 grams for 1,000 9cm pots.

2½g	5g	10g
£2.85	**£5.25**	**£9.70**

25g	50g
£22.45	**£41.50**

VHE400 **Sorrel, Broad Leaved** ***(Rumex acetosa)***
Perennial: 1,000 seeds per gram. Height 40-80cm. Young leaves have a tangy taste used to liven up salads. Used for salads, also as a vegetable like spinach. 100 grams for 1,000 9cm pots.

10g	25g	50g
£3.25	**£7.55**	**£13.95**

100g	250g
£25.85	**£59.80**

VHE430 **Tansy** ***(Tanacetum vulgare)***
Perennial: 2,500 seeds per gram. Fern-like aromatic leaves and yellow button-like flower heads. Height 80-100cm. Used in pot-pourri and as a natural insect repellant when dried. 3 grams for 1,000 plants.

1g	2½g	5g
£1.95	**£3.05**	**£5.60**

10g	25g
£10.35	**£23.90**

VHE440 **Tarragon, Russian** ***(Artemesia dracunculoides)***
Perennial: 6,000 seeds per gram. Not to be confused with French Tarragon which is not available from seed. Leaves have a strong and sweet anise flavour. Leaves are used in salads and sauces for seasoning, especially popular for fish dishes. Also used for flavouring vinegar. 3 grams for 1,000 plants.

1g	2½g	5g
£1.95	**£2.70**	**£4.95**

10g	25g
£9.15	**£21.15**

VHE448 **Thyme, Orangelo**
(Thymus fragrantissimus)
Perennial: 5,000 seeds per gram. A traditional style thyme but with a citrusy orange scent. Hardy perennial with narrow, grey-green leaves and tiny blush-white flowers in summer. Suitable for use in borders and containers. Precision herb seed.

100sd	250sd	500sd
£3.05	**£6.95**	**£13.15**

1,000sd	2,500sd

£13.10	**£30.30**

VHE455 **Thyme, Purple Creeping** ***(Thymus serpyllum)***
Perennial: 7,000 seeds per gram. A creeping habit, forming mats, 10cm in height. Attractive purple flowers. Used for both ornamental and culinary applications.

1g	2½g	5g
£1.95	**£4.05**	**£7.50**

10g	25g
£13.90	**£32.15**

VHE460 **Welsh Onion, White** ***(Allium fistulosum)***
Perennial: 500 seeds per gram. Similar in appearance to Chives with the same uses. Large decorative white flower heads. Slightly swollen base at soil level.

5g	10g	25g
£1.95	**£3.20**	**£7.35**

50g	100g
£13.60	**£25.20**

Kohl Rabi

A versatile and popular niche crop, suitable for open ground and protected cropping. For fresh sales and PYO, can be sown over a long period, and can command a relatively high price premium. 200 seeds per gram. Sow early February-mid July, germinates at 10-30°C. Spacing 10 x 40cm, crop May to October. 250,000 seeds per hectare drilled. Can be sown under glass. Can be sown at high density for 'baby' production.

VKO30 **Kohl Rabi Purple Micro**
A Kohl Rabi variety produced specifically for microgreen production. The microgreens produced feature a green leaf and purple stem. 300 sds/gram.

50g	100g	250g
£2.75	**£5.05**	**£11.70**

500g	1kg
£21.60	**£40.00**

organic seed
VOG342 **Noriko**
Pale green skinned variety. Very uniform plants of high quality for May-October harvesting. 250 seeds per gram.

Leeks

Leeks are another mainstay of the winter cropping programme. Plant sales is a popular market for this product. Early varieties are the most suitable for baby leek production. The later blue-green types are also used as a dot plant in bedding schemes. A good crop for harvesting over a long period, with good shelf life performance. 320-480 seeds per gram. Sow mid March-May, at 1.1-1.9kg per hectare (transplanted) or 1.9-3.4kg per hectare (direct drilled). Space 5-15cm x 30-90cm.

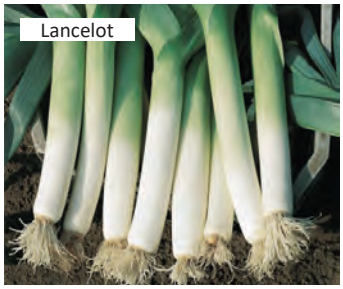

VLE046 **F1 Tempest**

An early, high yielding variety with erect, dark blue-green foliage. Good length shafts with attractive white colour. Reliable performer with good uniformity. Field trials have shown good resistance to bulbing and rust.

250sd	500sd	1,000sd
£9.20	**£14.35**	**£22.90**
2,500sd	10,000sd	25,000sd

Lettuce

A mainstay amongst salad crops. For protected all year round cropping and open ground production. Curly and coloured lettuce are popular with consumers and retailers alike. Well suited to sales in packs and as young plants. The wide range of colours and textures available makes lettuce ideal for mixed salad packs and 'baby leaf' products.

Approximate crop spacing

- Mini and small Cos: 15cm x 20cm
- Butterhead: 25cm x 30cm
- Other types: 35cm x 38cm

In row x between rows. (Actual spacing varies with production technique).

Seed count: see variety entry.

Lettuce types

Butterheads: flattish, rounded heads, soft texture, heart forming, can be grown nearly all-year-round.

Little Gem / Cos / Romaine: Tall and upright, sweet flavour, loose heart forming. Both large and small types.

Crisp / Iceberg / Batavian: crisp leaves, compact hearts. Iceberg: very crisp leaves. Batavian: thinner leaves than Icebergs, but thicker and crispier leaves than Butterheads.

Curled / Oak Leaf / Salad Bowl: mainly non-hearting types. Wide variety of leaf textures and colours. Multi and Eazyleaf® are developed to have the base cut off, leaving many similar sized, individual leaves.

Lollo Bionda / Lollo Rossa: non-hearting types with very deeply curled leaves. Lollo Bionda varieties are green, Lollo Rossa varieties are red (triple red has a more intense red colour than double red).

Butterhead - open field

split pills

VLE154 **Justine**

An ideal variety for late spring and summer cultivation. Pale, smooth, glossy head with nice texture. Tolerant of high temperatures. Sow April-July, for harvesting June-October. Resistant to LMV and Bremia BL 16-18,22,24,25,28-30.

100plt	250plt	500plt	1,000plt
£4.35	**£9.15**	**£16.80**	**£30.00**

VLE161 **Eliana**

A medium framed variety with very shiny, bright green colour. Semi-open, heavy, voluminous head. The bottom is flat and well closed. Good tolerance of tipburn and bolting. Sow March- August, for harvesting April-October. Resistant to LMV: 1 and Bremia BL 16-32. 900 seeds per gram.

Melon

For production under plastic or glass, or sales to the home gardener as a young plant. Useful for box schemes, farm gate and roadside sales. 20-60 seeds per gram. Sow March-April into modules, germinates at 20-30°C. Space the plants at 30 x 150-200cm.

VME12 **F1 Charmont**
An early maturing, vigorous, Charantais variety. Produces a prolific yield of deep round shaped fruits, with attractive colour and netting. Uniform size to fruit; typically weighing 1.0-1.2kg. The flesh is deep orange in colour, with a high sugar content (15° Brix). Very good shelf life. Resistant to Fusarium (0,1,2) and powdery mildew (1).

50sd	100sd	250sd
£8.65	**£15.45**	**£34.50**

500sd	1,000sd
£61.60	**£110.00**

VME20 **Ogen**
An open pollinated variety producing small, broad, oval fruits, green-skinned with yellow flesh. A popular product for plant sales.

50sd	100sd	250sd
£4.35	**£7.75**	**£17.25**

500sd	1,000sd
£30.80	**£55.00**

VME30 **F1 Jade Lady**
A Honeydew F1 hybrid producing fruit weighing approximately 1.5-2.5kg. The rind is smooth and creamy-white in colour. The flesh is tender, light green in colour. High sugar content gives the flesh a sweet taste. Resistant to Fusarium wilt.

50sd	100sd	250sd
£7.50	**£13.35**	**£29.80**

500sd	1,000sd
£53.20	**£95.00**

VME32 **F1 Lottie**
A classic Cantaloupe variety. Features lightly netted skin and delicately perfumed, orange flesh. The sweet flesh has a Brix of 15°. Typically produces 4-5 fruits per plant, with each fruit weighing between 1.5-2.0Kg. Resistant to downy mildew.

50sd	100sd	250sd
£8.25	**£14.75**	**£32.90**

500sd	1,000sd
£58.80	**£105.00**

VME40 **F1 Galia**
As the name suggests, a Galia type hybrid that produces very uniform, round fruit, with a small cavity and attractive netting. The fruit is firm, with good flavour and a high Brix level. Typical size is 0.8-1.2kg. Good storage ability. Resistant to Fusarium (0,1,2) and powdery mildew (0,1,2,5).

50sd	100sd	250sd
£5.90	**£10.55**	**£23.50**

500sd	1,000sd
£42.00	**£75.00**

VME42 **F1 Budgie**

A 'Canary' type melon producing 4-6 fruits on a tidy bush plant. Sweet, refreshing cream coloured flesh, with a typical Brix of 15°. Fruit normally weigh between 1.5-2.0Kg. Excellent resistance to powdery and downy mildew. Best grown under protection.

50sd	100sd	250sd
£12.20	**£21.80**	**£48.60**

500sd	1,000sd
£86.80	**£155.00**

VME48 **F1 Honey Drops Dara**

A mini-melon variety that can be used for both commercial production and hobby gardening. The fruit have a sweet sugary flavour and pleasant aroma. The skin, which turns yellow when fully ripe, is thin and allows the fruit to be eaten like an apple. Plants produce up to eighteen 100-150 gram fruits per plant.

25sd	50sd	100sd
£7.10	**£13.15**	**£24.95**

250sd	500sd
£56.90	**£107.65**

VME52 **F1 Little Darling**

A watermelon bred to embody the spirit of the classic American watermelon but in a more compact trailing form. The oval shaped fruits are typically up to 3Kg in size. The flesh is pinky-red with a sweet flavour and Brix rating of 12°. Best grown under glass or polythene tunnels for 3-4 fruits per plant.

50sd	100sd	250sd
£8.25	**£14.75**	**£32.90**

500sd	1,000sd
£58.80	**£105.00**

Onion (Salad)

Standard salad crop for bunching; relatively low maintenance, and some varieties are also suitable for overwintering for early lifting. Suitable for fresh market and prepack use. Salad onion information; 240-360 seeds per gram. Germinates 5-30°C. Sow March-April for spring crop, overwintering type July-August, pickling type mid February-March. Seed rate 15-20kg per hectare, at a population of 65-70 per metre row length.

A. cepa Varieties

VON185 **Reddy**

A long day variety that produces superb red bunching onions when grown as a salad onion from a spring sowing. Thick skin with deep red colour. This variety will also produce bulbing onions when grown at a wider spacing.

£5.60	**£9.50**	**£16.10**

2,500sd	10,000sd
£34.10	**£118.65**

Onion (Sets)

The advantages of growing onions from sets, rather than from seed, are that there is a shorter time to maturity, less sensitivity to soil types and a lower incidence of pest and disease.

In addition to the popular variety Sturon, we have put together a range of top quality commercial varieties to bring you the latest breeding enhancements.

Approx. 180-200 bulbs per kilo.

Planting

Space 10cm (in row) x 25cm (between rows). Plant onions so that the tip of the bulb is just visible above the soil. Best results acheived from planting mid March to mid April. Planting into cold wet ground can cause bolting so do not plant too early. Heat treatments are used to kill the flower embryo this prevents bolting in early plantings.

Our bulbs

Our bulbs are produced in the UK to ensure that they are ideally suited to UK growing conditions. All bulbs supplied are within the size range of 14/21, however we aim to grade them to a more precise specification where possible, e.g. 17/21. Most set bulbs are lifted in the early Autumn but need to dry and mature in order to achieve the best results. We therefore deliver our brown skinned bulbs from late February onwards, with actual delivery times varying with each variety. Early maturing brown skinned varieties and red skinned varieties need more heat treatment and so are normally delivered from mid-March onwards. If you order both brown and red skinned varieties they will normally be shipped together. Please order as early as possible because availability can be tight but demand high.

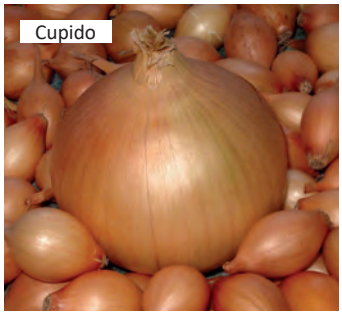

Please note: separate delivery charges apply to Onion sets - please see page 238-239 for details.

A wider range of sets, including overwintered, are available on our website

VOS020 **F1 Corrado**
Matures around mid July. Semi globe shape, with strong skins. Produces high yields. Suited to storage applications.

1kg	2½kg	5kg
£3.35	**£7.35**	**£13.60**

10kg	25kg
£25.00	**£55.00**

VOS030 **F1 Cupido**
For lifting towards the end of July, this hybrid produces high yields of semi-globe, dark skinned bulbs. Stuttgarter type. Suited to long term storage.

1kg	2½kg	5kg
£3.35	**£7.35**	**£13.60**

10kg	25kg
£25.00	**£55.00**

VOS035 **F1 Contado**
An early Stuttgarter type that typically matures 3-5 days before Sturon. Semi-globe shape with good skins and thin to medium necks.

£3.35	**£7.35**	**£13.60**

10kg	25kg
£25.00	**£55.00**

VOS040 **Sturon**
The established favourite for set based production, this open pollinated variety produces good quality round bulbs. Ready to lift in early August. Suitable for storage.

1kg	2½kg	5kg
£3.15	**£6.95**	**£12.80**

10kg	25kg
£23.50	**£51.70**

VOS045 **Red Baron**
A good quality red onion. Nice skin colour and texture. Thick necked, globe to semi-globe shape - medium storage ability.

500g	1kg	2½kg
£3.20	**£5.00**	**£11.00**

5kg	10kg	25kg
£20.25	**£37.25**	**£81.95**

Oriental and Unusual

Oriental vegetables are becoming an important market for the producer as an increasingly culturally diverse population has led to the wider culinary use of such products. Speciality leaves are now an established sector of the salads market. The colour, texture, shape and flavour of these products adds interest to mixed salad packs and baby leaf mixes.

Chinese Cabbage

VOR012 **Michihili**
Tall, cyclindrical shaped head, with crisp, light green leaves. Excellent in stir-fry cooking. 400 sds/gram.

10g	25g	50g	100g
£1.95	**£2.95**	**£5.45**	**£10.10**

250g	500g	1kg
£23.35	**£43.20**	**£80.00**

VOR004 **F1 Preduro**
A fast developing variety with good weight and dark green colour. Cylindrical shape. Very strong against bolting; ideal for early plantings. Harvest 55 days after transplanting. Intermediate resistance to clubroot.

250sd	500sd	1,000sd
£5.95	**£9.30**	**£14.80**

2,500sd	10,000sd
£35.20	**£117.70**

VOR007 **F1 Questar**
An excellent variety, with a good shape and nice dark green colour. Suitable for spring to early summer production. Harvest 60 days after planting. Trials show it has good resistance to clubroot.

250sd	500sd	1,000sd
£6.50	**£10.15**	**£16.15**

2,500sd	10,000sd
£38.40	**£128.40**

VOR008 **F1 Enduro**
Ideal for late cropping, this variety has a cylindrical shape and an attractive dark green colour. Harvest approximately 65 days after planting. Has intermediate resistance to clubroot.

250sd	500sd	1,000sd
£6.50	**£10.15**	**£16.15**

2,500sd	10,000sd
£38.40	**£128.40**

Oriental and Unusual (contd.)

Chinese Cabbage (contd.)

VOR009 **F1 Scarvita**
A new type of Chinese Cabbage. The outer leaves are dark green through to red, while the heart leaves are an intense red-pink colour. Ideal for salads and stir fries. Best suited to autumn production. Harvest approximately 60-65 days from planting.

25sd	50sd	100sd
£7.35	**£11.75**	**£18.80**
250sd	500sd	1,000sd
£37.60	**£60.10**	**£96.15**

Pak Choi

VOR016 **F1 Red Lady**
A hybrid red Pak Choi that offers excellent vigour. The very upright, long petioled habit makes for easy babyleaf harvesting. Oval leaves in deep wine red with green undersides; green stems and red veins. 400 sds/gram.

5g	10g	25g
£1.95	**£3.35**	**£7.75**
50g	100g	250g
£14.30	**£26.45**	**£61.25**

VOR045 **F1 Mei Qing Choi**
Very pale green stems with rich green foliage. Good for baby or full head production. Also suitable for baby leaf production. Very good bolt resistance, tolerant of hot and cold temperatures.

250sd	500sd	1,000sd
£4.50	**£7.00**	**£11.10**
2,500sd	10,000sd	
£26.40	**£88.30**	

VOR047 **F1 Yuushou**
A very vigorous green variety that is suitable for year round cropping. Quick to put on weight and slow to bolt. Mature plants produce 250 gram heads, which have a compact habit, bold base and good flavour. Broad light green petioles tapering to large, lime green leaves. Protected drillings: October to the end of March (use heat during propagation to minimise bolting).

500sd	1,000sd	2,500sd
£1.95	**£3.05**	**£7.20**
10,000sd	25,000sd	
£24.10	**£56.25**	

VOR046 **F1 Goku**
A slow bolting hybrid, ideal for spring and early summer plantings. Attractive glossy green leaves with long petioles that form high quality neat heads. Quick to bulk up but also holds well for flexibility at harvest time.

250sd	500sd	1,000sd
£6.10	**£9.55**	**£15.20**
2,500sd	10,000sd	
£36.20	**£120.95**	

VOR050 **F1 Joi Choi**
Vigorous hybrid, white stemmed variety, matures to 25-35cm, dense heavy heads, slow-bolting pure white petioles (leaf stalks) and rich green leaves. Suitable for baby leaf.

250sd	500sd	1,000sd
£4.55	**£7.10**	**£11.30**
2,500sd	10,000sd	
£26.90	**£89.90**	

VOR054 **Dwarf Canton White**
An open pollinated dwarf white Pak Choi variety, with compact habit. Produces plump, juicy white stems that contrast with lightly savoyed dark green leaves. 425 sds/gram.

10g	25g	50g
£2.05	**£4.70**	**£8.70**
100g	250g	500g
£16.10	**£37.20**	**£68.85**

VOR058 **F1 Baraku**
An excellent quality hybrid Pak Choi with very dark, nearly black, colour to the leaves. Leaves are oval in shape with serrated margins, with light green petioles. Ideal for baby leaf production. 425 sds/gram.

5g	10g	25g
£2.40	**£4.40**	**£10.10**
50g	100g	250g
£18.75	**£34.65**	**£80.20**

Pak Choi Micro
Bred and produced for microgreen production, these Pak Choi varieties feature the distinctive Pak Choi flavour, with either green or white stems. 375 sds/gram.

VOR060 **Green**

VOR062 **White**

50g	100g	250g
£4.45	**£8.20**	**£18.95**
500g	1kg	
£35.10	**£65.00**	

Tatsoi

VOR080 **Tah Tsai**
Suitable for both baby leaf and whole head production. Features dark green, nearly black, thick, spoon shaped leaves and short light green leaf stalks. Matures to form a rosette. Cold tolerant. 400 sds/gram.

5g	10g	25g
£2.30	**£4.25**	**£9.75**
50g	100g	250g
£18.05	**£33.40**	**£77.30**

VOR088 **F1 Rozetto**
A hybrid Tatsoi that is suitable for both babyleaf and wholehead production. Dark green, thick glossy leaves on strong, vigorous upright habit. Less sensitive to yellowing under cold stress. 450 sds/gram.

10g	25g	50g
£3.25	**£7.55**	**£13.95**
100g	250g	500g
£25.85	**£59.80**	**£110.70**

VOR084 **F1 Red**
Suitable for both babyleaf and wholehead. Mature plants have a semi upright habit and exhibit a rosette of rounded, savoyed, purple green leaves on slender, light green stalks. 400 sds/gram.

10g	25g	50g
£3.20	**£7.35**	**£13.60**
100g	250g	500g
£25.20	**£58.35**	**£108.00**

Mustard

Mustard Giant
Broad leaves with a slight savoyed texture. Can be cut at babyleaf stage or left to mature to 40-45cm. 840 sds/gram.

VOR035 **Red**

VOR037 **Green**

10g	25g	50g
£1.95	**£3.40**	**£6.30**
100g	250g	500g
£11.65	**£27.00**	**£49.95**

Mustard Streaks
A highly attractive, finely dissected leaf which has a sweet mustard flavour. Good texture for salad packs and processing. 500 sds/gram.

VOR090 **Golden**

VOR092 **Ruby**

5g	10g	25g
£2.55	**£4.70**	**£10.85**
50g	100g	250g
£20.10	**£37.20**	**£86.05**

Amaranth

VOR095 **Red Aztec**
An improved Red Amaranth variety, with an intense red colour. The distinctive flavour makes this a popular microgreen variety. Not hardy but thrives in the summer. (Please note that there is often a small percentage of green foliage). 1,240 sds/gram.

5g	10g	25g
£1.95	**£3.60**	**£8.30**
50g	100g	250g
£15.35	**£28.35**	**£65.65**

Various

VOR072 **Choy Sum Gunsho**
A vigorous variety with a large frame. Rounded leaves of mid green colour with thick flower stalks. Can be grown outside from May onwards under fleece, or under protection from February to April. 450 sds/gram.

5g	10g	25g
£2.10	**£3.90**	**£9.00**
50g	100g	250g
£16.70	**£30.90**	**£71.45**

VOR130 **Chopsuey Greens**
A member of the Chrysanthemum family, with deeply incised, bright green foliage, and tasty aromatic flavour. Harvest at baby or teen leaf stage. Can be eaten raw, lightly fried or boiled. 420 sds/gram.

25g	50g	100g
£2.60	**£4.80**	**£8.85**
250g	500g	1kg
£20.45	**£37.80**	**£70.00**

VOR010 **Corn Salad Verte de Cambrai**
Often known as Lamb's Lettuce. Traditional corn salad type suited to hand picking. Good colour and leaf shape - a consistent variety. 1,150 sds/gram.

25g	50g	100g
£2.75	**£5.10**	**£9.45**
250g	500g	1kg
£21.90	**£40.50**	**£75.00**

organic seed

VOG240 **Corn Salad Vit**
High quality variety for all year round production. Very hardy, harvest from July-September outdoors and from September-March under glass. 565 sds/gram.

10g	25g	50g
£2.80	**£6.45**	**£11.90**
100g	250g	500g
£22.05	**£51.05**	**£94.50**

VOR150 **Dwarf Cape Gooseberry**
Physalis pruinosa, also known as 'Ground Berry'. A dwarf version of the standard Cape Gooseberry growing up to 90cm in height. Produces a tasty small round berry, yellow-orange in colour. 1,300 sds/gram.

1g	$2^1/_2$g	5g
£2.15	**£5.00**	**£9.25**
10g	25g	50g
£17.10	**£39.50**	**£73.15**

VOR140 **Giant Cape Gooseberry**
Physalis peruviana, also known as 'Golden Berry'. A tall shrub growing up to a height of 180cm. Produces a small round berry fruit, yellow-orange in colour with a very sweet flavour. 1,100 sds/gram.

1g	$2^1/_2$g	5g
£2.05	**£4.75**	**£8.80**
10g	25g	50g
£16.30	**£37.65**	**£69.75**

VOR074 **Kailaan Kichi**
Also known as Chinese Broccoli. A uniform variety with large blue green waxy leaves. With excellent stem and bud eating quality. Later maturing type with good holding ability. Some resistance to downy mildew. Normally harvested when coming into flower. 400 sds/gram.

10g	25g	50g
£1.95	**£3.90**	**£7.15**
100g	250g	500g
£13.25	**£30.65**	**£56.70**

VOR102 **Komatsuna F1 Shoganyan**
Also known as Mustard Spinach. Komatsuna has a flavour that is often described as a mix of mustard and cabbage with a hint of spinach. Uniform, early maturing hybrid with dark green leaves, that are juicy and tender. 475sds/gram.

1,000sd	2,500sd	10,000sd
£2.85	**£6.75**	**£22.50**
25,000sd	50,000sd	
£52.50	**£105.00**	

VOR079 **Leaf Radish Rioja**
An all red leaf radish suitable for both microgreen and babyleaf production. Leaves are red with a distinctive radish flavour. Fast growing. (Please note that there is often a small percentage of green foliage). 75 sds/gram.

10g	25g	50g
£2.00	**£4.60**	**£8.50**
100g	250g	500g
£15.75	**£36.45**	**£67.50**

VOR025 **Mizuna**
Pencil thin white stalks with serrated, dark green leaves. A very prolific cropper which will reform after cutting. 350 sds/gram.

10g	25g	50g
£1.95	**£4.05**	**£7.50**
100g	250g	500g

£2.10	**£4.80**	**£8.85**
100g	250g	500g
£16.40	**£37.95**	**£70.20**

VOR026 **Red Mizuna**
A red version of the popular green Mizuna. Features serrated red leaves on thin stems. 350 sds/gram.

10g	25g	50g
£2.65	**£6.10**	**£11.25**
100g	250g	500g
£20.80	**£48.15**	**£89.10**

VOR030 **F1 April Cross**
Large, well-formed white rooted Mooli Radish; very high quality and good flavour and crisp texture, cropping August to November. 55 sds/gram.

5g	10g	25g
£4.95	**£9.15**	**£21.15**
50g	100g	250g
£39.15	**£72.45**	**£167.70**

VOR041 **Orach Scarlet Emperor**
Vibrant purple red, spade shaped leaves with mild spinach flavour. Ideal for summer babyleaf crops. 230 sds/gram.

5g	10g	25g
£2.05	**£3.75**	**£8.65**
50g	100g	250g
£16.00	**£29.60**	**£68.55**

Perilla
The Red Perilla has broad purple-red leaves and a slight Anise flavour. Green Perilla has a Cinnamon flavour, and is more spicy than the red. Normally used as a babyleaf product, with Sushi or as garnish. 650 sds/gram.

VOR110 **Red**
VOR120 **Green**

10g	25g	50g
£3.90	**£9.00**	**£16.70**
100g	250g	500g
£30.90	**£71.45**	**£132.30**

VOR098 **Sorrel, Red Veined**
Attractive bright green leaves contrast sharply with the red stems and red veins. Leaves have sharp and tangy Sorrel flavour. 1,000 sds/gram.

$2^1/_2$g	5g	10g
£2.10	**£3.90**	**£7.15**
25g	50g	100g
£16.55	**£30.65**	**£56.70**

VOR076 **Texsel Greens**
Derived from Ethiopian Mustard, this is a tasty, nutritious, leafy green. The plants are quick growing. The young leaves are tender enough to eat raw, with a pleasant mild cabbage flavour. 310 sds/gram.

25g	50g	100g
£2.95	**£5.45**	**£10.10**
250g	500g	1kg
£23.35	**£43.20**	**£80.00**

Oriental & Unusual (contd.)

Babyleaf & Salad Mixes

A range of mixes that can be used for cut leaf production, or for use as growing salads when sold in containers. The varieties are matched so that leaf development and flavours complement each other. Production time can be as short as four weeks. The mixes can be used as supplied or mixed with other products, such as lettuce, to provide bespoke mixes.

VOR180 **Spicy Greens Mix**
Mix includes Salad Rocket, Red Giant Mustard, Green Wave Mustard and Mizuna.

10g	25g	50g	100g
£3.25	**£7.55**	**£13.95**	**£25.85**

Parsley

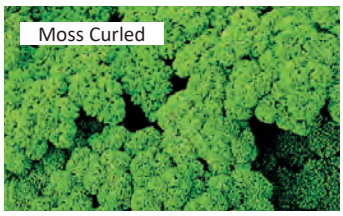

Multi-use crop for raising for pot herb sales, or for full grown plants. Also suited as a standard crop for harvesting one-off or cut and come again. Can be grown as a half-hardy perennial, but best treated as annual. Popular as a garnish for supply to the hotel trade, or for bunching. 440-500 seeds per gram. Germinates between 10 and 25°C. Sow from February to July, and September. Sowing rate 5-7.5kg per hectare. Spacing 10-30cm x 30-90cm. Harvest June onwards (spring sown) or April onwards (autumn sown).

VPA10 **Bravour**
Long-stemmed vigorous plants, with tightly curled heads of good colour and texture.

10g	25g	50g	100g

Parsnip

Long standing, low maintenance crop, popular as a large standard crop harvested over a long period (or cleared at one time), or as a 'mini-veg' crop. Good standing ability and long shelf life. 200-240 seeds per gram. Germinates at 5-20°C. Sow February-April, at 2.5-4.5 kg per hectare. Spacing 5-10cm x 45-90cm. Harvest from October to February.

primed, graded seed
VPA73 **F1 Gladiator**
Market standard variety, extremely high marketable yield of large roots with very good canker resistance. Roots have a shallow crown to reduce wastage. Suited to prepack and fresh market.

Peas

A popular market garden and pick-your-own crop. Sugar snap and mange-tout varieties command a good premium and are popular with the restaurant trade. Sales of 'pea tips' and 'in the pod' products have also been gaining popularity recently.

We are also able to supply seed for loose seed shop sales to the home gardener.

3,000-6,000 seeds per kg, 8,000 seeds per kg for petit pois types. Germinates at 5-25°C. Sow from March to June (November for overwintering varieties). Sowing rate 150-190kg per hectare. Spacing 2.5-7.5cm x 60-120cm. Harvest from early May onwards.

First Early Varieties

VPE025 **Meteor**

A neat, compact variety with excellent winter hardiness. Suitable for overwintered crops. First early, round seeded. Height typically 45cm.

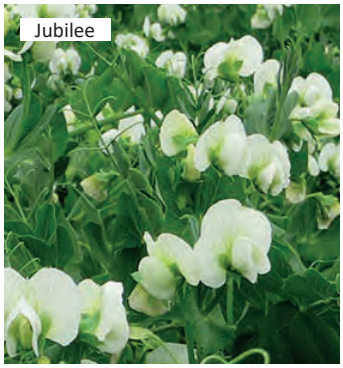

500g	1kg	2½kg
£4.65	**£7.30**	**£16.05**
5kg	10kg	25kg
£29.65	**£54.50**	**£119.90**

VPE012 **Avola**

An early maturing variety, which produces tender pods that normally contain 6-8 peas. Suitable for both fresh and frozen. Height typically 60cm.

250g	500g	1kg
£3.20	**£5.10**	**£7.95**
2½kg	5kg	10kg
£17.50	**£32.35**	**£59.50**

Second Early Varieties

VPE152 **Jubilee**

A second early variety, normally growing to a height of 60-70cm. Produces a heavy crop of dark green peas, with two pods per node. Suitable for all soil types. Resistant to Pea Wilt Race 1 and powdery mildew; moderate resistance to downy mildew.

500g	1kg	2½kg
£4.25	**£6.60**	**£14.60**
5kg	10kg	25kg
£26.90	**£49.50**	**£108.90**

VPE038 **Element**

A second early afila (semi leafless) type that delivers very high yields. Double pod set to nodes. Resistant to Pea Wilt Race 1 and powdery mildew, with moderate resistance to downy mildew. Height 55cm.

500g	1kg	2½kg
£4.25	**£6.60**	**£14.60**
5kg	10kg	25kg
£26.90	**£49.50**	**£108.90**

VPE050 **Kelvedon Wonder**

Second early maincrop variety, wrinkle-seeded, with 6-8 peas per well-filled pod. Heavy cropping dwarf (45cm) variety.

500g	1kg	2½kg
£3.85	**£6.00**	**£13.25**
5kg	10kg	25kg
£24.50	**£45.00**	**£99.00**

VPE040 **Early Onward**

Wrinkle-seeded, blunt dark green pods. Second early maincrop variety of 6-8 peas per pod. About 8-10 days earlier than Onward. Height: 60cm.

500g	1kg	2½kg
£3.85	**£6.00**	**£13.25**
5kg	10kg	25kg
£24.50	**£45.00**	**£99.00**

VPE065 **Progress No. 9**

Wrinkle-seeded second early, heavy cropper producing dark green pods 8-10cm long. Height: 40-50cm.

2½kg	5kg	10kg
£60.30	**£111.45**	**£205.00**

Maincrop Varieties

VPE060 **Onward**

High yielding variety, with large peas, 6-8 per pod, highly reliable well established variety. Height: 60cm.

500g	1kg	2½kg
£3.85	**£6.00**	**£13.25**
5kg	10kg	25kg
£24.50	**£45.00**	**£99.00**

VPE110 **Charlie**

An early maincrop afila (semi-leafless) type, typically growing to a height of 60-70cm. Produces a heavy crop of dark green peas, with a high percentage of medium sieve sized peas. Three pods per node. Resistant to Pea Wilt Race 1, powdery mildew and good resistance to downy mildew.

500g	1kg	2½kg
£3.85	**£6.00**	**£13.25**
5kg	10kg	25kg
£24.50	**£45.00**	**£99.00**

VPE090 **Hurst Greenshaft**

High yielding variety with dark green peas, 8-10 per pod, a reliable cropper at 75cm in height. AGM award winner.

500g	1kg	2½kg
£3.85	**£6.00**	**£13.25**
5kg	10kg	25kg
£24.50	**£45.00**	**£99.00**

VPE130 **Realm**

An early maincrop variety. Good early vigour. Sets multiple pods per node. High yielding. Resistant to Pea Wilt Race 1, with good tolerance to downy mildew. Height 60cm.

500g	1kg	2½kg
£3.85	**£6.00**	**£13.25**
5kg	10kg	25kg
£24.50	**£45.00**	**£99.00**

VPE120 **Oasis**

A market leading maincrop variety, normally growing to a height of 60-70cm. Produces a heavy crop of dark green peas, with three pods per node. Best suited to medium/heavy soil. Resistant to Pea Wilt Race 1 and moderate resistance to downy mildew.

500g	1kg	2½kg
£3.85	**£6.00**	**£13.25**
5kg	10kg	25kg
£24.50	**£45.00**	**£99.00**

organic seed

VOG560 **Rondo**

Wrinkle seeded late maincrop, which produces long dark green pods 10-12cm in length. Height 80-90cm.

250g	500g	1kg
£4.65	**£7.45**	**£11.70**
2½kg	5kg	10kg
£25.75	**£47.55**	**£87.50**

VPE170 **Infinity**

A very late maturing afila (semi leafless) type that typically matures at Avola +17 days and beyond, ideal for harvest extension. Resistant to powdery mildew, with moderate resistance to downy mildew. Height 60cm.

500g	1kg	2½kg
£3.85	**£6.00**	**£13.25**
5kg	10kg	25kg
£24.50	**£45.00**	**£99.00**

VPE180 **Alderman**

Tall, with very high yields. Pods produced late with a long harvest period. Needs support. Height 200cm.

250g	500g	1kg
£3.70	**£5.95**	**£9.30**
2½kg	5kg	10kg
£20.45	**£37.80**	**£69.50**

Petit Pois

VPE192 **Petit Provencal**

A traditional French Petit Pois variety that produces very sweet, small peas. Plants typically grow to a height of 40-50cm. Feature pods 7-9cm long, which contain 7-8 peas in each. Cropping can be as quick as 55 days from sowing. Suitable for overwintering.

250g	500g	1kg
£4.00	**£6.40**	**£10.00**
2½kg	5kg	10kg
£22.10	**£40.80**	**£75.00**

Peas (contd.)

Dwarf Types

VPE300 **Bernard**
A petite shelling pea that produces small pods. The compact, semi-leafless habit makes it an ideal variety for use in containers, such as window boxes. White flowers. Maximum height typically 35cm.

250sd	500sd	1,000sd
£5.15	**£8.75**	**£14.85**

2,500sd	10,000sd
£31.50	**£109.50**

Sugar Types

organic seed
VOG535 **Norli**
French mangetout type with small, dark green pods with good flavour. Height 50cm. Resistant to Fusarium Wilt.

250g	500g	1kg
£14.65	**£23.40**	**£36.70**

2½kg	5kg	10kg
£80.90	**£149.50**	**£275.00**

VPE205 **Sweet Horizon**
A high quality, late maturing, snow pea variety that produces a very heavy yield of straight, dark green pods. Pod size typically 22mm wide and 9-10cm long. Vigorous and upright habit; pods are set in doubles. Mildew resistant.

250g	500g	1kg
£6.80	**£10.85**	**£17.00**

2½kg	5kg	10kg
£37.50	**£69.30**	**£127.50**

VPE200 **Oregon Sugar Pod**
Sugar pea, 120cm tall, producing flat, 10cm pods for eating whole as a mange-tout. Pick whilst young, before the pods become too bulky.

250g	500g	1kg
£5.05	**£8.10**	**£12.70**

2½kg	5kg	10kg
£27.95	**£51.65**	**£95.00**

VPE250 **Shiraz**
A purple podded snow pea variety producing attractive flat, purple pods with good flavour. Very slow seed development. Resistant to *Erysiphe pisi* (powdery mildew).

250g	500g	1kg
£10.10	**£16.15**	**£25.35**

2½kg	5kg	10kg
£55.90	**£103.30**	**£190.00**

VPE215 **Delikett**
A high quality sugar snap pea with compact habit and high yields. Can be harvested over long period. Stringless at early stages with excellent flavour. Height 65cm. Pods 8-9cm long, 13mm wide. White flowering.

250g	500g	1kg
£6.30	**£10.10**	**£15.80**

2½kg	5kg	10kg
£34.85	**£64.40**	**£118.50**

VPE220 **Lusaka**
A high yielding sugar snap pea that is stringless at the point of picking. Long harvest window. Excellent flavour with attractive medium green pods. Compact habit; clustered pods. Pods 8-9cm long, 15mm wide. White flowering. Resistant to powdery mildew.

250g	500g	1kg
£6.85	**£10.95**	**£17.15**

2½kg	5kg	10kg
£37.80	**£69.85**	**£128.50**

Pepper

High value crop for the greenhouse or under plastic, also well suited for plant sales for the home gardener. High yielding over a long period. Becoming increasingly popular. 120-200 seeds per gram. Germinates between 25 and 30°C. Sow early December-January, or for maincrop March-April. Seed rate 400-425g per hectare. Spacing 30-60cm x 45-90cm. Grow on at 16-23°C. Harvest from early April/May, or maincrop from July. Please note that germination can be slow and erratic on some open pollinated hot peppers.

Hot - F1 Hybrids

VHP30 **Cheyenne**
A compact chili pepper (45cm in height) with medium sized, orange fruits, ideal for plant sales in pots or packs. Ideal for patios and windowsills, with prolific fruiting throughout the summer season. Fruit size 10-13cm.

50sd	100sd	250sd
£9.45	**£16.90**	**£37.60**

500sd	1,000sd
£67.20	**£120.00**

Gusto
Medium hot varieties that produce flavoursome fruits, which typically measure 55mm x 17mm. Plant habit suits a range of pots, from 15cm upwards. High yields. Fruits mature from green to red, or purple to red, and can be picked prior to maturity.

VHP80 **Green**
VHP82 **Purple**

50sd	100sd	250sd
£6.30	**£11.25**	**£25.10**

500sd	1,000sd
£44.80	**£80.00**

VHP10 **Apache**
A dwarf, chili type pepper producing good yields on compact plants. Excellent for plant sales.

50sd	100sd	250sd
£9.45	**£16.90**	**£37.60**

500sd	1,000sd
£67.20	**£120.00**

VHP03 **Firefly**
A *Capsicum frutescens* type with a high heat level of 67,000SHU. The 6cm fruits mature from white-green to red. The compact plants work well in baskets and containers. Ideal for semi-finished pot sales.

50sd	100sd	250sd
£6.70	**£11.95**	**£26.65**

500sd	1,000sd
£47.60	**£85.00**

VHP08 **Quickfire**
Probably the fastest maturing chilli pepper variety currently available in the UK, taking as little as 65 days from sowing to first fruit maturity. Produces compact, neat plants that are ideal for container use. Fruits turn from red to green, with conical shape and upward fruit presentation. Typical SHU is 40,000.

50sd	100sd	250sd
£8.65	**£15.45**	**£34.50**

500sd	1,000sd
£61.60	**£110.00**

Fresno
Improved hybrid versions of the popular Fresno chilli peppers. Conical shaped fruits typically 3 x 5cm. Turn from bright green to red, orange, yellow or black.

VHP21 **Red**
VHP22 **Orange**
VHP23 **Yellow**
VHP24 **Black**

50sd	100sd	250sd
£9.85	**£17.60**	**£39.20**

500sd	1,000sd
£70.00	**£125.00**

VHP02 **Raging Bull**
A hybrid cross between a mild, sweet Biquinho and a hot Habanero. Produces glossy, bright red, tear-drop shaped fruit. Plant height typically 40-60cm. Heat level of 100,000SHU.

50sd	100sd	250sd
£8.65	**£15.45**	**£34.50**

500sd	1,000sd
£61.60	**£110.00**

VHP16 **Habahot**
Based upon the traditional Habanero pepper this hybrid variety offers superior productivity over a prolonged period. Extremely hot. Resistant to TMV.

50sd	100sd	250sd
£6.70	**£11.95**	**£26.65**

500sd	1,000sd
£47.60	**£85.00**

Hot - Open Pollinated

VHP01 **Balls of Fire**
Produces 1.5cm round fruits that mature from creamy white to orange then red. Typically between 20-50 fruits per plant. Heat level of 20,000SHU. Makes a great edible ornamental plant.

50sd	100sd	250sd
£3.55	**£6.35**	**£14.10**

500sd	1,000sd
£25.20	**£45.00**

Carolina Reaper
An extremely hot chili pepper variety with 1.5-2 million SHU. Once over the extreme heat there is a fruity-like flavour, giving a sweet-hot combination. Fruit typically 5cm long by 3cm wide, and mature from green to red or yellow.

VHP05 **Red**
VHP06 **Yellow**

50sd	100sd	250sd
£23.15	**£41.45**	**£92.45**

500sd	1,000sd
£165.20	**£295.00**

VHP20 **Cayenne Red**
A hot, pungent pepper with long, thin fruits maturing from green to red.

50sd	100sd	250sd
£2.75	**£4.95**	**£11.00**

500sd	1,000sd
£19.60	**£35.00**

Habanero
An extremely hot pepper with unique flavour, measuring 3.5-6cm long and 2.5-5cm wide. Mature from green to white, chocolate, red, orange or yellow respectively.

VHP31 **White**
VHP32 **Chocolate**
VHP33 **Red**
VHP34 **Orange**
VHP35 **Yellow**

50sd	100sd	250sd
£2.95	**£5.30**	**£11.75**

500sd	1,000sd
£21.00	**£37.50**

Biquinho
These peppers originate from Brazil and are named after the Portuguese word for 'little beak' due to their distinctive shape. The fruits are typcally 3.5cm x 2.5cm in size and have a mild heat when ripe.

VHP54 **Red**
VHP56 **Yellow**

50sd	100sd	250sd
£3.15	**£5.65**	**£12.55**

500sd	1,000sd
£22.40	**£40.00**

VHP18 **Demon Red**
Ideal for growing in containers, this variety can be used as both an ornamental and edible pepper. The flowers and upward pointing fruits are produced throughout the season. Fruits turn from green to deep red with maturity.

50sd	100sd	250sd
£5.50	**£9.85**	**£21.95**

500sd	1,000sd
£39.20	**£70.00**

VHP36 **Scotch Bonnet Red**
Popular Habanero type pepper which measures 2.5-4cm long and 2.5-3cm wide. Mature from green to red. Very hot with strong pungency.

50sd	100sd	250sd
£2.75	**£4.95**	**£11.00**

500sd	1,000sd
£19.60	**£35.00**

VHP44 **Jalapeno M**
A well known culinary variety with mild and tasty fruits. Produces a high yield of fruits typically 8-10cm long, with a blunt end and thick walls. Matures from green to red.

50sd	100sd	250sd
£3.35	**£6.00**	**£13.35**

500sd	1,000sd
£23.80	**£42.50**

VHP45 **Tabasco**
As used for Tabasco sauce, this pepper has fruits which measure 2.5-3cm long and up to 1cm wide. Upright pods. Ripens from greenish-yellow, to orange, to red. Extremely hot.

50sd	100sd	250sd
£2.75	**£4.95**	**£11.00**

500sd	1,000sd
£19.60	**£35.00**

Naga
A range of Naga type varieties. The hot fruits often reach 0.8-1.3 million SHU at maturity. Fruit size can vary but typically measure 1.0cm x 3.0cm. Mature from green to red, yellow, orange or white respectively.

VHP61 **Red**
VHP63 **Yellow**
VHP65 **Orange**
VHP67 **White**

50sd	100sd	250sd
£20.05	**£35.85**	**£79.90**

500sd	1,000sd
£142.80	**£255.00**

VHP72 **Padron**
Padron peppers are traditionally used for Spanish Tapas. When harvested as green and immature they have a mild heat but occasionally one will be extremely hot. Heat intensifies with maturity. When mature the fruits are approximately 10cm long and 4cm wide at the shoulder but tapering towards the tip.

50sd	100sd	250sd
£6.70	**£11.95**	**£26.65**

500sd	1,000sd
£47.60	**£85.00**

VHP78 **Trinidad Scorpion**
An extremely hot chili variety reputed to have an SHU of 1.2 million. The round shaped fruits feature a distinctive tail and mature from lime green to bright red. Maximum fruit size is 5cm x 3cm but often the overall size is smaller. Needs high temperatures to germinate with the optimum being 27-32°C. Please take care when handling fruit.

50sd	100sd	250sd
£9.85	**£17.60**	**£39.20**

500sd	1,000sd
£70.00	**£125.00**

VHP86 **Pot Black**
A compact chili variety, ideal for container growing. Fantastic black leaves and a profusion of attractive purple flowers. Small edible fruits typically 3-4cm in length. Extremely hot fruits. Makes a striking plant sales item.

50sd	100sd	250sd
£10.60	**£19.00**	**£42.30**

500sd	1,000sd
£75.60	**£135.00**

VHP28 **Hot Lemon**
Originally from Ecuador, the pure lemon yellow fruits have a distinct wrinkled texture with tender skin and a spicy aroma. The heat is similar to a cayenne type but with a very different, unique flavour. The immature fruits, which are green in colour, can be used when a more delicate flavour is required. Best used fresh. Fruits typically 8-10cm in length.

50sd	100sd	250sd
£3.95	**£7.05**	**£15.70**

500sd	1,000sd
£28.00	**£50.00**

We could not fit all our peppers in the catalogue so please have a look at the full range on our website

Peppers (contd.)

Rootstock - F1 Hybrids

VHP96 **Protector (Rootstock)**
A hybrid rootstock suitable for use with both hot and sweet pepper varieties. Resistant to PVY, Tm, Pc, Ma, Mi, Mj.

50sd	100sd	250sd
£7.10	**£12.65**	**£28.20**

500sd	1,000sd
£50.40	**£90.00**

Sweet - F1 Hybrids

VSW142 **Akron**
Excellent high yielding Lamuyo hybrid with good vigour and cover. The elongated fruits are very fleshy with thick walls. Fruits mature from green to intense red. Fruit typically 9-10 x 14-16cm in size. Resistant to TMV.

50sd	100sd	250sd
£5.90	**£10.55**	**£23.50**

500sd	1,000sd
£42.00	**£75.00**

VSW160 **Mavras**
A purple coloured Sweet Pepper. In the unripe stage the fruit is shiny purple, later turning into dark red. This large block type is thick walled and 3-4 lobed. Tm 2 resistant.

50sd	100sd	250sd
£14.95	**£26.70**	**£59.55**

500sd	1,000sd
£106.40	**£190.00**

VSW120 **Bell Boy**
Deep coloured green to red blocky fruits, with thick walls and crispy flesh. An excellent plant sales variety. Tm resistant.

50sd	100sd	250sd
£6.70	**£11.95**	**£26.65**

500sd	1,000sd
£47.60	**£85.00**

Snacking Series
A pair of compact Sweet Pepper varieties producing small, pointed fruits. Sweet flavour and crunchy texture making them great snacking peppers. Around 30 fruits per plant. Good for use in patio containers. Typical plant height 60cm. Ideal for young plant sales.

VSW122 **Hami**
Matures to bright red colour.

VSW124 **Hamik**
Matures to shiny orange colour.

50sd	100sd	250sd
£4.75	**£8.45**	**£18.80**

500sd	1,000sd
£33.60	**£60.00**

Star Series
A complementary range of block peppers. The fruits are square in shape with thick walls, sweet, crisp taste. Fruit dimensions are typically 9-10cm long and 7-9cm in diameter.

VSW151 **Red Star**
Matures from green to an intense red.

VSW152 **Golden Star**
Matures from dark green to brilliant yellow.

VSW153 **Bright Star**
Matures from dark green to vibrant orange.

VSW154 **Purple Star**
Matures from deep purple to dark red.

VSW159 **Star Mix**
A formula mix of the Star series colours.

50sd	100sd	250sd
£6.70	**£11.95**	**£26.65**

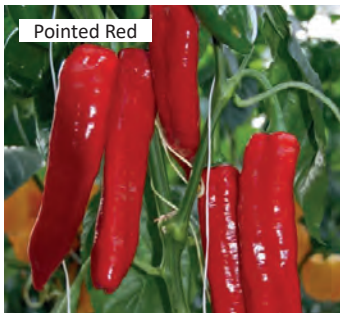

500sd	1,000sd
£47.60	**£85.00**

organic seed
VOG570 **Bendigo**
This green-red pepper has a strong, open habit and attractive, blocky fruit which is produced evenly throughout the season. High yielding - sets easily and is resistant to sunscald and blossom end rot. Resistant to Tm race 0.

50sd	100sd	250sd
£25.15	**£44.95**	**£100.30**

500sd	1,000sd
£179.20	**£320.00**

Sweet Point Series
Sweet Point varieties, producing long pointed fruits that typically mature at around 20cm in length. The skin is smooth, while the flesh is thick, crunchy and sweet. Mature fruit weight is approximately 100 grams per fruit. Plant has erect habit with medium spacing to internodes. Resistant to TMV (0).

VSW182 **Red**
Matures from green to intense red.

VSW184 **Yellow**
Matures from green to bright yellow.

50sd	100sd	250sd
£5.50	**£9.85**	**£21.95**

500sd	1,000sd
£39.20	**£70.00**

VSW192 **Mohawk**
A dwarf Sweet Pepper very similar to Redskin, but it produces medium sized orange fruits. Good for use in patio containers.

50sd	100sd	250sd
£9.45	**£16.90**	**£37.60**

500sd	1,000sd
£67.20	**£120.00**

VSW190 **Redskin**
A true dwarf bell pepper, which is ideal for growing in pots and containers. Very early fruiting, with an excellent yield of medium sized fruits which turn red. Ideal for plant sales.

50sd	100sd	250sd
£9.45	**£16.90**	**£37.60**

500sd	1,000sd
£67.20	**£120.00**

Sweet - Open Pollinated

Dream Series
A prolific crop of peppers are produced on these attractive, compact bushes. The brightly coloured, tapered fruits are typically 8cm long and are ideal for stuffing, grilling, pickling or eating straight off the plant.

VSW162 **Lemon**
Matures to bright yellow colour.

VSW164 **Tangerine**
Matures to orange-red colour.

50sd	100sd	250sd
£3.95	**£7.05**	**£15.70**

500sd	1,000sd
£28.00	**£50.00**

Potatoes

Potatoes remain one of the most popular and productive crops grown by amateur and professional alike, and continue to be a staple part of most diets. Potatoes can be grown in almost any soil type, and are ideal for 'cleaning up' previously uncropped land. Potatoes can also be grown in containers.

Potato types

First Earlies: chitting essential; plant mid to late March at a depth of 10cm, spaced 30cm in row and 45cm between rows; harvest as 'new' potatoes in June and July when the first flowers appear.

Second Earlies: chitting essential; plant early to mid April, space as per First Earlies; harvest as 'new' potatoes in July and August when the first flowers appear.

Salad: treat as per First Earlies.

Maincrop: chitting beneficial but not essential; plant mid to late April at a depth of 10cm, spaced 38cm in row and 68cm between rows; harvest between August and October when the foliage dies back; can be stored.

Cultivation terms

Chitting: when delivered lay tubers out in tray with rose end (most eyes) uppermost. Keep in frost free, light room until sprouts form (normally after 6 weeks).

Earthing-up

When the haulm (foliage) is approximately 20cm tall draw up soil around stem to form a flat ridge. Earthing-up improves drainage and growing environment for the plant giving a much improved yield. Earthing-up is also essential for reducing greening.

Our tubers

All our tubers are produced in Scotland and are certified by FERA as reaching the high quality standards required to be classified as 'Certified Seed Potatoes'. Please note that due to marketing and trade agreements not all varieties of Potato can be shipped outside of the UK, please contact us for further details.

Our seed potatoes are available for delivery around mid December or mid January, please specify your preferred delivery period when ordering. Please note: separate delivery charges apply to Potatoes - please see page 238 for details.

First Earlies

Swift

A very early, modern scraper, suitable for growing in containers, under polythene or glass, and field production. Oval shape, cream coloured flesh and good flavour. Moderate blight resistance and high scab resistance. Little discolouration when cooked, fairly firm flesh. Suitable for boiling and salad use.

VPT005N 2kg **£4.95**
VPT005B 20kg **£35.55**

Pentland Javelin

A very popular early scraper. Produces oval shaped tubers with white flesh. A flavoursome variety with excellent cooking qualities. Low blight resistance and high scab resistance. Resistant to Eelworm (PCN Ro1). Minimal discolouration when cooked, fairly firm flesh. Suitable for general purpose, boiling and salad use.

VPT010N 2kg **£4.95**
VPT010B 20kg **£35.55**

Casablanca

A modern first early variety with smooth white skin, shallow eyes and creamy flesh. Excellent cooking performance makes it suitable for chipping, baking and boiling. Also gathering a following for showbench use. Can be grown in containers. Cropping can be in as little as 62 days. Resistant to blackleg and Eelworm (PCN Ro1).

VPT018N 2kg **£4.95**
VPT018B 20kg **£35.55**

Premiere

A quick maturing first early that can be harvested in approximately 10-12 weeks from planting. The tubers are oval to round in shape, with shallow eyes and yellow skin and flesh. Ideal for baking, boiling, chipping, roasting and salad use. Resistant to blight, common scab, powdery scab, spraing and Eelworm (PCN Ro1).

VPT020N 2kg **£4.95**
VPT020B 20kg **£35.55**

Second Earlies

Kestrel

An exhibition quality variety that produces good yields of tasty tubers. Long oval shape, white coloured flesh, white skin with blue eyes. High blight resistance and moderate scab resistance. Slug resistant. No discolouration when cooked, fairly firm flesh. Suitable for general purpose, chipping and baking applications.

VPT030N 2kg **£4.95**
VPT030B 20kg **£35.55**

Wilja

Probably the most popular Second Early, producing high yields of large, yellow coloured, long oval tubers. Good flavour and excellent cooking qualities. Moderate blight resistance and high scab resistance. No discolouration when cooked, and very firm flesh. For general purpose and boiling use.

VPT035N 2kg **£4.95**
VPT035B 20kg **£35.55**

Acoustic

A high yielding second early variety that has shown strong resistance to blight. Produces round, pale skinned tubers. When lifted early the texture is waxy making the tubers ideal for salads and boiling. Later in the season the texture is more floury making the tubers ideal for chips, baking, mashing and roasting.

VPT038N 2kg **£4.95**
VPT038B 20kg **£35.55**

Nadine

A modern disease resistant potato that reputedly produces world record yields. A short oval, white-yellow variety with top exhibition appearance. Moderate blight resistance and high scab resistance. Resistant to Eelworm (PCN Ro1). No discolouration when cooked, and fairly firm flesh. Very waxy. For general purpose, boiling and salads use.

VPT040N 2kg **£4.95**
VPT040B 20kg **£35.55**

Maincrop

Rooster

An increasingly popular variety, which is easy to grow and very versatile. Oval tubers with red skin and yellow flesh. Floury texture and delicious flavour. Moderate blight and scab resistance. Good resistance to spraing. Suitable for mashing, steaming, roasting, chipping and crisping.

VPT060N 2kg **£4.95**

Desiree

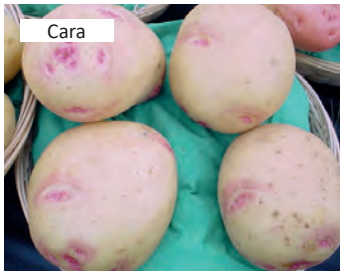

Probably the world's favourite red variety, and clearly the potato of choice for celebrity TV chefs. Produces long, oval shaped tubers. Firm with little discolouration when cooked. Strong flavour. Drought resistant. Some resistance to blight and scab.

VPT057N 2kg **£4.95**
VPT057B 20kg **£35.55**

Potatoes (contd.)

Maincrop continued

Cara
A popular variety that produces high yields of short oval tubers, with white skin and red eyes. High blight resistance and high scab resistance. Resistant to Eelworm (PCN Ro1). No discolouration when cooked, and firm flesh. Suitable for general purpose uses. The perfect variety for allotments.

VPT050N 2kg **£4.95**
VPT050B 20kg **£35.55**

Sarpo Mira
A maincrop variety that produces tasty, pinkish-skinned tubers. Shown to have good late blight resistance and tolerance to drought conditions. The pink skin reduces slug damage while the dense foilage helps supress weeds. Suitable for baking, chipping and roasting. Stores well for several months.

VPT056N 2kg **£4.95**
VPT056B 20kg **£35.55**

Caledonian Rose
A versatile maincrop variety that produces tubers with attractive bright red skin and pale yellow flesh. Wonderful flavour and texture. Suitable for boiling, mashing, baking and roasting. Good resistance to common scab, Eelworm (PCN Ro1) and blackleg.

VPT062N 2kg **£4.95**
VPT062B 20kg **£35.55**

Salads

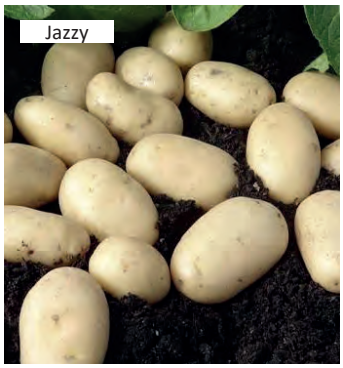

Charlotte
A popular variety and probably the best salad type currently available. Produces high yields of tasty, uniform, long oval, pale yellow tubers. High blight resistance and high scab resistance. Suitable for boiling and salad applications.

VPT065N 2kg **£4.95**
VPT065B 20kg **£35.55**

International Kidney
A classic heritage variety. If lifted early they are small, mild and waxy, and if left to mature they become large and floury. Yellow, long oval tubers. Low blight resistance and high scab resistance. Taste great hot or cold, sliced, diced or whole. Suitable for boiling and salads.

VPT070N 2kg **£4.95**
VPT070B 20kg **£35.55**

Jazzy
A recently introduced salad variety that delivers a prolific yield of small, waxy tubers. Great flavour. Suitable for boiling, mashing, roasting or steaming. Winner of RHS Award of Garden Merit.

VPT071N 2kg **£4.95**
VPT071B 20kg **£35.55**

Nicola
A tried and tested variety producing excellent, well flavoured salad potatoes. The firm, long oval tubers have yellow skin and light yellow flesh. Tasty hot or cold. Well suited to roasting, boiling and salad uses. Has low blight resistance but high scab resistance. Resistant to Eelworm (PCN Ro1).

VPT080N 2kg **£4.95**
VPT080B 20kg **£35.55**

Radicchio

Also known as 'Red Hearted Chicory', gaining popularity as a salad crop, yielding a strong red leaf for use in salad packs and as whole heads. Popular salad leaf for the restaurant trade that can be produced over a long season. A mainstay of prepared leafy salad packs. 400-800 seeds per gram. Germinates between 10 and 30°C. Sow from March to May in modules, crop from June to November. Spacing 30 x 30cm, approx 110,000 plants per hectare.

VRA005 **Palla Rossa 3**
An autumn cropping variety that produces bright red leaves with white ribs. Uniform well wrapped round heads, although also very popular as a babyleaf product. 480 seeds per gram.

VRA020 **Leonardo**
A productive variety for harvesting between July and November, with additional storage potential. Large frame with round deep red heads. High percentage cut.

100plt	250plt	500plt	1,000plt
£6.70	**£14.10**	**£25.90**	**£46.25**

Radish

A fast-maturing, long season crop suitable for bunching and prepack. A popular salad item which is high yielding, in limited space. An excellent catch crop throughout the season. 80-100 seeds/g. Germinates between 14 and 30°C. For early glasshouse production sow January-March. Sow maincrop March-August. Sow late glasshouse crop September-October. 60-75kg seed per hectare. Spacing 1.5-2.5cm x 20-45cm.

VRA064 **F1 Bandito**
A hybrid round red radish for sowing from mid-march to mid-August. Uniform shape with thick skin. Small leaf attachment and fine tap root. High tolerance to cracking.

1,000sd	2,500sd	5,000sd	10,000sd
£3.80	**£8.95**	**£15.30**	**£28.70**

VRA065 **F1 Celesta**
A hybrid Cherry Belle type with excellent vigour, uniformity and bolt tolerance. Good contrast between red skin and white, juicy flesh. Strong, compact and upright foliage. Suitable for both outdoor and protected production.

2,500sd	5,000sd	10,000sd	25,000sd

VOG500 **Oriental Rosa 2**
Very large tapered roots, similar to China Rose. The roots are a uniform size and of attractive colour. Interesting vegetable for box systems. 80 seeds per gram.

10g	25g	50g	100g	250g
£2.55	**£5.90**	**£10.90**	**£20.20**	**£46.70**

Rhubarb

An ideal low maintenance crop, and popular for plant and crown sales. The use of seed-bed raised one-year-old crowns will speed up the time from crop establishment to first harvest, and will provide a crop in the second year, from March onwards. 50-80 seeds per gram. Germinates between 10°C and 30°C. Sow from February-April. Spacing 60-120cm x 90-150cm. 5,000-18,000 plants per hectare.

Seed

VRH20 **Victoria**
Very popular maincrop variety. This heavy yielding, long stalked variety is ideal as a good low maintenance crop.

5g	10g	25g	50g	100g	250g
£1.95	**£3.60**	**£8.30**	**£15.35**	**£28.35**	**£65.65**

Crowns

Please order by the end of February for delivery late March or early April.

Please note: separate delivery charges apply to Rhubarb crowns - please see pages 238-239 for details.

VPL44 **Raspberry Red**
An early cropping variety that produces thick, deep red stalks. Delicious sweet flavour. Vigorous growth that doesn't require forcing.

5 crowns **£12.85**

VPL46 **Goliath**
A mid-season variety that produces a heavy crop. The red stalks are thick but not tough or stringy. Excellent flavour. Plant height typically 90-120cm.

5 crowns **£12.85**

Rocket

Rocket remains a popular ingredient of mixed salad packs. The tangy leaves add a distinctive flavour to salads. The development of cultivated x wild hybrids has added to the popularity of this product, particularly with the restaurant trade. Produce outside during the spring and summer, and under protection during the winter. Sowing depth 1cm. Spacing (final and for cut-and-come-again) 15cm in row, 15cm between rows.

VRO10 **Cultivated**

Plain Rocket. Leaves can be picked individually for a distinctive peppery-flavoured leaf. Very useful in mixed salad packs. Long, strap like, serrated leaves, dark green in colour. Very quick-maturing. 700 sds/gram.

50g	100g	250g

Spinach

Spinach consumption is showing an upturn, and has benefited from positive marketing. Excellent as a choice for 'baby veg' leaf, both fresh and pre-packed. Well regarded by the restaurant trade. 80-100 seeds/g. Sow 10-30°C. Sow March to mid July, seed rate for fresh market 20-25kg per hectare, for processing 32-50kg per hectare. Spacing 5-15cm x 30-90cm.

VSP22 **F1 Harp**

Oriental spinach with attractive serrated leaves. Thick leaves with a smooth leaf surface and dark green colour. Excellent flavour. Upright growth aids picking. Suitable for baby, teen and bunching production. Suitable for sowing January-March and October-December under glass. Mildew resistance 1-12,14-16,19.

Squash

Courgette

The courgette crop has recently benefited from the increased interest in gourmet cooking. Courgette flowers and yellow fruited varieties also fulfil a specialist demand from the restaurant market, while recently introduced top quality round courgettes add extra interest. Very prolific, cost-effective croppers. Can be grown early or late under glass to extend the season, when there is a price premium. 5-7 seeds per gram. Sow from early April to early June, at 3.5-5kg per hectare. Space at 60-120 by 90-150cm, giving a plant population of around 5,000-18,000 per hectare. Harvest from July onwards.

The majority of the varieties listed as courgettes can also be used to produce marrows, however we recommend the use of the varieties listed for marrow production to achieve the best results.

Courgettes - Round

VMA070 **F1 Eight Ball**

A hybrid courgette variety producing dark green, uniform, round fruits. More even cropping with higher yields than open pollinated round varieties. Bush habit.

50sd	100sd	250sd	500sd
£6.50	**£11.60**	**£25.85**	**£46.20**

VMA075 **F1 One Ball**

A bright yellow round fruited hybrid courgette variety. Works well in combination with F1 Eight Ball. Bush habit. Ideal for novelty sales.

50sd	100sd	250sd	500sd
£6.50	**£11.60**	**£25.85**	**£46.20**

Courgettes - Standard

VMA080 **Green Bush**

Produces dark green fruits; well suited to plant sales. Can be picked as standard sized courgettes, or left to mature into marrows.

10g	25g	50g	100g
£1.95	**£3.50**	**£6.50**	**£12.00**

250g	500g	1kg
£27.70	**£51.30**	**£95.00**

organic seed

VOG640 **Black Beauty**

Strong growing plant that gives a good yield of standard, dark green skinned fruits. Crops over a long period.

10g	25g	50g
£1.95	**£4.45**	**£8.20**

100g	250g	500g
£15.15	**£35.00**	**£64.80**

VMA010 **F1 Ambassador**

Standard variety for courgette plant sales. Quick-maturing, cylindrical fruits, open habit with few side shoots. Lacks the yields and uniformity of more modern hybrids, making it less suitable for commercial production.

100sd	250sd	500sd	1,000sd
£7.05	**£15.70**	**£28.00**	**£50.00**

organic seed

VOG252 **F1 Dunja**

High yielding hybrid courgette, with shiny, finely speckled, dark green fruits. Compact frame with an open habit makes for easy harvesting. Strong against powdery mildew, zucchini yellow mosaic virus, papaya ringspot virus and melon mosaic virus.

50sd	100sd	250sd	500sd
£22.40	**£40.05**	**£89.30**	**£159.60**

VMA112 **F1 Party**

A high yielding parthenocarpic variety with mid early maturity. The dark green fruits are typically 18-20cm in length with a cylindrical shape. Intermediate resistance to zucchini yellow mosaic virus and watermelon mosaic virus.

50sd	100sd	250sd	500sd
£11.80	**£21.10**	**£47.00**	**£84.00**

VMA116 **F1 Tosca**

A very productive variety that is early to mature. Suitable for both commercial and allotment production. The compact and bushy plants produce shiny, dark green fruits, typically 18-22cm in length. Tolerance to powdery mildew.

50sd	100sd	250sd	500sd
£10.60	**£19.00**	**£42.30**	**£75.60**

VMA105 **F1 Midnight**

The dark green, glossy fruits are produced on a very compact plant. High yielding. Completely spineless making it easy to pick.

50sd	100sd	250sd	500sd
£5.90	**£10.55**	**£23.50**	**£42.00**

VMA022 **F1 Precioza**

A superb variety delivering high yields of mid green, straight, shiny fruits. Open, upright habit makes for easy harvesting. Highly recommended for all levels of production. Tolerant of cucumber mosaic virus, melon mosaic virus, zucchini yellow mosaic virus and powdery mildew.

50sd	100sd	250sd	500sd
£15.30	**£27.40**	**£61.10**	**£109.20**

VMA030 **F1 Safari**

A unique variety that produces high yields of striking green striped, cylindrical, fruits. Spine free, bush habit. Contrasts well with conventional courgette varieties.

50sd	100sd	250sd	500sd
£5.90	**£10.55**	**£23.50**	**£42.00**

VMA038 **F1 Atena**

An early hybrid variety that produces a heavy crop of golden-yellow courgettes. Sweet flavour to creamy flesh with good internal texture. Semi-compact plant frame; easy picker. Fruits best harvested when 15-20cm in length.

50sd	100sd	250sd	500sd
£3.95	**£7.05**	**£15.70**	**£28.00**

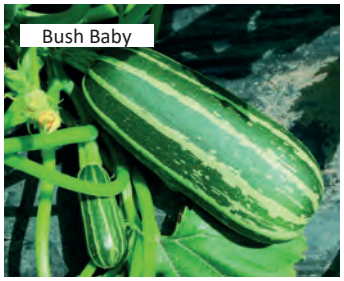

VMA085 **F1 Gold Rush**

Lacks the high yields and uniformity of the more modern hybrids, but still produces a good number of decent yellow courgettes. Ideal for the plant sales trade.

5g	10g	25g	50g
£3.90	**£7.15**	**£16.55**	**£30.65**

100g	250g	500g
£56.70	**£131.25**	**£243.00**

Marrows

VMA095 **F1 Bush Baby**

A baby marrow variety bred to satisfy market demands for a smaller marrow. Grows to approximately three quarters the size of a standard variety. Distinctive stripes on green fruit. Suitable for field and container production. Produces a high yield per plant.

50sd	100sd	250sd	500sd
£6.70	**£11.95**	**£26.65**	**£47.60**

VMA065 **F1 Tiger Cross**

Striped Green Bush type hybrid. Early to crop. Resistant to cucumber mosaic virus.

50sd	100sd	250sd	500sd
£6.50	**£11.60**	**£25.85**	**£46.20**

Pumpkins

The Hallowe'en pumpkin market is as popular as ever. Relatively easy to produce, with good storage qualities. Also gaining popularity for its culinary uses. Good for young plant sales and for P.Y.O. use. 4-10 seeds per gram. Germinates between 15 and 30°C. Sow from late March-May into modules, or June direct. Spacing 90-150cm x 180-240cm. Harvest from July to October. All our varieties are vine types unless stated otherwise.

VSQ200 **F1 Gold Speck**

A prolific munchkin type that produces orange, scalloped fruits that weigh approximately 100-200 grams each. Fruit typically 9-12cm in diameter. Bush plant habit.

25sd	50sd	100sd	250sd
£4.15	**£7.70**	**£14.60**	**£33.30**

VSQ230 **F1 Casperita**

A hybrid 'Munchkin' type producing small, white pumpkins, typically 750 grams in size. Fruits feature excellent skin finish and strong handles. Fruit diameter 12-14cm in size. Recommended cropping of 5-10 fruits per plant.

25sd	50sd	100sd	250sd
£6.75	**£12.55**	**£23.75**	**£54.15**

VSQ290 **F1 Chucky**

An orange hybrid that delivers a very high yield of small, uniform fruits. Strong, dark green handles. Fast maturity. Fruits typically 0.9-1.4Kg in size.

25sd	50sd	100sd	250sd
£4.15	**£7.70**	**£14.60**	**£33.30**

VSQ300 **F1 Snowball**

A smaller, white hybrid variety. The round fruits feature a bright white skin, fine ribbing and dark green handles. Colour holds well even under stress conditions. The perfect pumpkin for painting. Fruits typically around 1.0-2.0Kg in size.

25sd	50sd	100sd	250sd
£5.35	**£9.95**	**£18.90**	**£43.05**

VSQ310 **Zombie**

A scary looking warty variety that is great for enhancing Hallowe'en displays. A high concentration of warts. Good yields on trailing plant habit. Fruits typically around 1.5-2.5Kg in size. Thick skin allows for extended storage periods.

25sd	50sd	100sd	250sd
£4.70	**£8.70**	**£16.45**	**£37.50**

VSQ320 **F1 Spitfire**

A hybrid variety producing small, slightly flattened fruits with good orange colour. Fruits typically around 2.0Kg in size. Intermediate resistance to powdery mildew (Px).

25sd	50sd	100sd	250sd
£4.00	**£7.40**	**£14.00**	**£31.95**

VSQ330 **F1 Fireball**

A small, decorative Hallowe'en type with vibrant orange skin and contrasting yellow stripes. The flat-round fruits typically weigh 2.5-3.4Kg. Good storage potential.

25sd	50sd	100sd	250sd
£6.40	**£11.90**	**£22.55**	**£51.35**

VSQ340 **F1 Hot Chocolate**

A great novelty addition to a pumpkin display with its unique chocolate colour. Strong handles. Fruit typically 2.3-3.6Kg in size.

25sd	50sd	100sd	250sd
£5.90	**£10.95**	**£20.70**	**£47.20**

VSQ390 **F1 Fright Night**

A small, dark orange coloured variety bred for UK production. Semi-bush habit. Produces 2-3 fruits per plant, with typical diameter of 19-20cm and a weight of 2.8-3.2Kg.

25sd	50sd	100sd	250sd
£5.70	**£10.60**	**£20.10**	**£45.80**

VSQ410 **F1 Hermes**

An excellent dark orange coloured, medium sized Hallowe'en variety. Well defined ribs and strong handles. Semi-bush habit. Round fruits typically weigh 3.5-5.5Kg.

25sd	50sd	100sd	250sd
£4.70	**£8.70**	**£16.45**	**£37.50**

VSQ460 **F1 Racer**

A semi-bush variety producing fruits typically 4-7Kg in size. Good colour and strong handles. Consistently delivers high yields. An ideal Hallowe'en pumpkin.

50sd	100sd	250sd	500sd
£5.80	**£10.95**	**£25.00**	**£47.25**

VSQ440 **F1 Harvest Moon**

An early maturing and compact plant that produces fruits typically 4-5Kg in size. Flat globe shape with strong handles and attractive colour. Ideal for making Hallowe'en lanterns.

50sd	100sd	250sd	500sd
£7.10	**£13.40**	**£30.55**	**£57.75**

VSQ480 **F1 Specter**

A distinctive, creamy-white to pale yellow variety. Lightly warted fruits with strong handles. Good yield of uniform, round fruits that typically weigh 5-7Kg.

25sd	50sd	100sd	250sd
£5.90	**£10.95**	**£20.70**	**£47.20**

VSQ490 **F1 Mellow Yellow**

A unique variety producing bright lemon yellow coloured fruits that are typically 5.4-7.3Kg in size. Adds a touch of novelty to any pumpkin range

25sd	50sd	100sd	250sd
£5.70	**£10.60**	**£20.10**	**£45.80**

VSQ580 **F1 Jack Of All Trades**

A classic Hallowe'en pumpkin variety re-introduced due to popular demand. Produces medium sized fruits (typically 4-5Kg in size) with a bright orange colour and slight ribs. The fruits have a round shape and flat base, making them a popular choice for carving. The orange flesh is ideal for soups and pies.

50sd	100sd	250sd	500sd
£4.50	**£8.55**	**£19.45**	**£36.75**

organic seed

VOG655 **Jack O' Lantern**

A long established favourite with the Hallowe'en market. Fruit size 4-7Kg. Medium orange colour and sweet flavoured flesh. Lacks the uniformity of hybrids so shapes and sizes can vary.

50sd	100sd	250sd	500sd
£2.90	**£5.50**	**£12.50**	**£23.65**

VSQ525 **F1 Warty Goblin**

A heavily warted variety with orange skin and green warts. A flat-round shape with hard skin. Produces a high yield of fruits, which are typically 4-9Kg in weight.

25sd	50sd	100sd	250sd
£4.70	**£8.70**	**£16.45**	**£37.50**

Squash (contd.)

Pumpkins continued

VSQ582 **F1 Corvette**
A modern hybrid variety with the added benefit of powdery mildew (Px) resistance. The semi-bush habit produces attractive round fruits with good colour. Smooth skin and slight ribbing, with strong, well attached handles. Fruits typically 5-7Kg. Also exhibits tolerance to viruses ZYMV and WMV.

25sd	50sd	100sd	250sd
£4.45	**£8.25**	**£15.65**	**£35.70**

VSQ550 **F1 Wicked**
A trailing variety producing fruits typically 6-8Kg in size. Bred to work well in cooler climates, this early maturing variety will also store well due to good soft rot tolerance. Deep orange colour and smooth skin, which is easy to carve. An ideal large Hallowe'en pumpkin.

25sd	50sd	100sd	250sd
£4.00	**£7.40**	**£14.00**	**£31.95**

VSQ510 **F1 Carrie**
Produces attractive round fruits that are dark burnt orange in colour. Strong, dark green handles. Fruits typically 7-9Kg in size. Semi-bush habit. Intermediate resistance to powdery mildew (Px).

25sd	50sd	100sd	250sd
£4.35	**£8.05**	**£15.25**	**£34.70**

VSQ500 **F1 Magic Lantern**
A classic Hallowe'en variety, with upright shape and classy appearance. Good deep orange colour and strong handle; well defined ribs. Fruit typically 6.8-11.4Kg depending upon number left on vine. Produces a high yield. Intermediate resistance to powdery mildew.

25sd	50sd	100sd	250sd
£4.15	**£7.70**	**£14.60**	**£33.30**

VSQ240 **Atlantic Giant**
A very large pumpkin, ideal for plant sales or shows; often used for competitions.

25sd	50sd	100sd	250sd
£2.95	**£5.45**	**£10.35**	**£23.60**

VSQ584 **F1 Camaro**
A recently introduced hybrid variety with improved levels of powdery mildew (Px) resistance. The reduced vine habit produces attractive round fruits with classic orange coloured rind. Smooth skin and slight ribbing, with strong, well attached handles. Fruits typically 9-11Kg.

25sd	50sd	100sd	250sd
£4.40	**£8.35**	**£15.85**	**£36.10**

VSQ570 **F1 Gladiator**
A popular variety that typically produces fruits 9-14Kg in size. Excellent deep orange colour; deep round shape to pumpkins. Vigorous variety. Intermediate resistance to powdery mildew.

25sd	50sd	100sd	250sd
£4.15	**£7.70**	**£14.60**	**£33.30**

VSQ530 **F1 Big Loretta**
A hybrid that produces extra large fruits, that typically exceed 14Kg in size. Thick, strong handles and attractive dark burnt orange colour to the skin.

25sd	50sd	100sd	250sd
£5.20	**£9.65**	**£18.25**	**£41.65**

VSQ590 **F1 Polar Bear**
An extra-large white pumpkin, with fruit typically over 15Kg in size. Good white colour that is retained well after harvest. Vine habit. Upright shape to ribbed fruit. Best grown with one fruit per plant.

25sd	50sd	100sd	250sd
£7.10	**£13.15**	**£24.95**	**£56.90**

VSQ595 **Rouge Vif d'Etamps**
An heirloom variety from France. Often known as the 'Cinderella' pumpkin due to a classic shape that is often seen in fairytale illustrations. Flattened globe shaped fruits with ribs/lobes. Striking red-orange colour. A sweet flavour that is ideal for soups, roasting and pies. Fruits typically around the 6-8Kg size but can get much bigger.

50sd	100sd	250sd	500sd
£4.50	**£8.55**	**£19.45**	**£36.75**

Winter Squash

VSQ080 **F1 Hunter**
One of the first varieties of butternut squash developed for the UK climate. Matures after 105 days, producing 6-7 fruits, each weighing about 1Kg. Light tan colour with bright orange flesh and sweet taste.

50sd	100sd	250sd	500sd
£4.85	**£9.15**	**£20.85**	**£39.40**

VSQ150 **Waltham Butternut**
A variety that produces medium sized fruit, with that distinctive nutty butternut flavour.

10g	25g	50g
£1.95	**£4.45**	**£8.20**

100g	250g	500g

100g	250g	500g
£24.60	**£56.90**	**£105.30**

VSQ030 **F1 Autumn Crown**
An interesting variety that produces butternut-coloured scalloped fruits, typically weighing 2Kg each. Flesh is deep orange with a small seed cavity, and unique sweet melon aroma. Reduced vine habit. Typically 5 fruits per plant.

50sd	100sd	250sd	500sd
£4.65	**£8.85**	**£20.15**	**£38.10**

VSQ650 **Uchiki Kuri**
Each plant forms three to five small pumpkin-like fruits of intense orange red with a golden flesh, averaging 1.5Kg. Very early to mature with superb storage characteristics.

10g	25g	50g
£2.50	**£5.70**	**£10.55**

100g	250g	500g
£19.55	**£45.20**	**£83.70**

VOG650 **Uchiki Kuri**

25sd	50sd	100sd
£4.50	**£8.35**	**£15.85**

250sd	500sd	1,000sd
£36.10	**£68.25**	**£130.00**

VSQ680 **F1 Ambermax**
A hybrid variety that produces striking coloured red fruits, with sweet, bright orange, high quality flesh. Fruits typically 1.5-2.0Kg in size. Compact vine habit.

50sd	100sd	250sd	500sd
£5.80	**£10.95**	**£25.00**	**£47.25**

VSQ760 **F1 Red October**
A hybrid Hubbard variety that produces striking dark red fruits. Excellent uniformity and yield. Fruits typically 3-5Kg in size. Good for storage.

25sd	50sd	100sd	250sd
£3.80	**£7.10**	**£13.40**	**£30.55**

VSQ050 **F1 Harlequin**
A hybrid 'Acorn' squash with exceptionally sweet flesh. The green and cream striped fruits typically weigh around 750 grams. Reduced vine habit. Prolific cropper that is early maturing with good storage potential.

50sd	100sd	250sd	500sd
£5.15	**£9.75**	**£22.20**	**£42.00**

VSQ800 **F1 Celebration**
A light yellow 'Acorn' squash with orange sutures and flecking. Orange coloured flesh. Fruit typically 600-700 grams in weight. Very good eating quality and flavour when mature. Intermediate resistance to powdery mildew.

50sd	100sd	250sd	500sd
£5.15	**£9.75**	**£22.20**	**£42.00**

VSQ810 **Table Gold**
A bright golden orange 'Acorn' squash with yellow flesh. Fruit typically 600-700 grams in weight. Very good eating quality with sweet, nutty flavour at maturity. The compact, bush habit makes it ideal for containers and small gardens.

50sd	100sd	250sd	500sd
£5.00	**£9.45**	**£21.55**	**£40.70**

VSQ730 **F1 Honey Bear**
The mini Acorn shaped fruits are typically around 10cm in diameter. Attractive flesh with sweet flavour. Compact plant. Powdery mildew resistant. Fruits weigh up to 500g.

25sd	50sd	100sd	250sd
£4.00	**£7.40**	**£14.00**	**£31.95**

VSQ250 **F1 Crown Prince**
Grey-skinned variety with bright orange flesh, that contrasts extremely well. Excellent culinary variety weighing on average 3-4Kg. Sweet, rich, nutty flavour, and the fruits are round and flat in shape.

25sd	50sd	100sd	250sd	500sd
£4.65	**£8.60**	**£16.30**	**£37.20**	**£70.30**

VSQ990 **F1 Rosie**
A stunning pink Kabocha type squash with a great texture to the flesh. The skin has a pale pink colour at harvest. Suitable for long term storage, with the best eating qualities at around 2-5 months after harvest. Squashes typically weigh between 1.3 and 1.8Kg.

25sd	50sd	100sd	250sd
£5.80	**£10.75**	**£20.40**	**£46.50**

VSQ280 **F1 Fairy**
An early, vigorous variety with small leaves on a long vine. Fruit is oval shaped with orange-yellow smooth skin and golden yellow thick flesh. Fruit typically weighs about 1Kg. Excellent storage performance. Good resistance to viruses and powdery mildew.

50sd	100sd	250sd	500sd
£4.85	**£9.15**	**£20.85**	**£39.40**

VSQ980 **F1 Kabocha**
This type of squash is becoming increasingly popular. We offer a small fruited variety. The fruits are flattened globe in shape, dark green in colour and reach approximately 1Kg in weight. Good flavour and good storage performance.

25sd	50sd	100sd	250sd
£4.85	**£9.00**	**£17.05**	**£38.85**

VSQ180 **Turks Turban**
Ornamental, edible, large fruit with striped orange skin, a striking novelty crop which stores well.

25sd	50sd	100sd	250sd
£2.95	**£5.45**	**£10.35**	**£23.60**

VSQ740 **F1 Stripetti**
A hybrid spaghetti squash variety, delivering traditional style interior 'noodles' but with a sweeter flavour and much improved texture. The distinctive striped fruits turn from a cream to orange tinge when ripe. A uniform cropper with excellent storage performance.

50sd	100sd	250sd	500sd
£4.05	**£7.60**	**£17.35**	**£32.85**

VSQ750 **Spaghetti**
Also known as spaghetti marrow or vegetable spaghetti. Produces fruit up to 1.2Kg in weight. Cook fruits whole by baking, boiling or steaming. When cooked the flesh forms ribbons, which are similar in appearance to spaghetti, with a slightly sweet flavour.

10g	25g	50g	100g	250g	500g
£2.10	**£4.80**	**£8.85**	**£16.40**	**£37.95**	**£70.20**

VSQ820 **F1 Sweet Lightning**
A reduced vine hybrid variety that produces flat dumpling shaped fruits. Yellow coloured skin with orange stripes. Tender flesh with exceptional eating qualities. Fruits typically 0.5Kg in size.

25sd	50sd	100sd	250sd
£4.60	**£8.50**	**£16.15**	**£36.80**

Summer Squash

Patty Pan
A range of excellent hybrid pie-shaped patty pan varieties, with scallop edged fruits. All mature after 45-50 days. Good flavour and texture; with a small scar. Suited for both baby and standard sized fruit production.

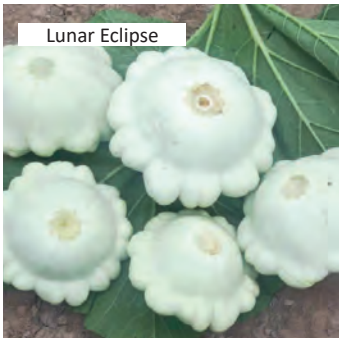

VSQ900 **F1 Lunar Eclipse**
Light green skin and pale green-white flesh.

50sd	100sd	250sd	500sd
£5.45	**£10.35**	**£23.60**	**£44.65**

VSQ940 **F1 Sunbeam**
Golden yellow skin, with minimal green colour to scar.

£4.85	**£9.15**	**£20.85**	**£39.40**

Squash (contd.)

Summer Squash contd.

VSQ880 **F1 Zephyr**
These distinctive slender fruits are predominantly yellow in colour with faint white stripes and light -green blossom ends. Best harvested when fruits are 10-15cm in length. Features a delicious nutty flavour and firm texture. Edible flowers.

50sd	100sd	250sd	500sd
£5.15	**£9.75**	**£22.20**	**£42.00**

Strawberry
(Culinary)

Our culinary strawberry varieties have been bred for fruit production, delivering high yields of fruits with enhanced fruit characteristics, such as size, shape and flavour. For varieties bred to deliver predominantly aesthetic qualities, such as colourful flowers, please see our ornamental strawberry range in the ornamental section of the catalogue. In addition to outright fruit production, seed raised strawberries are also popular for young plant sales and can work particularly well in conjunction with branded pots and other POS material.

Sow from late January through to mid-April. Germinate at 18-22°C, cover lightly with vermiculite; the seed can take several weeks to germinate and should be kept moist during this period. Prick out when large enough into packs/pots/modules as required, grow on at 14-18°C. Plants can be hardened off at around 10°C prior to planting out, when the plants should have developed at least 4-5 leaves. Production times are typically 6 weeks from sowing to finished plug and 8 weeks from plug to saleable fruiting plant in 15cm pot. 1,800 seeds per gram.
Sell in: 6-packs, 9cm pot young plants, larger pots starting to fruit
End Use: fruit production, PYO

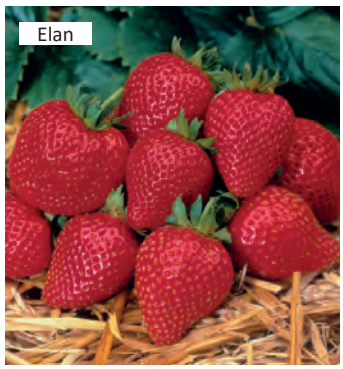

VST010 **F1 Delizz**
An everbearing variety that will produce an abundance of tasty fruits throughout the season. Conical shaped fruits with bright red colour. White flowers. Fruit: 9-12°Brix. Compact upright habit makes it ideal for containers. AAS award winner.

25sd	50sd	100sd	250sd
£8.80	**£16.40**	**£31.05**	**£70.80**

VST020 **F1 Delizzimo**
A commercial everbearing variety that will work with assimilation lighting to allow winter glasshouse production. Yields in excess of 1kg per plant are possible under the right growing conditions. The fruits have a flat conical shape, deep red colour and typically weigh between 16-30 grams each. Fruit: 9-12°Brix. Open vigorous habit.

25sd	50sd	100sd	250sd
£10.50	**£19.50**	**£37.00**	**£84.35**

VST030 **F1 Elan**
A productive variety delivering yields of up to 1kg per plant. Everbearing type. Bi-conical, shiny red fruits that have a high Vitamin C content. Exceptional flavour. White flowers. Fruit: 10-13°Brix. Vigorous habit.

25sd	50sd	100sd	250sd
£8.80	**£16.40**	**£31.05**	**£70.80**

VST040 **F1 Milan**
A strong growing everbearing variety that is early to crop. Produces larger than average fruits with a firm texture and a slightly less sweet flavour. Fruit: 9-10°Brix. Vigorous and robust habit.

25sd	50sd	100sd	250sd
£8.80	**£16.40**	**£31.05**	**£70.80**

VST050 **F1 Lizzy**
A fast flowering everbearing variety that will produce fruit up to two weeks earlier than other varieties, making it ideal for semi-finished pot sales. Conical shaped fruits with bright red colour. White flowers. Good flavour. A Fleuroselect approved novelty.

25sd	50sd	100sd	250sd
£8.80	**£16.40**	**£31.05**	**£70.80**

VST060 **F1 Queeny**
A fast flowering everbearing variety that will produce fruit up to two weeks earlier than other varieties, making it ideal for semi-finished pot sales. Conical shaped fruits with bright red colour. Bright pink flowers. Good flavour. A Fleuroselect approved novelty.

25sd	50sd	100sd	250sd
£8.80	**£16.40**	**£31.05**	**£70.80**

Swede

A crop going through a mini revival, increasing in acreage by some 30% in recent years. Good storage qualities and improved breeding has made swede more grower friendly for sale fresh and as a processed product. A good source of winter revenue. 280-480 seeds per gram. Germinates between 12°C and 30°C. Sow May-mid June; seed rate 0.75-3.5kg per hectare. Spacing 12-20cm x 45-90cm. Harvest autumn onwards.

graded seed
VSW034 **F1 Tweed**
An excellent purple skinned hybrid variety. Produces uniform, globe shaped roots with a vigorous early growth habit.

500sd	1,000sd	2,500sd
£3.10	**£4.95**	**£11.70**

10,000sd	25,000sd
£39.10	**£91.25**

VSW002 **Magres**
A popular high yielding variety specifically bred for the culinary market. Dark purple skin with few blemishes. Yellow flesh with fine texture. Fully winter hardy with mildew resistant foliage.

25g	50g	100g
£3.70	**£6.80**	**£12.60**

Sweetcorn

This is a versatile, popular crop for fresh market sales, P.Y.O., prepack and processing. Works very well as a roadside sales item. Sweetcorn is also suitable for use as young plant sales for the home gardener. Germinates at between 18°C and 30°C. Sow April to June, spacing 20-30cm x 75-95cm, drilling rate 45,000 - 65,000 per hectare (18,000 -26,000 per acre). Harvest August to October.

Main classifications for sweetcorn:
1) Normal sugar type (su)
2) Sugar enhanced (se)
3) Super sweet (sh2)

Note: sh2 varieties should be grown separately from other types to avoid cross pollination, which can cause a reduction in quality and flavour.

None of our sweetcorn varieties are genetically modified.

Super sweet (sh2)
higher levels of complex sugars with a slower conversion to starch results in a sweeter flavour and a longer shelf-life.

VSW072 **F1 Earlibird**
One of the earliest super sweet varieties currently available. Produces a good yield of high quality cobs. Cobs approximately 20cm in length, with 16 rows of small grains.

250sd	500sd	1,000sd
£6.75	**£10.55**	**£16.85**

2,500sd	10,000sd
£40.00	**£133.75**

VSW068 **F1 Rising Sun**
A quick to mature variety with strong vigour in colder growing conditions. Well filled cobs with dark yellow colour. Large grains with sweet flavour. Good disease resistance.

250sd	500sd	1,000sd
£6.75	**£10.55**	**£16.85**

2,500sd	10,000sd
£40.00	**£133.75**

VSW086 **F1 Goldcrest**
A mid-season variety with a clean and tidy habit. Excellent husk and tip protection. Cobs typically 19-21cm in length, with 14 rows of grains. Resistant to lodging.

250sd	500sd	1,000sd
£6.75	**£10.55**	**£16.85**

2,500sd	10,000sd
£40.00	**£133.75**

VSW080 **F1 Pot of Gold**
A compact sh2 bi-coloured variety. Plants around 1.5m tall making it ideal for small gardens, plots and exposed sites. Main season maturity. Small, sweet, well filled cobs.

250sd	500sd	1,000sd
£8.10	**£12.70**	**£20.20**

2,500sd	10,000sd
£48.00	**£160.50**

VSW083 **F1 Amaize**
A creamy white sh2 coloured variety with main season maturity. Produces good sized cobs with sweet flavour and crunchy texture. Long shelf life.

250sd	500sd	1,000sd
£8.65	**£13.50**	**£21.55**

2,500sd	10,000sd
£51.20	**£171.20**

VSW104 **F1 Golden Phoenix**
An mid-to late season variety, which produces smaller sized cobs, typically 19cm in length. Small sized grains and small sized core. 14-16 rows of grains per cob, with an average of 1.2 cobs per plant. Very few tillers.

250sd	500sd	1,000sd
£6.75	**£10.55**	**£16.85**

2,500sd	10,000sd
£40.00	**£133.75**

Normal Sugar (su)
standard types cope with difficult conditions and have a longer shelf-life.

VSW087 **F1 Prelude**
A mid-season normal sugar (su) variety that produces good sized, yellow cobs. Cobs typically 19cm long with 16-18 rows. Delivers a reliable yield even in difficult growing conditions.

250sd	500sd	1,000sd
£5.40	**£8.45**	**£13.45**

2,500sd	10,000sd
£32.00	**£107.00**

Unusual types:

VSW099 **F1 Robust**
A vigorous popcorn variety suitable for UK growing conditions. Produces bright-yellow orange kernels that pop into large, white fluffy flakes. Best grown away from other sweetcorn varieties.

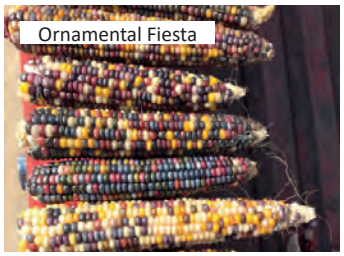

250sd	500sd	1,000sd
£5.95	**£9.30**	**£14.80**

2,500sd	10,000sd
£35.20	**£117.70**

VSW090 **F1 Minipop**
Very tender pericarp makes this an ideal variety for mini sweetcorn. Best grown at high density, and harvested when cobs approximately 10cm in length. Produces 5-6 cobs per plant. This variety normally crops after approximately 65 days, and does not require pollination to produce cobs.

250sd	500sd	1,000sd
£5.90	**£9.20**	**£14.60**

2,500sd	10,000sd
£34.75	**£116.10**

VSW056 **Ornamental Fiesta**
A traditional 'Indian' corn type, producing long cobs with coloured kernels of various shades, including purple, red, yellow and white. Makes a fantastic autumnal display.

250sd	500sd	1,000sd
£6.75	**£10.55**	**£16.85**

2,500sd	10,000sd
£40.00	**£133.75**

Tomato

We offer a wide range of varieties designed to meet most growers' requirements. While the old established favourites are still popular, the recent hybrid introductions have resulted in plants which not only perform better but taste better, an important characteristic in any tomato variety. New hybrid varieties with more unusual fruit shapes, colours and sizes are proving very popular both with fresh market sales and retail plant sales. For varietal fruit shape, size, colour and suitability please see the relevant table. Technical leaflet available.

For a key to the various tomato pathogen codes shown in varietal descriptions, please refer to the chart on page 231

Indeterminate (Cordon) Types - listed in order of fruit size, smallest first

VTO012 **F1 Sungrape**
A productive, early maturing, variety with red, baby grape shaped fruits. Thin skins but resistant to splitting. Sweet, sharp flavour. Resistant to ToMV (2), Fol (1), Va, Vd and Mj.

50sd	100sd	250sd	500sd
£7.10	**£12.65**	**£28.20**	**£50.40**

VTO014 **Sweet Aperitif**
A prolific indeterminate variety producing an excellent yield of tasty, bite sized fruits. The fruits have a shiny red colour, thin skins and a sweet flavour. Makes a good subject for plant sales. Suitable for growing under protection and outdoors during the summer months.

50sd	100sd	250sd	500sd
£5.10	**£9.15**	**£20.40**	**£36.40**

VTO235 **F1 Golden Sweet**
Grape shaped fruit with distinctive orange-yellow colour. Good flavour with fine, firm, sweet flesh. Fruit resists cracking. Tolerant of Pi, Pf (1-5).

50sd	100sd	250sd	500sd
£11.00	**£19.70**	**£43.90**	**£78.40**

VTO010 **F1 Modus**
An indeterminate mini plum type, with small, oval shaped fruits, with a high sugar content. Attractive colour. Good storage performance; suitable for loose and on the vine sales. Resistant to Fol (1), Va, Vd.

50sd	100sd	250sd	500sd
£7.85	**£14.05**	**£31.35**	**£56.00**

VTO026 **F1 Merrygold**
A blight resistant orange-fruited variety. Produces a bountiful crop of brightly coloured cherry sized fruits. Sweet and tangy flavoured. Ideally grown under protection this variety also works outdoors in milder areas. Also resistant to Fol (0,1,2) and Pi.

50sd	100sd	250sd	500sd
£5.10	**£9.15**	**£20.40**	**£36.40**

VTO276 **Gardener's Delight**
An old variety but still as popular as ever. The numerous small fruits have a fine tangy flavour. We offer the originator's selection.

250sd	500sd	1,000sd	2,500sd
£4.25	**£7.60**	**£13.50**	**£33.75**

VTO305 **F1 Sungold**
Small, delicious tasting orange coloured fruits on long trusses - ideal for salads. Resistant to ToMV, Fol (1)

50sd	100sd	250sd	500sd
£10.60	**£19.00**	**£42.30**	**£75.60**

VTO122 **F1 Crokini**
A sweet (Brix 8.5°) cherry variety with a light acidic taste. Typically 10-12 fruits per truss. Good on-vine performance with no cracking. A recent AAS winner. Resistant to ToMV (0-2), Pf (A-E), Fol (0), Ma, Mi, Mj, Pi and TYLCV.

50sd	100sd	250sd	500sd
£10.20	**£18.30**	**£40.75**	**£72.80**

VTO124 **F1 Tutti Frutti**
An elongated cherry variety that produces sweet tasting red fruits. Crisp and juicy texture to fruits, which store well post harvest. Vigorous variety that crops over a prolonged period. Resistant to ToMV (0-2), Fol (0,1). Intermediate resistance to TYLCV.

25sd	100sd	500sd	1,000sd
£5.45	**£19.50**	**£91.90**	**£175.00**

VTO126 **F1 Tutti Sun**
An ideal variety to accompany Tutti Futti. Produces attractive orange coloured elongated cherry fruits. Thin skin, dense flesh and very sweet flavour. Resistant to ToMV (0-2), Fol (0). Intermediate resistance to Ma, Mi, Mj.

25sd	100sd	500sd	1,000sd
£5.80	**£20.60**	**£97.15**	**£185.00**

VTO128 **F1 Santa Victoria**
A mini plum variety with a great flavour. Produces a high yield of bright red coloured fruit on long trusses. Ideal for plant sales but also works well with rootstocks for long season commerical cropping under glass. Resistant to ToMV (0,2), Fol (0), Pf (1-5), and intermediate resistance to TYLCV.

50sd	100sd	250sd	500sd
£10.20	**£18.30**	**£40.75**	**£72.80**

VTO025 **F1 Miele**
An indeterminate mini plum variety that produces a prolific crop of intense yellow coloured fruits. A high sugar content gives a very sweet taste, while the flesh has a good texture. Good on-truss fruit presentation. Suitable for loose and on the vine sales. Resistant to Fol (1&2), Ma, Mi and Mj.

25sd	100sd	500sd	1,000sd
£8.60	**£30.65**	**£144.40**	**£275.00**

VTO030 **F1 Bottondoro**
A vigorous, indeterminate variety that produces a prolific crop of really intense orange coloured, cherry sized fruits. High sugar and beta carotene content. Good flavour and texture; superb when eaten fresh from the plant. Ideal for loose sales. Resistant to Fol (1&2), Va, Vd and Pst.

25sd	100sd	500sd	1,000sd
£4.40	**£15.60**	**£73.50**	**£140.00**

VTO070 **F1 Goldwin**
A cherry variety that produces a prolific yield of golden yellow fruits. The flavour is a subtle blend of sweetness and acidity. Fruits typically weigh 18-20 grams. Early to ripen. Fruits ideal for both snacking and cooking. Blight resistance. Resistant to Fol (0,1), Va (0), Vd (0) and ToMV (0,1,2).

25sd	100sd	500sd	1,000sd
£3.90	**£13.95**	**£65.65**	**£125.00**

VTO284 **F1 Sweet Million**
A productive variety that produces a mass of cherry sized fruits. Ideal for cold glasshouse production but can also be used for outdoor container work, such as sunny patios. Popular for plant sales. Excellent flavour.

50sd	100sd	250sd	500sd
£6.30	**£11.25**	**£25.10**	**£44.80**

VTO032 **F1 Trilly**
A mini San Marzano type that produces a very high yield of sweet, tasty fruits, typically around 20g in weight. Suitable for both cluster and single fruit harvest. Resistant to Fol (0), Va, Vd.

50sd	100sd	250sd	500sd
£13.35	**£23.90**	**£53.30**	**£95.20**

VTO044 **F1 Cocktail Crush**
A blight resistant variety that produces classic 'cocktail' sized red fruits, typically 35-45 grams in weight. The flavour is sweet with a slightly acidic tang. Suitable for growing under heated or cold protection, outdoors and in containers.

50sd	100sd	250sd	500sd
£5.10	**£9.15**	**£20.40**	**£36.40**

VTO062 **F1 Honey Delight**
A hybrid cocktail variety that produces bright yellow fruits, typically around 40 grams in weight. A regular winner in taste tests due to its excellent sugar-acid balance. Prolific cropper. Resistant to Fol (0&1).

50sd	100sd	250sd	500sd
£5.90	**£10.55**	**£23.50**	**£42.00**

VTO180 **Ailsa Craig**
A semi-greenback variety producing bright red, medium sized fruits. Famous for its flavour. Matures early. 400 seeds per gram.

1g	2½g	5g
£2.50	**£5.45**	**£10.10**

10g	15g	25g
£19.00	**£27.40**	**£43.40**

VTO190 **Alicante**
A greenback-free version of Moneymaker. Early cropper with smooth skinned, fleshy fruits. Still a popular plant sales item. 400 seeds per gram.

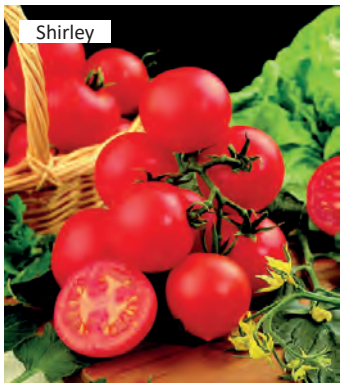

1g	2½g	5g
£2.50	**£5.45**	**£10.10**

10g	15g	25g
£19.00	**£27.40**	**£43.40**

VTO250 **Moneymaker**
Medium size, heavy cropper, very popular for the plant trade. 375 seeds per gram.

1g	2½g	5g
£2.50	**£5.45**	**£10.10**

10g	15g	25g
£19.00	**£27.40**	**£43.40**

VTO110 **F1 Shirley**
Early, short-jointed type with large trusses giving heavy yields of good-shaped fruits. Good for colder crops. A top seller for young plant sales. Resistant to TMV (1&2), Pf (1-5), Va, Vd.

50sd	100sd	250sd	500sd
£8.25	**£14.75**	**£32.90**	**£58.80**

VTO080 **F1 Pannovy**
A vigorous and well proven variety, suitable for use in soil or in substrate. Very high quality fruit with bright red colour, round shape and excellent flavour. Fruit size is 47-57mm and very uniform. Resistant to ToMV (0-2), Va, Vd, Fol (1&2) and Pf (1-5).

50sd	100sd	250sd	500sd
£23.55	**£42.15**	**£94.00**	**£168.00**

VTO078 **F1 Bauna**
Bred as an improved Shirley, this variety produces classic, round, red fruits with good flavour. Early maturity. Suitable for both cluster and single harvest. Resistant to ToMV (0-2), Va (0), Vd (0), Fol (0-2), Pf (1-5), For and intermediate resistance to TYLCV.

50sd	100sd	250sd	500sd
£9.85	**£17.60**	**£39.20**	**£70.00**

VTO120 **F1 Sparta**
A vigorous plant habit with short internodes. Fruits are slightly flat round and firm. Suitable for both protected and outdoor cropping. Good shipping and storage ability. Resistant to ToMV, Va, Vd, Fol (0&1), Pf (1-5), Ma, Mi, Mj.

50sd	100sd	250sd	500sd
£11.40	**£20.40**	**£45.45**	**£81.20**

Tomato (contd.)

Indeterminate (Cordon) Types continued- listed in order of fruit size, smallest first

VTO134 **F1 Cindel**

Early cropping variety suited to tunnel production and cool glass. Fruits are firm and bright red. Open habit with good vigour. Resistance ToMV (0-2), Va (0), Vd (0), Fol (0&1).

50sd	100sd	250sd	500sd
£8.25	**£14.75**	**£32.90**	**£58.80**

VTO416 **Cour Di Bue**

A classic open pollinated Cour Di Bue (Oxheart) heirloom variety, that features distinctive elongated heart shape fruits, with slight ribbing. Very fleshy fruits with melt-in-your-mouth pulp. Sweet flavour. Fruits typically 180-260 grams in weight.

50sd	100sd	250sd	500sd
£3.95	**£7.05**	**£15.70**	**£28.00**

VTO155 **F1 Gourmansun**

A heritage style variety that produces oxheart fruits of up to 250 grams in weight. Eye-catching orange fruits with red streaks. Juicy flesh and good flavour. Resistant to Fol (0,1,2), Va (0), Vd (0), ToMV (0,1,2); intermediate resistance to Pi, TSWV.

25sd	100sd	500sd	1,000sd
£8.60	**£30.65**	**£144.40**	**£275.00**

VTO408 **F1 Big Mama**

The ideal variety to grow for paste production. The large (typically 8cm long by 4cm wide) plum-shaped fruits benefit from having very meaty flesh. If par-boiled the skins can be peeled off really easily. Ideal for making delicious, thick creamy sauce. Resistant to Fol (0&1) and Va (0).

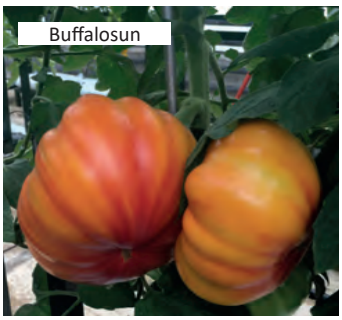

50sd	100sd	250sd	500sd
£5.50	**£9.85**	**£21.95**	**£39.20**

VTO450 **F1 Buffalosteak**

A quality hybrid producing large, fleshy, ribbed, Beefsteak fruits. Fruits typically 250-350 grams in size but can reach up to 500 grams. The red fruits have good flavour with juicy but firm flesh. Seedless. Ideal for slicing, sandwiches and burgers. Resistant to ToMV (0-2), Fol (0), Ma, Mi, Mj, Va, Vd.

50sd	100sd	250sd	500sd
£11.40	**£20.40**	**£45.45**	**£81.20**

VTO452 **F1 Buffalosun**

All the character and flavour of an heirloom variety but with the performance of a modern hybrid. Late blight tolerant. Produces large, fleshy, ribbed, Beefsteak fruits with a unique yellow/red flamed colour. Sweet, tender flesh with an attractive marbled interior. Fruits typically 250-350 grams in size but can reach up to 750 grams. Resistant to Fol (0-2), Va, Vd, Pi, TSWV (T0).

50sd	100sd	250sd	500sd
£11.40	**£20.40**	**£45.45**	**£81.20**

VTO456 **F1 Buffalopink**

Produces flat, ribbed fruits with a vibrant rose pink colour. Fleshy, tender and sweet. The large fruits typically weigh between 250-350 grams but can grow much bigger. Resistant to ToMV (0-2), Va (0), Vd (0), Fol (0) Pf (A-E). Intermediate resistance to Ma, Mi, Mj.

25sd	100sd	500sd	1,000sd
£6.85	**£24.50**	**£115.50**	**£220.00**

VTO447 **Ananas**

Also known as the Pineapple Tomato, this heirloom beefsteak variety produces large, slightly flattened fruits. Distinctive golden yellow and orange skin that is streaked or blushed with red. Thick, meaty, juicy flesh with few seeds. Sweet flavour. Fruits typically 400-500 grams but can grow much bigger.

50sd	100sd	250sd	500sd
£5.10	**£9.15**	**£20.40**	**£36.40**

Rootstock Types

VTO610 **F1 Arnold (Rootstock)**

Using a roostock can improve a variety's vigour and disease resistance. Excellent commercial roostock variety. Fruit: N/A. Resistant to ToMV, Fol (1&2), Va, Vd, Ff(Cf) (1-5), For, Ma, Mi,Mj, Pl, Si.

50sd	100sd	250sd	500sd
£21.20	**£37.95**	**£84.60**	**£151.20**

VTO615 **F1 Protector (Rootstock)**

A generative type rootstock, giving increased fruit production coupled with additional disease resistance. Strong root system. Resistant to ToMV, Fol (1,2,3), Va, Vd, For, Ma, Mi, Mj, Pl.

50sd	100sd	250sd	500sd
£15.70	**£28.10**	**£62.70**	**£112.00**

Tomato: Pathogen Codes

Code	Pathogen
Bacteria:	
Pst	*Pseudomonas syringae pv. tomato*

Tomato (contd.)

Semi-determinate and Determinate (Bush) Types
- listed in order of fruit size, smallest first

Tiny Temptations
A series of highly productive semi-trailing varieties for basket and container work. Produces up to 300 fruits per plant. The small cherry sized fruits are very sweet with 10-12°Brix. Available in three colours, with the orange winning a Fleuroselect Gold Medal for its productivity and flavour.

VTO462 **Red**

VTO464 **Yellow**

VTO466 **Orange**

25sd	100sd	500sd	1,000sd
£6.25	**£22.30**	**£105.00**	**£200.00**

VTO482 **F1 Baby Boomer**
A bush variety ideal for use in containers and smaller borders; will also work under protection. Produces a prolific crop of tasty, red, cherry tomaotes; typically 300 per plant. Resistant to Va, Fol (0&1).

50sd	100sd	250sd	500sd
£5.50	**£9.85**	**£21.95**	**£39.20**

VTO484 **F1 Veranda**
A compact dwarf variety that is ideal for container growing; works well in pots from 11cm to 16cm in diameter. The fruits are cherry sized with an attractive red colour. Sweet flavour. Support only needed when grown on to around 45cm in height. Resistant to Fol (0,1),Va and Pi.

50sd	100sd	250sd	500sd
£5.50	**£9.85**	**£21.95**	**£39.20**

VTO492 **F1 Cherry Falls**
As the name suggests, this variety produces an abundance of cherry red coloured fruits, which can be picked over a four or five week period. Good flavour to the fruit. A bush type that works well in hanging baskets and other semi-trailing applications. Resistant to Fol (0).

50sd	100sd	250sd	500sd
£5.10	**£9.15**	**£20.40**	**£36.40**

Tumbling Tom
Cascading, highly productive variety for basket and container work. Sweetly flavoured cherry fruits which look very attractive on the plant.

VTO330 **Red**

VTO335 **Yellow**

100sd	250sd	500sd	1,000sd
£8.45	**£18.80**	**£33.60**	**£60.00**

VTO494 **Rocola Stripe** N
A compact trailing cherry tomato variety that produces deep red fruit patterned with distinct yellow stripes. Juicy and sweet (typical Brix 7°). Ideal for hanging baskets, pots and balcony containers.

50sd	100sd	250sd	500sd
£3.15	**£5.65**	**£12.55**	**£22.40**

VTO496 **Rocola Chocolate** N
A compact trailing cherry tomato variety that produces fruit that ripen from green to a rich chocolate brown colour . Juicy and sweet (typical Brix 7°). Ideal for hanging baskets, window boxes and containers.

50sd	100sd	250sd	500sd
£3.15	**£5.65**	**£12.55**	**£22.40**

Please note that this chart is for guidance only; local conditions and factors outside of our control mean that actual results, eg harvest timing, may differ from those shown.

VTO520 **F1 Terenzo**
A hybrid 'Tumbler' type producing a prolific yield of cherry sized, red, round fruits. Fruits typically weigh 18-20 grams, with a Brix reading of 6°Bx.

50sd	100sd	250sd	500sd
£7.10	**£12.65**	**£28.20**	**£50.40**

VTO525 **F1 Red Profusion**
A very early to mature bush variety that forms a good tidy structure with an excellent branching habit. One plant is capable of filling a 30cm basket. Produces a decent crop of sweet cherry fruits, typically 18-22 grams in weight. Ideal for growing in containers. Works well outside due to good weather tolerance.

50sd	100sd	250sd	500sd
£5.10	**£9.15**	**£20.40**	**£36.40**

VTO530 **F1 Orangeto**
A late blight resistant orange-fruited variety. Produces a sumptuous yield of intensely sweet flavoured fruits, with a typcal Brix of 11.5°. It is not unknown for a single plant to produce 4Kg of fruit. The bushy habit makes it ideal for containers. Also known as Sungold Super Sweet.

50sd	100sd	250sd	500sd
£9.05	**£16.20**	**£36.05**	**£64.40**

VTO378 **F1 Summerlast**
A determinate variety that produces red, oblate shaped, cocktail sized fruits. Can grow in containers without extensive support. Bred to maintain dark, healthy foliage late into the summer. Height typically 45cm. Fruits 7°Brix. Tolerant to late blight. Resistant to ToMV.

50sd	100sd	250sd	500sd
£6.50	**£11.50**	**£25.85**	**£46.20**

VTO382 **F1 Divinity**
The counterpart to Summerlast, this variety offers comparable performance but with slightly larger fruit. Can be grown without support. Suitable for use in both containers and the soil. Height typically 45cm. Fruits 6°Brix. Tolerant to late blight.

50sd	100sd	250sd	500sd
£6.50	**£11.50**	**£25.85**	**£46.20**

VTO310 **F1 Totem**
A dwarf determinate variety which does not require the removal of side-shoots. An excellent item for young plant sales, as it may be used in pots, tubs, window boxes, gro-bags and in the garden.

50sd	100sd	250sd	500sd
£5.90	**£10.55**	**£23.50**	**£42.00**

Turnip

Very fast-maturing item for all season production, under glass and in open ground. Marketed during summer as a mini-veg, or later on as full grown product. Good shelf life. 360-600 seeds per gram. Germinates between 10 and 30°C. Sow early crop from March-May, late crop July-August. Seed rate 2.5-4.5kg per hectare. Spacing 5-15cm x 30-90cm. Harvest June to November.

VTU40 **Purple Top Milan**
Purple-topped variety with white base below soil level. Very popular for fresh market sales; good quality flattish roots.

50g	100g	250g	500g	1kg
£3.40	**£6.30**	**£14.60**	**£27.00**	**£50.00**

50pcs	100pcs	250pcs	500pcs
£5.10	**£9.15**	**£20.40**	**£36.40**

Angle Head Labels

A high quality UK manufactured angle head label. Ideal for labelling larger plants, sown seed rows, trays and so on. The 16cm has a writing area of 5x4cm and the 19cm has a writing area of 7.5x5cm

ZSN150 **16cm**

25pcs	50pcs	100pcs	250pcs
£7.20	**£12.95**	**£23.20**	**£51.70**

ZSN160 **19cm**

25pcs	50pcs	100pcs	250pcs
£10.30	**£18.55**	**£33.15**	**£73.95**

ZSN250 **Marker Pen**

Moles permanent marker. Fine-tipped quality marker pen for writing on plant labels and all those other jobs.

1pcs	5pcs	10pcs	25pcs
£2.15	**£9.15**	**£17.20**	**£39.25**

Cane Caps

Cane caps provide eye protection when handling staked plants.

ZSN200 **Green Cap**

Green cap, fits all canes.

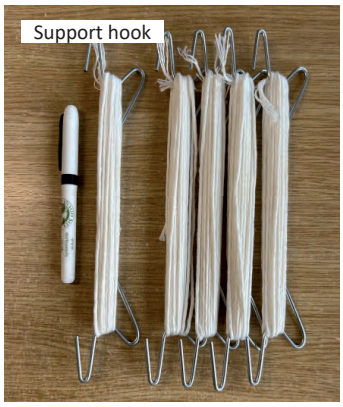

50pcs	100pcs	250pcs	500pcs
£6.70	**£11.95**	**£26.65**	**£47.60**

ZSN210 **Pyramid Cap**

Joins 3 canes, ideal for climbing plant support. Great for Runner Beans and Sweet Peas.

50pcs	100pcs	250pcs	500pcs
£6.70	**£11.95**	**£26.65**	**£47.60**

ZSN330 **Support Hook**

Pre-wound wire support hooks that are mainly used for tomato cultivation but can also be used for other crops. The wire hooks are 22cm in length. The supplied twine is 10 metres in length and is bio-degradeable, allowing it to be composted on the stems once the cropping is complete. The twine is soft but strong and does not cut into the plant stems as much as some plastic derived alternatives.

5pcs	10pcs	25pcs	50pcs
£4.65	**£8.75**	**£19.90**	**£38.05**

ZSN300 **Grafting Clip (plastic)**

A sprung plastic clip designed to securely hold both the scion and rootstock together during grafting. Removes the need for sticky tape, which can be awkward to remove.

25pcs	50pcs	100pcs	250pcs
£5.45	**£9.85**	**£17.60**	**£39.20**

ZSN310 **Grafting Clip (silicone)**

A disposable silicone grafting clip suitable for most solanacae and curcurbitacae species. These flexible and transparent clips aid sucessful grafting. 2mm diameter hole for graft.

50pcs	100pcs	250pcs	500pcs
£4.75	**£8.45**	**£18.80**	**£33.60**

ZSN340 **Support Clip**

A professional quality clip designed to hold plant stems, such as tomatoes and cucumbers, to crop support strings. 25mm.

50pcs	100pcs	250pcs	500pcs
£2.75	**£4.95**	**£11.00**	**£19.60**

ZSN350 **Truss Clip**

A handy truss clip designed to add support to heavily laden tomato trusses. Prevents truss damage through kinking. 6mm slot. Professional quality.

50pcs	100pcs	250pcs	500pcs
£2.35	**£4.25**	**£9.40**	**£16.80**

Useful Conversions

1 Hectare = 2.47 acres (i.e. 1 Hectare is approximately $2^{1}/_{2}$ acres)
1 Acre = 0.405 Hectares (i.e. 1 acre is approx $^{2}/_{5}$ of a Hectare)
1 Acre = 43,560 square feet, or 4840 square yards, or approx. 4000 square metres.
1 inch = 2.54 centimetres (i.e. 1 inch is approximately $2^{1}/_{2}$ centimetres)
1 foot = 0.305 metres (i.e. 1 foot is approx $^{3}/_{10}$ of a metre)
1 yard = 0.9144 metres.

GMO Disclaimer

Although many of our products reflect and are derived by the latest breeding techniques, none of our products are, or are developed from parent material which is genetically modified. The methods used in the development and maintenance of these varieties are designed to minimise the presence of off-types, including genetically modified organisms. Due to the free movement of pollen it is not possible for open pollinated crops to be guaranteed free from the presence of adventitious GM material. However, Moles Seeds works closely with breeders, suppliers and the relevant Government bodies to ensure that any such risks are minimised.

Please note that the information given is for guidance purposes only. The above information is for standard production under 'normal' growing conditions; actual results may vary depending upon timing, weather conditions, geographical location, etc. Many varieties can now be grown outside of these 'traditional' seasons, please see individual crop/product listings for details

Seed Technology

The following seed product forms are available throughout the catalogue. For any additional requirements please contact head office or your sales representative.

Coated Seed

These seeds have had a polymer coating to reduce friction and clumping when sowing. In addition their improved visibility aids sowing. Sometimes chemical additives are added to reduce pest and disease incidence. Some organic products are supplied with a non-chemical Soil Association approved coating.

Graded/Precision Seed

Seed is graded to a uniform size to enable easier sowing. Graded seed (sized to 0.50mm range) or Precision seed (sized to 0.25mm range).

Multi-Seeded Pellets

These pellets have more than one seed per pellet. The result is a strong clump of seedlings on varieties that need multi sowing.

Natural Seed

In general normal seed has not been subjected to additional processes after cleaning.

Organic Seed

Our seed is produced on farms which have been officially authorised as meeting all the required organic standards. The seed is harvested using traditional methods and there are no chemicals used in the seed cleaning process. All our organic seed is certified by the Soil Association.

Pelleted Seed

Very small seed encased in a usually inert polymer to make it easier to sow. Unlike coated seed it no longer resembles the shape of the seed.

Primed Seed

Seed in which the germination process has been started in a controlled environment. The advantages of primed seed are:

- The ability to germinate in conditions that are not optimum.
- Faster and more uniform emergence.
- Higher Emergence rates.

Split Pills

A pellet that is unique for its splitting character. The pellet does not melt but splits open and creates optimum conditions for quick development of the seedling.

Treated Seed

Chemical additives applied to the seed coat to reduce pest or disease incidence. Many of our products are available in both treated and untreated forms. If you have a particular request for treated or untreated seed please state this at the time of ordering.

Coated Seed

Coated Seed

Natural Seed

Pelleted Seed

Seed Testing

We have have our own in-house germination testing facilities including a laboratory area and multiple germination testing cabinets, allowing us to test seeds under different growing conditions. As part of our quality control system, we routinely carry out in-house testing of our seed. Testing is done following ISTA guidelines and includes germination and emergence tests to check the viability, vigour and purity of the seed.

Please see individual catalogue entries for further details of product specific technolgy. We can sometimes supply perennials with enhanced germination performance - please ask for details. The range of chemical seed treatments available is constantly changing so please contact us if you have a specific need.

Flower range seed technology available:

Name	Seed Type	Name	Seed Type
Ageratum	Pelleted	Laurentia	Pelleted
Antirrhinum	Multi-Seeded Pellets	Lobelia (Bedding Types)	Pelleted
Astilbe	Pelleted	Lobelia (Perennial)	Pelleted

Swede	Graded Seed

Important: please read before ordering

Ordering online

Please visit our secure website at: **www.molesseeds.co.uk**

Ordering by e-mail

sales@molesseeds.co.uk

Ordering by post

When ordering by post it helps us if you use our order form but this is not essential. When ordering please ensure you state the product code, product name and quantity required. We can provide pre-printed order forms upon request; a pdf copy of the order form can be downloaded from our website.

Ordering by phone

Telephone: +44 (0)1206 213213.

Our telephone is staffed from 8.00am to 5.00pm, Monday to Friday. Our answerphone operates outside these hours. All orders and messages left on our answerphone are dealt with as soon as our office opens. Please note phone calls to Moles Seeds may be recorded for training purposes.

When placing an order that you intend to pay for on collection, please be sure to state this at the time of ordering.

If you place an order and subsequently send a written confirmation it must be clearly marked Confirmation of phone order. We reserve the right to make a handling charge for any orders that are duplicated through failure to do this.

Trade counter

This is open for the placing and collection of orders from 8.00am until 5.00pm Monday to Friday. Lunch break is 12.30pm until 1.30pm. If you wish to collect more than five items it would assist us if you phone, post or fax your order in advance, to save any unnecessary delay.

If making a long journey please telephone first to ensure your requirements are in stock.

Seed treatments

Where treated seed is supplied the treatment will be printed on the packet label. If you have a specific request for treated or untreated seed please state at time of ordering. Seed returned when no preference was stated at time of ordering may incur a re-stocking fee. Please note alternatives are not always available.

Prices

All seed prices are as listed. The minimum quantity supplied of any item is the lowest amount listed in the catalogue. We are always pleased to quote prices for quantities larger than those listed. All prices listed are exclusive of VAT. At the time of printing there is no VAT on vegetable seeds, herb seeds, grass seed, asparagus crowns, rhubarb crowns, onion sets, seed potatoes and culinary strawberry seed. All flower seed, including wild flower and ornamental strawberry seed, is subject to VAT at the current rate. Delivery is subject VAT at the current rate. VAT is calculated at the time of despatch/invoice.

Discount for online orders

We offer 3% discount for credit/debit card payment with online orders, providing that there are no other accounts outstanding. All orders received on this basis will automatically be sent an itemised VAT receipt.

The minimum order value

There is no minimum order value.

Non-catalogue items

We may be able to obtain items not listed in our catalogue subject to a minimum order quantity and value. Please also allow for a longer lead time to obtain these items. Additional fees may be incurred where specific import documentation is required for non-catalogue items.

Delivery charges

Please refer to pages 238-239.

Forward orders

We are happy to forward book seed orders for future delivery. Forward orders are booked as per calendar week numbers and are normally despatched the preceding Friday to ensure prompt arrival in the desired week.

Orders to Northern Ireland

It is possible for us to send seed to Northern Ireland but the documents required vary greatly depending upon the products and quantities involved. The arrangements are subject to change at the time of going to print so please contact us with your requirements and we will endeavour to advise you of the costs and complications involved.

Export orders to the EU and the Rest of the World

The movement of seed around the world is tightly controlled and the entry documents required vary greatly from country to country. Any shipping prices quoted for export orders are just for guidance and exclude any document charges. Please contact us with your requirements and we will endeavour to advise you on the costs and complications involved.

Seed returns

We can only accept seed returns as a result of incorrect ordering, and at our discretion. They must not be returned to us without prior notification and must be in our sealed packets as supplied, and the packets in a suitable box or padded envelope. Returns may be subject to a handling charge. We must be notified within 7 days of receipt. Under no circumstances can we accept returns of non-catalogue items. We reserve the right to charge for, or withhold a refund for, additional services (e.g. bespoke backing, additional testing, obtaining export documents, etc.) relating to orders that are delivered and returned or cancelled prior to despatch, where the costs have been incurred prior to confirmation of cancellation when said charges are accepted by the customer at the time of ordering.

New customers

Payment with order is normally required for all customers without an approved credit account. If you would like to open a credit account please ask for a credit application form.

Credit accounts

All invoices are due within 30 days from date of issue. All accounts outstanding 60 days and over will be subject to 2% interest per month and credit facilities may be withdrawn. Credit facilities are available providing our credit account application form has been processed successfully.

When making a payment by BACS or cheque, please ensure we can easily identify the payer, for example include the invoice number to which the payment refers. Please make all cheques payable to Moles Seeds (UK) Ltd. Please note we do not accept credit cards for payment of account invoices.

BACS payments

When customers are paying by BACS please use their Moles Seeds Customer Account Number as the payment reference, and send a remittance confirmation. If e-mailing a remittance confirmation please send to **remittance@molesseeds.co.uk**

Euro cheques/non-Sterling (£) payments

Ideally all payments are to be made in pounds sterling. Any charges we incur when converting non sterling payments will be deducted from your payment.

Terms of business

This list is current from November 2026 and cancels all previous lists. All prices are subject to alteration without notice and all seeds are offered subject to crop and being available upon receipt of order.

Our VAT number is GB285 3757 20 Our Company number is 6301851 Our EORI number is GB285375720000

Delivery Charges

How delivery is charged

Delivery is charged on all orders on and calculated on a per product category basis, i.e. seeds and sundries, vegetable plants, onion sets, and seed potatoes. The categorisation is because we have to ship different products at different times of the year, leading to multiple shipments.

Please note that the quoted shipping charges are based upon courier tariffs; for larger orders, e.g. 10 x 25Kg sacks of seed potatoes, we may be able to secure more competitive pallet network rates so please contact us if you have a specific requirement. Furthermore, we may be able to collate shipments to reduce the charges but this may not always be possible; again, if you have a specific requirement please let us know. The shipping rates and restrictions may be subject to change at any time so please check our website for the latest information regarding rates and restrictions on the movement of goods.

How to calculate the shipping charge: worked example

The shipping charge on an order being shipped to UK Mainland, consisting of £45.00 of various seeds including 2Kg of Seeds, £2.35 of Onion Sets weighing a total of 1Kg, £28.00 of Seed Potatoes weighing a total of 25Kg, vegetable plants (25 Asparagus crowns and 5 Rhubarb crowns) costing a total of £39.85, would be calculated like this:

Step1. Determine shipping zone: UK Mainland is in Zone 1

Step 2. Determine shipping charge for each product category:

Seeds and sundries	Total category weight is 2Kg, so category charge = **£8.55**
Onion Sets	Total category weight is 1Kg, so category charge = **£5.65**
Seed potatoes	Total category weight is 25Kg, so category charge = **£10.95**
Vegetable Plants	Total category weight is 3.5Kg (1 x 2.5Kg for each 25 Asparagus crowns plus 1 x1Kg for each pack of five Rhubarb crowns), so category charge = **£8.55** (*for pack weights see 'Vegetable Plants' table notes*)

Step 3. Then add the category charges together to get the total charge:

	£8.55
	£5.65
	£10.95
	£8.55
Total shipping charge:	**£33.70** (excluding VAT)

Please note: due to recent changes in the regulations concerning VAT we are now required to add VAT to all our carriage charges.

Shipping Methods:

Goods are shipped via the postal service, a courier or pallet network. We reserve the right to charge for any additional costs incurred, such as phytosanitory certificates, re-directions, or any other special delivery instructions. Please allow up to 28 days for delivery. All goods shipped via a 'signed for' or courier service must be signed for by the customer upon receipt. Requests to leave goods as 'unsigned' must be made at the time of ordering, and any such requests are made with the customer accepting liability. If you have any special delivery instructions please state these at the time of ordering. Re-direction requests made once the goods have been despatched may incur a charge. We can offer guaranteed delivery time, e.g. by 10.30am, afternoon only and Saturday morning delivery services by courier however there are additional charges; please contact us if these services are required.

Shipping Zones
Zone 1: Mainland UK
This zone includes all parts of the UK not defined in Zone 2, 3 or 4. All goods despatched to this area via our couriers should be with you within 2-3 days of the date of despatch from our premises; postal services may take longer.
Zone 2: Scottish Highlands & Islands, Scilly Isles, Isle of Wight & Isle of Man
This zone includes all parts of the UK defined by the following postal codes: IV,HS,KA27-28,KW,PA20-49,PA60-78,PH17-26,PH30- 44,PH49-50,ZE,BT,GY,JE,TR21-25, PO30-41 and IM. All goods despatched to this area via our couriers should be with you within 2-3 days of the date of despatch from our premises; postal services may take longer.
Zone 3: Channel Isles
This zone includes all parts of the UK defined by the following postal codes: GY,JE. All goods despatched to this area via our couriers should be with you within 3-4 days* of the date of despatch from our premises; postal services may take longer. *Subject to any delays at the point of duty inspection.
Zone 4: Northern Ireland
This zone includes all parts of the UK defined by the following postal code: BT. All goods despatched to this area via our couriers should be with you within 3-4 days* of the date of despatch from our premises; postal services may take longer. *Subject to any delays at the point of import inspection.
Zone 5: Canada, Falklands Islands and Iceland
These areas have agreements with the UK that allow relatively easy movement of seed and so we can provide a shipping price and allow online ordering. Due to plant health restrictions we are unable to supply some non-seed products to these areas. All goods despatched to these areas via our couriers should be with you within 6-10 days* of the date of despatch from our premises; postal services may take longer. *Subject to any delays at the point of import inspection.
Zone 6: EU, Switzerland and the Rest of the World
Due to the complicated rules regarding seed shipments it is not possible to give an instant price for shipping and certification to these areas. Please contact us via e-mail with your requirements and we will be pleased to advise what is possible and the likely costs. Due to plant health restrictions we are unable to supply some non-seed products to these areas. All goods despatched to these areas via couriers should be with you within 10-12 days* of the date of despatch from our premises although this does vary greatly depending upon the destination; postal services may take longer. *Subject to any delays at the point of import inspection.

Conditions of Sale

1. GENERAL

1.1 Every order is accepted subject to these conditions which shall apply in conjunction with the terms of business contained in our catalogue.

1.2 Nothing in our catalogue shall constitute an offer to sell.

1.3 The sending or giving to us of an order constitutes an offer which we may accept or decline to accept.

1.4 The sending or giving to us of an order shall constitute agreement to and acceptance of all terms of business including (but not limited to) these conditions, and the buyer if not prepared to accept such terms and conditions must return the goods to us forthwith (and in any case within 48 hours).

1.5 No order which seller has accepted may be cancelled by buyer except with the written agreement of seller and on the terms that buyer shall indemnify seller in full against all losses (including loss of profit) costs damages charges and expenses incurred by seller as a result of such conditions.

2. TITLE AND RISK

2.1 Until payment in full has been made to us all goods supplied by us remain our property which shall be kept on the buyer's premises separately from the buyer's own goods or those of any other person and in such manner as shall render them readily identifiable as our goods and they shall be properly stored protected and insured until such time as the property in the goods passes to the buyer.

2.2 Until payment in full has been made the buyer shall hold the goods as bailee of and in trust for us as legal and beneficial owners of the goods and the buyer shall at all times take proper care of the goods.

2.3 The risk in the goods shall pass to the buyer at the time of delivery of the goods to the buyer or the buyer's agent.

2.4 Until such time as the property in the goods shall pass to the buyer we shall be at liberty at any time to require the buyer to deliver up the goods to us and if the buyer fails to do so forthwith (and in any case within 48 hours) we shall be entitled to enter upon any premises where the goods are stored and repossess the goods and the buyer hereby grants us an irrevocable licence to do so which shall continue in force notwithstanding the termination of the contract for any reason.

3. FORCE MAJEURE

3.1 We shall not be responsible for any delay in delivery or for non-delivery of any goods or any part of them caused by any act of God action by any government or any department of central government or any local government or any strike lockout industrial action riot civil commotion breakdown of machinery or vehicle power failure inclement weather fire failure of crop loss at sea detention at sea or port or any other event or contingency beyond our control.

3.2 If any of the goods shall be rendered unfit for delivery by reason of any of the above-mentioned acts events or contingencies the contract shall so far as it relates to those goods be deemed to be discharged without liability on our part.

4. PRICE

4.1 All goods are sold at prices current at the date of contract notwithstanding anything in our catalogue.

4.2 Value added tax at the rate or rates for the time being in force in respect of the goods shall be payable by the buyer in addition to the price.

4.3 We shall be entitled to adjust the price of the goods whether before or after the making of the contract in the event of any variation in the cost to us of supplying the goods or any part thereof by reason of (a) any increase in the cost of the goods required by us for the completion of the contract; (b) any increase in any royalty payable under the Plant Varieties and Seeds Act 1964 or any statutory modification or re-enactment thereof for the time being in force (c) any other matter beyond our control including (but not limited to) fluctuations in exchange rates between monetary currencies or the action of any government or other authority anywhere in the world or any labour problems.

4.4 All prices are subject to alteration without notice.

5. COMPLAINTS

5.1 No complaint under the terms of these conditions can or will be considered unless clear proof can be and is given that seed sown and alleged to have performed unsatisfactorily was in fact the seed supplied by us and that it was sown on ground suitably prepared and was treated carefully and correctly throughout and subject only to such conditions as were likely to produce a favourable crop.

5.2 All seeds are offered and sold for production of consumer crops and not for reproduction of seed.

5.3 No responsibility whatsoever will be accepted by us for any seed crops produced.

6. TERMS OF PAYMENT

6.1 Goods are invoiced net and accounts will be regarded as overdue if unpaid after 30 days from date of invoice.

6.2 Interest will be charged at the rate of 2% per month on accounts still unpaid after 60 days from date of invoice (as well after as before any judgment).

6.3 We reserve the right to withhold deliveries under the contract until all outstanding payments under any contract have been received by us.

6.4 If any cheque is returned by the bank after presentation or re-presentation of it for payment any bank charges incurred by us together with a handling charge shall be reimbursed to us by the buyer.

6.5 Any card chargebacks that are instigated by the card holder without giving us due opportunity to resolve any matter relating to the order/chargeback may be deemed unreasonable and the chargeback left as a debt owing by the customer.

7. INSOLVENCY

7.1 If the buyer (a) has a receiver or liquidator or administrator appointed in respect of any property or business undertaking (b) announces that the buyer has ceased or is ceasing to trade (c) fails to make any payment when due or suspends payment (d) notifies any creditor that the buyer is unable to meet debts or that he is about to suspend payment of any debts (e) calls or holds a meeting of creditors (I) commits an act of bankruptcy or is adjudicated bankrupt or has an administration order made (g) being a limited company enters into liquidation (other than for the purpose of re-construction or amalgamation) (h) enters into any arrangement or composition with or for the benefit of creditors or (i) suffers any distress or execution to be levied upon the buyer's goods then notwithstanding any previous arrangement for deferred payments all sums payable by the buyer to us shall immediately become due and we shall have the right (without prejudice to any other right or remedy available to us) to cancel or suspend further deliveries under the contract.

7.2 On the exercise of any rights or remedies we shall not be liable to pay any compensation to the buyer.

8. DAMAGE, DELAY OR LOSS IN TRANSIT

8.1 We are to be notified immediately of any damage or delay or loss in transit.

8.2 On receipt of goods the buyer is to inspect them carefully and if there is any sign of damage they are to sign for the goods as "damaged in transit" and to indicate that a claim will be made.

8.3 The buyer must notify us immediately by telephone or e-mail and immediately confirm such notification by first-class post or e-mail of any goods received damaged or missing.

8.4 All liability is excluded for any loss resulting from the need to provide additional documentation at the point of import into a customers country, trade territory or any other administrative zone. Furthermore, all liability is excluded for any import duties, taxation or any other charges levied upon the customer at the point of import. We will endeavour to comply with all import/export requirements wherever possible but does not accept any liability relating to such requirements; customers are strongly advised to seek out guidance on such matters from the relevant authority before placing an order. No liability is accepted for any loss or damage resulting from the goods being destroyed by the authorities at the point of entry.

9. AVAILABILITY

9.1 Orders are only accepted subject to availability of goods.

9.2 If a particular variety is not available we may substitute what in our opinion is the most suitable alternative.

9.3 The buyer shall be deemed to have accepted the substitute unless the goods are returned in good condition to us within ten days of the receipt of them in which case we will credit their value to the buyer's account.

9.4 If no suitable substitute is available any relevant contract will be deemed to e cancelled without any liability on either party's part and in that case if payment for the goods has already been made we will credit the value of them to the buyer's account.

10. LIABILITY

10.1 We warrant that the seed supplied shall be of the species and type specified in the contract. Should a quantifiable breach of this warranty occur we will either replace the defective seeds free of charge to the buyer or refund all payments made by the buyer in respect of the breach and this shall be the limit and extent of our obligation. Any such cases will be considered on an individual basis.

10.2 Subject to the provisions of sub-clause 1 of this clause if any seeds sold shall not comply with the express terms of the contract of sale or if any seed of the correct species and type shall prove defective in varietal purity we will either replace the defective seeds free of charge to the buyer or refund all payments made by the buyer in respect of the defective seeds and this shall be the limit and extent of our obligation. Any such cases will be considered on an individual basis.

10.3 All liability is excluded for any loss or damage arising from the use of any seed supplied and for any consequential loss or damage arising from the failure in the performance of or from any disease or any defect in any seeds supplied and for any other loss or damage including (without prejudice however to the enerality of the foregoing) any failure whether total or partial of the resultant crop. Any such cases will be considered on an individual basis.

10.4 Any express or implied conditions, statements, representations or warranties statutory or otherwise not stated in these conditions are hereby excluded.

10.5 Our liability under the warranty hereinbefore contained shall automatically cease and determine if the buyer shall not have paid by the due date for all goods supplied by us (whether under this or any other contract between the uyer and us)

10.6 If specially treated or tested seed is contracted to be sold we accept no liability beyond undertaking that the treatment or test has been carried out and (at our option) to refund the price or to replace the seed if the treatment or test has not been carried out.

10.7 The price of seeds sold or offered for sale by us is based upon the foregoing limitation upon our liability.

10.8 In accepting the goods upon these conditions the buyer acknowledges that the limitation of our liability is fair and reasonable and undertakes to insure against all risks hereby excluded.

10.9 All information given in our catalogue or otherwise provided by us or by any agent employee or representative on our behalf relating to varieties varietal characteristics or periods of maturity or otherwise relating to the performance of seeds and seed count is given for general guidance (and for general guidance only) to our customers and does not constitute a warranty or representation on our part as to such matters or any of them and must not be relied upon as such but must be seen only as general guidance, for which no responsibility is accepted and which the buyer if he acts thereon must do so entirely at his own risk.

11. ARBITRATION

We shall be at liberty to require any dispute arising out of the contract or any question relating thereto to be referred to arbitration under the provisions of the Arbitration Acts 1950 and 1979 or any statutory modification or re-enactment thereof for the time being in force.

12. LAW AND INTERPRETATION

12.1 These conditions and every contract made pursuant thereto shall be governed by and construed in accordance with English law.

12.2 The headings of these conditions is for convenience only and shall not affect the construction of the conditions.

12.3 If any of the provisions of these conditions shall at any time be held to be unenforceable unlawful or invalid in any respect the validity and enforceability of the remaining provisions hereof shall not be affected or impaired by any unenforceable unlawful or invalid provision.
